II. Differences between accounting data under domestic and overseas accounting standards

1. Differences of net profit and net assets disclosed in financial reports prepared under international and Chinese accounting standards

Applicable Inapplicable

Unit: RMB Yuan

	Net profit attributable to shareholders of the Company		Net assets attributable to shareholders of the Company	
	2014	2013	Closing amount	Opening amount
According to Chinese accounting standards	958,725,402.84	999,256,730.65	6,588,772,245.55	5,988,054,133.73
Items and amounts adjusted according to international accounting standards				
Impact on domestic equipment tax credit recognized as deferred income under international accounting standards	1,225,000.00	1,509,000.00	-2,069,000.00	-3,294,000.00
According to international accounting standards	959,950,402.84	1,000,765,730.65	6,586,703,245.55	5,984,760,133.73

2. Differences of net profit and net assets disclosed in financial reports prepared under overseas and Chinese accounting standards

Applicable Inapplicable

No difference in the report period.

3. Explain reasons for the differences between accounting data under domestic and overseas accounting standards

Applicable Inapplicable

Effects of domestic equipment exempted from income tax

The Company exempted from income tax for buying domestic equipment. According to Chinese accounting

standards, the income tax expenses are directly reduced which are recognized as deferred income related to assets by the international accounting standards. According to the regulations of the international accounting standards, this difference is amortized over the fixed using periods of year of the fixed assets and adjusting net income and net assets.

III. Items and amounts of extraordinary gains and losses

Applicable Inapplicable

Unit: RMB Yuan

Item	2014	2013	2012	Note
Gains/losses on the disposal of non-current assets (including the offset part of the asset impairment provisions)	-3,316,012.55	432,380.47	-2,427,861.48	
Government grants recognized in the current period, except for those acquired in the ordinary course of business or granted at certain quotas or amounts according to the government's unified standards	99,126,878.52	51,990,074.84	26,423,520.84	
Gains and losses on change in fair value from tradable financial assets and tradable financial liabilities, as well as investment income from disposal of tradable financial assets and tradable financial liabilities and financial assets available for sales except for effective hedging related with normal businesses of the Company	-5,319,435.30	33,746,810.30	18,052,349.49	
Non-operating income and expense other than the above	21,173,199.30	1,991,154.72	6,442,815.14	
Less: Income tax effects	22,913,850.04	12,701,157.60	8,926,514.34	
Minority interests effects (after tax)	6,120,557.51	5,204,297.02	2,240,147.87	
Total	82,630,222.42	70,254,965.71	37,324,161.78	--

Explain the reasons if the Company classifies an item as an extraordinary gain/loss according to the definition in the Explanatory Announcement No. 1 on Information Disclosure for Companies Offering Their Securities to the Public—Extraordinary Gains and Losses, or classifies any extraordinary gain/loss item mentioned in the said explanatory announcement as a recurrent gain/loss item

Applicable Inapplicable

No such cases in the reporting period.

Section IV. Report of the Board of Directors

I. Overview

In 2014, the textile industry faced a complicated external situation characteristic of weak growth in market demand, great difference of cotton prices at home and abroad and rising costs of production factors. These unfavorable factors further brought up the production costs of enterprises and weakened the competitiveness in export. Meanwhile, the textile and garment processing industries in Southeast Asia rose quickly. The Company felt the double pressures from the market and costs. Under the circumstances, the Company, based on its actual situation and that of the industry, continued to deepen the excellent performance management model, vigorously promoted the Lu Thai Production System (LTPS), proactively implemented its global planning, accelerated the industrial and informatization fusion, and enhanced corporate culture improvement. As such, the Company managed to maintain a healthy and steady development trend and fully accomplished all work objectives.

For the reporting period, the Company achieved operating revenue of RMB 6.17 billion, operating profit of RMB 1.04 billion, net profit of RMB 959 million attributable to shareholders of the Company, and net profit of RMB 876 million after deducting non-recurring gains and losses, down by 4.76%, 11.11%, 4.06% and 5.69% respectively as compared with last year. During the reporting period, the main business and profit sources of the Company, as well as their composition, remained unchanged.

In the reporting period, the Company has made great improvement in scientific research innovation, management upgrading, brand construction, corporate culture establishment and so on. The Company was granted “China Industrial Award” by China Federation of Industrial Economics (CFIE); the 20th “GPEA” by APQO; “China Quality Honesty Enterprise” by China Product Quality Association (CPQA); “Top Ten Textile Culture Brands of China” by CTEI and Chinese Association for Textile Enterprises Culture Construction; and the first “Five-star Enterprise in Performing Social Accountability of China Industrial Enterprises (2014)” on “2014 Social Accountability Report Conference for Chinese Industrial Economic Enterprises” by MIIT, UNIDO, and CFIE. Besides, the “automatically digital polyester yarn dyeing technology and equipment” jointly developed by the Company, China Academy of Machinery Science & Technology and Shandong Companion Group won the first prize for national technology advance award; the “R&D and application pilot of NC warp dyeing technology and equipment” was listed into national technology support plan; the Company was evaluated as “2013 the listed company with the greatest contribution” on the first session of listed companies on Sino Finance; the Company’s labor union was ranked excellent unit in 2013 “The Cup of Safety & Health in China” by China Academy of Machinery Science & Technology; and in 2014, the Company again was accredited as a hi-tech enterprise by Department Of Science & Technology Of Shandong Province, Shandong Province Finance Bureau, State Administration Of Taxation and Local Taxation Bureau, with the validity lasting for 3 years.

Go abroad to create a global layout. Currently, as the cost for production elements in China increases day by day, it seems to be a must for top textile enterprise to go abroad, in order to give full play to the technology and brand in dyed textile and shirt processing, effectively integrate advantageous resources at home and abroad, efficiently avoid the impacts of potential trade barriers, enlarge the Company’s international production scale and maintain the Company’s leading position in global dyed textile industry. In 2014, the Company established successively Luthai (Milan) Office, Luthai (America) Co., Ltd., Luthai (Cambodia) Company and Luthai (Burma) Company. Through such establishment, the Company is able to provide more prompt and convenient after-sales service and acquire the latest market information. It greatly reduced the cost in exported shirt processing, and

gained the competition platform equivalent to other enterprises. As the world's garment processing industry transfers to southeastern Asia, the Company has decided to set up a production line with the annual capacity of 30 million meter dyed cloth in Vietnam, to effectively avoid the impacts of potential trade barriers.

Further promote Performance Excellence Management (PEM) to create LTPS. The Company further promoted PEM mode. Market-oriented, it understood the customer's demands, expectations and preferences, enhanced customer relation management, optimized new product R&D procedures, and vigorously provided products and services that satisfy customer's demands to improve customer stickiness. Also, it continuously expanded emerging market to improve management science and system; attached greater importance to employee relation management to keep the team healthy and stable; integrated the supply chain resources; and advanced quality improvement projects. After one-year promotion, many achievements have been made in shortening production cycle, reducing finished product stock and raising work efficiency.

Focus on R&D investment to implement the innovation-driven strategy. The Company continued to increase the investment in R&D, with the R&D expenses sharing 4.68% of the operating revenue. It further improved the capability for technology innovation and independent R&D, effectively increasing its market competitiveness and product's added value. In 2014, there were three technology fruits passed the verification by CTEI. More than 40 new products including flannel-like materials, color-coding materials, and dyed elastic pants materials independently developed by the Company enriched seven series featured with new raw materials, new functions and new types of hundreds of thousands of specifications. Meanwhile, the Company has established custom R&D system with some strategic customers and key customers, to jointly develop more targeted new products.

In the reporting period, the "automatically digital polyester yarn dyeing technology and equipment" jointly developed by the Company, China Academy of Machinery Science & Technology and Shandong Companion Group won the first prize for national technology advance award; the project of "Internet custom production system based on virtual dressing and great data technology" was listed into the support scope by MIIT for the year 2014; the "research and application of dyeing technology for different rolls", as well as the "research on key technology for the development of pure cotton comfortable dyed materials" won the first prize for national technology advance award by CTEI; and the "key technology and its industrialization for cotton/sorona low-carbon elastic ironing-free dyed materials" was granted the second prize for national technology advance award.

By the end of 2014, the Company's 34 projects winning national and provincial awards, including 1 for the first prize for national technology advance, 2 for the second prize and 7 for the first prize for provincial technology advance; the Company has applied for 194 patents accepted, of which, 65 are inventions (including 1 America invention patent and 2 Japan invention patents), and has been granted 137 patents; it also involved in formulating 21 standards, of which, there are 5 national standards and 16 industrial standards.

Upgrade from Luthai manufacturing to Luthai creation to improve brand influence. The Company gave full play to the leading role of Milan Office and America Company, made innovation and design more international, and promoted the upgrading of Luthai manufacturing to Luthai creation. Currently, the sales of materials independently designed shared 7.87% of the total material sales. In order to satisfy the personal demands in Internet era, the Company established Beijing Luthai Excellent Fiber Ecommerce AG. Relying on 3D modeling and Internet emerging technology, the Company offered more personalized superior custom service to customers both online and offline. At present, it has carried out pilot operation in Beijing, Shanghai, Shenzhen and Tianjin. In 2014, the Company convened several new product promotion conferences in Tokyo, New York and Milan to further maintain and improve its brand influence and reputation. In 2014, the Company was listed in China branded textile garment industry, and successively won the honors of "Top Ten Textile Culture Brands of China" and "2014 Top Hundred Enterprise of China National Garment Association (CNGA)". The pure cotton dyed

textile – “LT. GRFF” was evaluated as “the most influential brand” in cotton textile industry for the year of 2014 by China Cotton Textile Association.

Now, the Company has developed a product system that majored natural fiber materials, led by multicomponent fiber material, cored by ironing-free technology, oriented by world’s fashionable consumption and concentrated on functional health, to satisfy personalized and diversified market demands.

II. Main business analysis

1. Overview

For the reporting period, the Company achieved operating revenue of RMB 6.17 billion, down 4.76% from last year, with operating costs being RMB 4.235 billion, down 5.52% from last year; selling expenses being RMB 178 million, up 7.99% from last year; and R&D expenses being RMB 289 million, up 12.76% from last year. And the net cash flows from operating activities stood at RMB 1.112 billion, down 23.51% from last year.

	Stock	(ton)			

Reasons for any over-30% YoY movement of the data above:

Applicable Inapplicable

1. The sales volume of cotton stood at 9,119.35 tons in 2014, down 49.29% over last year, which was mainly because the Lu Thai subsidiary in Xinjiang sold less reserved cotton.

V. Core competitiveness analysis

The comprehensive management ability, research and development ability, technological accumulation and global planning of the Company's whole industry chain are the Company's core competitiveness, which did not change during the reporting period.

1. The Company boasts a complete industrial chain from cotton planting, yarn spinning, dyeing, weaving and post-processing to cloth manufacturing, and thus enjoys the cost advantage brought by complete steps for producing high-end dyed textile.

2. Relying on sound comprehensive management capacity, the Company has passed ISO9000 quality management system, ISO14000 environmental management system, OHSAS18000 occupational health safety management system, and SA8000 social accountability management system successively from 1995. Ever since 2007, the Company has also passed WRAP: 1999 global garment production social accountability standard, C-TPAT: 2004 anti-terrorism standard, OE100 and GOTS organic cotton system certification and CNAS national laboratory recognition, to realize the internationalization and standardization of the Company's management. In order to pursue the operational management of performance excellence and better the Company's performance and capability, the Company has gradually introduced GB/T19580-2004 *Standards for Performance Excellence*

Evaluation, created “Great Quality” system and promoted management innovation, to ensure the Company’s business quality.

3. The Company has attached great importance to R&D investment, persisted independent innovation, and relied on Research Academy of Luthai Textile Garment Engineering to continuously perfect a platform for scientific and research cooperation. It has carried out cooperation with research academies, universities, strategic customers and important suppliers to gradually transfer from product R&D to technology research, from overcoming key technology difficulties to mastering technology principles and formulating industrial standards, and from focusing technology innovation to integration of new technology and creative mode, enhanced low-carbon, green and recycled development, empowered the corporate growth and increased the contribution of technology advance to industrial development.

4. Centered by customers, the Company has comprehensively enhanced quality management, stuck to high-standard services, and successfully established a brand image that leads the industry, satisfies customers and wins market. It has actively utilized new technologies to transform traditional industries, promoted technology and product innovation, and vigorously integrated brand construction, textile technology and garment culture, for the purpose of improving corporate brand image. Besides, the Company has paid close attention to the product diversification and reasonable adjustment to market structure, stressed both domestic and international markets, integrated global market resources, explored international layout, and craving out a new road in terms of manufacturing mode, production organization manner and marketing mode, to give full play to the Company’s comprehensive management advantages in the industry.

Analysis on risks and control measures of derivative products held in the reporting period (including but not limited to market risk, liquidity risk, credit risk, operation risk, law risk, etc.)			<p>The Company conducted derivatives products transaction in order for hedging. And the forward settlement hedging was operated by installments, with the relevant amount not more than the planned derivatives products transactions. And all derivatives products transaction was zero-deposit. Meanwhile, the Company had a complete risk control system for sufficient analysis and prevention of possible risks such as risk of laws and regulations, credit risk, operation risk and market risk.</p> <p>1. Risk of laws and regulations:</p> <p>The Company conducted derivatives products transaction in strict accordance with relevant laws and rules as well as regulatory policies from government securities regulatory authorities, if there were no standard operation procedures and strict approval procedures, it was easy to cause compliant and regulatory risks existing in the validity and feasibility of contract, commitments and other legal documents signed.</p> <p>Precautionary measures: The Company carefully studied and mastered laws, regulations and policies relevant to derivative products transaction, formulated internal control rules for the forward settlement hedging business, standardized the operation procedures. And strengthened the compliant examination on derivative products investment business, and strictly abided by relevant laws, regulations and the Company's internal management rules.</p> <p>2. Credit risk and liquidity risk:</p> <p>When the contract matures, the Company couldn't deliver as scheduled due to insufficient liquidity, and the counterparty or the Company couldn't fulfill the contract due to other aspects except the liquidity, which would cause credit risk and further economic losses for the Company.</p> <p>Precaution measure: the Company chose the powerful financial institutions with good reputation as the counterparty, and signed standard derivative products transaction contract, as well as strictly controlled the credit risk of counterparty. The Company conducted derivative investment transactions according to the relevant approval procedure, which was in line with relevant laws, regulations, the Company's Articles of Association, the Management Rules for Derivative Investment of Lu Thai Textile Co., Ltd., the Proposal on the Plan of Lu Thai Textile Co., Ltd. for Derivative Transactions in 2013 approved at the 28th Session of the 6th Board of Directors on 15 May 2013 and the Proposal on the Plan of Lu Thai Textile Co., Ltd. for Derivative Transactions in 2014 approved at the 7th Session of the 7th Board of Directors on 25 Mar. 2014, and performed relevant information disclosure responsibilities. The Company decided the up limit for the</p>							

	<p>amount of derivative products transaction according to the production and operation scale and the progress of foreign exchange income for the Company, and delivered by phases. It was also possible to use extension of term and other ways to ensure the fulfillment of contract as schedules upon the mature of contract, and wouldn't cause any loss of credit risk for the Company due to insufficient liquidity or other reasons.</p> <p>3. Operation risk:</p> <p>The derivative financial transactions had high specialty and complexity, so imperfect internal operation procedures, staffs and external events would make the Company to undertake risks during the transaction.</p> <p>Precaution measure: The Company promulgated strict authorization and approval system and perfect regulatory mechanism, fixed the departments, operation procedures and approval procedures system to conduct derivative products transaction, established special risk control positions, implemented strict authorization and post checks and balances system, meanwhile, it improved the overall quality of relevant personnel through strengthening the business training and professional ethics education for them. Besides, it established the System of Reporting the Abnormal Situation Timely, formed an efficient risk management procedures, so as to ensure to lower the operation risks to the maximum.</p> <p>4. Market risk:</p> <p>The forward settlement of exchange is an important derivative products transaction, which was significantly affected by the exchange rate fluctuation due to its large amount. The Central Bank decided to expand the inter-bank spot RMB-dollar trading band from 1% to 2% since 17 Mar. 2014, which would increase the difficulty in the operation of forward settlement of exchange. Besides, if the RMB is devalued by a large margin on the basis of the current situation before the contract is due, so then, the larger losses shall incur in the contract on forward settlement of exchange signed by the Company.</p> <p>Risk analysis and precaution measure: Renminbi appreciated significantly compared with that before the exchange rate reform, but Renminbi internationalization would be a long-term goal, which decided that Renminbi would not depreciated significantly. Although the increased fluctuation range added the operation difficulty, it provided a certain opportunity, which required relevant personnel of the Company actively master the market trend, carefully operate and hold positive opportunity, so as to try the best to reduce the market risks under the condition of increased market difficulty.</p>
<p>Changes of market prices or fair values in the reporting period of the invested derivatives. And the analysis on the fair value of the derivatives should include the specific use methods and the relevant assumptions and parameters.</p>	<p>1. Up to 31 Dec. 2014, the Company held 16 undue financial derivative product contracts, totaling US\$ 88 million, including 8 forward settlement contracts worth US\$ 34 million and 8 foreign exchange option contracts worth US\$ 54 million (the latest expiration before Dec. 2015). The financial derivative products above accounted for 7.56% of the closing net assets.</p> <p>2. From Jan. 2014 to Dec. 2014, the due financial derivative products of the Company totally equaled to US\$ 414.4746 million, all delivered on time, and the gain generated was RMB 27.9359 million. To be specific, the due forward settlement was US\$ 363.6 million, generating gain of RMB 28.5554 million; the due forward foreign exchange trading amount equaled to US\$ 42.8746 million, which caused a loss of RMB 1.045 million; and the due foreign exchange options equaled to US\$ 8 million, which generated a gain of RMB 425,500.</p>
<p>Whether significant changes occurred</p>	<p>Unchanged</p>

to the Company's accounting policy and specific accounting principles of derivatives in the reporting period compared to the previous reporting period	
Specific opinion from independent directors on the Company's derivatives investment and risk control	The Company's independent directors Zhou Zhiji, Zhang Chengzhu, Wang Lei, Xu Jianjun and Zhao Yao, concerning conducting derivatives business, have issued the following professional advice: we were of the opinion that it would strengthen the Company's competitiveness to use derivative transactions with focus on forward settlement and purchase as an effective tool to avoid foreign exchange risks, to strengthen the relevant internal control and to carry out the loss and risk prevention measures so as to improve the operation and management. It was considered feasible for the Company to conduct derivative transactions with focus on forward settlement and purchase, and no harm was done to interests of the Company's shareholders.

2. Use of raised funds

Applicable Inapplicable

(1) Overview of the use of raised funds

Applicable Inapplicable

Unit: RMB Ten thousand Yuan

Total raised capital	95,081.45
Total raised capital input in the reporting period	773.3
Accumulative raised capital input	95,585.18
Total raised capital of which the use was changed in the reporting period	0
Accumulative raised capital of which the use was changed	14,000
Proportion of accumulative raised capital of which the use was changed (%)	14.72%
Overview of the use of raised funds	

In Dec. 2008, the Company made an additional issue of 150 million A-shares and raising a net amount of RMB 950,814,500. And the raised funds went to the 150,000-Ingot Top-grade Fine Combed Yarn Project, the 50-thousand Ingot Two-for-one Twisting Production Line Project, the Production Line Project for 10-million-meter Top-grade Jacquard Fabrics for Women's Wear, the Marketing Network Development Project and the Project for Supplementing the Working Capital. Among the aforesaid projects, the 150,000-Ingot Top-grade Fine Combed Yarn Project, the 50-thousand Ingot Two-for-one Twisting Production Line Project, the Production Line Project for 10-million-meter Top-grade Jacquard Fabrics for Women's Wear and the Project for Supplementing the Working Capital had been completed before the reporting period.

