Section IV. Report of the Board of Directors

I. Introduction

The first half year of 2016, under the background of macro-economic environment continued depression, Tellus achieved a favorable operation results by means of innovation thinking and open-sourcing and potential-tapping, total profit and net profit attributable to parent company have a major growth from a year earlier. In first half year of 2016, operation revenue achieved 157.15 million Yuan with 1.34 million Yuan down compared with last period's 158.49 million Yuan, a 0.85% declined; total profit reached 18.57 million Yuan with 10.06 million Yuan growth compared with last period's 8.51 million Yuan, a growth of 118.21%; the net profit attributable to parent company reached 17.75 million Yuan with 10.10 million Yuan growth compared with last period's 7.65 million Yuan, a growth of 131.99%. Main reasons of the above mentioned growth are as: the rental income and investment income increased, the financial expenses declined.

On current profit of main business increased substantially, transition work of Tellus was carried out with the utmost propriety and promoted actively. During the period, as entered the retail market of jewelry industry, the Anhui Tellus Star Jewelry Investment Co., Ltd. was registered; the regional sourcing platform for the jewelry market is working on a proactively way; as for the physical platform of jewelry, 1st phase of Tellus Shuibei Jewelry Building is in its stage of inviting outside investments. Tellus will continue to expand way of thinking in second half year, to maintain steady development in order to completed vary economic indicators for the whole year.

II. Main business analysis

Y-o-y changes of main financial data

In RMB

	Current period	Same period of last year	Y-o-y increase/decrease	Reasons for changes
Operation revenue	157,147,166.48	158,491,781.84	-0.85%	
Operation cost	112,822,380.88	116,939,503.91	-3.52%	
Sales expenses	7,399,760.23	9,520,419.70	-22.27%	Owing to the changes of calculation caliber, a fraction of sales expenses re-classify to operation costs
Administrative expenses	20,805,027.12	16,780,916.30	23.98%	The remuneration expenses rise resulted by the year-end awards

				accrual by month
Financial cost	289,000.78	4,529,677.17	-93.62%	The interest expenditure declined from a year earlier due to loans payment

In ten thousand Yuan

Total raised capitals	64,680
-----------------------	--------

Total raised capital invested in reporting period	3,563.95
Total accumulative raised capital invested	43,287.39
Total raised fund for changes its usage area in report period	0
Total accumulative raised fund for changes its usage area	0
Proportion of total accumulative raised fund for changes its usage area	0.00%
Explanation on general usage of raised capital	
<p>According to the "Proposal of the company's plan for non-public offering of shares" and other related proposals deliberated and approved by the company's 19th extraordinary meeting of the seventh board of directors and the 4th extraordinary general meeting of 2014, and the "Approval for non-public offering of shares of Shenzhen Test Rite (Group) Co., Ltd." (CSRC license No. [2015]173) approved by China Securities Regulatory Commission, the Company has adopted non-public offering of shares to issue RMB ordinary shares (A shares) of 77 million shares, and the issue price is 8.40 yuan /share. The total raised funds of this issuance are 646,800,000 Yuan, the net amount of raised funds is 633,520,000 yuan after deducting the issuance costs of 13,280,000 yuan. On March 12, 2015, Ruihua Certified Public Accountants (special general partnership) has verified the capital of this issuance and issued "Capital Verification Report" RHYZ No. [2015]48330003. During the reporting period, the Company has totally put into raised funds of 35,639,500 Yuan for project of the Tellus Shuibei Jewelry Building. Accumulated fund-raising of 432,873,900 Yuan invested up to period-end, including 241373900 Yuan invested for the Tellus Shuibei Jewelry Building and 191,500,000 Yuan used to supplement working capital.</p>

Investment orientation for fund arising out of plan										
N/A										
Total	--	63,352	63,352	3,563.95	43,287.39	--	--	0	--	--
Situation about not coming up to scheduled progress or expected revenue and the reason(In specific project)	<p>1. Tellus Shuibei Jewelry Building has currently completed the main construction, and expected to be put into use at end of 2016. 2. In the investment projects of raised funds for supplementing the company's working capital: (1) Repayment of bank loans of 191,500,000 yuan has been completed in the reporting period. (2) The newly increased renovation costs of Tellus Shuibei project will be put into use as planned according to the project implementation progress, actual funds are reduced over that of planning. (3) Jewelry e-commerce business: the jewelry e-commerce business market is highly competitive, payback period is long, the Company bears a certain operation risks and deficits in business incubation period; there may bring adverse effects on the Company's overall performance if investing the jewelry e-commerce platform according to the original plan under the current market situation, so the Company has decided not to invested in the project with fund raising. The raised funds in the original plan shall be used for other projects. (4) Jewelry retail market business: since 2015, affected by the decline of prosperity in jewelry industry and the raise of property costs, large jewelry retail markets across the country have shrunk the business and reduced the income and profits, if the company continued to invest large funds into the jewelry retail market, the business risks would be large, so the Company has planned to reduce the investment scale in single retail market, change to establish the small jewelry retail stores with the help of their managerial experience and industry resources, accumulate the industry experience, and train the management team so as to enlarge the investment scale when the industry climate becomes better. (5) Jewelry training business: this project has not yet been put into use. The company has started to investigate some schools in early 2015 and found that there are already many jewelry training schools in Shenzhen Shuibei area and the market competition is rather intense; at the same time, affected by the decline of prosperity in jewelry industry, the demand for training business has substantially reduced. If the company invests in the construction of jewelry training schools, the return on investment is relatively low and the payback period is long, so the company has decided to suspend the investment plan for this project, and wait to argue until the business of jewelry service industry goes smoothly and enough resources are accumulated. The raised funds in the original plan shall be used for other projects. (6) Automobile leasing business supporting the jewelry market: the project has not yet been put into use. One main reason is that Shenzhen Municipal Government announced the implementation of car-purchase restriction policy on December 29, 2014, the car purchase takes two methods, i.e. lottery and bidding, this policy made the company unable to carry out this business as planned; another reason is that the prosperity of jewelry industry has declined, the demand for automobile leasing has greatly reduced in jewelry industry of Shuibei, and the business prospects are influenced, so the company has decided to cancel the investment in this project. The raised funds in the original plan shall be used for other projects.</p>

Applicable Not applicable

Commitments	Acceptor	Contents	Commitment time	Commitment period	Implementation
Commitments for Share Merger Reform	SDG	(I) Commitments during the work of Share Merger Reform of the Company: 1. commitment for lock-up period. (1) In accordance with the Measures for the Administration of the Share Merger Reform of Listed Companies, SDG would abide by the various laws, regulations and rules, and perform its statutory commitment duty. (2) Apart from the above-mentioned statutory commitment, SDG also made the following special commitment: with 36 months since the day the reform plan starts to take effect, SDG would not list at Shenzhen Stock Exchange and sell the shares of Tellus it held (except for the	2005-12-25	Long-term	Other commitment has completed, special commitment of the incentive mechanism has exemption from performance

	<p>shares used to promote the administration level of Tellus). (3) The administration level would abide by the laws, regulations and rules, and perform its statutory commitment duty. (4) SDG made the commitment: “The Promiser hereby promises that, if the Promiser failed to fulfill its commitment or not fully fulfill its commitment, it would compensate other shareholders for their losses suffered thereafter”. (5) SDG declared: “The Promiser would dutifully fulfill its commitments and shoulder corresponding legal responsibilities. The Promiser would transfer the shares held by it only if the assignee agree and have the ability to shoulder the commitment responsibility.”</p> <p>2. Special commitment of incentive mechanism. In order to effectively boost the core management level and business backbones for long, SDG would take out its shares, not exceeding 10% in total number after the Share Merger Reform, and apply them to the boost of the administration level. The shares would be sold to the Company’s administrative level over 3 years, with the selling price being the net asset value per share audited during the period nearest to the implementation. Before the implementation of the promoting plan by share selling each year, the administration level must prepay the Company a risk responsibility fund, i.e. 20% of the planned selling price; Should the work of the performance examination set by the Board failed to be finished, the paid risk responsibility fund would not be refunded and shall be owned by the Company. Detailed rules concerning the limitations on the administration level, such as the subscription conditions and risk responsibility fund, and boost plans would be set by the Board and submitted to relevant departments for approval. The implementation of the shares for promoting would be conducted strictly according to relevant laws and regulations, and the circulation conditions of these shares would be in conformity with relevant regulations set by the Shenzhen Stock Exchange.</p> <p>3. Relevant expenses of this Share Merger</p>			
--	---	--	--	--

		Reform of Tellus would be paid by SDG.			
	SDG	SDG, the controlling shareholder of the Company, made a special commitment of incentive mechanism in Share Merger Reform. After that SASAC and Ministry of Finance jointly issued a “Trial Approach of Equity Incentive for State-Owned Listed Companies”, and CSRC issued the “Incentive Management on Shares of Listed Companies (Trial)”, after comparison, the above mentioned commitments made by SDG are out of the relevant regulations and requirement, relevant commitments are not implemented as a result. On 26 June 2014, the Company actively communicating with SDG, and promised that on the premise of subjecting to applicable laws and regulations and supervision requirements, continues to support the Company promote a long-term incentive plan as soon as possible in stead of the commitments made in share merger reform, and complete the long-term incentive plan before 30 June 2016. At that time, the long-term incentive plan shall be implemented after submit for deliberation in General Meeting.	2014-06-26	2016-6-30	Immunity to perform
Commitments in report of acquisition or equity change

Other commitments for medium and small shareholders	Shenzhen SDG Co., Ltd.	In order to avoid the horizontal competition, the company’s controlling shareholder, Shenzhen SDG Co., Ltd., has issued the “commitment letter about the avoidance of horizontal competition” on	2014-05-26	Long-term	Implementing