Meanwhile, at the 3rd Special Shareholders' General Meeting for 2011, it was decided to adjust the raised funds investment of RMB 200 million for the Marketing Network Development Project to RMB 60 million, and the remaining RMB 140 million would be invested in a new project—the Production Line Project for 40-million Meter Top-grade Yarn-dyed Fabric. By the end of the reporting

period, the cumulative input for the new project stood at RMB 433,955,800, of which raised funds of RMB 140 million was used, including RMB 28,103,000 for construction and RMB 111,897,000 for equipment purchase. The Project has been fully put into operation in Apr. 2014.

In the reporting period, the raised funds investment to The Marketing Network Development Project increase RMB 7.733 million, total raised funds investment is RMB 65,037,300 (of which RMB 5,037,300 is the net interest income on the raised funds after bank charges). The investment in the reporting period was mainly used for decoration, rents and advertising expenses of exclusive outlets as well as expansion and maintenance expenses on “Lu Thai Online”, the internet marketing platform.

Up to the end of the reporting period, the previously raised funds had been used up.

Adjustment of the implementation method of any raised funds investment project	Inapplicable
Advance input and exchange of any raised funds investment project	Applicable On 11 Jan. 2009, Proposal on Replacing the Self-collected Funds of RMB 264,861,646.97 with the Input Raised Capital in Advance at the 27 th Meeting of the 5 th Board of Directors. Sponsor Guotai Junan Securities Co., Ltd. expressed the same opinion. The Company engaged RSM China Certified Public Accountants to audit investment of self-collected capital to project should be invested with raised capital in advance, and issued certification report ZRYHZZ Zi [2008] No. 3754.
Idle raised capital for temporarily supplementing working capital	Applicable On 3 Sept. 2010, it was reviewed and approved at the 3 rd Session of the 6 th Board of Directors to temporarily supplementing working capital with raised funds of RMB 94 million for a term from Sep. 2010 to Mar. 2011. The raised funds used for supplementing working capital accounted for 9.89% of the net raised funds, so the relevant proposal did not need to be submitted to the general meeting for review. Independent directors and Guotai Junan Securities (the sponsor) issued their independent opinion and sponsor opinion respectively. The announcement about temporarily supplementing working capital with raised funds was published on Securities Times, Shanghai Securities News and Ta Kung Pao dated 4 Sept. 2010. On 2 Mar. 2011, the Company returned, in full amount, the raised funds used previously for supplementing working capital. On 28 Mar. 2011, it was reviewed and approved at the 9 th Session of the 6 th Board of Directors to temporarily supplementing working capital again with raised funds of RMB 94 million for a term from Mar. 2011 to Sep. 2011. The raised funds used for supplementing working capital accounted for 9.89% of the net raised funds, so the relevant proposal did not need to be submitted to the general meeting for review. Independent directors and Guotai Junan Securities (the sponsor) issued their independent opinion and sponsor opinion respectively. The announcement about temporarily supplementing working capital with raised funds was published on Securities Times, Shanghai Securities News and Ta Kung Pao on 30 Mar. 2011. On 21 Sep. 2011, the Company returned, in full amount, the raised funds used previously for supplementing working capital.
Outstanding raised funds in project implementation and reasons	Inapplicable
Usage and whereabouts of unused raise capital	Up to 30 Jun. 2014, the raised funds and interest had been used up.
Problems found in the usage and disclosure affairs of raised capital and other	The Company performed its information disclosure duty in a timely, accurate and complete manner when it used raised funds, temporarily supplemented working capital with raised funds and changed the investment directions of raised funds. No violation of information disclosure rules was found.

Total	--	14,000	0	14,000	--	--	0	--	--
Reasons for change, decision-making procedure and relevant information disclosure (explain one project by one project)	Due to market changes and other reasons, the implementation of the raised funds-invested project—Project for Marketing Network Development—was slow. It was a project that should be invested persistently on a long-term basis, so some raised funds for the project was idle for a long time, which affected the utilization efficiency of raised funds. In order to increase the utilization efficiency of the capital and maximize shareholders' interests, according to relevant stipulations in the management methods for use of raised funds, the Company held the 2011 3 rd Special Shareholders' General Meeting on 18 Oct. 2011, at which the proposal on adjusting the raised funds-invested project was reviewed and approved. According to the said proposal, the raised fund for the Project for Marketing Network Development was adjusted from RMB 200 million to RMB 60 million and the remaining RMB 140 million would be input for a new project—the Project for a 40-million Meter Top-grade Yarn-dyed Fabric Production Line.								
Reason for failing to reach scheduled progress or projected income (explain one project by one project)	Project for a 40-million Meter Top-grade Yarn-dyed Fabric Production Line was fully put into operation in Apr. 2014.

VIII. Outlook of the Company's future development

1. Competition and development trends in the sector

At present, the global production capacity of high-ended dyed fabric is about 0.8 billion meters, which was the largest production base of yarn-dyed fabric. The pure cotton yarn-dyed fabric has characters of dyed fastness, clear striped weave, abundant color, comfort and strong gas permeability, which was always the main shell fabric of medium and high end shirts. In the recent years, accompanied with the increase of the domestic environmental protection stress, the increasingly improvement of the production factors and the guiding of the national transformation upgrade strategy, part of the low end and small scale yarn-dyed capacity which quit the market had been inexorable trend.

The yarn-dyed fabric falls into three categories, i.e. the top, the high-end, and the middle /low end, which have formed a triangular structure. To be specific, the top-grade yarn dyed fabric is mainly produced by few manufacturers in Italy, France, Germany, etc., and it mainly targets at the fashion and top-brand shirt market. The high-end yarn dyed fabric was characterized of high-density and high-counts, and delicateness after-finishing. Though inferior to the top-grade yarn dyed fabric in terms of the pattern design and fashion, it requires an advanced manufacturing technology and a high product quality, which does not differ much from the former.

In the long run, along with the recovery of the global economy, as well as improvement of urbanization, residents' incomes and consumption in China, the market requirements of the future medium and high end yarn dyed fabric would constantly increased and at the same time would appear the tendency that the market concentrate towards to the medium and large enterprises.

2. Development strategies of the Company

China's textile industry enjoys outstanding advantages in the world and mainly in the aspects such as the capital, technology and labor efficiency, and although the cost of the factor cost is increasing day by day, the prominent comprehensive advantage of China's textile industry remains unchanged. The Company is a large textile enterprise that boasts a complete industrial chain from cotton planting, yarning, dyeing, weaving and post-processing to cloth manufacturing. It is the largest production base for dyed textile for shirts in the world. Now, it has developed three series textiles for shirts, including pure cotton, cotton and natural fiber, and cotton and functional fiber mixture. At present, the Company has speeded up the integration of internationally advantageous resources while promoting the upgrading of Luthai manufacturing to Luthai creation. This helps realize a reasonable layout for the Company's international capacity, further improves its internationalization, and maintains its outstanding edges in global dyed materials for shirts. In terms of brand, the Company will continue on-line and off-line marketing network construction, crave out a new marketing mode through the Internet and mobile terminals, and continuously enhance high-end shirt custom service, to balance the development of domestic and international markets. Also, the Company will increase its investment in technology R&D, design and environmental

protection, to offer more green and low-carbon products to the market.

3. Operating plan (The contents set forth herein do not form any commitment of the Company.)

(1) As for the Company government: The Company will strengthen the system construction of the enterprise internal control, constantly perfect the organization structure and the legal person government structure as well as the prevention mechanism of the risks, and guarantee the Company to realize the healthy, stable and sustainable development in the system level.

(2) As for the market expansion: The Company will adhere to the philosophy of attaching equal importance to both the domestic and overseas markets, proactively expand emerging markets on the basis of stabilizing the existing markets, further enlarge the domestic market share, and promote a balanced development of the domestic and overseas markets.

(3) As for the enterprise management: The Company will refine management responsibility, deepen promoting excellent performance management mode in all-round, carry forward LTPS, further deepen and refine comprehensive budget management, and keep pushing forward management upgrading.

(4) As for the brand construction: The Company will make great efforts to promote the innovation marketing mode, gain more customers with quality and service, further optimize resource allocation as well as perfect the integration of the online and offline marketing mode. Depend on the internet and the mobile terminal means, provide the advanced customization service and satisfy the individual needs of the market.

4. Fund demand, source and using plan

During the reporting period, the Company set up the Luthai Cambodia Company and Burma Company, and recently Phase I of the Cambodia Company had been put into production as well as the Phase II engineer was executed as planned. The Cambodia Company and the Vietnam Company were also under construction as planned. The capital resources of the whole projects were the self-owned and self-raised funds of the Company.

5. Risk of reverse effect and countermeasures for the company to achieve development strategy and business goal

(1) Economic environment impact: Compact of persistence of slow resurging of developed economic entity market and domestic industrial structure deep adjustment on the whole consumption market may possibly cause uncertain for market environment of the company, and that may possibly influence on increase of overseas sales. The Company will try the best to stabilize the domestic and international market and actively expand domestic market at the same time, to achieve a balanced development between domestic and foreign sales.

(2) As the cost for production elements in China increases day by day, and the processing trade for textile garment especially garment processing has been transferred to countries in southeastern Asia, it seems to be a must for top textile enterprise to go abroad. The Company will, based on its research on production elements, promote the comprehensive utilization of internationally advantageous resources to create a reasonable layout for processing bases.

(3) The Company mainly uses long-staple cotton as its raw materials, whose price may be affected by market supply-demand, climate, policy, exchange rate and quota. In 2015, when the government greatly reduces cotton import quota, the cotton cost will be mainly affected by domestic market. Therefore, except ensuring stable supply of long-staple cotton from Xinjiang subsidiary, the Company must carefully study on market developments, and make every effort to reduce the influences of raw material price fluctuation on its business performance, through actively effective manners and methods.

(4) Change of exchange rate: at present and in the future for a long time, products of the Company are mainly exported to the international market, and sales income mainly settled with USD; meanwhile, major equipments used in the Company was imported, part foreign exchange paid for import was not USD. Our country executed directional system on fluctuated exchange rate, so the exchange rate fluctuated with changes of domestic and foreign policy and environment. When exchange rates experienced a great fluctuation, it might cause a negative influence on the Company. In order to reduce adverse influence of exchange rate fluctuation, the Company adopted the following measures: firstly, the Company proactively conducted foreign exchange hedging, forward FX sales and purchase, reasonable arrangement on settlement day and currency structure and conclusion of agreements on fixed foreign exchange rate to avoid exchange rate-related risks. Secondly, the Company actively adjusted the Renminbi and foreign-currency liabilities structure to control financial costs. Thirdly, according to the fluctuation trend of exchange rates, the Company properly

adjusted imports of raw and auxiliary materials to partially offset the influence of exchange rate fluctuations on the Company. Fourthly, the Company tried to settle with its customers in Renminbi whenever was possible.

IX. Explanation by the Board of Directors and the Supervisory Committee about the “non-standard audit report” issued by the CPAs firm for the reporting period

Applicable Inapplicable

X. Explain any change of the accounting policies, the accounting estimates and the accounting methods when compared to the financial report for last year

Applicable Inapplicable

Alteration of the accounting policies led by executing the new ASBE

At the year-begin of 2014, the Ministry of Finance issued No. 39 of ASBE—Fair Value Measurement, No. 30 of ASBE—Presentation of Financial Statements (revised in 2014), No. 9 of ASBE—Employee Compensation (revised in 2014), No. 33 of ASBE—Consolidation Financial Statement (revised in 2014), No. 40 of ASBE—Joint Venture Arrangement, No. 2 of ASBE—Long-term Investment (revised in 2014) and No. 41 of ASBE—Equity Disclosure of Other Entities which respectively by C-H [2014] No.6, No. 7, No. 8, No. 10, No. 11, No. 14 and No. 16 which be required to execute among the enterprises that applied the ASBE since 1 Jul. 2014 as well as encouraged the enterprises listed overseas to execute in advance. At the same time, the Ministry of Finance issued No. 37 of ASBE—Presentation of Financial Instruments (revised in 2014) as C-H [2014] No. 23 (hereinafter referred to Presentation Guidelines of Financial Instruments for short), which be required to present the financial instruments according to the requirements of the guidelines in Y2014 and the following period among the financial statement.

Through review and approval of the 19th Session of the 7th Board of Directors of the Company on 28 Mar. 2015, the Company began to execute the above 7 new issued or revised enterprises principles except for the presentation guidelines of financial instruments since 1 Jul. 2014 and began to execute the presentation guidelines of financial instruments when compiling the 2014 financial report and adjusted according to the relative requirements of each guidelines, while the influences on the financial statement items during the current period and the earlier stage of the presentation as well as the amount were as follows:

Name of criterions	Notes of the content and the influences	The affected amount of the relevant financial statement items on 1 Jan. 2014/of Y2013	
		Name of items	Affected amount Increase+/-Decrease
No. 2 of ASBE—Long-term Equity Investment	The Group had no joint control or significant influences on the investees before executing the No. 2 of ASBE—Long-term Equity Investment (revised in 2014), and the equity investment which had no quotation in the active market as well as its fair value could be not reliable measured should be measured as long-term equity investment by cost method. After executed the No. 2 of ASBE—Long-term Equity Investment (revised in 2014), the Group measured the equity investment which didn't have joint control or significant influences on the investees and	Long-term equity investment	-67,442,600.00
		Available-for-sale financial assets	67,442,600.00

	had no quotation in the active market as well as its fair value could not be reliable measured as available-for-sale financial assets. The Group executed the accounting treatment of the above changes of accounting policies by retrospective application.		
No. 9 of ASBE—Payroll Payment	Before executed the No. 9 of ASBE—Payroll Payment(revised in 2014), the Company included all the bonus distributed to the employees into the payroll payable and after executed the No. 9 of ASBE—Payroll Payment(revised in 2014), the Company included the bonus distributed to the employees according to the short-term bonus plan into payroll payment-short-term payroll as well as included the bonus according to the long-term bonus plan into the long-term payroll payable-other long-term employee benefits.	Payroll payable	-23,883,400.00
		Long-term payroll payable	23,883,400.00
No. 30 of ASBE—Presentation of Financial Statement	No. 30 of ASBE—Presentation of Financial Statement (revised in 2014) had divided the other comprehensive income into two categories: (1) other comprehensive income items which could not be re-classified into gains and losses in afterwards accounting period; (2) other comprehensive income items which could not be re-classified into gains and losses when satisfying the specific conditions in afterwards accounting period and at the same time specify the presentation of the held-to-sold items etc. The Financial Statement had presented according to the criterion and executed corresponding adjustment compared to the presentation of the Annual Financial Statement.		
No. 39 of ASBE—Fair Value Measurement	No. 39 of ASBE—Fair Value Measurement standardized the measurement and disclosure of the fair value. To adopt No. 39 of ASBE—Fair Value Measurement not caused significant influence on the measure of the financial statement items, but had led the enterprises made wider disclosure of the fair value information of the notes of the financial statement. The financial statement had been disclosed according to regulations of the ASBE.		
No. 41 of ASBE—Equity Disclosure of Other Entities	No. 41 of ASBE—Equity Disclosure of Other Entities is adapted to the disclosure of the equity for the enterprises among the subsidiaries, joint venture arrangement, joint operation and structured entities which not included in the consolidation financial statement. To adopt No. 41 of ASBE—Equity Disclosure of Other Entities will lead the enterprises made wider disclosure of the fair value		

	information of the notes of the financial statement. The financial statement had presented according to the ASBE and had made corresponding adjustment on the disclosure of the notes of the comparable annual financial statement.		
No. 33 of ASBE-Consolidation of Financial Statement (revised in 2014)	No. 33 of ASBE-Consolidation of Financial Statement (revised in 2014) similarly stipulated that “the consolidation scope of the Consolidation Financial Statement should be recognized based on the control”, but had revised the definition “control” as “refers to the power of the investors on the investees, which could enjoy the variable returns through participate in the relevant activities of the investees and has the ability to use the power on the investees to influence its return amount”. The criterion after revised required the investees to adjust the investees based on whether the investors control the investees on deliberating all the relevant facts and situations and provided more specific guidance on the judgment problems of the control right. The changes of the former would not cause influences on the financial statement of the Company.		
No. 37 of ASBE—Presentation of Financial Instruments	No. 37 of ASBE—Presentation of Financial Instruments (revised in 2014) increased the regulation about off-set and the disclosure requirements as well as the disclosure requirements of the transfer of the financial assets, and verified the disclosure requirements of the overdue period analysis of the financial assets and liabilities. The changes of the former would not cause influences on the financial statement of the Company.		

XI. Explain if any major correction of accounting errors occurred in the reporting period and for that retroactive restatement was needed

Applicable Inapplicable

There was no any major correction of accounting errors occurred in the reporting period and for that retroactive restatement was needed.

XII. Explanation of the changes of the consolidated statement scale compared to the last financial report

Applicable Inapplicable

The Company newly set up the wholly owned subsidiary Luthai (Cambodia) Company, Luthai (Burma) and Luthai (USA) Company as well as the controlling subsidiary Beijing Luthai Youxian Co., Ltd. and included all of them into the consolidation scope.

XIII. Profit allocation and dividend payout

Formulation, execution or adjustment of the Company's profit allocation policy, especially the cash dividend policy, during the reporting period:

Applicable Inapplicable

The Company's preplans or plans for profit allocation and turning capital reserve into share capital for the recent three years (including the reporting year):

1. The 2014 annual profit allocation pre-plan reviewed and approved at the 19th Session of the 7th Board of Directors:

By December 31 of 2014, the Company's registered capital is based on 955,758,496 shares, with a cash dividend of RMB 5.00 distributed to every 10 shares (including tax). The individual income tax for Share A shall be subject to related regulations under *CS [2012] No. 85 Notice on Certain Question about the Implementation of Differentiated Individual Income Tax Policy for Share Dividend of Listed Companies* jointly issued by Ministry of Finance, SAT, and CSRC; and that for Share B shall be converted to HKD based on the central parity rate on interbank exchange market released by the People's Bank of China on the following day after shareholder's meeting (for foreign shareholders, tax is free pursuant to CSZ (1994) No. 020 regulations; and non-residential corporate shareholders is entitled to a 10% reduction of enterprise income tax according to related regulations under *Enterprise Income Tax Law of the People's Republic of China*).

Based on the above distribution plan, the Company actually has been distributed RMB 477,879,248.00 dividends. Such plan may only be implemented after the review and approval on 2014 shareholder's meeting.

2. 2013 profit distribution plan has been approved on the 7th session of the seventh board meeting: By December 31 of 2013, the Company's registered capital is based on 95,580,0496 ten thousand shares, with RMB 3.8 contributed to every 10 shares (including tax). The individual income tax for Share A shall be subject to related regulations under *CS [2012] No. 85 Notice on Certain Question about the Implementation of Differentiated Individual Income Tax Policy for Share Dividend of Listed Companies* jointly issued by Ministry of Finance, SAT, and CSRC; and that for Share B shall be converted to HKD based on the central parity rate on interbank exchange market released by the People's Bank of China on the following day after shareholder's meeting (for foreign shareholders, tax is free pursuant to CSZ (1994) No. 020 regulations; and non-residential corporate shareholders is entitled to a 10% reduction of enterprise income tax according to related regulations under *Enterprise Income Tax Law of the People's Republic of China*). Based on the above distribution plan, the Company actually has been distributed of RMB 363,204,188.48 dividends. Such plan was implemented in May of 2014 after the review and approval on 2013 shareholder's meeting convened on April 29 of 2014.

3. The profit allocation pre-plan for 2012 was reviewed and approved at the 26th Session of the 5th Board of Directors. The total registered capital of the Company as at 31 Dec. 2012 was 1,008,894,800 shares, including the bought-back inventory 48,837,304 B-shares that had not been written off, so the total shares eligible for the profit allocation were 960,057,496 shares. Based on total share capital of 960,057,496 shares, the cash dividend of RMB 2.80 (tax included) was distributed for every 10 shares. The individual income tax on A-share holders was executed according to the "Notice of the Ministry of Finance, the State Administration of Taxation and the China Securities Regulatory Commission on Relevant Issues concerning Applying Differentiated Policies of Individual Income Tax to the Dividends of Listed Companies" (CS [2012] No. 85). The cash dividend to shareholders of B share was converted into HK dollars by the middle price between RMB and HKD on the inter-bank foreign exchange market declared by the People's Bank of China on the first working day after adopting resolution of the Shareholders' General Meeting (Dividends to foreign individual shareholders were free of tax pursuant to the Document CSZ (1994) No.020, and as for non-resident enterprise shareholders, enterprise income tax was collected by 10% on the dividends distributed to them pursuant to the Enterprise Income Tax Law of PRC and other stipulations.) In total, RMB 268,816,098.88 was actually distributed as dividends. The aforesaid profit distribution plan was implemented in Jun. 2013 after being reviewed and approved by the Shareholders' General Meeting 2012 held on 22 Apr. 2013.

Cash dividend distribution of the Company over the recent three years:

Unit: RMB Yuan

Dividend year	Amount of cash dividend (including tax)	Net profit belonging to shareholders of the listed company in consolidated statement of dividend year	The ratio accounting in net profit which belongs to shareholders of the listed company in consolidated statement	The amount offered and re-purchased the shares by cash that included in the cash bonus	The proportion offered and re-purchased the shares by cash that included in the cash bonus
2014	477,879,248.00	958,725,402.84	49.85%	0.00	0.00%
2013	363,204,188.48	999,256,730.65	36.35%	0.00	0.00%
2012	268,816,098.88	707,857,544.14	37.98%	0.00	0.00%

The Company (including its subsidiaries) made profit in the reporting period and the retained profit of the Company (without subsidiaries) was positive, but it did not put forward a preplan for cash dividend distribution:

Section V. Significant Events

I. Implementation and influence of equity incentive

√ Applicable □ Inapplicable

1. Summary of equity incentive plan

On 8 April 2011, the 10th session of the 6th board of directors reviewed and approved “2011 Plan on Restricted Stock Incentive of Lu Thai Textile Co., Ltd. (Draft)”. According to requirements of CSRC, the Company submitted the complete application materials on equity incentive plan to CSRC for the record. In accordance with feedback from CSRC, the Company revised the incentive plan and formed “2011 Plan on Restricted Stock Incentive of Lu Thai Textile Co., Ltd.”(Revised Draft) which was approved in the 13th session of the 6th board of meeting on 15 July 2011 without objection of CSRC. On 3 Aug. 2011, the Company held the 2nd temporary shareholders’ general meeting for 2011 and approved “2011 Plan on Restricted Stock Incentive of Lu Thai Textile Co., Ltd. (Revised Draft)”.

With the authorization of shareholders’ general meeting, on 17 Aug. 2011, the Company held the 15th session of the 6th board of directors and approved “Proposal on Granting Incentive Objects Restricted Stocks According to 2011 Plan on Restricted Stock Incentive” and decided that 18 Aug. 2011 was fixed as grant date of the above incentive plan. On the same day, “Proposal on Personnel Adjustment in 2011 Plan on Restricted Stock Incentive of Lu Thai Textile Co., Ltd.”. Because four employees were not qualified for requirements of incentive objects, their qualifications of incentive objects were canceled and they were not granted restricted stocks. Therefore, the number of incentive objects changed from 350 into 346 and the amount of granted restricted stocks changed from 14.3 million shares to 14.12 million shares.

“Announcement of Lu Thai Textile Co., Ltd. on Finishing Granting Restricted Stocks” declared on 6 Sep. 2011 clarified that: because of personal reasons, incentive objects including Guo Yuan and Yang Tao voluntarily gave up restricted stocks the Company was about to endow, respectively 10,000 shares and 20,000 shares. Therefore, the number of incentive objects changed from 346 into 344 and the amount of granted stocks changed from 14.12 million shares into 14.09 million shares. Up to now, the Company has already finished granting restricted stocks: grant date is 18 Aug. 2011, the amount of granted stocks is 14.09 million shares, the number of incentive objects is 344 and grant price is RMB 5.025 per share.

On 13 Aug. 2012, the 23rd session of the 6th board of directors reviewed and approved “Proposal on Repurchasing and Withdrawing Restricted Stocks Granted to Unqualified Original Incentive Objects”. Original incentive objects including Liu Qingchun and Shi Qian left their posts during the assessment period and they were not qualified for regulations of restricted stock incentive plan, so the stocks granted to the above persons, respectively 20,000 shares and 40,000 shares, were repurchased and withdrawn; withdrawal was completed on 6 Dec. 2012. Therefore, the number of incentive objects of restricted stocks changed to 342, and the amount of restricted stocks change to 14.03 million shares.

On 27 Mar. 2013, the Company passed “Proposal on Restricted Stock Granted to Previous Incentive Objects Who Fall through Incentive Requirements” and “Proposal on Restricted Stock Granted to All Incentive Objects and still Locked during the Second Unlocking Period” on 26th Session of the 6th Board of Directors. The Company decided to repurchase and write off locked and restricted stocks of Zhangtao, Mengming and Chuiyan in the amount of 12,000 shares, 12,000 shares, 12,000 shares respectively, because they were left on January 2013 and fell through the standard of incentive plan of restricted stocks. In addition, previous incentive object, Qu Qingfeng has arranged retirement and left in January 2013. pursuant to “the 33rd” in incentive plan, part of restricted stocks of Qu Qingfeng still locked in the second period were still valid; restricted stocks still locked in the third period in the amount of 30,000 shares would be repurchased and written off by the Company. The restricted stocks repurchased and written off this period reached 66,000 shares and incentive objects decreased four people; therefore, incentive objects holding restricted shares in

the second period declined to be 339, and restricted stocks still locked were adjusted to be 4,191,000 shares. In line with stipulation of stock incentive plan, unless company performance index meets three requirements of unlocking requirement of 2012 simultaneously, can companies unlock. Net profits of the Company increased 0.52% comparing to 2010 after being deducted non-recurring profit and loss and was lower than the examination requirement, therefore, the stock incentive plan in the second period did not comply with the unlocking requirements. Under this situation, the Company shall repurchase and write off all stocks according to relevant stipulations of “Repurchase and write-off of restricted stocks” in the 8th chapter of stock incentive plan. The restricted stock stated above were written off on 27 Jun. 2013, therefore, incentive objects who obtain restricted stocks in the third period became 338, and restricted stocks still locked in the third period reached 4,161,000 shares.

On 11 Jun. 2014, the 11th Session of the 7th Board of Directors of the Company reviewed and approved the “Proposal on Restricted Stock Granted to Previous Incentive Objects Who Fall through Incentive Requirements”. The original incentive targets Gao Hong failed in the 2013 performance assessment, of whom the third unlocking restricted shares of 18,000 shares should not be locked and would be repurchased and written off by the Company; The original incentive targets Yang Jun, Wang Fuye, Yang Zezhi, Zhai Shenbo and Yang Jian had left their position during Aug. 2013 to May 2014, which had not met with the incentive plan of “No. 20 Unlocking Arrangement and Inspection Conditions of Restricted Stocks”. Those 5 people had been granted the whole unlocking stocks which was amounted to 24,000 shares and had be repurchased and written off by the Company. The above 42,000 shares had been written off in Shenzhen Branch of CSDC on 26 Aug. 2014. On 11 Jun. 2014, the 11th Session of the 7th Board of Directors of the Company reviewed and approved the “Proposal on Unlocking Restricted Stock 2011 Incentive Plan during the Third Unlocking Period of Luthai Textile Co., Ltd.”, therefore, there were 332 people met with the conditions of the third period of the incentive plan, with the unlocking stocks of the restricted stocks of the third period adjusted to 4.1190 million shares. And the date of the listing of the unlocking shares: 10 Sep. 2014. Thus the 2011 Incentive Plan of the Restricted Shares of Luthai Textile Co., Ltd. had completed execution.

2. Source of incentive stocks:

Directional add-issuance of restricted stocks to incentive objects.

3. Assessment to incentive objects

The human resource department of the Company, according to implementation and assessment methods of restricted stock incentive plan of Lu Thai Textile Co., Ltd., conducted appraisal of 2011 annual performance of incentive objects and the appraisal result was that: they were all qualified and met the conditions of unlocking.

Net profits of the Company increased 0.52% comparing to 2010 after being deducted non-recurring profit and loss and was lower than the examination requirement, therefore, the stock incentive plan in the second period did not comply with the unlocking requirements. Under this situation, the Company shall repurchase and write off all stocks according to relevant stipulations of “Repurchase and write-off of restricted stocks” in the 8th chapter of stock incentive plan and repurchased all restricted stocks on 27 Jun. 2013.

According to implementation and assessment methods of restricted stock incentive plan of Lu Thai Textile Co., Ltd., the Enterprise Management Department and Human Resources Department conducted appraisal of 2013 annual performance of the 333 incentive objects except for the original incentive objects that left the office during Aug. 2013 and May 2014, with the appraisal result was that: they were all qualified and met the conditions of unlocking except Gao Hong.

4. Particulars about unlocking incentive stocks:

On 13 Aug. 2012, the 23rd session of the 6th Board of Directors reviewed and approved “Proposal on Unlocking Restricted Stock Incentive Plan during the First Unlocking Period” and approved that the 342 qualified incentive objects were unlocked during the first unlocking period, the proportion of unlocked shares during the first unlocking period in total granted incentive shares was 40% and the amount of unlocked shares was 5.612 million shares. The listing date of firstly unlocked shares was 3 Sep. 2012. On 11 Jun. 2014, the 11th Session of the 7th Board of Directors reviewed and approved “Proposal on Unlocking Restricted Stock Incentive Plan during the Third Unlocking Period” and there were 332 met the conditions of unlocking of the third incentive plan, with the locking

restricted shares of the third period adjusted to 4.1190 million and the listing date of the unlocking shares of the third period was: 10 Sep. 2014.

5. Influence of implementing stock incentive plan on financial situation and operation results during the reporting period and in the future:

The fee of implementing stock incentive plan during the reporting period was RMB 6.0419 million and the influenced total profit of the Company of 2014 reached RMB 6.0419 million. The incentive plan of the restricted shares had completed execution during the reporting period.

Section IX. Corporate Governance

I. Basic condition of corporate governance

1. The Company continued to perfect the corporate governance structure, establish and perfect the modern enterprise system and ensure the efficient and standardized operation of the Company's Shareholders' General Meeting, Board of Directors, Board of Supervisors and Senior Executives strictly according to Company Law, Securities Law and Governing Rules for Listed Company as well as relevant stipulations and requirements from CSRC. It formed a relationship of clear division of rights and responsibilities, assuming each own functions and check and balance each other between the management organ, decision-making organ, supervisory organ and management layer, so as to provide a good internal operational environment for the Company's standardized and efficient operation. At present, there is no difference between the actual situation of the Company's corporate governance structure and the requirements on the corporate governance of CSRC and Shenzhen Stock Exchange.

2. About shareholders and Shareholders' General Meeting

The Company convened and held the Shareholders' General Meeting in strict accordance with the requirements from the Rules for Shareholders' General Meeting in Listed Companies and the stipulation of the Rules of Procedure for Shareholders' General Meeting. During the reporting period, as for the contents such as providing the internet voting platform and the individual voting calculation as well as the disclosure of the medium and small shareholders, the Company revised part of the regulations of the Articles of Association and Rules of Procedure of the Shareholders' General Meeting of Luthai Textile Co., Ltd. according to the requirements of the Rules of Procedure of the Shareholders' General Meeting of Listed Companies (revised in 2014) and Articles of Association of Listed Companies (revised in 2014), which ensured all shareholders especially medium to small shareholders to enjoy equal rights and fully exercise their own rights.

3. About the relationship between the principal shareholders and the Company

The Company's principal shareholders acted according to relevant standards without directly or indirectly intervening the Company's decision-making and operating activities over the Shareholders' General Meeting; the Company was independent with its principal shareholders in business, personnel, assets, organization, finance, and the Company's Board of Directors, Supervisory Committee and Internal Organs could completely independent to operate. There was no situation about annexing the assets or occupation of funds of the Company by principal shareholders or other events on infringing the interest of the Company and other shareholders.

4. About the directors and Board of Directors

The Company nominated and elected directors in strict accordance with the Articles of Association, the structure of the Board of Directors and the number of independent directors was in compliance with the requirement of laws and regulations. Besides, it established four special committees such as Strategy Committee, Nomination Committee, Audit Committee and Remuneration & Appraisal Committee in accordance with the Rules of Procedure for the Board of Directors, and accordingly promulgated the work rules for the committees. The committees clearly understood their responsibilities and operated well. The directors and independent directors completely enjoyed the rights stipulated in Company Law and Articles of Association, which ensure the scientific and impartial decision made by the Board of Directors of the Company. During the reporting period, the Company revised the Rules of Procedure of the Board of Directors of Luthai Textile Co., Ltd. according to the actual situation and revised the number of the Directors.

5. About supervisors and Supervisory Committee

The Company's Supervisory Committee and supervisors conscientiously performed their duties by strictly implementing relevant regulations of Articles of Association and the Rules of Procedure for Supervisory

Committee, and conducted effective supervision on the Company's finance, the legal and regulatory compliance of directors and senior executive in duty performance.

6. About information disclosure and the transparency

The Company authentically, accurately, completely and timely performed its information disclosure responsibility in strict accordance with the stipulations of the Stock Listing Rules of Shenzhen Stock Exchange and relevant laws and regulations. Moreover, it ensured all shareholders have equal opportunity to gain information by disclosing information in strict accordance with Management System on Information Disclosure and Management System on Information Insiders as well as relevant stipulations. During the reporting period, the Company revised the Information Disclosure Management System of Luthai Textile Co., Ltd. according to the relevant regulations of No. 23-No. 35 of Memo of Information Disclosure Business issued by SZSE and combined with the actual situation of the Company.

The Company has established the Management System on Investor Relationship, and it paid special attention to the management of investor relationship and continued to maintain good communication with investors during executing the said system. During the reporting period, through attending the investor exchanging fair, accepting investors' on-site visit and consultant by way of on-site research and phone, the Company introduced its situation of production and operation and development strategy to the investors, so as to enhance their understanding of the Company and increase the Company's market transparency, as well as establish a good corporate image in the capital market. Meanwhile, it fully took advantage of the investor interactive platform of Shenzhen Stock Exchange to answer the questions and consultant from investors, and accepted the advices and opinion proposed by them, so as to maintain a healthy and good relationship between the Company and the investors.

8. About relevant beneficiaries

The Company fully respected and protected the legal rights of its customers, banks, suppliers, other creditors, staffs and consumers, etc., as well as paid special attention to the active cooperation with the said relevant beneficiaries, so as to mutually promote the sustainable and healthy development of the Company.

Besides, *Guarantee Management System of Luthai Textile*, *Independent Director Work System of Luthai Textile*, *Related Transaction Management System of Luthai Textile*, *Funds Use Management System of Luthai Textile*, *Management System for Capital Transaction with Related Parties of Luthai Textile*, and *Foreign Investment Management Measures of Luthai Textile* have been modified on 2013 shareholder's meeting; and *Asset Depreciation Reserve Management System of Luthai Textile* has been modified on the first extraordinary shareholder's meeting in 2014. On the 7th session of the seventh board meeting, *Board Auditing Committee Work Rules of Luthai Textile*, *Board Nominating Committee Work Rules of Luthai Textile*, *Board Remuneration and Evaluation Committee Work Rules of Luthai Textile*, *Investor Relation Management System of Luthai Textile*, and *Funds Use Management System of Luthai Textile* have been approved; on the 11th session of the seventh board meeting, *Controlled Subsidiary Management System of Luthai Textile*, *Controlled Subsidiary Authorization Management System of Luthai Textile*, *Controlled Subsidiary Major Event Report System of Luthai Textile*, and *Authorization Management System of Luthai Textile* have been approved, and *Internal Audit Management System of Luthai Textile* modified; on the 15th session of the seventh board meeting, *Derivative Transaction Management System of Luthai Textile* and *General Manager Work Rules of Luthai Textile* have been approved.

Whether independent directors raised objections to relevant events of the Company

Yes No

During the reporting period, independent directors did not raise objections to relevant events of the Company.

IV. Duty performance of special committees affiliated to the board of directors during the reporting period

Duty fulfillment of Audit Committee under the Board

1. Main work of the Audit Committee in the preparation of the 2014 Annual Report

(1) On 11 Nov. 2014, the Audit Committee convened the first session for the 2014 annual financial audit at the Conference Room of the Company. At this session, the Audit Committee and Ruihua CPAs (LLP) (the auditor for 2014) determined, through consultation, the schedule for the 2014 annual financial audit.

(2) On 20 Jan. 2015, the Audit Committee convened the second session for the 2014 annual audit, reviewing the Company's financial statements to be submitted to Ruihua CPAs (LLP) for audit and issuing a written opinion.

(3) In the audit process, the Committee kept in touch with the project manager from Ruihua CPAs (LLP) by phone, email, etc., and urged the manager to submit the auditor's report within the set time.

(4) The 3rd Meeting on 2014 Annual Audit, as well as the 2014 Annual Work Conference, were convened by the Committee on 27 Mar. 2015, where the following proposals were approved as resolutions, namely, the audited 2014 Financial Report of the Company, the Summary Report on the Audit Conducted by Ruihua CPAs (LLP) on the Company's 2014 Financial Report, and the Proposal on Renewing Employment of Ruihua CPAs (LLP) as the Company's audit agency for 2015.

3. Written opinions, summary report of the annual audit, and resolutions of 2014 Work Conference on Annual Report by Audit Committee

(1) Audit Committee's written opinion on the 2014 financial and accounting statements prepared by the Company's Financial Department before the presence of the registered accountants for the annual audit:

According to the Rules for Audit Committee of the Board Concerning Annual Reports of Lu Thai Textile Co., Ltd., the Audit Committee shall perform its duties of conducting supervision and checks in the Company's preparation and disclosure of its annual reports. The Committee reviewed the 2014 financial and accounting statements prepared by the Company's Financial Department before the presence of the registered accountants for the annual audit, and expressed its opinion as follows:

1. The financial and accounting statements were prepared in accordance with the Company's accounting policy with proper application of the accounting policy and reasonable accounting estimates, which were in line with the New Accounting Standards for Business Enterprises, the Accounting System for Business Enterprises, and the relevant regulations issued by the Ministry of Finance of PRC;

2. The subsidiary statements included in the Company's consolidated statements were complete in terms of contents, providing an accurate basis for the statement combination;

3. The Company's financial statements were found objective, factual and accurate with no major misstatements or information omission.

4. Since there is still a certain period of time from this review of the financial statements to the formal issuance of the auditor's report and the financial statements, the Company's Financial Department is advised to pay close attention to and carefully handle the matters after the balance sheet date, so as to ensure the fairness, factuality and completeness of the financial statements. The Audit Committee is of the opinion that the financial and accounting statements are ready to be submitted to the registered accountants for audit.

(2) Audit Committee's written opinion on the Company's financial statements after the preliminary audit opinion was issued by Ruihua CPAs (LLP):

According to the Rules for Audit Committee of the Board Concerning Annual Reports of Lu Thai Textile Co., Ltd., the Audit Committee shall perform its duties of conducting supervision and checks in the Company's preparation and disclosure of its annual reports. We effectively communicated with the said CPA firm (LLP) at the beginning of the audit. And we once again reviewed the Company's 2014 financial and accounting statements following the preliminary audit opinion issued by the CPA firm (LLP), and expressed our opinions as follows:

In accordance with the New Accounting Standards for Business Enterprises and the Company's relevant financial rules, the financial statements were prepared in a rational and standardized way, which fairly, factually, accurately and completely presented the Company's assets, liabilities, shareholders' equity and operation results by 31 Dec. 2014.

The Audit Committee is of the opinion that the Company's 2014 financial and accounting statements preliminarily audited by RSM China Certified Public Accountants (Special General Partnership) are ready to be submitted to the Audit Committee for review.