	<p>May 26, 2014. The full commitment letter is as follows: 1. The Company and other enterprises controlled by the Company except Test Rite Group haven't occupied in any business that could substantially compete with the main businesses of Test Rite Group, and have no horizontal competition relationship with Test Rite Group.</p>			
<p>Shenzhen Tellus Holding Co., Ltd.</p>	<p>From 2014 to 2016, the company's profits will first be used to cover the losses of previous years; after making up for losses of previous years, in the premise that the company's profits and cash flow can meet the company's normal operations and long-term development, reward shareholders, the company will implement positive profit distribution approaches to reward the shareholders, details are as follows: 1. The company's profit distribution can adopt cash, stock or the combination of cash and stock or other methods permitted by law. The foreign currency conversion rates of domestically listed foreign shares dividend are calculated according to the standard price of HK dollar against RMB announced by People's Bank of China on the first working day after the resolution date of the shareholders' meeting. The company prefers to adopt the cash dividends to distribute profits. In order to maintain the adaptability between capital expansion and performance growth, in the premise of ensuring the full cash dividend distributions and the rationality of equity scale and equity structure, the company can adopt the stock dividend methods to distribute profits. 2. According to the "Company Law" and other relevant laws and the provisions of the company's "Articles of Association", following conditions should be satisfied when the company implements cash dividends: (1) the company's annual distributable profits (i.e. the after-tax profits after making up for losses and withdrawing accumulation funds) are positive value, the implementation of cash dividends will not affect the company's subsequent continuing operations; (2) the audit institution issues the standard audit</p>	<p>2014-06-03</p>	<p>2016-12-31</p>	<p>Implementing</p>

	<p>report with clean opinion to the company's annual financial report; (3) the company has no significant investment plans or significant cash outlay (except for fund-raising projects). Major investment plans or significant cash outlay refer to: the accumulated expenditures the company plans to used for investments abroad, acquisition of assets, or purchase of equipments within the next 12 months reach or exceed 30% of the net assets audited in the latest period. 3. In the premise of meeting the conditions of cash dividends and ensuring the company's normal operation and long-term development, the company makes cash dividends once a year in principle, the company's board of directors can propose the company to make interim cash dividends in accordance with the company's profitability and capital demand conditions. The proportion of cash dividends in profits available for distribution and in distribution of profits should meet the following requirements: (1) in principle, the company's profits distributed in cash every year should not be less than 10% of profit available for distribution realized in the same year, and the company's profits accumulatively distributed in cash in the last three years should not be less than 30% of the annual average profit available for distribution realized in the last three years. (2) if the company's development stage belongs to mature stage and there is no significant capital expenditure arrangement, when distributing profits, the minimum proportion of cash dividends in this profit distribution should be 80%; (3) if the company's development stage belongs to mature stage and there are significant capital expenditure arrangements, when distributing profits, the minimum proportion of cash dividends in this profit distribution should be 40%; (4) if the company's development stage belongs to growth stage and there are significant capital expenditure arrangements, when distributing profits, the minimum proportion of cash dividends in this profit distribution should be 20%; when the</p>

4. Consolidation scope of the Company in the year

Totally 14 companies included in the consolidation scope for the Year of 2016, found more in “Equity in other entity” in the Note VIII. The consolidation range has no changes over that of last year.

5. Relevant party offering approval reporting of financial statements and date thereof

This financial statement is approved for disclosure by resolution from the Board dated 25 August 2016.

IV. Basis Preparation of the Financial Statements

The financial statements of the Group is prepared based on the going-concern assumption in accordance with the actually occurred transactions and events, the “Accounting standards for Business Enterprise-Basic rules” (ministry of finance order No. 33 issued, ministry of finance No.76 revised), the “Accounting Standards for Business Enterprises – Basic Standards” and 41 specific accounting standards promulgated by the ministry of finance on 15th, Feb., 2006, the subsequently promulgated application guide and interpretation of the accounting standards for business enterprises and other relevant provisions (hereinafter collectively referred to as “ASBE”), and China Securities Regulatory Commission “information disclosure regulations No.15 for the companies publicly issuing securities - general provisions of financial reports” (2014 Revision).

According to the relevant requirements under the Accounting Standards for Business Enterprises, the Company has adopted the accrual basis as its basis of accounting. Except for certain financial instruments, historical costs have been adopted as the basis of measurement in these Financial Statements. Non-current assets held for sale are recorded at the lower of fair value less predicted expenses and the original carrying value when the assets satisfy such conditions for sale. Provisions of corresponding impairment losses are recognised in respect of any impairment of assets.

V. Statement of Compliance with the Accounting Standards for Business Enterprises

The financial statements prepared by the Groups meet the requirements of the Accounting Standards for Business Enterprises, truthfully and completely reflect the financial situation of the Company on 30th, June, 2016, and the business performance and cash flow in January to June of 2016. In addition, the financial statements of the Company and the Group meet the disclosure requirements of “Preparation Regulation of Information Disclosure for Enterprise with Security Issued

Publicly No.15—General Rules of Financial Report” revised by China Securities Regulatory Commission in all significant aspects in 2014.

VI. Main accounting policy and estimate

The Company and its subsidiaries determine specific accounting policies and accounting estimation based on their actual production characteristics according to the relevant requirements under the Accounting Standards for Business Enterprises. Details relating to significant accounting judgment and estimation made by the management, please refer to note IV(29) “Significant accounting judgment and estimation”

1. Fiscal period

The accounting period of the Group includes annual and interim, accounting interim refers to the reporting period shorter than a complete fiscal year. The fiscal year of the Group adopts the Gregorian calendar, i.e. from 1 January to 31 December for each year.

2. Business cycle

Normal business cycle is the period from purchasing assets used for process by the Company to the cash and cash equivalent achieved.

The Company’s normal business cycle was one-year (12 months), and as the determining criterion of the liquidity for assets and liabilities.

3. Book-keeping currency

RMB is the currency in the major economic environment of the Company and its sub-company which take RMB as the book-keeping currency. The Group adopts RMB as the currency when preparing this financial statement.

4. The accounting treatment of business merger under the common control and the different control.

Business merger refers to the transactions or matters that two or more than two individual enterprises form a reporting entity. Business combination is at least subject to the following conditions: to acquire controlling right upon another or multiple enterprises (or business); enterprises to be combined must constitute business. In case that an acquirer obtains controlling right upon another or multiple enterprises which do not constitute business, the transaction shall not constitute business combination.

When acquirer acquires a group of assets or net assets which don’t constitute business, the acquisition costs shall be allocated into various identifiable assets or liabilities based on their fair value as of the acquisition date. Where there are specific identifiable assets which cannot be substituted taking substantial proportion in a group of assets or net assets and the future cash flow of the acquiree also highly depends on such specific identifiable assets, the remaining amount between acquisition costs less fair value of other identifiable assets shall be entirely recorded in such specific identifiable assets.

Business merger includes the business merger under the common control and the different control.

(1) Business merger under the common control

Business merger under the common control means the enterprises participated in the merger are subject to the ultimate control of the same party or the same multi-party before and after the merger, and the control is not temporary. For the business merger under the same control, the party obtains the control rights of other enterprises participated in the merger on the merger date is the merging party, and other enterprises participated in the merger are the merged party. The merger date refers to the date that the merging party obtains the control rights of the merged party.

The assets and liabilities of the merging party should be measured in accordance with the book value of the combined party on the combining date. The balance between the book value of the net asset obtained by the merging party and the book value of the merger consideration (or the total face value of the issued shares) paid by the merging party, and adjust the

capital reserve (share premium); for the capital reserve (share premium) insufficient to reduce, adjust the retained earnings.

All direct expenses the merging party spent for the business merger are included in the current profit and loss when the business merger occurred.

(2) Business merger under the different control

Business merger under the different control means the enterprises participated in the merger are not subject to the ultimate control of the same party or the same multi-party before and after the merger. For the business merger under the different control, the party obtains the control rights of other enterprises participated in the merger on the acquisition date is the acquirer, and other enterprises participated in the merger are the acquiree. The acquisition date refers to the date that the acquirer obtains the control rights of the acquiree.

As for the business merger under the different control, the merger costs contain the assets paid by the acquirer for obtaining the control rights of the acquiree on the acquisition date, the liabilities incurred or assumed, and the fair value of the issued equity securities. The intermediary fees such as auditing, legal services and consulting services costs and other administrative costs incurred by the business merger are charged to the current profit and loss. The transaction costs of the equity securities or debt securities issued as the combination consideration by the acquirer are reckoned in the initially recognized amount of the equity securities or debt securities. As for the involved or existing consideration reckoned in the merger costs in accordance with the fair value on the acquisition date, correspondingly adjust the consolidated goodwill for these needs to be adjusted or possess consideration because new or further evidence appears for the situations existing on the acquisition date within 12 months after the acquisition date. The merger costs of the acquirer and the net identifiable assets obtained in the merger are reckoned in accordance with the fair value on the acquisition date. The balance of which the merger costs are more than the net identifiable assets' fair value share of the acquiree obtained in the merger on the acquisition date is recognized as goodwill. For those whose merger costs are less than the net identifiable assets' fair value share of the acquiree obtained in the merger, recheck the obtained identifiable assets, liabilities, and the fair value with contingent liability of the acquiree, and the measurement of the merger costs at first, while for those whose merger costs are still less than the net identifiable assets' fair value share of the acquiree obtained in the merge after rechecking, reckon its the balance in the current profit and loss.

For the deductible temporary difference obtained by the acquirer from the acquiree that is not confirmed because of not meeting the assets confirmation requirements of the deferred income taxes on the acquisition date, if there is new or further information states that the relevant conditions on the acquisition date has already existed and the economic interests on the acquisition date brought by the deductible temporary difference can be realized by the acquiree within 12 months after the acquisition date, then confirm the relevant deferred income tax assets, and decrease the goodwill, as for the goodwill insufficient for reducing, confirm the difference to be the current profit and loss; except for the above-mentioned cases, reckon those deferred income tax assets related to the business merger in the current profit and loss.