(3) Resolutions made at 2014 Annual Work Conference of Audit Committee of the Board

The Audit Committee of the Board of Lu Thai Textile Co., Ltd. held its 2014 Annual Work Conference at Banyang Villa Meeting Room of the Company on 27 Mar. 2015. Three persons were supposed to attend the meeting, and all three of them were in fact present at the meeting as well as the Chief Accountant, the Manager Assistant of the Audit Department, the project responsible person of Luthai of Ruihua CPAs attended the meeting. Mr. Qi Haodong, Chairman of the Audit Committee, presided over the meeting, and Chief Accountant and Chief Auditor of the Audit Department sat in on the meeting. The meeting was convened in accordance with the Company Law and the Articles of Association of the Company. And the following proposals were passed by vote at the meeting:

I. With 3 favorable votes, 0 negative votes and no abstentions, the 2014 Financial Report of the Company audited by Ruihua CPAs (LLP) was passed;

II. With 3 favorable votes, 0 negative votes and no abstentions, the Summary Report on the Audit Conducted by Ruihua CPAs (LLP) on the Company's 2014 Financial Report was passed;

III. With 3 favorable votes, 0 negative votes and no abstentions, the Proposal on Renewing Employment of Ruihua CPAs (LLP) as the Company's audit agency and internal control audit agency for 2015 was passed with a valid term of 1 year. The Company paid RMB 1.585 million to the said CPAs firm as fees for the 2014 annual financial report audit and internal control audit.

The Committee agrees to submit the above-mentioned proposals 1 and 3 to the Board of Directors for examination on the 19th Session of the 7th Board of Directors.

Duty performance of remuneration committee affiliated to the Board of Directors:

1. The Remuneration Committee of the Board of Luthai Textile Co., Ltd. held the First Conference in 2014 at Banyang Villa Meeting Room of the Company on 24 Mar. 2014. Six persons were supposed to attend the meeting, and four of them were in fact present at the meeting. The Chief Accountant, Board Secretary attended the meeting and because Mr. Sun Ruizhe, the Chairman of the Compensation Committee, and Mr. Su Xin, committee member of Compensation Committee had not attended the meeting and without entrusting other Directors for attendance, the meeting was presided by Mr. Zhou Zhiji, committee member of Compensation Committee and Independent Director. The meeting held by the Company met with the relevant regulations of Company Law and the Articles of Association of the Company. With 3 favorable votes, 0 negative votes and no abstentions, the Proposal on the 2013 Appraisal Result of the Senior Executives of Luthai Company was passed.

RHS Zi [2015] No. 37040004

To the shareholders of Lu Thai Textile Co., Ltd.

We have audited the accompanying financial statements of Lu Thai Textile Company Limited (hereinafter refers as "the Company") which comprise the Company's balance sheet and the consolidated balance sheet as at 31 December 2014, the Company's profit statement and the consolidated profit statement, the Company's cash flow statement and the consolidated cash flow statement, the Company's statement of changes in owners' equity and the consolidated statement of changes in owners' equity, for the year then ended, as well as the notes to the financial statements.

I. Management's responsibility for the financial statements

The management of the Company is responsible for the preparation of these financial statements and fair presentation. These responsibilities include: (1) preparing financial statements according to the Accounting Standards for Business Enterprises and make them a fair presentation; and (2) designing, implementing and maintaining internal control relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

II. Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes

evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

III. Opinion

In our opinion, the accompanying financial statements has been prepared according to the Enterprise Accounting Standards and give a true and fair view of the financial position of the Company as at 31 December 2014, and of the financial performance and cash flows for the year then ended in all material aspects.

III. Company Profile

Lu Thai Textile Co., Ltd. (hereinafter referred to as the Company) is a joint venture invested by Zibo Lucheng Textile Investment Co., Ltd (originally named Zibo Lucheng Textile Co., Ltd, hereinafter referred to as Lucheng Textile) and Thailand Tailun Textile Co., Ltd. On Feb. 3, 1993, the Company is approved by the former Ministry of Foreign Trade and Economy of the State (1993) in WJMZEHZ No. 59 to convert into a joint-stock enterprise. Zibo Administration for Industry and Commerce issued the Company corporate business license with the registration No. of QGLZZZ No. 000066. In July 1997, the Company is approved by the Securities Committee of the Department of the State in the ZWF (1997) No. 47 to issue 80 million shares of domestically listed foreign share (B-shares) at the price of RMB 1.00 per share. Upon approved by Shenzhen Stock Exchange with No. (1997) 296 Listing Notice, the Company is listed on the Shenzhen Stock Exchange on August 19, 1997 with B-shares stock code of 200726. On November 24, 2000, approved by ZJGSZ [2000] No.199 by CSRC, the Company increased publication of 50 million shares of general share (A-shares) at the book value of RMB 1.00, which are listed on the Shenzhen Stock Exchange on December 25, 2000 with A-shares stock code of 000726 through approval by Shenzhen Stock Exchange with No. (2000) 162 Listing Notice. As approved by 2000 Shareholders' General Meeting in May, 2001, the Company carried out the distribution plan that 10 shares of capital public reserve are converted to 3 more shares for each 10 shares. As approved by Resolutions of 2001 Shareholders' General Meeting in June 2002, the Company implemented the distribution plan that 10 shares of capital public reserve are converted 3 more shares for each 10 shares again. As approved by 2002 Shareholders' General Meeting in May 2003, the Company implemented the distribution plan that 10 shares of capital public reserve are 2 more shares for each 10 shares, and inner employees' shared increased to 40.56 million shares. As examined and approved by ZJGSZ No. [2000] 199 of CSRC, the inner employees' shares will start circulation 3 years later since listing on the A-share market. On Dec. 25, 2003, the inner employees' shares reach 3 years since listing on the A-share stock market, and they set out circulation on Dec.26, 2003. As approved by the Shareholders' General Meeting 2006 held in June 2007, the Company implemented the plan on converting 10 shares to all its shareholders with capital reserves for every 10 shares. After capitalization, the registered capital of the Company was RMB 844.8648 million. The Company, in accordance with the official reply on approving Lu Thai Textile Co., Ltd. to issue additional shares (ZJXK [2008] No. 890 document) from CSRC, issued the Renminbi common shares (A shares) amounting to 150 million shares on 8 Dec. 2008. According to the relevant resolution of the 2nd Special Shareholders' General Meeting for 2011, the relevant resolution of the 15th Session of the 6th Board of Directors, the Opinion of China Securities Regulatory Commission on the Restricted Share Incentive Plan of Lu Thai Textile Co., Ltd. (Shang-Shi-Bu-Han [2011] No. 206), the Company applied for a registered capital increment of RMB 14.09 million, which was contributed by restricted share incentive receivers with monetary funds. In accordance with the resolution of Proposal on Repurchasing and Canceling Partial Restricted Shares already Granted for the Original Incentive Targets not Reaching the Incentive Conditions made at the 23rd Session of the 6th Board of Directors on 13 Aug. 2012, the Company canceling a total of 60,000.00 shares already granted for the original incentive targets not reaching the incentive conditions. According to the second temporary resolution of Proposal on counter purchase of part of the domestic listed foreign share (B share) on 25 Jun. 2012, the Company counter purchase domestic listed foreign share (B share) 48,837,300 shares. According to the Proposal on Repurchase and Cancel Part of Unlocked Restricted Share of the Original Incentive Personnel not Conforming to the Incentive Condition, Proposal on Repurchase and Cancel unlocked Restricted Share in Second Unlocked Period of all the Incentive Personnel reviewed and approved by the 26th meeting of 6th session of the board of the directors on 27 Mar. 2013, the Company repurchase and cancel 4,257,000 shares owned by original people whom to motivate. According to the Proposal on Repurchase and Write-off of Partly of the Original Incentive Targets Not Met with the Incentive Conditions but Granted Restricted Shares approved on the 11th

Session of the 7th Board of Directors on 11 Jun. 2014, to execute repurchase and write-off of the whole granted shares of 42,000 shares of the original incentive targets not met with the incentive targets of the Company. Up to 31 Dec. 2014, the registered capital of the Company was of RMB 955.7585 million.

The Company's registered address: No. 11, Mingbo Road, Hi-tech Development Zone, Zibo, Shandong

The Company's legal representative: Liu Shizhen

The Company's business scope includes production of cotton yarn, yarn dyed fabrics, shirts, fashion accessories, health underwear and other textile products and their mating products; domestic and overseas sale of the Company's self-produced products and provision of after-sales services; acquisition and export of products not under exclusive rights or quota licenses; and hotel, guesthouses and catering services as well as the construction and management of the purified water projects.

The Company's financial statements have been approved for issue by the Board of Directors of the Company on 28 Mar. 2015.

There were 14 subsidiaries included into the consolidation scope of the Company in 2014, and for the details, please refer to Notes IX. Equities among Other Entities. There were 4 subsidiaries increased of 2014 in the consolidation scope over the last year, and please refer to Notes VIII. Changes in Consolidation Scope for details.

IV. Basis for the preparation of financial statements

1. Preparation basis

With the going-concern assumption as the basis and based on transactions and other events that actually occurred, the Group prepared financial statements in accordance with <The Accounting Standards for Business Enterprises—Basic Standard> issued by the Ministry of Finance with Decree No. 33 and revised with Decree No. 76, the 41 specific accounting standards, the Application Guidance of Accounting Standards for Business Enterprises, the Interpretation of Accounting Standards for Business Enterprises and other regulations issued and revised from 15 Feb. 2006 onwards (hereinafter jointly referred to as “the Accounting Standards for Business Enterprises”, “China Accounting Standards” or “CAS”), as well as the Rules for Preparation Convention of Disclosure of Public Offering Companies No.15 – General Regulations for Financial Reporting (revised in 2014) by China Securities Regulatory Commission.

In accordance with relevant provisions of the Accounting Standards for Business Enterprises, the Group adopted the accrual basis in accounting. Except for some financial instruments, where impairment occurred on an asset, an impairment reserve was withdrawn accordingly pursuant to relevant requirements.

V. Important accounting policies and estimations

Indication of specific accounting policies and estimations:

The Company and each subsidiary mainly engage in the production and operation of textile products. The Company and each subsidiary according to the actual production and operation characteristics and the regulations of the relevant ASBE, formulated certain specific accounting policies and accounting estimates of the transactions and events such as recognizing the revenues, and please refer to each description of Notes V. for details. For the notes of the significant accounting adjustment and estimates made by the management layer, please refer to the Significant Accounting Adjustment and Estimates.

3. Operating cycle

② Held-to-maturity investment

The term "held-to-maturity investment" refers to a non-derivative financial asset with a fixed date of maturity, a fixed or determinable amount of repo price and which the enterprise holds for a definite purpose or the enterprise is able to hold until its maturity.

For the held-to-maturity investment adopting actual interest rate method, which is measured at the post-amortization costs, the profits and losses that arise when such financial assets or financial liabilities are terminated from recognition, or are impaired or amortized, shall be recorded into the profits and losses of the current period.

The actual interest rate method refers to the method by which the post-amortization costs and the interest incomes of different installments or interest expenses are calculated in light of the actual interest rates of the financial assets or financial liabilities (including a set of financial assets or financial liabilities). The actual interest rate refers to the interest rate adopted to cash the future cash flow of a financial asset or financial liability within the predicted term of existence or within a shorter applicable term into the current carrying amount of the financial asset or financial liability.

When the actual interest rate is determined, the future cash flow shall be predicted on the basis of taking into account all the contractual provisions concerning the financial asset or financial liability (the future credit losses shall not be taken into account).and also the various fee charges, trading expenses, premiums or reduced values, etc., which are paid or collected by the parties to a financial asset or financial liability contract and which form a part of the actual interest rate.

③ Loans and the accounts receivables

Loans and the accounts receivables refer to non-derivative financial assets, which there is no quotation in the active market, with fixed recovery cost or recognizable.

Financial assets that are defined as loans and the accounts receivables by the Company including notes receivables, accounts receivables, interest receivable, dividends receivable and other receivables etc..

Loans and the accounts receivables are made follow-up measurement on the basis of post-amortization costs employing the effective interest method. Gains or loss arising from the termination recognition, impairment occurs or amortization shall be recorded into the profits and losses of the current period.

④ Assets available for sales

Assets available for sales including non-derivative financial asset that has been assigned as assets available for sales on the initial recognition and financial assets excluded those measured at fair value and of which the variation into profits and losses of the current period, they are some financial assets, loans and accounts receivables, held-to-maturity investment.

The cost at the period-end of the available-for-sale liabilities instruments should be confirmed according to its amortized cost method, that is the initially recognized amount which deduct the principal that had been repaid, to plus or minus the accumulative

amortization amount formed by the amortization between the difference of the initially recognized amount and the amount on the due date that adopted the actual interest rate method, and at the same time deduct the amount after the impairment loss happened. The cost at the period-end of the available-for-sale liabilities instruments is its initial cost.

Financial assets available-for-trade are subsequently measured at fair value, and gains or losses arising from changes in the fair value are recognized as other comprehensive income, and be carried forward when the said financial assets stopped recognition, then it shall be recorded into the profits and losses of the current period. But, the equity instrument investment which neither have quotation in the active market nor its fair value could not be reliable measured, as well as the derivative financial assets that concern with the equity instruments and should be settled through handing over to its equity instruments, should take the follow-up measurement according to the cost.

Interest receive during the holding of assets available for sales and cash dividends with distribution announcement by invested companies, it shall be recorded into the profits and losses of the current period.

(3) Impairment of financial assets

The Company assesses at the balance sheet date the carrying amount of every financial asset except for the financial assets that measured by the fair value. If there is objective evidence indicating a financial asset may be impaired, a provision is provided for the impairment.

The Company carries out a separate impairment test for every financial asset which is individually significant. As for a financial asset which is individually insignificant, an impairment test is carried out separately or in the financial asset group with similar credit risk. Where the financial asset (individually significant or insignificant) is found not impaired after the separate impairment test, it is included in the financial asset group with similar credit risk and tested again on the group basis. Where the impairment loss is recognized for an individual financial asset, it is not included in the financial asset group with similar credit risk for an impairment test.

① Impairment on held-to maturity investment, loans and receivables

The financial assets measured by cost or amortized cost write down their carrying value by the estimated present value of future cash flow. The difference is recorded as impairment loss. If there is objective evidence to indicate the recovery of value of financial assets after impairment, and it is related with subsequent event after recognition of loss, the impairment loss recorded originally can be reversed. The carrying value of financial assets after impairment loss reversed shall not exceed the amortized cost of the financial assets without provisions of impairment loss on the reserving date.

② Impairment of available-for-sale financial assets

When it judged that the decrease of fair value of the available-for-sale equity instrument investment is serious and not temporarily after comprehensive considering relevant factors, it reflected that the available-for-sale equity instrument investment occurred impairment. Of which, the “serious decline” refers to the accumulative decline range of the fair value over 20%; while the “non-temporary decline” refers to the consecutive decline time of the fair value over 12 months.

Where an available-for-sale financial asset is impaired, the accumulative losses arising from the decrease of the fair value of the capital reserve which is directly included are transferred out and recorded in the profits and losses for the current period. The accumulative losses transferred out are the balance obtained from the initially obtained cost of the said financial asset after deducting the principals as taken back, the amortized amount, the current fair value and the impairment loss originally recorded in the profits and losses.

Where the impairment loss has been recognized for an available-for-sale financial asset, if, within the accounting periods thereafter, there is any objective evidence proving that the value of the said financial asset has been restored and the restoration is objectively related to the events that occur after the impairment loss was recognized, the originally recognized impairment loss is reversed. The impairment losses on the available-for-sale equity instrument investments are reversed and recognized as other comprehensive incomes, and the impairment losses on the available-for-sale liability instruments are reversed and recorded in the profits and losses for the current period.

The impairment loss incurred to an equity instrument investment for which there is no quoted price in the active market and whose fair value cannot be reliably measured, or incurred to a derivative financial asset which is connected with the said equity instrument investment and which must be settled by delivering the said equity investment, is not reversed.

(4) Recognition and measurement of financial asset transfers

Where a financial asset satisfies any of the following requirements, the recognition of it is terminated: ① The contractual rights for collecting the cash flow of the said financial asset are terminated; ② The said financial asset has been transferred and nearly all of the risks and rewards related to the ownership of the financial asset to the transferee; or ③ The said financial asset has been transferred. And the Company has ceased its control on the said financial asset though it neither transfers nor retains nearly all of the risks and rewards related to the ownership of the financial asset.

Where the Company neither transfers nor retains nearly all of the risks and rewards related to the ownership of a financial asset, and it does not cease its control on the said financial asset, it recognizes the relevant financial asset and liability accordingly according to the extent of its continuous involvement in the transferred financial asset. The term “continuous involvement in the transferred financial asset” refers to the risk level that the enterprise faces resulting from the change of the value of the financial asset.

If the transfer of an entire financial asset satisfies the conditions for stopping recognition, the difference between the amounts of the following 2 items is recorded in the profits and losses of the current period: (1) The book value of the transferred financial asset; and (2) The sum of consideration received from the transfer, and the accumulative amount of the changes of the fair value originally recorded in other comprehensive incomes.

If the transfer of partial financial asset satisfies the conditions to stop the recognition, the book value of the transferred financial asset is apportioned between the portion whose recognition has been stopped and the portion whose recognition has not been stopped according to their respective relative fair value, and the difference between the amounts of the following 2 items is included into the profits and losses of the current period: (1) The summation of the consideration received from the transfer and the portion of the accumulative amount of changes in the fair value originally recorded in other comprehensive incomes which corresponds to the portion whose recognition has been stopped; and (2) The amortized carrying amounts of the aforesaid amounts.

In respect of the assets using recourse to sell or using endorsement to transfer, the Company needs to determine whether almost all of the risks and rewards of the financial asset ownership are transferred. If almost all of the risks and rewards of the financial asset ownership had been transferred to the transferee, derecognize the financial assets. For almost all of the risks and rewards of the financial asset ownership retained, do not end to recognize the financial assets. For which neither transfer or retain almost all of the risks and rewards of the financial asset ownership, continuously judge whether the Company retain the control of the assets, and conduct accounting treatment according to the principle of mentioned in the previous paragraphs.

(5) Classification and measurement of financial liabilities

In the initial recognition, financial liabilities are divided into the financial liabilities measured at fair values and whose changes are recorded in current gains and losses and other financial liabilities. Financial liabilities are initially recognized at their fair values. As for a financial liability measured at fair value and whose changes are recorded in current gains and losses, the relevant trading expense is directly recorded in the profits and losses for the current period. As for other financial liabilities, the relevant trading expenses are recorded in the initially recognized amounts.

① Financial liabilities measured at fair values and whose changes are recorded in current gains and losses

Such financial liabilities are divided into transactional financial liabilities and financial liabilities designated to be measured at fair values and whose changes are recorded in current gains and losses in the initial recognition under the same conditions where such financial assets are divided into transactional financial assets and financial assets designated to be measured at fair values and whose changes are recorded in current gains and losses in the initial recognition.

Financial liabilities measured at fair values and whose changes are recorded in current gains and losses are subsequently measured at their fair values. Gains or losses arising from the fair value changes, as well as the dividend and interest expenses in relation to the said financial liabilities, are recorded in the profits and losses for the current period.

② Other financial liabilities

As for a derivative financial liability connected to an equity instrument for which there is not quoted price in an active market and whose fair value cannot be reliably measured and which must be settled by delivering the equity instrument, it is subsequently measured on the basis of costs. Other financial liabilities are subsequently measured according to the amortized cost using the actual interest rate method. Gains or losses arising from de-recognition or amortization of the said financial liabilities is recorded in the profits and losses for the current period.

4. Recording currency

Renminbi (RMB) is the prevailing currency used in the main economic circumstances of the Company and its domestic subsidiaries. The Company and its domestic subsidiaries adopt RMB as the recording currency. When preparing the financial statements for the reporting period, the Company adopted RMB as the recording currency.

5. Accounting treatment methods for business combinations under the same control or not under the same control

Business combinations, it is refer to two or more separate enterprises merge to form a reporting entity transactions or events. Business combination is divided into under the same control and those non under the same control.