For a business combination not involving enterprises under common control and achieved in stages, the company shall determine whether the business combination shall be regarded as "a bundle of transactions" in accordance with "Interpretation 5 on Accounting Standards for Business Enterprises" (Cai Kuai 2012 No. 19) and clause 51 of ASBE 33- Consolidated Financial Statements relating to judgment standard for "a bundle of transactions"(please refer to this Note IV 5(2)). When the business combination is regarded as "a bundle of transactions", the accounting treatment for the business combination shall be in accordance with the previous paragraphs and Note IV 13 "long term equity investment"; when the business combination is not regarded as "a bundle of transactions", the accounting treatment should be different when comes to individual financial report and consolidated financial report.

In the individual financial statements, the initial cost of the investment shall be the sum of the carrying amount of its previously-held equity interest in the acquiree prior to the acquisition date and the amount of additional investment made to the acquiree at the acquisition date. Other comprehensive income involved in the previously-held equity interest of the acquiree prior to the acquisition date shall be subject to accounting treatment on the same basis adopted by the acquiree in

its direct disposal of related assets or liabilities (which are reclassified as investment income during the period, net of the audited changing corresponding shares resulted from the net liability and net assets remeasured and set by acquiree according to equity method).

In the consolidated financial statements, the previously-held equity interest of the acquiree is re-measured according to the fair value at the acquisition date; the difference between the fair value and the carrying amount is recognized as investment income for the current period; the amount recognized in other comprehensive income relating to the previously-held equity interest in the acquiree shall be subject to accounting treatment on the same basis adopted by the acquiree in its direct disposal of related assets or liabilities (which are reclassified as investment income during the period, net of the audited changing corresponding shares resulted from the net liability and net assets re-measured and set by acquiree according to equity method).

5. Preparing method of consolidated financial statements

(1) Determinate principles of range for consolidation financial statement

The scope of consolidated financial statements is determined based on control. Control is the power to govern the investees so as to obtain benefits from their operating activities by the involvement in the relevant activities of the investee. The scope of consolidation comprises the Company and all of its subsidiaries. Subsidiaries are the entities controlled by the Company.

Once relevant elements involved in the above definition of control change due to alteration of relevant facts or situations, the Company will make evaluation again.

(2) Preparing method of consolidated financial statements

Since the date of gaining the net assets and the actual control rights of the production and operation decision-making of the subsidiaries, the Group has started to bring it into the consolidation scope; stop to bring into the consolidation scope since the date of losing the actual control rights. As for the disposed subsidiaries, the business performance and cash flow before the disposal have been suitably included in the consolidated income statement and the consolidated cash flow statement; as for the subsidiaries currently disposed; don't adjust the opening balance of the consolidated balance sheet. For the subsidiaries increased by the business merger under the different control, the business performance and cash flow after its acquisition date have been suitably included in the consolidated income statement and the consolidated cash flow statement, and don't adjust the opening balance and correlation date of the combined financial statement. For the subsidiaries increased by the business merger under the common control, the business performance and cash flow from the beginning period of the merger to its merger date have been suitably included in the consolidated income statement and the consolidated cash flow statement, and adjust the correlation date of the combined financial statement at the same time.

When preparing the consolidated financial statements, for the accounting policies adopted by the subsidiaries and the Company being inconsistent during the accounting time period, adjust in accordance with the accounting policies of the Company and the financial statements of the subsidiaries during the accounting time period. As for the subsidiaries obtained by the business merger under the different control, adjust the financial statements based on the fair value of the net identifiable assets on the acquisition date.

All significant intra-group current account balances, transactions and unrealized profits are offset in the preparation of consolidated financial statements.

The stockholders' equity of the subsidiaries and the shares not belong to the Company in the current net profit or loss are respectively served as the separate presentation in the stockholders' equity and net profits of the minority interest and minority interest income in the consolidated financial statements. The shares of the current net profit or loss of the subsidiaries that belong to the minority interest are listed under net profit item in the consolidated profit statement as "minority interest income" item. Reduce the minority interest for those that the subsidiaries' losses shared by the minority shareholders exceed the shares that the minority shareholders gained from the owner's equity at the beginning period of this subsidiary.

When losing the control rights of the original sub companies because of disposing some equity investment or other reasons, re-measure the residual equity in accordance with its fair value on the date of losing the control rights. Use the sum of the consideration obtained by disposing the stock rights and the fair value of the residual equity to minus the balance among the net assets' shares of the original sub companies continuously calculated since the acquisition date in accordance with the original shareholding ratio, and then reckon in the current investment income when losing the control rights. The other consolidated incomes related to the equity investment of the original sub companies, It shall be subject to accounting treatment on the same basis adopted by the acquirer in its direct disposal of related assets or liabilities during the period when the control ceases (which are reclassified as investment income for the current period, other than changes resulting from re-measuring net liability or net assets under defined benefit plan of the original subsidiary). Thereafter, do the follow-up measurement for this part's residual equity in accordance with the relevant provisions of "Accounting Standards for Business Enterprises No.2 - long-term equity investment" or "Accounting Standards for Business Enterprises No.22 - financial instruments recognition and measure", refer to the Note IV 13 "long-term equity investment" or the Note IV 9 "financial instruments" for details.

The company shall determine whether loss of control arising from disposal in a series of transactions should be regarded as a bundle of transactions. When the economic effects and terms and conditions of the disposal transactions met one or more of the following situations, the transactions shall normally be accounted for as a bundle of transactions: (i) The transactions are entered into after considering the mutual consequences of each individual transaction; (ii) The transactions need to be considered as a whole in order to achieve a deal in commercial sense; (iii) The occurrence of an individual transaction depends on the occurrence of one or more individual transactions in the series; (iv) The result of an individual transaction is not economical, but it would be economical after taking into account of other transactions in the series. When the transactions are not regarded as a bundle of transactions, the individual transactions shall be accounted as "disposal of a portion of an interest in a subsidiary which does not lead to loss of control" (for details, please refer to Note IV 13(2)④) and "disposal of a portion of an interest in a subsidiary which lead to loss of control" (details are set out in previous paragraph). When the transactions are regarded as a bundle of transactions, the transactions shall be accounted as a single disposal transaction; however, the difference between the consideration received from disposal and the share of net assets disposed in each individual transactions before loss of control shall be recognized as other comprehensive income, and reclassified as profit or loss arising from the loss of control when control is lost.

6. Classification of joint arrangement and accounting for joint operations

A joint arrangement refers to an arrangement jointly controlled by two or more parties. In accordance with the Company's rights and obligations under a joint arrangement, the Company classifies joint arrangements into: joint ventures and joint operations. Joint operations refer to a joint arrangement during which the Company is entitled to relevant assets and obligations of this arrangement. Joint ventures refer to a joint arrangement during which the Company only is entitled to net assets of this arrangement.

Investment in joint venture is accounted for using the equity method accounting to the accounting policies referred to Note IV 13(2)②"Long-term equity investment accounted for using the equity method".

The Company shall, as a joint venture, recognise the assets held and obligations assumed solely by the Company, and recognise assets held and obligations assumed jointly by the Company in appropriation to the share of the Company; recognise revenue from disposal of the share of joint operations of the Company; recognise fees solely occurred by Company and recognise fees from joint operations in appropriation to the share of the Company.

When the Company, as a joint venture, invests or sells assets to or purchase assets (the assets dose not constitute a business, the same below) from joint operations, the Company shall only recognise the part of profit or lost from this transaction attributable to other parties of joint operations before these assets are sold to a third party. In case of an impairment loss incurred on these assets which meets the requirements as set out in "Accounting Standards for Business Enterprises No. 8 – Asset Impairment", the Company shall recognise the full amount of this loss in relation to its investment in or sale of assets

to joint operations, or recognise the loss according to the Company's share of commitment in relation to the its purchase of assets from joint operations.

7. Determination criteria of cash and cash equivalent

Cash and cash equivalent of the Company including stock cash, deposits available for payment at any time and the investment held by the Company with the follow characters obtained at the same time: short term (expire within 3 months commencing from purchase day), active liquidity, easy to convert to already-known cash, and small value change risks.

8. Foreign Currency Operations and translation of foreign currency statements

(1) Basis for translation of foreign currency transactions

The foreign currency transactions of the Company, when initially recognized, are translated into functional currency at the prevailing spot exchange rate on the date of exchange (usually refers to the middle rate of the exchange rate for the day as quoted by the People's Bank of China, the same below) while the Company's foreign currency exchange operations and transactions in connection with foreign currency exchange shall be translated into functional currency at the exchange rate actually adopted.

(2) Basis for translation of foreign currency monetary items and foreign currency non-monetary items

On the balance sheet date, foreign currency monetary items shall be translated at the spot exchange rate on the balance sheet date. All differences are included in the consolidated income statement, except for: ① the differences arising from foreign currency borrowings related to the acquisition or construction of fixed assets which are qualified for capitalization; and ② except for other carrying amounts of the amortization costs, the differences arising from changes of the foreign currency items available for sale.

When preparing consolidated financial statement involving overseas operation, in case there is foreign currency monetary items which substantially constitute net investment in overseas operation, the exchange difference arising from exchange rate fluctuation shall be included in other comprehensive income; and shall transfer to gains and losses from disposal for the current period when the overseas operation is disposed of.

The foreign currency non-monetary items measured at historical cost shall still be measured by the functional currency translated at the spot exchange rate on the date of the transaction. Foreign currency non-monetary items measured at fair value are translated at the spot exchange rate on the date of determination of the fair value. The difference between the amounts of reporting currency before and after the translation will be treated as changes in fair value (including changes in foreign exchange rates) and recognized in profit or loss for the period or recognized as other consolidated income.

(3) Translation of foreign currency financial statement

When preparing consolidated financial statement involving overseas operation, in case there is foreign currency monetary items which substantially constitute net investment in overseas operation, the exchange difference arising from exchange rate fluctuation shall be included in other comprehensive income as "translation difference of foreign currency statement"; and shall transfer to gains and losses from disposal for the current period when the overseas operation is disposed of.