(1) Business combinations under the same control

A business combination under the same control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or the same parties both before and after the business combination and on which the control is not temporary. In a business combination under the same control, the party which obtains control of other combining enterprise(s) on the combining date is the combining party, the other combining enterprise(s) is (are) the combined party. The “combining date” refers to the date on which the combining party actually obtains control on the combined party.

The assets and liabilities that the combining party obtains in a business combination shall be measured on the basis of their carrying amount in the combined party on the combining date. As for the balance between the carrying amount of the net assets obtained by the combining party and the carrying amount of the consideration paid by it (or the total par value of the shares issued), the additional paid-in capital (share premium) shall be adjusted. If the additional paid-in capital (share premium) is not sufficient to be offset, the retained earnings shall be adjusted.

The direct cost for the business combination of the combining party shall be recorded into the profits and losses at the current period.

(2) Business combinations not under the same control

A business combination not under the same control is a business combination in which the combining enterprises are not ultimately controlled by the same party or the same parties both before and after the business combination. In a business combination not under the same control, the party which obtains the control on other combining enterprise(s) on the purchase date is the acquirer, and other combining enterprise(s) is (are) the acquiree.

For a business combination not under the same control, the combination costs shall include the fair values, on the acquisition date, of the assets paid, the liabilities incurred or assumed and the equity securities issued by the acquirer in exchange for the control on the acquiree, the expenses for audit, legal services and assessment, and other administrative expenses, which are recorded into the profits and losses in the current period. The trading expenses for the equity securities or debt securities issued by the acquirer as the combination consideration shall be recorded into the amount of initial measurement of the equity securities or debt securities. The involved contingent consideration shall be recorded into the combination costs at its fair value on the acquiring date. Where new or

further evidences emerge, within 12 months since the acquiring date, against the existing circumstances on the acquiring date and the contingent consideration thus needs to be adjusted, the combined goodwill shall be adjusted accordingly. The combination costs of the acquirer and the identifiable net assets obtained by it in the combination shall be measured according to their fair values at the acquiring date. The acquirer shall recognize the positive balance between the combination costs and the fair value of the identifiable net assets it obtains from the acquiree as business reputation. Where the combination costs are less than the fair value of the identifiable net assets it obtains from the acquiree, the acquirer shall re-examine the measurement of the fair values of the identifiable assets, liabilities and contingent liabilities it obtains from the acquiree as well as the combination costs. If, after the reexamination, the combination costs are still less than the fair value of the identifiable net assets it obtains from the acquiree, the acquirer shall record the balance into the profits and losses of the current period.

As for the deductible temporary differences the acquirer obtains from the acquiree which are not recognized into deferred income tax liabilities due to their not meeting the recognition standards, if new or further information shows that the relevant situation has existed on the acquiring date and the economic benefits brought by the deductible temporary differences the acquirer obtains from the acquiree on the acquiring date can be realized, they shall be recognized into deferred income tax assets and the relevant goodwill shall be reduced. Where the goodwill is not sufficient to be offset, the difference shall be recognized into the profits and losses in the current period. In other circumstances than the above, where the deductible temporary differences are recognized into deferred income tax assets on the acquiring date, they shall be recorded into the profits and losses in the current period.

In a business combination not under same control realized by two or more transactions of exchange, according to about the 5th Notice about the Treasury Issuing the Accounting Standards for Enterprises (Finance accounting) [2012] No. 19 Criterion about the “package deal” (see note 4, 4 (2)), Whether the deals are “package deal” or not, belong to the “package deal”, see the previous paragraphs described in this section and note 4, 10 “long term equity investment transaction” and conduct accounting treatment, those not belong to the “package deal” distinguish between the individual financial statements and the consolidated financial statements and conduct relevant accounting treatment.

In the individual financial statements, the sum of the book value and new investment cost of the Company holds in the acquiree before the acquiring date shall be considered as initial cost of the investment. Other related comprehensive gains in relation to the equity interests that the Company holds in the acquiree before the acquiring date shall be treated on the same basis as the acquiree directly disposes the related assets or liabilities when disposing the investment (that is, except for the corresponding share in the changes in the net liabilities or assets with a defined benefit plan measured at the equity method arising from the acquiree’s re-measurement, the others shall be transferred into current investment gains).

In the Company’s consolidated financial statements, as for the equity interests that the Company holds in the acquiree before the acquiring date, they shall be re-measured according to their fair values at the acquiring date; the positive difference between their fair values and carrying amounts shall be recorded into the investment gains for the period including the acquiring date. Other related comprehensive gains in relation to the equity interests that the Company holds in the acquiree before the acquiring date shall be treated on the same basis as the acquiree directly disposes the related assets or liabilities when disposing the investment (that is, except for the corresponding share in the changes in the net liabilities or assets with a defined benefit plan measured at the equity method arising from the acquiree’s re-measurement, the others shall be transferred into current investment gains on the acquiring date).

6. Methods for preparing consolidated financial statements

(1) Principle for determining the consolidation scope

The consolidation scope for financial statements is determined on the basis of control. The term “control” is the power of the Company upon an investee, with which it can take part in relevant activities of the investee to obtain variable returns and is able to influence the amount of returns. The consolidated financial statements comprise the financial statements of the Company and its

subsidiaries. A subsidiary is an enterprise or entity controlled by the Company.

(2) Methods for preparing the consolidated financial statements

Subsidiaries are fully consolidated from the date on which the Company obtains control on their net assets and operation decision-making and are de-consolidated from the date when such control ceases. As for a disposed subsidiary, its operating results and cash flows before the disposal date has been appropriately included in the consolidated income statement and cash flow statement; and as for subsidiaries disposed in the current period, the opening items in the consolidated balance sheet are not adjusted. For a subsidiary acquired in a business combination not under the same control, its operating results and cash flows after the acquiring date have been appropriately included in the consolidated income statement and cash flow statement, and the opening items and comparative items in the consolidated financial statements are not adjusted. For a subsidiary acquired in a business combination under the same control or a combined party obtained in a takeover, its operating results and cash flows from the beginning of the reporting period of the combination to the combination date have been appropriately included in the consolidated income statement and cash flow statement, and the comparative items in the consolidated financial statements are adjusted at the same time.

The financial statements of subsidiaries are adjusted in accordance with the accounting policies and accounting period of the Company during the preparation of the consolidated financial statements, where the accounting policies and the accounting periods are inconsistent between the Company and subsidiaries. For a subsidiary acquired from a business combination not under the same control, the individual financial statements of the subsidiary are adjusted based on the fair value of the identifiable net assets at the acquisition date.

All significant inter-group balances, transactions and unrealized profits are offset in the consolidated financial statements.

The portion of a subsidiary's shareholders' equity and the portion of a subsidiary's net profits and losses for the period not held by the Company are recognized as minority interests and minority shareholder profits and losses respectively and presented separately under shareholders' equity and net profits in the consolidation financial statements. The portion of a subsidiary's net profits and losses for the period that belong to minority interests is presented as the item of "minority shareholder profits and losses" under the bigger item of net profits in the consolidated financial statements. Where the loss of a subsidiary shared by minority shareholders exceeds the portion enjoyed by minority shareholders in the subsidiary's opening owners' equity, minority interests are offset.

Where the Company losses control on its original subsidiaries due to disposal of some equity investments or other reasons, the residual equity interests are re-measured according to the fair value on the date when such control ceases. The summation of the consideration obtained from the disposal of equity interests and the fair value of the residual equity interests, minus the portion in the original subsidiary's net assets measured on a continuous basis from the acquisition date that is enjoyable by the Company according to the original shareholding percentage in the subsidiary, is recorded in investment gains for the period when the Company's control on the subsidiary ceases. Other comprehensive incomes in relation to the equity investment in the original subsidiary are treated on the same accounting basis as the acquiree directly disposes the relevant assets or liabilities (that is, except for the changes in the net liabilities or assets with a defined benefit plan resulted from re-measurement of the original subsidiary, the rest shall all be transferred into current investment gains) when such control ceases. And subsequent measurement is conducted on the residual equity interests according to the No.2 Accounting Standard for Business Enterprises—Long-term Equity Investments or the No.22 Accounting Standard for Business Enterprises—Recognition and Measurement of Financial Instruments. For details, see note IV, 13 "long term equity investment" or 9 "financial instruments".

Where the Company losses control on its original subsidiaries due to step by step disposal of equity investments through multiple transactions, it need to distinguish the Group losses control on its subsidiaries due to disposal of equity investments whether belongs to a package deal. All the transaction terms, conditions and economic impact of the disposal of subsidiaries' equity investment are in accordance with one or more of the following conditions, which usually indicate the multiple transactions, should be considered as a package deal for accounting treatment. ①These deals are at the same time or under the condition of considering the influence of

each other to concluded; ② These transactions only be as a whole can achieve a complete business result; ③ The occurrence of a deal depends on at least one other transactions; ④ A deal alone is not economical, it is economical with other trading together. Those not belong to a package deal, each of them a deal depends on circumstances respectively conduct accounting treatment in accordance with the applicable principles of “part disposal of subsidiaries of a long-term equity investment under the condition of not losing control on its subsidiaries” (see note IV 13, (2) ④) and “Where the Company losses control on its original subsidiaries due to disposal of some equity investments or other reasons” (See the front paragraph) relevant transactions of the Company losses control on its subsidiaries due to disposal of equity investments belonging to a package deal, considered as a transaction and conduct accounting treatment. However, Before losing control, every disposal cost and corresponding net assets balance of subsidiary of disposal investment are confirmed as other comprehensive income in consolidated financial statements, which together transferred into the current profits and losses in the lose of control, when the Company losing control on its subsidiary.

7. Recognition standard for cash and cash equivalents

The term “cash” refers to cash on hand and deposits that are available for payment at any time. The term “cash equivalents” refers to short-term (within 3 months from the purchase date) and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

8. Foreign currency businesses and translation of foreign currency financial statements

(1) Accounting treatments for translation of foreign currency transactions

As for a foreign currency transaction, the Company shall convert the amount in a foreign currency into amount in its bookkeeping base at the spot exchange rate (usually referring to the central parity rate announced by the People’s Bank of China, the same below) of the transaction date, while as for such transactions as foreign exchange or involving in foreign exchange, the Company shall converted into amount in the bookkeeping base currency at actual exchange rate the transaction is occurred.

(2) Accounting treatments for translation of foreign currency monetary items and non-monetary items

On the balance sheet date, the foreign currency monetary items shall be translated at the spot exchange rate on the balance sheet date. The exchange difference arising from the difference between the spot exchange rate on the balance sheet date and the spot exchange rate at the time of initial recognition or prior to the balance sheet date shall be recorded in the profits and losses in the current period, excluding the following situations: ① the exchange difference arising from foreign currency loans related to acquisition of fixed assets shall be treated at the principle of capitalization of borrowing costs; ② the exchange difference arising from the hedging instruments used for effective hedging of net overseas operation investments shall be recorded into other comprehensive incomes, and shall be recognized into current gains and losses when the net investments are disposed; and ③ the exchange difference arising from change in the book balance of foreign currency monetary items available for sale except the amortized costs shall be recorded into other comprehensive gains and losses.

A foreign currency non-monetary item measured at the historical costs shall still be translated at the spot exchange rate on the transaction date. Where the foreign non-monetary items measured at the fair value shall be converted into amount in its bookkeeping base currency at spot exchange rate, the exchange gains and losses arising thereof shall be treated as change in fair value, and recorded into the current period gains and losses or as other comprehensive incomes.

(3) Translation of foreign currency financial statements

When it involves overseas business in preparing the consolidated financial statement, for the translation difference of foreign currency monetary items of net investment in overseas business arising from the change in exchange rate, it shall be recorded into the item of “difference of foreign currency financial statement translation” under the owners’ equity; and be recorded into disposal gains and losses at current period when disposing overseas business.

The foreign currency financial statement of overseas business should be translated in to RMB financial statement by the following

methods: The asset and liability items in the balance sheets shall be translated at a spot exchange rate on the balance sheet date. Among the owner's equity items, except for the items as "undistributed profits", other items shall be translated at the spot exchange rate at the time when they are incurred. The income and expense items in the profit statements shall be translated at the spot exchange rate of the transaction date. The undistributed profits at year-begin is the undistributed profits at the end of last year after the translation; undistributed profits at year-end shall be listed as various distribution items after the translation; after the translation, the balance between assets and the sum of liabilities and owners' equities shall be recorded into other comprehensive gains and losses as difference of foreign currency translation. Where an enterprise disposes of an overseas business without the control right, it shall shift the differences, which is presented under the items of the owner's equities in the balance sheet and which arises from the translation of foreign currency financial statements relating to this overseas business, into the disposal profits and losses of the current period by all or proportion of the disposed overseas business.

Foreign cash flow shall be translated at the spot exchange rate of the date of cash flow incurred. The influence of exchange rate on the cash flow shall be adjustment item and individually listed in the cash flow statement.

And the opening balance and the actual balance of last year shall be listed at the amounts after translation of foreign currency financial statement in last year.

Where the control of the Company over an overseas operation ceases due to disposal of all or some of the Company's owner's equity in the overseas operation or other reasons, the foreign-currency statement translation difference belonging to the parent company's owner's equity in relation to the overseas operation which is stated under the shareholders' equity in the balance sheet shall be all restated as gains and losses of the disposal period.

Where the Company's equity in an overseas operation decreases due to disposal of some equity investment or other reasons but the Company still has control over the overseas operation, the foreign-currency statement translation difference in relation to the disposed part of the overseas operation shall be recorded into minority interests instead of current gains and losses. If what's disposed is some equity in an overseas associated enterprise or joint venture, the foreign-currency statement translation difference related to the overseas operation shall be recorded into the gains and losses of the current period of the disposal according to the disposal ratio.

9. Financial instruments

The Company recognizes a financial asset or liability when it becomes a party of the relevant financial instrument contract. Financial assets and liabilities are measured at fair value in initial recognition. As for the financial assets and liabilities measured at fair value of which changes are recorded into current gains and losses, the relevant dealing expenses are directly recorded into gains and losses; and the dealing expenses on other kinds of financial assets and liabilities are included in the amounts initially recognized.

(1) Determination of the fair value of main financial assets and financial liabilities

Fair value refers to the price that a market participant shall receive for selling an asset or shall pay for transferring a liability in an orderly transaction on the measurement date. As for the financial assets or financial liabilities for which there is an active market, the quoted prices in the active market shall be used to determine the fair values thereof. The quoted prices in the active market refers to the prices available from stock exchange, broker's agencies, guilds, pricing organization and etc., which represent the actual trading price under equal transaction. Where there is no active market for a financial instrument, the enterprise concerned shall adopt value appraisal techniques, including the prices adopted by the parties, who are familiar with the condition, in the latest market transaction upon their own free will, the current fair value obtained by referring to other financial instruments of the same essential nature, the cash flow capitalization method and the option pricing model, etc., to determine its fair value.

(2) Classification, recognition and measurement of financial assets

The purchase and sale of financial assets under the normal ways shall be recognized and stopped to be recognized respectively at the price of transaction date. Financial assets shall be classified into the following four categories when they are initially recognized: (a) the financial assets which are measured at their fair values and the variation of which is recorded into the profits and losses of the

current period, (b) the investments which will be held to their maturity; (c) loans and the account receivables; and (d) financial assets available for sale.

① The financial assets which are measured at their fair values and the variation of which is recorded into the profits and losses of the current period

Including transactional financial assets and the financial assets which are designated to be measured at their fair value when they are initially recognized and of which the variation is recorded into the profits and losses of the current period;

The financial assets meeting any of the following requirements shall be classified as transactional financial assets: A. The purpose to acquire the said financial assets is mainly for selling them in the near future; B. Forming a part of the identifiable combination of financial instruments which are managed in a centralized way and for which there are objective evidences proving that the enterprise may manage the combination by way of short-term profit making in the near future; C. Being a derivative instrument, excluding the designated derivative instruments which are effective hedging instruments, or derivative instruments to financial guarantee contracts, and the derivative instruments which are connected with the equity instrument investments for which there is no quoted price in the active market, whose fair value cannot be reliably measured, and which shall be settled by delivering the said equity instruments.

A transactional financial asset is subsequently measured at the fair value. The gains and losses arising from the fair value changes, as well as the dividend and interest incomes from the financial asset, are recorded in the gains and losses for the current period.

② Held-to-maturity investment

The term "held-to-maturity investment" refers to a non-derivative financial asset with a fixed date of maturity, a fixed or determinable amount of repo price and which the enterprise holds for a definite purpose or the enterprise is able to hold until its maturity.

For the held-to-maturity investment adopting actual interest rate method, which is measured at the post-amortization costs, the profits and losses that arise when such financial assets or financial liabilities are terminated from recognition, or are impaired or amortized, shall be recorded into the profits and losses of the current period.

The actual interest rate method refers to the method by which the post-amortization costs and the interest incomes of different installments or interest expenses are calculated in light of the actual interest rates of the financial assets or financial liabilities (including a set of financial assets or financial liabilities). The actual interest rate refers to the interest rate adopted to cash the future cash flow of a financial asset or financial liability within the predicted term of existence or within a shorter applicable term into the current carrying amount of the financial asset or financial liability.

When the actual interest rate is determined, the future cash flow shall be predicted on the basis of taking into account all the contractual provisions concerning the financial asset or financial liability (the future credit losses shall not be taken into account) and also the various fee charges, trading expenses, premiums or reduced values, etc., which are paid or collected by the parties to a financial asset or financial liability contract and which form a part of the actual interest rate.

③ Loans and the accounts receivables

Loans and the accounts receivables refer to non-derivative financial assets, which there is no quotation in the active market, with fixed recovery cost or recognizable.

Financial assets that are defined as loans and the accounts receivables by the Company including notes receivables, accounts receivables, interest receivable, dividends receivable and other receivables etc..

Loans and the accounts receivables are made follow-up measurement on the basis of post-amortization costs employing the effective interest method. Gains or loss arising from the termination recognition, impairment occurs or amortization shall be recorded into the profits and losses of the current period.

④ Assets available for sales

Assets available for sales including non-derivative financial asset that has been assigned as assets available for sales on the initial recognition and financial assets excluded those measured at fair value and of which the variation into profits and losses of the current

period, they are some financial assets, loans and accounts receivables, held-to-maturity investment.

The cost at the period-end of the available-for-sale liabilities instruments should be confirmed according to its amortized cost method, that is the initially recognized amount which deduct the principal that had been repaid, to plus or minus the accumulative amortization amount formed by the amortization between the difference of the initially recognized amount and the amount on the due date that adopted the actual interest rate method, and at the same time deduct the amount after the impairment loss happened. The cost at the period-end of the available-for-sale liabilities instruments is its initial cost.

Financial assets available-for-trade are subsequently measured at fair value, and gains or losses arising from changes in the fair value are recognized as other comprehensive income, and be carried forward when the said financial assets stopped recognition, then it shall be recorded into the profits and losses of the current period. But, the equity instrument investment which neither have quotation in the active market nor its fair value could not be reliable measured, as well as the derivative financial assets that concern with the equity instruments and should be settled through handing over to its equity instruments, should take the follow-up measurement according to the cost.

Interest receive during the holding of assets available for sales and cash dividends with distribution announcement by invested companies, it shall be recorded into the profits and losses of the current period.

(3) Impairment of financial assets

The Company assesses at the balance sheet date the carrying amount of every financial asset except for the financial assets that measured by the fair value. If there is objective evidence indicating a financial asset may be impaired, a provision is provided for the impairment.

The Company carries out a separate impairment test for every financial asset which is individually significant. As for a financial asset which is individually insignificant, an impairment test is carried out separately or in the financial asset group with similar credit risk. Where the financial asset (individually significant or insignificant) is found not impaired after the separate impairment test, it is included in the financial asset group with similar credit risk and tested again on the group basis. Where the impairment loss is recognized for an individual financial asset, it is not included in the financial asset group with similar credit risk for an impairment test.