Foreign currency financial statement for overseas operation is translated into RMB statement by the following means: assets and liabilities in balance sheet are translated at the spot rate as of balance sheet date; owner's equity items (other than undistributed profit) are translated at the spot rate prevailing on the date of occurrence. Income and expense items in profit statement are translated at the spot rate prevailing on the date of transactions. Beginning undistributed profit represents the translated ending undistributed profit of previous year; ending undistributed profit is allocated and stated as several items upon translation. Upon translation, difference between assets, liabilities and shareholders' equity items shall be recorded as foreign currency financial statement translation difference and recognized as other comprehensive income. In case of disposal of overseas operation where control is lost, foreign currency financial statement translation difference relating to the overseas operation as stated under shareholders' equity in balance sheet shall be transferred to current gains and losses of disposal in full or under the proportion it disposes.

Foreign currency cash flow and cash flow of overseas subsidiary are translated at the spot rate prevailing on the date of occurrence of cash flow. Influence over cash from exchange rate fluctuation is taken as adjustment items to separately stated in cash flow statement.

The beginning figure and previous year actual figures are stated at the translated figures in previous year financial statement. If the Company loses control over overseas operation due to disposal of all the owners' equity or part equity investment in the overseas operation or other reasons, foreign currency financial statement translation difference relating to the overseas operation attributable to owners' equity of parent company as stated under shareholders' equity in balance sheet shall be transferred to current gains and losses of disposal in full.

If the Company reduces equity proportion while not loses control over overseas operation due to disposal of part equity investment in the overseas operation or other reasons, foreign currency financial statement translation difference relating to the disposed part will be vested to minority interests and will not transfer to current gains and losses. When disposing part equity interests of overseas operation which is associate or joint venture, foreign currency financial statement translation difference relating to the overseas operation shall transfer to current disposal gains and losses according to the disposed proportion.

9. Financial instruments

(1) Method of determination of the fair value for financial assets and financial liabilities

Fair value represents the price that market participator can receive for disposal of an asset or he should pay for transfer of a liability in an orderly transaction happened on the measurement date. Financial instruments exist in an active market. Fair value is determined based on the quoted price in such market. An active market refers to where pricing is easily and regularly obtained from exchanges, brokers, industrial organizations and price-fixing service organizations, representing the actual price of a market transaction that takes place in a fair deal. While financial instruments do not exist in an active market, the fair value is determined using valuation techniques. Valuation technologies include reference to be familiar with situation and prices reached in recent market transactions entered into by both willing parties, reference to present fair values of similar other financial instruments, cash flow discounting method and option pricing models.

(2) Classification, recognition and measurement of the financial assets

Financial asset or financial liability is recognized when the Company becomes a party to financial instrument contract. Financial assets and liabilities are initially measured at fair value. For financial assets and financial liabilities classified as fair value through profit or loss, relevant transaction costs are directly recognized in profit or loss for the period. For financial assets and financial liabilities classified as other categories, relevant transaction costs are included in the amount initially recognized.

① Financial assets carried at fair value through profit or loss for the current period

They include financial assets held for trading and financial assets designated as at fair value through profit or loss for the current period.

Financial assets may be classified as financial assets held for trading if one of the following conditions is met: A. the financial assets is acquired or incurred principally for the purpose of selling it in the near term; B. the financial assets is part of a portfolio of identified financial instruments that are managed together and for which there is objective evidence of a recent pattern of short-term profit taking; or C. the financial assets is a derivative, excluding the derivatives designated as effective hedging instruments, the derivatives classified as financial guarantee contract, and the derivatives linked to an equity instrument investment which has no quoted price in an active market nor a reliably measured fair value and are required to be settled through that equity instrument.

A financial asset may be designated as at FVTPL upon initial recognition only when one of the following conditions is satisfied: A. Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise result from measuring assets or recognizing the gains or losses on them on different bases; or B. The financial

asset forms part of a group of financial assets or a group of financial assets and financial liabilities, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is reported to key management personnel on that basis.

Financial assets carried at fair value through profit or loss for the current period is subsequently measured at fair value. The gain or loss arising from changes in fair value and dividends and interest income related to such financial assets are charged to profit or loss for the current period.

②Held-to-maturity investments

They are non-derivative financial assets with fixed maturity dates and fixed or determinable payments that the Group has positive intent and ability to hold to maturity.

Held-to-maturity investments are subsequently measured at amortized cost using the effective interest method. Gain or loss on derecognition, impairment or amortization is recognized through profit or loss for the current period.

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income or expense over each period based on the effective interest of a financial asset or a financial liability (including a group of financial assets or financial liabilities). The effective interest is the rate that discounts future cash flows from the financial asset or financial liability over its expected life or (where appropriate) a shorter period to the carrying amount of the financial asset or financial liability.

In calculating the effective interest rate, the Group will estimate the future cash flows (excluding future credit losses) by taking into account all contract terms relating to the financial assets or financial liabilities whilst considering various fees, transaction costs and discounts or premiums which are part of the effective interest rate paid or received between the parties to the financial assets or financial liabilities contracts.

③ Loans and receivable

They are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets, including bills receivable, accounts receivable, interest receivable, dividends receivable and other receivables, are classified as loans and receivables by the Group.

Loans and receivables are subsequently measured at amortized cost using the effective interest method. Gain or loss arising from derecognition, impairment or amortization is recognized in current profit or loss.

④Available-for-sale financial assets

They include non-derivative financial assets that are designated in this category on initial recognition, and the financial assets other than the financial assets at fair value through profit and loss, loans and receivables and held-to-maturity investments.

The closing cost of available-for-sale debt instruments are determined based on amortised cost method, which means the amount of initial recognition less the amount of principle already repaid, add or less the accumulated amortised amount arising from the difference between the amount due on maturity and the amount initially recognised using effective interest rate method, and less the amount of impairment losses recognised. The closing cost of available-for-sale equity instruments is equal to its initial acquisition cost.

Available-for-sale financial assets are subsequently measured at fair value. The gain or loss on change in fair value are recognized as other comprehensive income, except for impairment loss and exchange differences arising from foreign monetary financial assets and amortized cost which are accounted for through profit or loss for the current period. The financial assets will be transferred out of the financial assets on derecognition and accounted for through profit or loss for the current period.

However, equity instrument investment which is not quoted in active market and whose fair value cannot be measured reliably, and derivative financial asset which is linked to the equity instrument and whose settlement is conditional upon delivery of the equity instrument, shall be subsequently measured at cost.

Interests received from available-for-sale financial assets held and the cash dividends declared by the investee are recognized as investment income.

(3) Impairment of financial assets

In addition to financial assets at fair value through profit or loss for the current period, the Group reviews the book value of other financial assets at each balance sheet date and provide for impairment where there is objective evidence that financial assets are impaired.

For a financial asset that is individually significant, the Group assesses the asset individually for impairment. For a financial asset that is not individually significant, the Group assess the asset individually for impairment or include the asset in a group of financial assets with similar credit risk characteristics and collectively assess them for impairment. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether the financial asset is individually significant or not, the financial asset is included in a group of financial assets with similar credit risk characteristics and collectively assessed for impairment. Financial assets for which an impairment loss is individually recognized are not included in the collective assessment for impairment.

① Impairment of held-to-maturity investments, loans and receivables

The carrying amount of financial assets measured at costs or amortized costs are subsequently reduced to the present value discounted from its projected future cash flow. The reduced amount is recognized as impairment loss and recorded as profit or loss for the period. After recognition of the impairment loss from financial assets, if there is objective evidence showing recovery in value of such financial assets impaired and which is related to any event occurring after such recognition, the impairment loss originally recognized shall be reversed to the extent that the carrying value of the financial assets upon reversal will not exceed the amortized cost as at the reversal date assuming there is no provision for impairment.

② Impairment of available-for-sale financial assets

In the event that decline in fair value of the available-for-sale equity instrument investment is regarded as “severe decline” or “non-temporary decline” on the basis of comprehensive related factors, it indicates that there is impairment loss of the available-for-sale equity instrument investment.

The company’s standards to judge if the fair value of available for sale equity instruments investment has a “severe” depreciation is that if the fair value of a single available for sale financial asset has a sharp fall which exceeds 50% of its holding cost, then this available for sale financial asset is affirmed to have a severe decrease in value and should have the provision for asset impairment to confirm the impairment loss.

The company’s standards to judge if the fair value of available for sale equity instruments investment has a “non-temporary” depreciation is that if the fair value of a single available for sale financial asset has a sharp fall and this downtrend is predicted to be non-temporary with the duration over a year that cannot be fundamentally changed in the whole holding period, then this available for sale financial asset is affirmed to have a non-temporary decrease in value and should have the provision for asset impairment to confirm the impairment loss.

When the available-for-sale financial assets impair, the accumulated loss originally included in the capital reserve arising from the decrease in fair value was transferred out from the capital reserve and included in the profit or loss for the period. The accumulated loss that transferred out from the capital reserve is the balance of the acquired initial cost of asset, after deduction of the principal recovered, amortized amounts, current fair value and the impairment loss originally included in the profit or loss.

After recognition of the impairment loss, if there is objective evidence showing recovery in value of such financial assets impaired and which is related to any event occurring after such recognition in subsequent periods, the impairment loss

originally recognized shall be reversed. The impairment loss reversal of the available-for-sale equity instrument will be recognized as other consolidated income, and the impairment loss reversal of the available-for-sale debt instrument will be included in the profit or loss for the period.

When an equity investment that is not quoted in an active market and the fair value of which cannot be measured reliably, or the impairment loss of a derivative financial asset linked to the equity instrument that shall be settled by delivery of that equity instrument, then it will not be reversed.

(4) Recognition and measurement of transfers of financial asset

Financial asset that satisfied any of the following criteria shall be derecognized: ① the contract right to recover the cash flows of the financial asset has terminated; ② the financial asset, along with substantially all the risk and return arising from the ownership of the financial asset, has been transferred to the transferee; and ③ the financial asset has been transferred to the transferee, and the transferor has given up the control on such financial asset, though it does not assign maintain substantially all the risk and return arising from the ownership of the financial asset.

When the entity does not either assign or maintain substantially all the risk and return arising from the ownership of the financial asset and does not give up the control on such financial asset, to the extent of its continuous involvement in the financial asset, the entity recognizes it as a related financial asset and recognizes the relevant liability accordingly. The extent of the continuous involvement is the extent to which the entity exposes to changes in the value of such financial assets.

On derecognition of a financial asset, the difference between the following amounts is recognized in profit or loss for the current period: the carrying amount and the sum of the consideration received and any accumulated gain or loss that had been recognized directly in equity.

If a part of the financial assets qualifies for derecognition, the carrying amount of the financial asset is allocated between the part that continues to be recognized and the part that qualifies for derecognition, based on the fair values of the respective parts. The difference between the following amounts is recognized in profit or loss for the period: the sum of the consideration received and the carrying amount of the part that qualifies for derecognition and the aforementioned carrying amount.

For financial assets that are transferred with recourse or endorsement, the Company needs to determine whether the risk and rewards of ownership of the financial asset have been substantially transferred. If the risk and rewards of ownership of the financial asset have been substantially transferred, the financial assets shall be derecognised. If the risk and rewards of ownership of the financial assets have been retained, the financial assets shall not be derecognised. If the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial assets, the Company shall assess whether the control over the financial assets is retained, and the financial assets shall be accounted for according to the above paragraphs.

(5) Classification and measurement of financial liabilities

At initial recognition, financial liabilities are classified either as “financial liabilities at fair value through profit or loss” or “other financial liabilities”. Financial liabilities are initially recognized at fair value. For financial liabilities classified as fair value through profit or loss, relevant transaction costs are directly recognized in profit or loss for the period. For financial liabilities classified as other categories, relevant transaction costs are included in the amount initially recognized.

① Financial liabilities at fair value through profit or loss for the period

The criteria for a financial liability to be classified as held for trading and designated as at financial liabilities at fair value through profit or loss are the same as those for a financial asset to be classified as held for trading and designated as at financial assets at fair value through profit or loss.

Financial liabilities at fair value through profit or loss for the period are subsequently measured at fair value. The gain or loss arising from changes in fair value and dividends and interest income related to such financial liabilities are included into the current profit or loss.

② Other financial liabilities

Derivative financial liabilities which are linked to equity instruments that are not quoted in an active market and the fair value of which cannot be measured reliably measured, and which shall be settled by delivery of equity instruments are subsequently measured at cost. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Gains or losses arising from derecognition or amortization is recognized in profit or loss for the current period.

③ Financial guarantee contract

Financial guarantee contract in respect of financial liabilities not designed at fair value through profit or loss shall be initially measured at fair value, and subsequently measured at the lower between the amount determined under Accounting Standards for Enterprises No.13-Contingent issues and its initial measurement amount less accumulative amortization determined under Accounting Standards for Enterprises No.14-Revenue.

(6) Derecognition of financial liabilities

Financial liabilities are derecognized in full or in part only when the present obligation is discharged in full or in part. An agreement is entered between the Group (debtor) and a creditor to replace the original financial liabilities with new financial liabilities with substantially different terms, derecognize the original financial liabilities as well as recognize the new financial liabilities.

When financial liabilities is derecognized in full or in part, the difference between the carrying amount of the financial liabilities derecognized and the consideration paid (including transferred non-cash assets or new financial liability) is recognized in profit or loss for the current period.

(7) Derivatives and embedded derivatives

Derivatives are initially measured at fair value as of the execution date of relevant contract, and subsequently measured at fair value. Change of fair value of derivatives is recorded in profit or loss for the period.

In respect of mixed instruments containing embedded derivatives, if they are financial assets or financial liabilities not designated at fair value through profit or loss, and there is no close relation between embedded derivatives and such main contract in terms of economic characteristics and risk, separate instrument shares the same conditions with embedded derivatives and meets definition of derivatives, the embedded derivatives are split off from the mixed instruments and accounted for as separate derivative financial instrument. If an embedded derivative instrument cannot be measured separately upon acquisition or at subsequent balance sheet date, the mixed instruments shall be taken in its entirety as financial assets or financial liabilities designated at fair value through profit or loss.

(8) Offset of Financial Assets and Financial Liabilities

If the Group owns the legitimate rights of offsetting the recognized financial assets and financial liabilities, which are enforceable currently, and the Group plans to realize the financial assets or to clear off the financial liabilities by net amount method, the amount of the offsetting financial assets and financial liabilities shall be reported in the balance sheet. Otherwise, financial assets and financial liabilities are presented separately in the balance sheet without offsetting.

(9) Equity instruments

Equity instruments are any contract that evidences a residual interest in the assets of an entity after deducting all of its

liabilities. The Company issues (including refinancing), repurchases, sells or cancels equity instruments as movement of equity. No fair value change of equity instrument would be recognized by the Company. Transaction fees relating to equity transactions are deducted from equity.

The distribution (excluding the dividends) to the equity instrument holders by the Group shall reduce the shareholder's equity. The Group shall not recognize the changes of the equity instruments' fair value.

10. Account receivable

Account receivable including receivables and other account receivables etc.

(1) Recognition standards for bad debt provision

On balance sheet date, the Company examined book value of the account receivable, if the followed objective evidence has been show for impairment occurred, impairment provision shall withdrawal: ①the debtor has serious financial difficulties; ②debtor violated the terms of the contract (such as interest or principal payment default or overdue etc.); ③debtor probably close down or exercise other financial restructuring; and ④other objective evidence showing impairment occurred on receivables.

(2) Withdrawal method for bad debt provision

①Recognition criteria and depreciation method for account receivable with large single amount and accrued for provision of bad debt on a single basis

Account receivable with over RMB one million and other account receivable with over RMB 500,000 are recognized as account receivable with large single amount.

The Company exercise impairment test separately on account receivable with large single amount, if no impairment been found in financial assets after separate testing, they shall be included in portfolios of accounts receivable with similar credit risk features for impairment tests.

For accounts receivable with confirmed impairment losses after separate tests, they shall not be included in portfolios of accounts receivable with similar credit risk features for impairment tests.

②Recognition criteria and depreciation method for account receivable with accrued for provision of bad debt on credit risk portfolio basis

A. Recognition basis for credit risk characteristics portfolio

As for the account receivable with minor single amount and those with major amount without impairment had been found after testing on a single basis, the Company grouping the financial assets according to similarity and relativity of the credit risk characteristics. The credit risk characteristics usually reflect the repaying capability for all due amount from debtors, in line with the terms of the contract, and related with the measurement of future cash flow on assets which has been examined.

Recognition basis for different portfolio:

Item	Basis
Age portfolio	Divide the portfolio on the age of account receivable as a credit risk characteristics

B. Depreciation method for bad debt provision recognized by credit risk characteristics portfolio

At the time of impairment testing, the bad debt amount will recognized by the estimated losses, according to historical losses experience, which has been occurred in account receivable portfolio, and current economic status as well as portfolio structure and similar credit risk characteristics (debt paying capability for debtor based on terms of the contract).

Depreciation method of bad debt provision in different portfolio:

Item	Depreciation method
------	---------------------

Item	Depreciation method
Age portfolio	Accrual bad debt provision by aging of accounts

a. Depreciation method of bad debt provision by aging of accounts in portfolio

Age	Accrual ratio of account receivable (%)	Accrual ratio of other receivables (%)
Within 1 year (including one year, the same below)	No accrual	No accrual
1-2 years	5	5
2-3 years	20	20
Over 3 years	50	50

③Accounts receivable that are individually insignificant but with bad debt provision provided on an individual basis:

Account receivable with RMB one million at most and other account receivable with RMB 500,000 at most are recognized as account receivable with insignificant single amount.

As for the account receivable with insignificant single amount but with followed features, exercise impairment separately, if there has evidence of impairment, provision for bad debts shall be made at the difference of present value of estimated future cash flows in short of their book values, and shall be recognized as impairment losses: account receivable with dispute and arbitration involved or exist with the counter party; receivables which has obvious evidence that the debtor probably unable to performed payment obligations etc.

(3) Reversal of bad debt provisions

If there is evidence showing that the value of the account receivable has been recovered, and that the recovery is objectively related to events after recognition of the loss, the originally recognized impairment loss should be reversed and included in current profit and loss. However, the book values after such reversal shall not exceed the amortized costs of the account receivable on the reversal date, assuming there is no provision for impairment.

11. Inventories

(1) Classification of inventories

Inventory including raw materials, stock commodity and low value consumables etc.

(2) Pricing for inventories delivered and obtained

Inventories are priced at actual costs when acquired. Inventory cost includes procurement cost, processing cost and other costs. Raw materials and inventory commodities are measured under weighted average method when applied for use and delivered.

(3) Recognition for net realizable value of inventories and withdrawal method for inventory impairment provision

Net realizable value refers to the amount resulted by inventory's estimated sale price minor the cost, which is going to occurred till end of the completion, estimated sales expenses and relevant taxes, in daily activities. At the time of recognizing the net realizable value for inventory, on basis of unambiguous evidence, take the purpose of inventory held and influence of events after the balance sheet date into account at the same time.

On balance sheet date, measure of the inventory is made as the lower of their cost and or net realizable

values. Provision for inventory depreciation reserve are made while the net realizable values below the cost. Inventory falling price reserves withdrawal usually base on the difference of the cost of single inventory which over the net realizable value. As for inventories with numerous quantity and low unit price, inventory depreciation provision is made based on categories of inventories.