① Impairment on held-to maturity investment, loans and receivables

The financial assets measured by cost or amortized cost write down their carrying value by the estimated present value of future cash flow. The difference is recorded as impairment loss. If there is objective evidence to indicate the recovery of value of financial assets after impairment, and it is related with subsequent event after recognition of loss, the impairment loss recorded originally can be reversed. The carrying value of financial assets after impairment loss reversed shall not exceed the amortized cost of the financial assets without provisions of impairment loss on the reserving date.

② Impairment of available-for-sale financial assets

When it judged that the decrease of fair value of the available-for-sale equity instrument investment is serious and not temporarily after comprehensive considering relevant factors, it reflected that the available-for-sale equity instrument investment occurred impairment. Of which, the “serious decline” refers to the accumulative decline range of the fair value over 20%; while the “non-temporary decline” refers to the consecutive decline time of the fair value over 12 months.

Where an available-for-sale financial asset is impaired, the accumulative losses arising from the decrease of the fair value of the capital reserve which is directly included are transferred out and recorded in the profits and losses for the current period. The accumulative losses transferred out are the balance obtained from the initially obtained cost of the said financial asset after deducting the principals as taken back, the amortized amount, the current fair value and the impairment loss originally recorded in the profits and losses.

Where the impairment loss has been recognized for an available-for-sale financial asset, if, within the accounting periods thereafter, there is any objective evidence proving that the value of the said financial asset has been restored and the restoration is objectively related to the events that occur after the impairment loss was recognized, the originally recognized impairment loss is reversed. The

impairment losses on the available-for-sale equity instrument investments are reversed and recognized as other comprehensive incomes, and the impairment losses on the available-for-sale liability instruments are reversed and recorded in the profits and losses for the current period.

The impairment loss incurred to an equity instrument investment for which there is no quoted price in the active market and whose fair value cannot be reliably measured, or incurred to a derivative financial asset which is connected with the said equity instrument investment and which must be settled by delivering the said equity investment, is not reversed.

(4) Recognition and measurement of financial asset transfers

Where a financial asset satisfies any of the following requirements, the recognition of it is terminated: ① The contractual rights for collecting the cash flow of the said financial asset are terminated; ② The said financial asset has been transferred and nearly all of the risks and rewards related to the ownership of the financial asset to the transferee; or ③ The said financial asset has been transferred. And the Company has ceased its control on the said financial asset though it neither transfers nor retains nearly all of the risks and rewards related to the ownership of the financial asset.

Where the Company neither transfers nor retains nearly all of the risks and rewards related to the ownership of a financial asset, and it does not cease its control on the said financial asset, it recognizes the relevant financial asset and liability accordingly according to the extent of its continuous involvement in the transferred financial asset. The term "continuous involvement in the transferred financial asset" refers to the risk level that the enterprise faces resulting from the change of the value of the financial asset.

If the transfer of an entire financial asset satisfies the conditions for stopping recognition, the difference between the amounts of the following 2 items is recorded in the profits and losses of the current period: (1) The book value of the transferred financial asset; and (2) The sum of consideration received from the transfer, and the accumulative amount of the changes of the fair value originally recorded in other comprehensive incomes.

If the transfer of partial financial asset satisfies the conditions to stop the recognition, the book value of the transferred financial asset is apportioned between the portion whose recognition has been stopped and the portion whose recognition has not been stopped according to their respective relative fair value, and the difference between the amounts of the following 2 items is included into the profits and losses of the current period: (1) The summation of the consideration received from the transfer and the portion of the accumulative amount of changes in the fair value originally recorded in other comprehensive incomes which corresponds to the portion whose recognition has been stopped; and (2) The amortized carrying amounts of the aforesaid amounts.

In respect of the assets using recourse to sell or using endorsement to transfer, the Company needs to determine whether almost all of the risks and rewards of the financial asset ownership are transferred. If almost all of the risks and rewards of the financial asset ownership had been transferred to the transferee, derecognize the financial assets. For almost all of the risks and rewards of the financial asset ownership retained, do not end to recognize the financial assets. For which neither transfer or retain almost all of the risks and rewards of the financial asset ownership, continuously judge whether the Company retain the control of the assets, and conduct accounting treatment according to the principle of mentioned in the previous paragraphs.

(5) Classification and measurement of financial liabilities

In the initial recognition, financial liabilities are divided into the financial liabilities measured at fair values and whose changes are recorded in current gains and losses and other financial liabilities. Financial liabilities are initially recognized at their fair values. As for a financial liability measured at fair value and whose changes are recorded in current gains and losses, the relevant trading expense is directly recorded in the profits and losses for the current period. As for other financial liabilities, the relevant trading expenses are recorded in the initially recognized amounts.

① Financial liabilities measured at fair values and whose changes are recorded in current gains and losses

Such financial liabilities are divided into transactional financial liabilities and financial liabilities designated to be measured at fair values and whose changes are recorded in current gains and losses in the initial recognition under the same conditions where such financial assets are divided into transactional financial assets and financial assets designated to be measured at fair values and whose changes are recorded in current gains and losses in the initial recognition.

Financial liabilities measured at fair values and whose changes are recorded in current gains and losses are subsequently measured at their fair values. Gains or losses arising from the fair value changes, as well as the dividend and interest expenses in relation to the said financial liabilities, are recorded in the profits and losses for the current period.

② Other financial liabilities

As for a derivative financial liability connected to an equity instrument for which there is not quoted price in an active market and whose fair value cannot be reliably measured and which must be settled by delivering the equity instrument, it is subsequently measured on the basis of costs. Other financial liabilities are subsequently measured according to the amortized cost using the actual interest rate method. Gains or losses arising from de-recognition or amortization of the said financial liabilities is recorded in the profits and losses for the current period.

(6) De-recognition of financial liabilities

Only when the prevailing obligations of a financial liability are relieved in all or in part may the recognition of the financial liability be terminated in all or partly. Where the Company (debtor) enters into an agreement with a creditor so as to substitute the existing financial liabilities by way of any new financial liability, and if the contractual stipulations regarding the new financial liability is substantially different from that regarding the existing financial liability, it terminates the recognition of the existing financial liability, and at the same time recognizes the new financial liability.

Where the recognition of a financial liability is totally or partially terminated, the enterprise concerned shall include into the profits and losses of the current period for the gap between the book value which has been terminated from recognition and the considerations it has paid (including the non-cash assets it has transferred out and the new financial liabilities it has assumed)

(7) Derivatives and embedded derivatives

Derivative financial instruments include derivatives are initially measured at fair value at the date when the derivative contracts are entered into and are substantially re-measured at fair value. The resulting gain and loss is recognized in profit or loss.

An embedded derivative is separated from the hybrid instrument, where the hybrid instrument is not designated as a financial asset or financial liability at fair value through profit or loss, and the treated as a standalone derivative if (a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract; and (b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative. If the Company is unable to measure the embedded derivative separately either at acquisition or at a subsequent balance sheet date, it designates the entire hybrid instrument as a financial asset or financial liability at fair value through profit or loss.

(8) Offsetting financial assets and financial liabilities

When the Company has a legal right that is currently enforceable to set off the recognized financial assets and financial liabilities, and intends either to settle on a net basis, or to realize the financial asset and settle the financial liability simultaneously, a financial asset and a financial liability shall be offset and the net amount is presented in the balance sheet. Except for the above circumstances, financial assets and financial liabilities shall be presented separately in the balance sheet and shall not be offset.

(9) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. The Company issues (including refinancing), re-purchases, sells or written-offs the equity instrument as the disposing of the changes of the equity. The Group not recognized the changes of the fair value of the equity instrument. The transaction expenses related to the equity transaction would be deducted from the equity.

All types of distribution (excluding stock dividends) made by the Company to holders of equity instruments are deducted from shareholders' equity. The Company does not recognize any changes in the fair value of equity instruments.

10. Receivables

(1) Accounts receivable with significant single amount for which the bad debt provision is made individually

Judgement basis or monetary standards of provision for bad debts of the individually significant accounts receivable	Receivables with the amount of RMB 5 million or more than RMB 5 million should recognize as the receivables with significant single amount.
Method of individual provision for bad debts of the individually significant accounts receivable	The Company made an independent impairment test on receivables with significant single amounts; the financial assets without impairment by independent impairment test should be included in financial assets portfolio with similar credit risk to take the impairment test. Receivables was recognized with impairment should no longer be included in receivables portfolio with similar credit risk to take the impairment test.

(2) Accounts receivable which the bad debt provision is withdrawn by credit risk characteristics

Name of portfolios	Bad debt provision method
Aging group	Aging analysis method

In the groups, adopting aging analysis method to withdraw bad debt provision:

Applicable Inapplicable

Age	Withdrawal proportion for accounts receivable (%)	Withdrawal proportion for other accounts receivable (%)
Within 1 year (including 1 year)	5.00%	5.00%
1-2 years	10.00%	10.00%
2-3 years	20.00%	20.00%
Over 3 years	30.00%	30.00%

In the groups, adopting balance percentage method to withdraw bad debt provision:

Applicable Inapplicable

In the groups, adopting other methods to withdraw bad debt provision:

Applicable Inapplicable

(3) Accounts receivable with an insignificant single amount but for which the bad debt provision is made individually

Reason of individually withdrawing bad debt provision	Receivables have dispute with the other parties or involving lawsuit and arbitration; receivables have obvious indication showing that the debtors are likely to fail to perform the duty of repayment, etc.
---	--

Withdrawal method for bad debt provision	The Company made independent impairment test on receivables with insignificant amount but with the following characteristics, if any objective evidence shows that the accounts receivable has been impaired, impairment loss shall be recognized on the basis of the gap between the current values of the future cash flow lower than its book value so as to withdraw provision for bad debts.
--	---

11. Inventory

(1) Classification

Inventories mainly include raw materials, work-in-progress and self-made semi-manufactured goods, revolving materials, finished products as well as stock products etc.

(2) Valuation method of inventories acquiring and issuing

The inventories should be measured by the actual cost when acquired, and the cost of the inventories including the procurement cost, processing cost and other cost. Bulk chemical raw materials, work-in-progress goods and finished products should be measured by the actual cost and should carry forward the cost by weighted average method when issuing; auxiliary materials, packing materials should be measured by actual cost and adopt the planned cost for accounting as well as included the difference between the actual cost and the planned cost into the material cost variance and according the material cost variance rate, work out the material cost variance which should be shared at the end of the month, and to adjust the planned cost that had issued the materials as the actual cost; low priced and easily worn articles should be recorded by actual cost and should adopt the one-time amortization method for accounting when consuming.

(3) Basis for determining net realizable value of inventories and provision methods for decline in value of inventories

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion, the estimated costs necessary to make the sale and relevant taxes. Net realizable value is determined on the basis of clear evidence obtained, and takes into consideration the purpose of holding inventories and effect of post balance sheet events.

At the balance sheet date, inventories are measured at the lower of the cost and net realizable value. If the net realizable value is below the cost of inventories, a provision for decline in value of inventories is made. The provision for inventories decline in value is determined normally by the difference of the cost of individual item less its realizable value. For large quantity and low value items of inventories, provision for decline in value is made based on categories of inventories. For items of inventories relating to a product line that are produced and marketed in the same geographical area, have the same or similar end users or purposes, and cannot be practicably evaluated separately from other items in that product line provision for decline in value is determined on an aggregate basis.

After the provision for decline in value of inventories is made, if the circumstances that previously caused inventories to be written down below cost no longer exist so that the net realizable value of inventories is higher than their cost, the original provision for decline in value is reversed and the reversal is included in profit or loss for the period.

(4) The perpetual inventory system is maintained for stock system.

(5) Amortization method of the low-value consumption goods and packing articles

For the low-value consumption goods, should be amortized by one-off amortization method when consuming; and for the packing articles, should be amortized by one-off amortization method when consuming.

12. Long-term equity investments

The long-term equity investments of this part refer to the long-term equity investments that the Company has control, joint control or significant influence over the investees. The long-term equity investment that the Company does not have control, joint control or significant influence over the investees, should be recognized as available-for-sale financial assets or be measured by fair value with the changes should be included in the financial assets accounting of the current gains and losses, and please refer the details of the accounting policies to “financial instrument”.

Joint control, refers to the control jointly owned according to the relevant agreement on an arrangement by the Company and the relevant activities of the arrangement should be decided only after the participants which share the control right make consensus. Significant influence refers to the power of the Company which could anticipate in the finance and the operation policies of the investees, but could not control or jointly control the formulation of the policies with the other parties.

(1) Recognition of investment costs

As for long-term equity investments acquired by enterprise merger, if the merger is under the same control, the share of the book value of the owner's equity of the merged enterprise, on the date of merger, is regarded as the initial cost of the long-term equity investment. The difference between the initial cost of the long-term equity investment and the payment in cash, non-cash assets transferred as well as the book value of the debts borne by the merging party shall offset against the capital reserve. If the capital reserve is insufficient to dilute, the retained earnings shall be adjusted. If the consideration of the merging enterprise is that it issues equity securities, it shall, on the date of merger, regard the share of the book value of the shareholder's equity of the merged enterprise on the consolidated financial statement of the ultimate control party as the initial cost of the long-term equity investment. The total face value of the stocks issued shall be regarded as the capital stock, while the difference between the initial cost of the long-term equity investment and total face value of the shares issued shall offset against the capital reserve. If the capital reserve is insufficient to dilute, the retained earnings shall be adjusted. The equities of the combined party which respectively acquired through multiple transaction under the same control that ultimately form into the combination of the enterprises under the same control, should be disposed according whether belongs to package deal; if belongs to package deal, each transaction would be executed accounting treatment by the Company as a transaction of acquiring the control right. If not belongs to package deal, it shall, on the date of merger, regard the enjoyed share of the book value of the shareholder's equity of the merged enterprise on the consolidated financial statement of the ultimate control party as the initial cost of the long-term equity investment, and as for the difference between the initial investment cost of the long-term equity investment and sum of the book value of the long-term equity investment before the combination and the book value of the consideration of the new payment that further required on the combination date, should adjust the capital reserve; if the capital reserve is insufficient to dilute, the retained earnings shall be adjusted. The equity investment held before the combination date which adopted the equity method for accounting, or the other comprehensive income confirmed for the available-for-sale financial assets, should not have any accounting disposal for the moment.

For the long-term investment required from the business combination under different control, the initial investment cost regarded as long-term equity investment on the purchasing date according to the combination cost, the combination costs shall be the sum of the fair values of the assets paid, the liabilities incurred or assumed and the equity securities issued by the Company. The equities of the acquirees which respectively acquired through multiple transaction that ultimately form into the combination of the enterprises under the different control, should be disposed according whether belongs to package deal; if belongs to package deal, each transaction would be executed accounting treatment by the Company as a transaction of acquiring the control right. If not belongs to package deal, the sum of the book value of the original held equity investment of the acquirees and the newly added investment cost should be regarded as the initial investment cost of the long-term equity investment that changed to be accounted by cost method. If the original held equity is calculated by cost method, the other relevant comprehensive income would not have any accounting disposal for the moment. If the original held equity investment is the financial assets available for sale, its difference between the fair value and the book value as well as the accumulative changes of the fair value that include in the other comprehensive income, should transfer into the current gains and losses.

The commission fees for audit, law services, assessment and consultancy services and other relevant expenses occurred in the business combination by the combining party or the purchase party, shall be recorded into current profits and losses upon their occurrence; the transaction expense from the issuance of equity securities or bonds securities which are as consideration for combination by the combining party, should be recorded as the initial amount of equity securities and bonds securities.

Besides the long-term equity investments formed by business combination, the other long-term equity investments shall be initially measured by cost, the cost is fixed in accordance with the ways of gaining, such as actual cash payment paid by the Company, the fair value of equity securities issued by the Company, the agreed value of the investment contract or agreement, the fair value or original carrying amount of exchanged assets from non-monetary assets exchange transaction, the fair value of the long-term equity investments, etc. The expenses, taxes and other necessary expenditures directly related with gaining the long-term equity investments shall also be recorded into investment cost.

(2) Subsequent measurement and recognition of gains or losses

A long-term equity investment where the investing enterprise has joint control (except for which forms into common operators) or significant influence over the investors should be measured by equity method. Moreover, long-term equity investment adopting the cost method in the financial statements, and which the Company has control on invested entity.

① Long-term equity investment measured by adopting cost method

The price of a long-term equity investment measured by adopting the cost method shall be included at its initial investment cost and append as well as withdraw the cost of investing and adjusting the long-term equity investment. The return on investment at current period shall be recognized in accordance with the cash dividend or profit announced to distribute by the invested entity, except the announced but not distributed cash dividend or profit included in the actual payment or consideration upon gaining the investment.

② Long-term equity investment measured by adopting equity method

If the initial cost of a long-term equity investment is more than the Company's attributable share of the fair value of the invested entity's identifiable net assets for the investment, the initial cost of the long-term equity investment may not be adjusted. If the initial cost of a long-term equity investment is less than the Company's attributable share of the fair value of the invested entity's identifiable net assets for the investment, the difference shall be included in the current profits and losses and the cost of the long-term equity investment shall be adjusted simultaneously.

When measured by adopting equity method, respectively recognize investment income and other comprehensive income according to the net gains and losses as well as the portion of other comprehensive income which should be enjoyed or be shared, and at the same time adjust the book value of the long-term equity investment; corresponding reduce the book value of the long-term equity investment according to profits which be declared to distribute by the investees or the portion of the calculation of cash dividends which should be enjoyed; for the other changes except for the net gains and losses, other comprehensive income and the owners' equity except for the profits distribution of the investees, should adjust the book value of the long-term equity investment as well as include in the capital reserve. The investing enterprise shall, on the ground of the fair value of all identifiable assets of the invested entity when it obtains the investment, recognize the attributable share of the net profits and losses of the invested entity after it adjusts the net profits of the invested entity. If the accounting policies adopted by the investees is not accord with that of the Company, should be adjusted according to the accounting policies of the Company and the financial statement of the investees during the accounting period and according which to recognize the investment income as well as other comprehensive income. For the transaction happened between the Company and associated enterprises as well as joint ventures, if the assets launched or sold not form into business, the portion of the unrealized gains and losses of the internal transaction, which belongs to the Company according to the calculation of the enjoyed proportion, should recognize the investment gains and losses on the basis. But the losses of the unrealized internal transaction happened between the Company and the investees which belongs to the impairment losses of the transferred assets, should not be neutralized. The assets launched by the Company to the associated enterprises or the joint ventures if could form into business, the long-term equity investment without control right which acquired by the investors, should regard the fair value of the launched business as the initial investment cost the newly added long-term equity investment, and for the difference

between the initial investment cost and the book value of the launched business, should be included into the current gains and losses with full amount. The Company shall recognize the net losses of the invested enterprise until the book value of the long-term equity investment and other long-term rights and interests which substantially form the net investment made to the invested entity are reduced to zero. However, if the Company has the obligation to undertake extra losses, it shall be recognized as the estimated liabilities in accordance with the estimated duties and then recorded into investment losses at current period. If the invested entity realizes any net profits later, the Company shall, after the amount of its attributable share of profits offsets against its attributable share of the un-recognized losses, resume recognizing its attributable share of profits.

For the long-term equity investment held by the Company before the first execution of the new accounting criterion on 1 Jan. 2007 of the associated enterprises and joint ventures, if there is debit difference of the equity investment related to the investment, should be included in the current gains and losses according to the amount of the straight-line amortization during the original remained period.

③ Acquiring shares of minority interest

In the preparation for the financial statements, the balance existed between the long-term equity investment increased by acquiring shares of minority interest and the attributable net assets on the subsidiary calculated by the increased shares held since the purchase date (or combination date), the capital reserves shall be adjusted, if the capital reserves are not sufficient to offset, the retained profits shall be adjusted.

④ Disposal of long-term equity investment

In the preparation of financial statements, the Company disposed part of the long-term equity investment on subsidiaries without losing its controlling right on them, the balance between the disposed price and attributable net assets of subsidiaries by disposing the long-term equity investment shall be recorded into owners' equity; where the Company loses the controlling right by disposing part of long-term equity investment on such subsidiaries, it shall treated in accordance with the relevant accounting policies in Method on preparation of combined financial statements.

For other ways on disposal of long-term equity investment, the balance between the book value of the disposed equity and its actual payment gained shall be recorded into current profits and losses.

For the long-term equity investment measured by adopting equity method, if the remained equity after disposal still adopts the equity method for measurement, the other comprehensive income originally recorded into owners' equity should adopt the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees according to the corresponding proportion. The owners' equity recognized owing to the changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution of the investees, should be transferred into the current gains and losses according to the proportion.

For the long-term equity investment which adopts the cost method of measurement, if the remained equity still adopt the cost method, the other comprehensive income recognized owing to adopting the equity method for measurement or the recognition and measurement standards of financial instrument before acquiring the control of the investees, should adopt the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees and should be carried forward into the current gains and losses according to the proportion; the changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution among the net assets of the investees which recognized by adopting the equity method for measurement, should be carried forward into the current gains and losses according to the proportion.

For those the Company lost the control of the investees by disposing part of the equity investment as well as the remained equity after disposal could execute joint control or significant influences on the investees, should change to measure by equity method when compiling the individual financial statement and should adjust the measurement of the remained equity to equity method as adopted since the time acquired; if the remained equity after disposal could not execute joint control or significant influences on the investees, should change the accounting disposal according to the relevant regulations of the recognition and measurement standards of financial instrument, and its difference between the fair value and book value on the date lose the control right should be included in the current gains and losses. For the other comprehensive income recognized by adopting equity method for measurement or the

recognition and measurement standards of financial instrument before the Company acquired the control of the investees, should execute the accounting disposal by adopting the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees when lose the control of them, while the changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution among the net assets of the investees which recognized by adopting the equity method for measurement, should be carried forward into the current gains and losses according to the proportion. Of which, for the disposed remained equity which adopted the equity method for measurement, the other comprehensive income and the other owners' equity should be carried forward according to the proportion; for the disposed remained equity which changed to execute the accounting disposal according to the recognition and measurement standards of financial instrument, the other comprehensive income and the other owners' equity should be carried forward in full amount.

For those the Company lost the control of the investees by disposing part of the equity investment, the disposed remained equity should change to calculate according to the recognition and measurement standards of financial instrument, and difference between the fair value and book value on the date lose the control right should be included in the current gains and losses. For the other comprehensive income recognized from the original equity investment by adopting the equity method, should execute the accounting disposal by adopting the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees when terminate the equity method for measurement, while for the owners' equity recognized owing to the changes of the other owner's equity except for the net gains and losses, other comprehensive income and the profits distribution of the investees, should be transferred into the current investment income with full amount when terminate adopting the equity method.

The Company respectively disposes the equity investment of the subsidiaries through multiple transactions until lose the control right, if the above transactions belongs to the package deal, should execute the accounting disposal by regarding each transaction as a deal of disposing the equity investment of the subsidiaries until lose the control right, while the difference between each expenses of the disposal and the book value of the long-term equity investment in accord with the disposed equity before losing the control right, should firstly be recognized as other comprehensive income then be transferred into the current gains and losses of losing the control right along until the time when lose it.

13. Fixed assets

(1) Conditions for recognition

The term "fixed assets" refers to the tangible assets that simultaneously possess the features as follows: (a) they are held for the sake of producing commodities, rendering labor service, renting or business management; and (b) their useful life is in excess of one fiscal year. The fixed assets are only recognized when the relevant economic benefits probably flow in the Company and its cost could be reliable measured. The fixed assets should take the initial measurement according to the cost and at the same time consider the influences of the factors of the estimated discard expenses.

(2) Depreciation methods

The Company shall withdraw the depreciation of fixed assets by adopting the straight-line method since the second month of its useful life. Useful life, expected net salvage value and annual depreciation rate of each fixed assets are as below:

Category of fixed assets	Method	Useful life (Year)	Salvage value (%)	Annual deprecation (%)
Housing and building	Average method of useful life	5-30	5-10	3.00-19.00
Machinery equipments	Average method of	10-18	5-10	5.00-9.50

	useful life			
Transportation vehicle	Average method of useful life	5	5-10	19.00-18.00
Electronic equipments and others	Average method of useful life	5	5-10	19.00-18.00

Net Salvage is refer to the assumption of fix assets estimated service life is full and is in the estimated state that the service life is in the end, the Group. The group currently obtained amount from the disposal amount after deducting the estimated disposal expense.

(3) Recognition basis, pricing and depreciation method of fixed assets by finance lease

The "finance lease" shall refer to a lease that has transferred in substance all the risks and rewards related to the ownership of an asset. Its ownership may or may not eventually be transferred. The fixed assets by finance lease shall adopt the same depreciation policy for self-owned fixed assets. If it is reasonable to be certain that the lessee will obtain the ownership of the leased asset when the lease term expires, the leased asset shall be fully depreciated over its useful life. If it is not reasonable to be certain that the lessee will obtain the ownership of the leased asset at the expiry of the lease term, the leased asset shall be fully depreciated over the shorter one of the lease term or its useful life.

14. Construction in progress

Construction in process is measured at actual cost. Actual cost comprises construction costs, borrowing costs that are eligible for capitalization before the fixed assets being ready for their intended use and other relevant costs. Construction in process is transferred to fixed assets when the assets are ready for their intended use.

See the details of the impairment test method of the impairment provision withdrawal method of the construction in progress to "Long-term assets impairment".

15. Borrowing costs

The borrowing costs shall include interest on borrowings, amortization of discounts or premiums on borrowings, ancillary expenses, and exchange balance on foreign currency borrowings. When the borrowing costs can be directly attributable to the construction or production of assets eligible for capitalization, and the asset disbursements or the borrowing costs have already incurred, and the construction or production activities which are necessary to prepare the asset for its intended use or sale have already started, the capitalization of borrowing costs begins. When the asset eligible for capitalization under acquisition and construction or production is ready for the intended use or sale, the capitalization of the borrowing costs shall be ceased. Other borrowing costs shall be recognized as expenses when incurred.

The to-be-capitalized amount of interests shall be determined in light of the actual interests incurred of the specially borrowed loan at the present period minus the income of interests earned on the unused borrowing loans as a deposit in the bank or as a temporary investment; the enterprise shall calculate and determine the to-be-capitalized amount on the general borrowing by multiplying the weighted average asset disbursement of the part of the accumulative asset disbursements minus the general borrowing by the capitalization rate of the general borrowing used. The capitalization rate shall be calculated and determined in light of the weighted average interest rate of the general borrowing.

During the period of capitalization, the exchange balance on foreign currency special borrowings shall be capitalized; the exchange balance on foreign currency general borrowings shall be recorded into current profits and losses.

The term "assets eligible for capitalization" refers to the fixed assets, investment real estate, inventories and other assets, of which the

acquisition and construction or production may take quite a long time to get ready for its intended use or for sale.

Where the acquisition and construction or production of a qualified asset is interrupted abnormally and the interruption period lasts for more than 3 months, the capitalization of the borrowing costs shall be suspended.

16. Biological assets

(1) Consumptive biological assets

Consumptive biological assets refer to the biological assets held for sale or to be harvested as agricultural products in future, including crops, vegetables under growing, timber production forest and domestic animals for sale. The consumptive biological assets shall be measured based on cost. All costs for planting, creating, cultivating or raising of consumptive biological assets shall be the necessary expenses directly added to such assets that accrued before harvest, including any loan that satisfies capitalization conditions. The subsequent expenses for keeping and feeding the consumptive biological assets after harvest should be recognized as the losses and gains of the current period.

Upon harvest or sale, the cost of consumptive biological assets shall be based on its book value through weighted average.

On the date of Balance Sheet, the consumptive biological assets shall be measured with lower of cost and net realizable value, and the method for confirming the reserve for inventory price drop shall be adopted to confirm the reserve for price drop of consumptive biological assets. If the impacts of depreciation disappear, the depreciation amount shall be recovered, and the reserve for price drop originally accrued shall be reversed. Such amount reversed shall be recognized as loss and gain for the current period.

If consumptive biological assets change its usage to be as productive biological assets, the cost after such change shall be confirmed based on the book value when the usage is changed. If consumptive biological assets are changed as public biological assets, depreciation shall be taken into consideration pursuant to Corporate Accounting Rules No.8 – Assets Depreciation. When depreciation occur, accrued the depreciation reserve first and then confirm based on the book value after such accrual.

(2) Productive biological assets

Productive biological assets refer to agricultural products produced, and biological assets held for labor provision or lease, including economic forest, firewood forest, productive animals and labor animals. The productive biological assets shall be measured based on cost. All costs for creating or fostering productive biological assets shall be the necessary expenses directly added to such assets that accrued before it reaches expected production purpose, including any loan that satisfies capitalization conditions.

The Company shall withdraw the depreciation of the productive biological assets by adopting the straight-line method since the second month of its useful life. Useful life, expected net salvage value and annual depreciation rate of each productive biological assets are as below:

Category	Useful life (Year)	Expected net salvage value (%)	Annual depreciation (%)
Livestock	5	5%	19

The Company shall review the service life, expected net residuals and depreciation method of the productive biological assets at least by the end of the year. In case of any change, it shall be deemed as accounting estimate change.

The difference between proceedings from disposal (sale, loss, death or damage) of the productive biological assets deducted by book value and related tax shall be recognized as loss and gain for the current period.

The Company shall check on the date of Balance Sheet whether there is a depreciation sign for the productive biological assets. If yes, estimate the recoverable amount. Such recoverable amount shall be estimated based on single asset item. If it is difficult, the recoverable amount of the portfolio shall be confirmed based on the portfolio such assets belong to. If the recoverable amount of the assets is lower than book value, reserve for asset depreciation shall be accrued based on such difference, and recognized as loss and gain for the current period.

The above assets impairment losses once be recognized, should not be reversed during the accounting periods afterwards.

If the productive biological assets changed the usage as the consumptive biological assets, the cost after the change should be

recognized as the book value when changing the usage; of the productive biological assets changed the usage as non-profit living assets, should be recognized according to the book value after the withdrawal of the impairment provision in accord with the regulation of No. ASBE-Assets Impairment for considering whether there was impairment and should withdraw the impairment provision in ahead of it.

17. Intangible assets

(1) Pricing method, useful life and impairment test

The term "intangible asset" refers to the identifiable non-monetary assets possessed or controlled by enterprises which have no physical shape.

The intangible assets shall be initially measured according to its cost. The costs related with the intangible assets, if the economic benefits related to intangible assets are likely to flow into the enterprise and the cost of intangible assets can be measured reliably, shall be recorded into the costs of intangible assets; otherwise, it shall be recorded into current profits and losses upon the occurrence.

The use right of land gained is usually measured as intangible assets. For the self-developed and constructed factories and other constructions, the related expenditures on use right of land and construction costs shall be respectively measured as intangible assets and fixed assets. For the purchased houses and buildings, the related payment shall be distributed into the payment for use right of land and the payment for buildings, if it is difficult to be distributed, the whole payment shall be treated as fixed assets.

For intangible assets with a finite service life, from the time when it is available for use, the cost after deducting the sum of the expected salvage value and the accumulated impairment provision shall be amortized by straight line method during the service life. While the intangible assets without certain service life shall not be amortized.

At the end of period, the Company shall check the service life and amortization method of intangible assets with finite service life, if there is any change, it shall be regarded as a change of the accounting estimates. Besides, the Company shall check the service life of intangible assets without certain service life, if there is any evidence showing that the period of intangible assets to bring the economic benefits to the enterprise can be prospected, it shall be estimated the service life and amortized in accordance with the amortization policies for intangible assets with finite service life.

(2) Accounting polices of internal R & D expenses

The expenditures for internal research and development projects of an enterprise shall be classified into research expenditures and development expenditures.

The research expenditures shall be recorded into the profit or loss for the current period.

The development expenditures shall be confirmed as intangible assets when they satisfy the following conditions simultaneously, and shall be recorded into profit or loss for the current period when they don't satisfy the following conditions.

- ① It is feasible technically to finish intangible assets for use or sale;
- ② It is intended to finish and use or sell the intangible assets;
- ③ The usefulness of methods for intangible assets to generate economic benefits shall be proved, including being able to prove that there is a potential market for the products manufactured by applying the intangible assets or there is a potential market for the intangible assets itself or the intangible assets will be used internally;
- ④ It is able to finish the development of the intangible assets, and able to use or sell the intangible assets, with the support of sufficient technologies, financial resources and other resources;
- ⑤ The development expenditures of the intangible assets can be reliably measured.

As for expenses that can't be identified as research expenditures or development expenditures, the occurred R & D expenses shall be

all included in current profits and losses.

18. Impairment of long-term assets

For non-current financial Assets of fixed Assets, projects under construction, intangible Assets with limited service life, investing real estate with cost model, long-term equity investment of subsidiaries, cooperative enterprises and joint ventures, the Company should judge whether decrease in value exists on the date of balance sheet. Recoverable amounts should be tested for decrease in value if it exists. Other intangible Assets of reputation and uncertain service life and other non-accessible intangible assets should be tested for decrease in value no matter whether it exists.

If the recoverable amount is less than book value in impairment test results, the provision for impairment of differences should include in impairment loss. Recoverable amounts would be the higher of net value of asset fair value deducting disposal charges or present value of predicted cash flow. Asset fair value should be determined according to negotiated sales price of fair trade. If no sales agreement exists but with asset active market, fair value should be determined according to the Buyer's price of the asset. If no sales agreement or asset active market exists, asset fair value could be acquired on the basis of best information available. Disposal expenses include legal fees, taxes, cartage or other direct expenses of merchantable Assets related to asset disposal. Present value of predicted asset cash flow should be determined by the proper discount rate according to Assets in service and predicted cash flow of final disposal. Asset depreciation reserves should be calculated on the basis of single Assets. If it is difficult to predict the recoverable amounts for single Assets, recoverable amounts should be determined according to the belonging asset group. Asset group is the minimum asset combination producing cash flow independently.

In impairment test, book value of the business reputation in financial report should be shared to beneficial asset group and asset group combination in collaboration of business merger. It is shown in the test that if recoverable amounts of shared business reputation asset group or asset group combination are lower than book value, it should determine the impairment loss. Impairment loss amount should firstly be deducted and shared to the book value of business reputation of asset group or asset group combination, then deduct book value of all assets according to proportions of other book value of above assets in asset group or asset group combination except business reputation.

After the asset impairment loss is determined, recoverable value amounts would not be returned in future.

19. Amortization method of long-term deferred expenses

Long-term deferred expenses refer to general expenses with the apportioned period over one year (one year excluded) that have occurred but attributable to the current and future periods. The long-term deferred expenses mainly including the land contract fee. And the long-term deferred expense shall be amortized averagely within benefit period.

20. Payroll

(1) Accounting treatment of short-term compensation

Short-term compensation mainly including salary, bonus, allowances and subsidies, employee services and benefits, medical insurance premiums, birth insurance premium, industrial injury insurance premium, housing fund, labor union expenditure and personnel education fund, non-monetary benefits etc. The short-term compensation actually happened during the accounting period when the active staff offering the service for the Company should be recognized as liabilities and is included in the current gains and losses or relevant assets cost. Of which the non-monetary benefits should be measured according to the fair value.

(2) Accounting treatment of the welfare after demission

Welfare after demission mainly includes setting drawing plan. Of which setting the drawing plan mainly includes basic endowment insurance, unemployment insurance and annuity etc, and the corresponding payable and deposit amount should be included into the relevant assets cost or the current gains and losses when happen.

(3) Accounting treatment of the welfare of other long-term staffs

The other long-term welfare that the Company offers to the staffs, if met with the setting drawing plan, should be accounting disposed according to the setting drawing plan, while the rest should be disposed according to the setting revenue plan.

21. Share-based payment

(1) Accounting treatment of share-based payment

Share-based payment refers to the transaction in order to require the service offered by the employees and other parties that grants the equity instruments or responsible for the liabilities recognized on the basis of the equity instruments. Share-based payment divided into equity-settled share-based payment and cash-settled share-based payment.

① Equity-settled share-based payment

It is a share-based payment settled by equity used for exchange the service offered by the staffs and be measured by the fair value on the grant date of granting the equity instrument for the staffs. When the services are fully rendered during vesting period or specified performance targets are met, based on the best estimate of the number of the vesting equity instruments during vesting period and according to the straight-line method to calculate and to include into the relevant cost or expenses/when using the vesting power immediately after the granting, should include the relevant cost or expenses on the grant date and correspondingly increase the capital reserve.

On each balance sheet date within the vesting period, the Company makes the best estimate base on the subsequent information newly required such as the changes of the vesting staffs' number to modify the number of the estimated vesting equity instrument. The above influences of the estimation should be included into the current relevant cost or expenses and correspondingly adjust the capital surplus.

For equity-settled share-based payment made in return of other parties' services and the fair value of the other parties' services can be reliably measured, it will be measured based on the fair value of the other parties' services on the date of grant; if the fair value of the other parties' services cannot be reliably measured but the fair value of equity instruments can be reliably measured, it will be recognized in relevant costs or expenses and the capital reserves shall be adjusted accordingly at the fair value of such instruments on the date of the grant.

② Cash-settled share-based payment

The cash-settled share-based payment should be measured according to the fair value of the liabilities recognized based on the shares or other equity instrument undertaken by the Company. For the cash-settled share-based payment made in return for the rendering of employee services that may be exercised immediately after the grant, the fair value of the liability incurred by the Company shall, on the date of the grant, be recognized in relevant costs or expenses and the liabilities shall be increased accordingly. For cash-settled share-based payment made in return for the rendering of employee services that cannot be exercised until the services are fully provided during the vesting period or specified performance targets are met, on each balance sheet date within the vesting period, the services acquired in the current period shall, based on the best estimate of the number of exercisable instruments, be recognized in relevant costs or expenses and the corresponding liabilities at the fair value of the liability incurred by the Company.

On each balance sheet date and the settlement date before the settlement of the relevant liabilities, the Company should re-measure the fair value of the liabilities and its changes should be included in the current gains and losses.

(2) Relevant accounting treatment about revision and termination of share-based payment plans

As to the revision on the share-based payment plan made by the Company, if the fair value of the granted equity instrument increases after the revision, it shall recognize the increase of the service gained according to the increase of the fair value of equity instrument. The increase of the fair value of equity instrument refers to the balance between the fair value on the revising date of the equity instruments before and after the revision. If the total fair value of share-base payment decreases after the revision or adopting other ways against the staffs in the revision, it shall continue to conduct accounting treatment on the service gained as if the revision never happens, only if the Company p cancel partial or total granted equity instrument.

During the vesting period, if the Company cancels the granted equity instrument, the Company shall treat the cancel of granted equity instrument as accelerating the vesting, and includes the amount shall be recognized during the remained vesting period into current profit and loss, and also recognize the capital reserves. If staffs or other party can choose to meet the non-vesting conditions but not meets with them during the vesting period, which will be treated as the cancel of granted equity instrument by the Company.

22. Revenue**(1) Selling products**

No revenue from selling goods may be recognized unless the following conditions are met simultaneously: the significant risks and rewards of ownership of the goods have been transferred to the buyer by the enterprise; the enterprise retains neither continuous management right that usually keeps relation with the ownership nor effective control over the sold goods; the relevant amount of revenue can be measured in a reliable way; the relevant economic benefits may flow into the enterprise; and the relevant costs incurred or to be incurred can be measured in a reliable way.

(2) Providing labor services

If the Company can reliably estimate the outcome of a transaction concerning the labor services it provides, it shall recognize the revenue from providing services employing the percentage-of-completion method on the date of the balance sheet. The completed proportion of a transaction concerning the providing of labor services shall be decided by the proportion of the labor service already provided to the total labor service to provide.