After inventory impairment provision, if any factor rendering write-downs of the inventories has been eliminated as net realizable value higher than its book value resulted, the amounts written down are recovered and reversed from the inventory depreciation reserve, which has been provided for. The reversed amounts are included into the current profit and loss.

(4) Inventory system was the perpetual inventory system.

(5) Low value consumptions and packing materials are amortized under amortization method when applied for use.

12. Classified as assets held for sale

If a non-current asset can be promptly sold at its existing status only according to the practice terms in connection with disposal of this kind of assets, and the Company has already made resolution on disposal of the non-current asset and entered into irrevocable transfer agreement with the transferee, and this transfer will be completed within one year, then the non-current asset would be calculated as non-current asset held for sale which would be not applicable to depreciation or amortisation since the date of classification as asset held for sale, and would be measured at the lower of its carrying value less disposal cost and fair value less disposal cost. Non-current asset held for sale consists of single item asset and disposal group. If a disposal group is a group of assets as defined by No.8 of Business Accounting Standards-Assets Impairment, and goodwill arising from business combination shall be allocated to the group of assets under this accounting principle, or the disposal group constitutes one operation of the group of assets, then the disposal group includes the goodwill arising from business combination.

For single non-current asset and asset in disposal group classified as assets held for sale, they shall be presented in balance sheet separately as current assets. For liabilities in disposal group relating to the transferred assets classified as assets held for sale, they shall be presented in balance sheet separately as current liabilities.

If an asset or disposal group classified as held for sale no longer meets the recognition condition as non-current asset held for sale, the Company will cease such recognition and measure the asset at the lower of (1)the carrying value of the asset or disposal group prior to being classified as held for sale, based on the amount adjusted with the depreciation, amortisation or impairment which should have been recognised assuming it had not been classified as held for sale; (2)the recoverable amount on the date when the Company decides to cease disposal.

13. Long-term equity investments

Long-term equity investments under this section refer to long-term equity investments in which the Company has control, joint control or significant influence over the investee. Long-term equity investment without control or joint control or significant influence of the Group is accounted for as available-for-sale financial assets or financial assets measured at fair value with any change in fair value charged to profit or loss. Details on its accounting policy please refer to Note 9. "Financial instruments" under section IV.

Joint control is the Company's contractually agreed sharing of control over an arrangement, which relevant activities of such arrangement must be decided by unanimously agreement from parties who share control. Significant influence is the power of the Company to participate in the financial and operating policy decisions of an investee, but to fail to control or joint control the formulation of such policies together with other parties.

(1) Determination of investment cost

For a long-term equity investment acquired through a business combination involving enterprises under common control, the initial investment cost of the long-term equity investment shall be the absorbing party's share of the carrying amount of

the owner's equity under the consolidated financial statements of the ultimate controlling party on the date of combination. The difference between the initial cost of the long-term equity investment and the cash paid, non-cash assets transferred as well as the book value of the debts borne by the absorbing party shall offset against the capital reserve. If the capital reserve is insufficient to offset, the retained earnings shall be adjusted. If the consideration of the merger is satisfied by issue of equity securities, the initial investment cost of the long-term equity investment shall be the absorbing party's share of the carrying amount of the owner's equity under the consolidated financial statements of the ultimate controlling party on the date of combination. With the total face value of the shares issued as share capital, the difference between the initial cost of the long-term equity investment and total face value of the shares issued shall be used to offset against the capital reserve. If the capital reserve is insufficient to offset, the retained earnings shall be adjusted. For business combination resulted in an enterprise under common control by acquiring equity of the absorbing party under common control through a stage-up approach with several transactions, these transactions will be judged whether they shall be treat as "transactions in a basket". If they belong to "transactions in a basket", these transactions will be accounted for a transaction in obtaining control. If they are not belong to "transactions in a basket", the initial investment cost of the long-term equity investment shall be the absorbing party's share of the carrying amount of the owner's equity under the consolidated financial statements of the ultimate controlling party on the date of combination. The difference between the initial cost of the long-term equity investment and the aggregate of the carrying amount of the long-term equity investment before merging and the carrying amount the additional consideration paid for further share acquisition on the date of combination shall offset against the capital reserve. If the capital reserve is insufficient to offset, the retained earnings shall be adjusted. Other comprehensive income recognised as a result of the previously held equity investment accounted for using equity method on the date of combination or recognised for available-for-sale financial assets will not be accounted for.

For a long-term equity investment acquired through a business combination involving enterprises not under common control, the initial investment cost of the long-term equity investment shall be the cost of combination on the date of acquisition. Cost of combination includes the aggregate fair value of assets paid by the acquirer, liabilities incurred or borne and equity securities issued. For business combination resulted in an enterprise not under common control by acquiring equity of the acquiree under common control through a stage-up approach with several transactions, these transactions will be judged whether they shall be treat as "transactions in a basket". If they belong to "transactions in a basket", these transactions will be accounted for a transaction in obtaining control. If they are not belong to "transactions in a basket", the initial investment cost of the long-term equity investment accounted for using cost method shall be the aggregate of the carrying amount of equity investment previously held by the acquiree and the additional investment cost. For previously held equity accounted for using equity method, relevant other comprehensive income will not be accounted for. For previously held equity investment classified as available-for-sale financial asset, the difference between its fair value and carrying amount, as well as the accumulated movement in fair value previously included in the other comprehensive income shall be transferred to profit or loss for the current period.

Agent fees incurred by the absorbing party or acquirer for the acquisition such as audit, legal service, and valuation and consultation fees, and other related administration expenses are charged to profit or loss in the current period at the time such expenses incurred.

The long-term equity investment acquired through means other than a business combination shall be initially measured at its cost. Such cost is depended upon the acquired means of long-term equity investments, which is recognised based on the purchase cost actually paid by the Company in cash, the fair value of equity securities issued by the Group, the agreed value of investment contract or agreement, the fair value or original carrying amounts of the non-monetary asset exchange transaction which the asset will be transferred out of the Company, and the fair value of long-term equity investment itself. The costs, taxes and other necessary expenses that are directly attributable to the acquisition of the long-term equity investments are also included in the investment cost. For additional equity investment made in order to obtain significant influence or common control over investee without resulted in control, the relevant cost for long-term equity investment

shall be the aggregate of fair value of previously held equity investment and additional investment cost determined according to “Accounting Standard for Business Enterprises No. 22 – Recognition and measurement of Financial Instruments”.

(2) Subsequent measurement and income recognition method

Long term equity investment by which the Company has common control (other than that constituting joint operation) or significant influence in investee is measured under equity method. In addition, long term equity investment by which the Company is able to exercise control in investee is measured under cost method in financial statements.

① Long term equity investment measured under cost method

Under cost method, long term equity investment is measured at initial investment cost, and cost of long term equity investment shall be adjusted in case of adding or recovering investment. Other than the price actually paid when obtaining investment or cash dividends or distribution declared but not paid in consideration, investment income for the period would be recognised based on the cash dividend or distribution declared by the investee.

② Long-term equity investments accounted for using the equity method

Under the equity method, where the initial investment cost of a long-term equity investment exceeds the investor’s interest in the fair value of the investee’s identifiable net assets at the acquisition date, no adjustment shall be made to the initial investment cost. Where the initial investment cost is less than the investor’s interest in the fair value of the investee’s identifiable net assets at the acquisition date, the difference shall be charged to profit or loss for the current period, and the cost of the long term equity investment shall be adjusted accordingly.

Under the equity method, investment gain and other comprehensive income shall be recognised based on the Group’s share of the net profits or losses and other comprehensive income made by the investee, respectively. Meanwhile, the carrying amount of long-term equity investment shall be adjusted. The carrying amount of long-term equity investment shall be reduced based on the Group’s share of profit or cash dividend distributed by the investee. In respect of the other movement of net profit or loss, other comprehensive income and profit distribution of investee, the carrying value of long-term equity investment shall be adjusted and included in the capital reserves. The Group shall recognise its share of the investee’s net profits or losses based on the fair values of the investee’s individual separately identifiable assets at the time of acquisition, after making appropriate adjustments thereto. In the event of inconformity between the accounting policies and accounting periods of the investee and the Company, the financial statements of the investee shall be adjusted in conformity with the accounting policies and accounting periods of the Company. Investment gain and other comprehensive income shall be recognised accordingly. In respect of the transactions between the Group and its associates and joint ventures in which the assets disposed of or sold are not classified as operation, the share of unrealised gain or loss arising from inter-group transactions shall be eliminated by the portion attributable to the Company. Investment gain shall be recognised accordingly. However, any unrealised loss arising from inter-group transactions between the Group and an investee is not eliminated to the extent that the loss is impairment loss of the transferred assets. In the event that the Group disposed of an asset classified as operation to its joint ventures or associates, which resulted in acquisition of long-term equity investment by the investor without obtaining control, the initial investment cost of additional long-term equity investment shall be the fair value of disposed operation. The difference between initial investment cost and the carrying value of disposed operation will be fully included in profit or loss for the current period. In the event that the Group sold an asset classified as operation to its associates or joint ventures, the difference between the carrying value of consideration received and operation shall be fully included in profit or loss for the current period. In the event that the Company acquired an asset which formed an operation from its associates or joint ventures, relevant transaction shall be accounted for in accordance with “Accounting Standards for Business Enterprises No. 20 “Business combination”. All profit or loss related to the transaction shall be accounted for.

The Group's share of net losses of the investee shall be recognized to the extent that the carrying amount of the long-term equity investment together with any long-term interests that in substance form part of the investor's net investment in the investee are reduced to zero. If the Group has to assume additional obligations, the estimated obligation assumed shall be provided for and charged to the profit or loss as investment loss for the period. Where the investee is making profits in subsequent periods, the Group shall resume recognizing its share of profits after setting off against the share of unrecognized losses.

If there is debit variation in relation to the long-term equity investments in associates and joint venture held prior to first adoption of the Accounting Standards for Business Enterprises by the Group on 1 January 2007, the amounts amortized over the original residual term using the straight-line method is included in the profit or loss for the period.