The outcome of a transaction concerning the providing of labor services can be measured in a reliable way, means that the following conditions shall be met simultaneously: ① The amount of revenue can be measured in a reliable way; ② The relevant economic benefits are likely to flow into the enterprise; ③ The schedule of completion under the transaction can be confirmed in a reliable way; and ④ The costs incurred or to be incurred in the transaction can be measured in a reliable way.

If the outcome of a transaction concerning the providing of labor services can not be measured in a reliable way, the revenue from the providing of labor services shall be recognized in accordance with the amount of the cost of labor services incurred and expected to be compensated, and make the cost of labor services incurred as the current expenses. If it is predicted that the cost of labor services incurred couldn't be compensated, thus no revenue shall be recognized.

Where a contract or agreement signed between Company and other enterprises concerns selling goods and providing of labor services, if the part of sale of goods and the part of providing labor services can be distinguished from each other and can be measured respectively, the part of sale of goods and the part of providing labor services shall be treated respectively. If the part of selling goods and the part of providing labor services can not be distinguished from each other, or if the part of sale of goods and the part of providing labor services can be distinguished from each other but can not be measured respectively, both parts shall be conducted as selling goods.

(3) Royalty revenue

In accordance with relevant contract or agreement, the amount of royalty revenue should be recognized as revenue on accrual basis.

(4) Interest revenue

The amount of interest revenue should be measured and confirmed in accordance with the length of time for which the Company's

monetary fund is used by others and the agreed interest rate.

23. Government subsidies

(1) Judgment basis and accounting treatment of government subsidies related to assets

Government subsidies consist of the government subsidies pertinent to assets and government subsidies pertinent to income. The Company defines the acquisition of government subsidy of long term assets using in construction or formed in other ways as government subsidiary related to income. If the government document not clearly regulate the subsidy acquirees then adopt the following method to divide the government subsidy into government subsidy related to income and government subsidy related to assets; (1) If the government document clearly regulate the specific project, according to the budget project will form the spending amount of assets and the cost included of spending amount ratio to divide, and division ratio shall be reexamine in every balance sheet date, renew if necessary. (2) The usage in government documents is for general description only, for which do not identify a particular project, consider as government subsidy related to income.

The government subsidies pertinent to assets shall be recognized as deferred income, equally distributed within the useful lives of the relevant assets, and included in the current profits and losses. The government subsidies pertinent to incomes shall be treated respectively in accordance with the circumstances as follows: those subsidies used for compensating the related future expenses or losses of the enterprise shall be recognized as deferred income and shall included in the current profits and losses during the period when the relevant expenses are recognized; or those subsidies used for compensating the related expenses or losses incurred to the enterprise shall be directly included in the current profits and losses.

Where it is necessary to refund any government subsidy which has been recognized, it shall be treated respectively in accordance with the circumstances as follows: if there is the deferred income concerned, the book balance of the deferred income shall be offset against, but the excessive part shall be included in the current profits and losses; or if there is no deferred income concerned to the government subsidy, it shall be directly included in the current profits and losses.

(2) Judgment basis and accounting treatment of government subsidies related to profits

Government subsidies consist of the government subsidies pertinent to assets and government subsidies pertinent to income and the rest should be recognized as the government subsidy related to the revenue. The Company defines the acquisition of government subsidy of long term assets using in construction or formed in other ways as government subsidiary related to income. If the government document not clearly regulate the subsidy acquirees then adopt the following method to divide the government subsidy into government subsidy related to income and government subsidy related to assets; (1) If the government document clearly regulate the specific project, according to the budget project will form the spending amount of assets and the cost included of spending amount ratio to divide, and division ratio shall be reexamine in every balance sheet date, renew if necessary. (2) The usage in government documents is for general description only, for which do not identify a particular project, consider as government subsidy related to income.

The government subsidies pertinent to incomes shall be treated respectively in accordance with the circumstances as follows: those subsidies used for compensating the related future expenses or losses of the enterprise shall be recognized as deferred income and shall included in the current profits and losses during the period when the relevant expenses are recognized; or those subsidies used for compensating the related expenses or losses incurred to the enterprise shall be directly included in the current profits and losses.

When it is necessary to refund any government subsidy which has been recognized, if there is the deferred income concerned, the book balance of the deferred income shall be offset against, but the excessive part shall be included in the current profits and losses; and if there is no deferred income concerned to the government subsidy, it shall be directly included in the current profits and losses.

24. Deferred income tax assets/deferred income tax liabilities

(1) Income tax of the current period

On the balance sheet date, for the current income tax liabilities (or assets) of the current period as well as the part formed during the previous period, should be measured by the income tax of the estimated payable (returnable) amount which be calculated according to the regulations of the tax law. The amount of the income tax payable which is based by the calculation of the current income tax expenses, are according to the result measured from the corresponding adjustment of the pre-tax accounting profit of 2014 which in accord to the relevant regulations of the tax law.

(2) Deferred income tax assets and deferred income tax liabilities

The difference between the book value of certain assets and liabilities and their tax assessment basis, as well as the temporary difference occurs from the difference between the book value of the items which not be recognized as assets and liabilities but could confirm their tax assessment basis according to the regulations of the tax law, the deferred income tax assets and the deferred income tax liabilities should be recognized by adopting liabilities law of the balance sheet.

No deferred tax liability is recognized for a temporary difference arising from the initial recognition of goodwill, the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). Besides, no deferred tax assets is recognized for the taxable temporary differences related to the investments of subsidiary companies, associated enterprises and joint enterprises, and the investing enterprise can control the time of the reverse of temporary differences as well as the temporary differences are unlikely to be reversed in the excepted future. Otherwise, the Group should recognize the deferred income tax liabilities arising form other taxable temporary difference.

No deferred taxable assets should be recognized for the deductible temporary difference of initial recognition of assets and liabilities arising from the transaction which is not business combination, the accounting profits will not be affected, nor will the taxable amount or deductible loss be affected at the time of transaction. Besides, no deferred taxable assets should be recognized for the deductible temporary difference related to the investments of the subsidiary companies, associated enterprises and joint enterprises, which are not likely to be reversed in the expected future or is not likely to acquire any amount of taxable income tax that may be used for making up such deductible temporary differences. Otherwise, the Company shall recognize the deferred income tax assets arising from a deductible temporary difference basing on the extent of the amount of the taxable income that is likely to be acquired to make up such deductible temporary differences

For any deductible loss or tax deduction that can be carried forward to the next year, the corresponding deferred income tax asset shall be determined to the extent that the amount of future taxable income to be offset by the deductible loss or tax deduction to be likely obtained.

On the balance sheet date, the deferred income tax assets and the deferred income tax liabilities shall be measured at the tax rate applicable to the period during which the assets are expected to be recovered or the liabilities are expected to be settled.

The book value of deferred income tax assets shall be reviewed at each balance sheet date. If it is unlikely to obtain sufficient taxable income to offset against the benefit of the deferred income tax asset, the book value of the deferred income tax assets shall be written down. Any such write-down should be subsequently reversed where it becomes probable that sufficient taxable income will be available.

(3) Income tax expenses

Income tax expenses include current income tax and deferred income tax.

The rest current income tax and the deferred income tax expenses or revenue should be included into current gains and losses except for the current income tax and the deferred income tax related to the transaction and events that be confirmed as other comprehensive income or be directly included in the shareholders' equity which should be included in other comprehensive income or shareholders' equity as well as the book value for adjusting the goodwill of the deferred income tax occurs from the business combination.

(4) Offset of income tax

The current income tax assets and liabilities of the Company should be listed by the written-off net amount which intend to executes the net amount settlement as well as the assets acquiring and liabilities liquidation at the same time while owns the legal rights of settling the net amount.

The deferred income tax assets and liabilities of the Company should be listed as written-off net amount when having the legal rights of settling the current income tax assets and liabilities by net amount and the deferred income tax and liabilities is relevant to the income tax which be collected from the same taxpaying bodies by the same tax collection and administration department or is relevant to the different taxpaying bodies but during each period which there is significant reverse of the deferred income assets and liabilities in the future and among which the involved taxpaying bodies intend to settle the current income tax and liabilities by net amount or are at the same time acquire the asset as well as liquidate the liabilities.

25. Lease

(1) Accounting treatment of operating lease

(1) Business of operating leases recorded by the Group as the lessee

The rent expenses from operating leases shall be recorded by the lessee in the relevant asset costs or the profits and losses of the current period by using the straight-line method over each period of the lease term. The initial direct costs shall be recognized as the profits and losses of the current period. The contingent rents shall be recorded into the profits and losses of the current period in which they actually arise.

(2) Business of operating leases recorded by the Group as the lessor

The rent incomes from operating leases shall be recognized as the profits and losses of the current period by using the straight-line method over each period of the lease term. The initial direct costs of great amount shall be capitalized when incurred, and be recorded into current profits and losses in accordance with the same basis for recognition of rent incomes over the whole lease term. The initial direct costs of small amount shall be recorded into current profits and losses when incurred. The contingent rents shall be recorded into the profits and losses of the current period in which they actually arise.

(2) Accounting treatments of financial lease

(1) Business of finance leases recorded by the Company as the lessee

On the lease beginning date, the Company shall record the lower one of the fair value of the leased asset and the present value of the minimum lease payments on the lease beginning date as the entering value in an account, recognize the amount of the minimum lease payments as the entering value in an account of long-term account payable, and treat the balance between the recorded amount of the leased asset and the long-term account payable as unrecognized financing charges. Besides, the initial direct costs directly attributable to the leased item incurred during the process of lease negotiating and signing the leasing agreement shall be recorded in the asset value of the current period. The balance through deducting unrecognized financing charges from the minimum lease payments shall be respectively stated in long-term liabilities and long-term liabilities due within 1 year.

Unrecognized financing charges shall be adopted by the effective interest rate method in the lease term, so as to calculate and recognize current financing charges. The contingent rents shall be recorded into the profits and losses of the current period in which they actually arise.

(2) Business of finance leases recorded by the Company as the lessor

On the beginning date of the lease term, the Company shall recognize the sum of the minimum lease receipts on the lease beginning date and the initial direct costs as the entering value in an account of the financing lease values receivable, and record the unguaranteed residual value at the same time. The balance between the sum of the minimum lease receipts, the initial direct costs and the unguaranteed residual value and the sum of their present values shall be recognized as unrealized financing income. The balance

through deducting unrealized financing incomes from the finance lease accounts receivable shall be respectively stated in long-term claims and long-term claims due within 1 year.

Unrecognized financing incomes shall be adopted by the effective interest rate method in the lease term, so as to calculate and recognize current financing revenues. The contingent rents shall be recorded into the profits and losses of the current period in which they actually arise.

26. Significant accounting judgments and estimates

Due to the internal uncertainty of operating activities, the Company needs to make judgments, estimates and assumptions for carrying amounts of statement items that can't be measured accurately during the process of applying accounting policies. Such judgments, estimates and assumptions are made on the basis of the past experience of Company's management staffs and on the consideration of other relevant factors. Such judgments, estimates and assumptions have effect on reporting amount of incomes, expense, assets and liabilities, as well as disclosure of contingent liabilities on the balance sheet date. However, the uncertainty of such estimates may results in major adjustments of carrying amounts of assets or liabilities that will be influenced in future.

The Company shall have a check on the aforesaid judgments, estimates and assumptions at fixed intervals on the basis of sustainable operation. As for the change in accounting estimates that only effects on the current period of the change, the affected amount thereof shall be recognized at current period of the change. As for accounting estimates that effects on both the current period of the change and future periods, the affected amount thereof shall be recognized at current period of the change and future periods.

On balance sheet date, major fields requiring judgments, estimates and assumptions on amounts of financial statement items by the Company are as follows:

(1) Classification of leases

In line with rules in Accounting Standards for Enterprises No. 21 – Leases, the Company classifies leases into operating leases and finance leases. Upon the classification, the management staffs need to make analysis and judgments on whether to essentially transfer all risks and remuneration relating to the ownership of leased-out assets to the lessee, or whether the Company has essentially undertaken all risks and remuneration relating to the ownership of leased-in assets.

(2) Withdrawal of bad debt provisions

The Company shall, in accordance with accounting policies of receivables, calculate bad debt provisions by adopting allowance method. Impairment of accounts receivable is based on the assessment of the recovery of accounts receivable. Identification of impairment of accounts receivable requires judgments and estimates by management staffs. The difference between actual outcomes and originally estimated outcomes, which will influence the carrying amount of accounts receivable and bad debt provisions thereof in the estimated period of the change, shall be withdrawn or reversed.

(3) Inventory depreciation reserves

The Company shall calculate whichever is lower between the cost and realizable net value in light of inventory accounting policies. As for inventories of which the cost is higher than the realizable net value and inventories which are obsolete and unsalable inventory depreciation reserves shall be withdrawn. Impairment of inventories to realizable net value is based on the assessment of the marketing of inventories and realizable net value thereof. Identification of inventory impairment requires well-established evidences by management staffs, as well as judgments and estimates based on consideration of the purpose of holding inventories and other factors such as events occurring after the date of balance sheet. The difference between actual outcomes and originally estimated outcomes, which will influence the carrying amount of inventories and inventory depreciation reserves in the estimated period of the change, shall be withdrawn or reversed.

(4) Fair values of financial instruments

As for financial instruments not existing in active trading market, the Company shall determine their fair values by all kinds of assessment methods, which include model analysis of discounted cash flow and etc. During the assessment, the Company needs to

assess for respects such as future cash flows, credit risks, market volatility, correlation, and choose appropriate discount rate. Such related assumptions have uncertainty, of which the change will effect on fair values of financial instruments.

(5) Impairment of financial assets available for sale

To a large extent, whether the impairment of financial assets available for sale is recognized or not relies on the judgments and assumptions of the management staffs. In that way, the Company shall be certain about whether to recognize impairment losses of financial assets available for sale in the profit statement. During the process of making judgments and assumptions, the Company needs to evaluate how much the fair value of such investment is less than its cost, how long such investment will last, and the financial condition and short-term business outlook of the invested parties, which include industry status, technology transform, credit rating, default rate and risks from the opposite parties.

(6) Impairment provisions of non-financial non-current assets

The Company shall judge whether there is sign of impairment of non-current assets other than financial assets on balance sheet date. Intangible assets with uncertain service lives, besides being conducted with annual impairment test every year, have to accept impairment tests when there is sign of impairment. Other non-current assets except for financial assets have to accept impairment tests when there is sign indicating the carrying amount thereof is unrecoverable.

When the carrying amounts of the asset or group assets are higher than the recoverable amounts, namely whichever is higher between the net amount through deducting disposal charges from the fair value and the present value of the estimated future cash flow, impairment occurs.

The net amount of the fair value of an asset minus the disposal expenses shall be determined in light of the amount of the basis of the price as stipulated in the sales agreement or the observable market price in the fair transaction minus the incremental cost directly subject to the disposal of the asset.

When estimating present value of future cash flows, it is necessary to make significant judgments on characters of the asset or asset group, such as output, sales price, related operating costs, and discount used to calculate the present value. When estimating recoverable amount, the Company shall adopt all relevant materials that can be required, including estimates relating to output, sales price and relevant operating costs judged by rational and supportable assumptions.

The Company tests whether there is impairment of good will at least for every year, which requires itself to estimate the present value of the future cash flow of group assets or combination of group assets. When estimating the present value of the future cash flow, the Company needs to estimate the cash flow arising from future group assets or combination of group assets, and at the same time choose appropriate discount rate to determine the present value of the future cash flow.

(7) Depreciation and amortization

Upon consideration on the salvage value of investment real estates, fixed assets and intangible assets, the Company shall withdraw depreciation and amortization by straight-line method over their service lives. The Company checks on service lives at fixed intervals, so as to determine the amounts of depreciation expenses and amortization expenses at each period. Service lives are confirmed in accordance with the past experience on similar assets of the Company, along with renewed technology of expectation. If any significant change occurred to previous estimated, depreciation expenses and amortization expenses will be adjusted in future period.

(8) Development expenditure

When recognizing the capitalized amount, the management layer of the Company needs to make suppose about the estimated future cash flow, the appropriate discounts rate and the estimated benefit period related to the assets.

(9) Deferred income tax assets

In a limit providing large possibility of offset losses from sufficient taxable profits, the Group shall recognize deferred income tax assets in line with all unused tax losses, which requires management staffs of the Group to estimate the time when future taxable profits occurs and the amount thereof by applying plenty of judgments and combining tax planning strategies, so as to determine the amount of the recognizable deferred income tax assets.

(10) Income taxes

There's certain uncertainty of disposal and calculation of taxes of partial transactions in normal operating activities. It is uncertain whether some pre-taxed items can set aside the approvals by tax authorities or not. If there are differences between the ultimate recognition outcomes and the originally estimated amounts of such tax issues, then such differences shall effect on the current income tax and deferred income tax during the ultimate recognition period.

27. Changes in main accounting policies and estimates**(1) Change of accounting policies**

Applicable Inapplicable

(1) Alteration of the accounting polices

Alteration of the accounting polices led by executing the new ASBE

At the year-begin of 2014, the Ministry of Finance issued No. 39 of ASBE—Fair Value Measurement, No. 30 of ASBE—Presentation of Financial Statements (revised in 2014), No. 9 of ASBE—Employee Compensation (revised in 2014), No. 33 of ASBE—Consolidation Financial Statement (revised in 2014). No. 40 of ASBE—Joint Venture Arrangement, No. 2 of ASBE—Long-term Investment (revised in 2014) and No. 41 of ASBE—Equity Disclosure of Other Entities which respectively by C-H [2014] No.6, No. 7, No. 8, No. 10, No. 11, No. 14 and No. 16 which be required to execute among the enterprises that applied the ASBE since 1 Jul. 2014 as well as encouraged the enterprises listed overseas to execute in advance. At the same time, the Ministry of Finance issued No. 37 of ASBE—Presentation of Financial Instruments (revised in 2014) as C-H [2014] No. 23 (hereinafter referred to Presentation Guidelines of Financial Instruments for short), which be required to present the financial instruments according to the requirements of the guidelines in Y2014 and the following period among the financial statement.

Approved by the resolution of the 19th Session of the 7th Board of Directors held by the Company on 38 Mar. 2015, the Company began to execute the above 7 new issued or revised enterprises principles except for the presentation guidelines of financial instruments since 1 Jul. 2014 and began to execute the presentation guidelines of financial instruments when compiling the 2014 financial report and adjusted according to the relative requirements of each guidelines, while the influences on the financial statement items during the current period and the earlier stage of the presentation as well as the amount were as follows:

Name of criterions	Notes of the content and the influences	The affected amount of the relevant financial statement items on 1 Jan. 2014/of Y2013	
		Name of items	Affected amount
No. 2 of ASBE—Long-term Equity Investment	The Group had no joint control or significant influences on the investees before executing the No. 2 of ASBE—Long-term Equity Investment (revised in 2014), and the equity investment which had no quotation in the active market as well as its fair value could be not reliable measured should be measured as long-term equity investment by cost method. After executed the No. 2 of ASBE—Long-term Equity Investment (revised in 2014), the Group measured the equity investment which didn't have joint control or significant influences on the investees and had no quotation in the active market as well as its fair value could not be reliable measured as available-for-sale	Long-term equity investment	-67,442,600.00
		Available-for-sale financial assets	67,442,600.00

	financial assets. The Group executed the accounting treatment of the above changes of accounting policies by retrospective application.

According to international accounting standards	959,950,402.84	1,000,765,730.65	6,586,703,245.55	5,984,760,133.73

(2) Differences of net profit and net assets disclosed in financial reports prepared under overseas and Chinese accounting standards

Applicable Inapplicable

(3) Explain reasons for the differences between accounting data under domestic and overseas accounting standards, for audit data adjusting differences had been foreign audited, should indicate the name of the foreign institutions

Effects of domestic equipment exempted from income tax

The Company exempted from income tax for buying domestic equipment. According to Chinese accounting standards, the income tax expenses are directly reduced which are recognized as deferred income related to assets by the international accounting standards. According to the regulations of the international accounting standards, this difference is amortized over the fixed using periods of year of the fixed assets and adjusting net income and

net assets.