③ Acquisition of minority interests

Upon the preparation of the consolidated financial statements, since acquisition of minority interests increased of long-term equity investment which was compared to fair value of identifiable net assets recognized which are measured based on the continuous measurement since the acquisition date (or combination date) of subsidiaries attributable to the Group calculated according to the proportion of newly acquired shares, the difference of which recognized as adjusted capital surplus, capital surplus insufficient to set off impairment and adjusted retained earnings.

④ Disposal of long-term equity investments

In these consolidated financial statements, where the parent company disposes of a portion of the long term equity investments in a subsidiary without a change in control, the difference between disposal cost and disposal of long-term equity investments relative to the net assets of the subsidiary is charged to the shareholders' equity. As for the disposal of a portion of the long term equity investments in a subsidiary by the parent company leading to lose of control over such subsidiary, it shall be accounted for under the relevant accounting policies described in Note IV.5-(2) Headed "preparation methods for consolidated financial statements".

On disposal of a long-term equity investment otherwise, the difference between the carrying amount of the investment and the actual consideration paid is recognized through profit or loss in the current period.

In respect of long-term equity investment at equity with the remaining equity interest after disposal also accounted for using equity method, other comprehensive income previously under owners' equity shall be accounted for in accordance with the same accounting treatment for direct disposal of relevant asset or liability by investee on pro rata basis at the time of disposal. The owners' equity recognised for the movement of other owners' equity (excluding net profit or loss, other comprehensive income and profit distribution of investee) shall be transferred to profit or loss for the current period on pro rata basis.

In respect of long-term equity investment at cost with the remaining equity interest after disposal is also accounted for at cost, other comprehensive income recognised due to measurement at equity or recognition and measurement for financial instruments prior to obtaining control over investee shall be accounted for in accordance with the same accounting treatment for direct disposal of relevant asset or liability by investee and carried forward to current gains and losses on pro rata basis. The movement of other owners' equity (excluding net profit or loss, other comprehensive income and profit distribution of investee) shall be transferred to profit or loss for the current period on pro rata basis.

In the event of loss of control over investee due to partial disposal of equity investment by the Group, in preparing separate financial statements, the remaining equity interest which can apply common control or impose significant influence over the investee after disposal shall be accounted for using equity method. Such remaining equity interest shall be treated as accounting for using equity method since it is obtained and adjustment was made accordingly. For remaining equity interest which cannot apply common control or impose significant influence over the investee after disposal, it shall be accounted for using the recognition and measurement standard of financial instruments. The difference between its fair value and carrying amount as at the date of losing control shall be included in profit or loss for the current period. In respect of other comprehensive income recognised using equity method or the recognition and measurement standard of financial

instruments before the Group obtained control over the investee, it shall be accounted for in accordance with the same accounting treatment for direct disposal of relevant asset or liability by investee at the time when the control over investee is lost. Movement of other owners' equity (excluding net profit or loss, other comprehensive income and profit distribution under net asset of investee accounted for and recognised using equity method) shall be transferred to profit or loss for the current period at the time when the control over investee is lost. Of which, for the remaining equity interest after disposal accounted for using equity method, other comprehensive income and other owners' equity shall be transferred on pro rata basis. For the remaining equity interest after disposal accounted for using the recognition and measurement standard of financial instruments, other comprehensive income and other owners' equity shall be fully transferred.

In the event of loss of common control or significant influence over investee due to partial disposal of equity investment by the Group, the remaining equity interest after disposal shall be accounted for using the recognition and measurement standard of financial instruments. The difference between its fair value and carrying amount as at the date of losing common control or significant influence shall be included in profit or loss for the current period. In respect of other comprehensive income recognised under previous equity investment using equity method, it shall be accounted for in accordance with the same accounting treatment for direct disposal of relevant asset or liability by investee at the time when equity method was ceased to be used. Movement of other owners' equity (excluding net profit or loss, other comprehensive income and profit distribution under net asset of investee accounted for and recognised using equity method) shall be transferred to profit or loss for the current period at the time when equity method was ceased to be used.

The Group disposes its equity investment in subsidiary by a stage-up approach with several transactions until the control over the subsidiary is lost. If the said transactions belong to "transactions in a basket", each transaction shall be accounted for as a single transaction of disposing equity investment of subsidiary and loss of control. The difference between the disposal consideration for each transaction and the carrying amount of the corresponding long-term equity investment of disposed equity interest before loss of control shall initially recognised as other comprehensive income, and subsequently transferred to profit or loss arising from loss of control for the current period upon loss of control.

14. Investment real estate

Investment real estate is the real estate that held by the Company for purpose of obtaining rent or capital appreciation or both purpose received. Investment real estate including rented land use right, land use right held ready for transfer after appreciation and rented buildings etc.

The investment real estate shall be measured initially at the cost. The subsequent spending related to the investment real estate, if it is very likely for the related economic interest to flow in and its cost can be reliably measured, shall be included in the cost for the investment real estate. Other subsequent spending shall be included in the current profit or loss when occurring.

The Company applies the cost model for subsequent measurement of investment real estate, and depreciates and amortizes it as per the policy consistent to those for the houses and buildings and land use right.

For details about the methods for impairment testing of the investment real estate and for accrual of impairment provision, see Note IV 20 "Impairment of long term assets".

Where property for own use or inventory transfers to investment property, or investment property transfers to property for own use, carrying value before such transfer shall be taken as book value after such transfer.

In the event that an investment property is converted to an owner-occupied property, such property shall become fixed assets or intangible assets since the date of its conversion. In the event that an owner-occupied property is converted to real estate held to earn rentals or for capital appreciation, such fixed assets or intangible assets shall become an investment property since the date of its conversion. Upon the conversion, investment property which is measured at cost is accounted for with the carrying value prior to conversion, and investment property which is measured at fair value is accounted for with the fair value as of the conversion date.

If an investment property is disposed of or if it withdraws permanently from use and no economic benefit will be obtained

from the disposal, the recognition of it as an investment property shall be terminated. When an investment property is sold, transferred, retired or damaged, the amount of proceeds on disposal of the property net of the carrying amount and related tax and surcharges is recognised in profit or loss for the current period.

15. Fixed assets

(1) Recognition criteria of fixed assets

Fixed assets refer to the tangible assets held for the purpose of producing commodities, rendering services, renting or business management with useful lives exceeding one fiscal year. Fixed assets are only recognised when the relevant economic benefits are likely to inflow to the Company and their cost can be measured reliably. Fixed assets are initially measured at cost taking into account predicted disposal expenses.

(2) Depreciation method of fixed assets

The initial measurement of a fixed assets shall be made at its cost and consider expected discard expenses factors alternatives. Accrual depreciation of fixed assets shall be made based on straight-line depreciation within the service life since the second month, when the fixed assets reached its expected condition for use. Service life, estimated net residual value and annual depreciation rate for vary fixed assets are as:

Type	Depreciation term (year)	Residual rate (%)	Annual depreciation rate (%)
House and buildings	35	3	2.77
Machinery equipment	12	3	8.08
Transportation equipment	7	3	13.86
Electronic equipment	7	3	13.86
Office and other equipment	7	3	13.86
Decoration charge for self-owned houses	10	0	10.00

Estimated net residual value is the amount obtained from disposal of such fixed assets after estimated disposal expense deducted, on assumption basis of the fixed assets has full estimated service life and in an anticipating condition of service life terminated.

(3) Impairment test method and accrual of depreciation reserves for fixed asset

Impairment test method and accrual of depreciation reserves for fixed asset please found in “20. Impairment of non-current and non-financial assets” in Note IV.

(4) Others

As for the subsequent expenditure related to fixed assets, if the economic benefits related to the fixed assets is probable to flow into the Company and its cost could be measured reliably, then the expenditure shall be included in costs of the fixed assets, and the carrying value of the replaced portion shall be derecognized. Other subsequent expenditures other than this shall be included in profits or losses of the period when occurred.

The disposal income from disposal, transfer, dumping or damage of fixed assets less its carrying value and related tax expenses shall be recorded in profits or losses of the period.

The Company, at least, re-reviews the use of life, projected net residual value and depreciation method of fixed assets at the end of year. For any change of the above factor, it shall be dealt as change of accounting estimation.

16. Construction-in-progress

Cost of construction-in-progress should be recognized by the actual construction costs, including various construction costs during the period of construction, the capitalized borrowing costs prior to the expected conditions for use and other relevant expenses etc. The construction-in-progress should be carried forward as fixed assets after reaching the expected conditions for use.

Impairment test method and impairment provision method for the construction-in-progress found in “20. Impairment of non-current/non-financial assets” in Note IV.

17. Borrowing costs

Borrowing costs include interest, amortization of discounts or premiums related to borrowings, ancillary costs incurred in connection with the arrangement of borrowings, and exchange differences arising from foreign currency borrowings. For borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, when expenditures for the asset and borrowing costs are being incurred, activities relating to the acquisition, construction or production of the asset that are necessary to prepare the asset for its intended use or sale have commenced, such borrowing costs shall be capitalized as part of the cost of that asset; and capitalization shall be discontinued when the qualifying asset is ready for its intended use or sale. Other borrowing costs shall be recognized as expense in the period in which they are incurred.

Where funds are borrowed for a specific purpose, the amount of interest to be capitalized shall be the actual interest expense incurred on that borrowing for the period less any bank interest earned from depositing the borrowed funds before being used into banks or any investment income on the temporary investment of those funds. Where funds are borrowed for general purpose, the Group shall determine the amount of interest to be capitalized on such borrowings by applying a capitalization rate to the weighted average of the excess amounts of cumulative expenditures on the asset over and above the amounts of specific-purpose borrowings. The capitalization rate shall be the weighted average of the interest rates applicable to the general-purpose borrowings.

During the capitalization period, exchange differences related to the principal and interest on a specific purpose borrowing denominated in foreign currency shall be capitalized as part of the cost of the qualifying asset. Exchange differences related to general-purpose borrowings denominated in foreign currency shall be included in profit or loss for the current period.

Qualifying assets are assets (fixed assets, investment property, inventories, etc) that necessarily take a substantial period of time for acquisition, construction or production to get ready for their intended use or sale.

Capitalization of borrowing costs shall be suspended during periods in which the acquisition, construction or production of a qualifying asset is interrupted abnormally, when the interruption is for a continuous period of more than 3 months, until the acquisition, construction or production of the qualifying asset is resumed.

18. Intangible assets

(1) Intangible assets

An intangible asset is an identifiable non-monetary asset without physical substance owned or controlled by the Group.

An intangible asset shall be initially measured at cost. The expenditures incurred on an intangible asset shall be recognized as cost of the intangible asset only if it is probable that economic benefits associated with the asset will flow to the Group and the cost of the asset can be measured reliably. Other expenditures on an intangible asset shall be charged to profit or loss when incurred.

Land use right acquired shall normally be recognized as an intangible asset. Self-constructed buildings (e.g. plants), related land use right and the buildings shall be separately accounted for as an intangible asset and fixed asset. For buildings and structures purchased, the purchase consideration shall be allocated among the land use right and the buildings on a reasonable basis. In case there is difficulty in making a reasonable allocation, the consideration shall be recognized in full as fixed assets.

An intangible asset with a finite useful life shall be stated at cost less estimated net residual value and any accumulated impairment loss provision and amortised using the straight-line method over its useful life when the asset is available for use. Intangible assets with indefinite life are not amortised.

The Group shall review the useful life of intangible asset with an infinite useful life and the amortization method applied at period-end. A change in the useful life or amortization method used shall be accounted for as a change in accounting estimate. For an intangible asset with an indefinite useful life, the Group shall review the useful life of the asset. If there is evidence indicating that the period during which the intangible assets brings in economic benefits to the Group can be predicted, the Group shall estimate the useful life of that asset and make amortization under the amortization policies applicable to intangible assets with finite useful life.

(2) Research and development expenditures

Research and development expenditure of the Group was divided into expenses incurred during the research phase and expenses incurred during the development phase.

Expenses incurred during the research phase are recognised as profit or loss in the current period.

Expenses incurred during the development phase that satisfy the following conditions are recognised as intangible assets, while those that do not satisfy the following conditions are accounted for in the profit or loss for the current period:

- ① it is technically feasible that the intangible asset can be used or sold upon completion;
- ② there is intention to complete the intangible asset for use or sale;
- ③ the intangible asset can produce economic benefits, including there is evidence that the products produced using the intangible asset has a market or the intangible asset itself has a market; if the intangible asset is for internal use, there is evidence that there exists usage for the intangible asset;
- ④ there is sufficient support in terms of technology, financial resources and other resources in order to complete the development of the intangible asset, and there is capability to use or sell the intangible asset;
- ⑤ the expenses attributable to the development phase of the intangible asset can be measured reliably.

If the expenses incurred during the research phase and the development phase cannot be distinguished separately, all development expenses incurred are accounted for in the profit or loss for the current period.

(3) Intangible assets impairment test method and their impairment provision

The method for impairment test and impairment provision of intangible assets is detailed in Note IV. 20 “Impairment of non-current non-monetary financial asset”.

19. Long-term prepaid expenses

Long-term prepaid expenses refer to the general expenses that occurred but shall be amortized over one year in reporting period and later period. Long-term prepaid expenses shall amortized by straight-line method in expected benefit period.

20. Long-term impairment

The Group will judge if there is any indication of impairment as at the balance sheet date in respect of long-term investments such as fixed assets, construction in progress, intangible assets with a finite useful life, investment properties measured at cost, and long-term equity investments in subsidiaries, joint controlled entities and associates. If there is any evidence indicating that an asset may be impaired,

recoverable amount shall be estimated for impairment test. Goodwill, intangible assets with an indefinite useful life and intangible assets beyond working conditions will be tested for impairment annually, regardless of whether there is any indication of impairment.

If the impairment test result shows that the recoverable amount of an asset is less than its carrying amount, the impairment provision will be made according to the difference and recognized as an impairment loss. The recoverable amount of an asset is the higher of its fair value less costs of disposal and the present value of the future cash flows expected to be derived from the asset. An asset's fair value is the price in a sale agreement in an arm's length transaction. If there is no sale agreement but the asset is traded in an active market, fair value shall be determined based on the bid price. If there is neither sale agreement nor active market for an asset, fair value shall be based on the best available information. Costs of disposal are expenses attributable to disposal of the asset, including legal fee, relevant tax and surcharges, transportation fee and direct expenses incurred to prepare the asset for its intended sale. The present value of the future cash flows expected to be derived from the asset over the course of continued use and final disposal is determined as the amount discounted using an appropriately selected discount rate. Provisions for assets impairment shall be made and recognized for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group shall determine the recoverable amount of the asset group to which the asset belongs. The asset group is the smallest group of assets capable of generating cash flows independently.

For the purpose of impairment testing, the carrying amount of goodwill presented separately in the financial statements shall be allocated to the asset groups or group of assets benefiting from synergy of business combination. If the recoverable amount is less than the carrying amount, the Group shall recognise an impairment loss. The amount of impairment loss shall first reduce the carrying amount of any goodwill allocated to the asset group or set of asset groups, and then reduce the carrying amount of other assets (other than goodwill) within the asset group or set of asset groups, pro rata on the basis of the carrying amount of each asset.

An impairment loss recognized on the aforesaid assets shall not be reversed in a subsequent period in respect of the restorable value.

21. Staff remuneration

Staff remuneration includes short term staff remuneration, post office benefit, dismissal benefit, among which:

Short term staff remuneration mainly consists of salary, bonus, allowance and subsidy, staff benefits, medical insurance, maternity insurance, work related injury insurance, housing funds, labor unit fee and education fee, non-monetary benefits, etc. short term staff remuneration actually happened during the accounting period in which staff provides services to the Company is recognised as liability, and shall be included in current gains and losses or relevant asset cost. Non-monetary benefits are measured at fair value.

Post office benefits mainly consist of defined withdraw plan and defined benefit plan. Defined withdraw plan mainly includes basic pension insurance, unemployment insurance and annuity, and the contribution payable is included in relevant asset cost or current gains and losses when occurs. Our defined benefit plan mainly relates to retirement benefits. The Company engaged independent actuary to make estimation on demographic variables and financial variables under predicted accumulative benefits unit method with unbiased and consistent actuary assumption, measure liabilities arising from defined benefit plan and determine vesting periods of various liabilities. On balance sheet date, the Company presented liabilities arising from defined benefit plan at present value, and recorded service costs as profit or loss for the period.

When the Company terminates the employment relationship with employees before the end of the employment contracts or provides compensation as an offer to encourage employees to accept voluntary redundancy, the Company shall recognise employee compensation liabilities arising from compensation for staff dismissal and included in profit or loss for the current period, when the Company cannot revoke unilaterally compensation for dismissal due to the cancellation of labour relationship plans and employee redundant proposals; and the Company recognise cost and expenses related to payment of compensation for dismissal and restructuring, whichever is earlier. However, if the compensation for termination of

employment is not expected to be fully paid within 12 months from the reporting period, it shall be accounted for other long-term staff remuneration.

Employee internal retirement plans is to use the same principle to deal with termination benefits. The group will pay staff salary, social insurance and others from the date they stop providing service to their retire-day. This amount shall be included in the current profits and losses (termination benefits), only when it meets the projected liabilities confirmation conditions.

For other long-term employee benefits provided by the Company to its employees, if satisfy with the established withdraw plan, then the benefits are accounted for under the established withdraw plan, otherwise accounted for under defined benefit scheme.

22. Accrual liability

The obligation pertinent to contingencies shall be recognized as accrual liability when the following conditions are satisfied simultaneously: (1) That obligation is a current obligation of the Group; (2) It is likely to cause any economic benefit to flow out of the enterprise as a result of performance of the obligation; and (3) The amount of the obligation can be measured in a reliable way.

At the balance sheet date, considering matters related to risks, uncertainties and time value of money and other factors, the expected liabilities are measured in accordance with the best estimate of the necessary expenses for the performance of the current obligation.

If the expenditure required paying all or part of the expected liabilities was compensated by the third party, and the amount of compensation basically can be sure when received, it could be recognized as a separate asset. But the amount of compensation confirmed couldn't be more than the book value of the estimated debts.

23. Income

(1) Income of commodities sales

When the transfer of significant risks and rewards of ownership of the goods to the buyer is done, when the right of management usually associated with ownership is not reserved, when we didn't effectively control the goods sold, the amount of revenue can be measured reliably. The associated economic benefits are likely to flow into the enterprise. And the related costs incurred or to be incurred can be measured in a reliable way. Thus we realize sales income.

The company engages in sales of cars, confirming income after the vehicle delivery to customers according to agreement, payment received or the rights to receive payment.

(2) Income from providing labor

On condition that provision of services trade results can be reliably estimated, we confirm income from providing labor on the balance sheet date according to the percentage of completion. The Company calculates the completion schedule through the ratio of the costs incurred taking up of the estimated total cost.

The results of labor transaction provided can be estimated reliably only when simultaneously: ①the amount of revenue can be measured reliably; ②the economic interests are likely to flow into the enterprise; ③the degree of completion can be reliably determined; ④cost occurred and to be occurred can be reliably measured.

If the service transaction results couldn't be able to reliably estimated, labor income will be calculated according to according to amount of labor costs which has occurred and is expected to be t compensated, and labor costs occurred would be included as expenses of the current period. Labor cost occurred which cannot be compensated will not be included as revenue.

The Company engages in car repair services, confirming income after the car repair service is delivered to customers according to agreement, payment received or the rights to receive payment.

(3) Use fee income

According to the relevant contract or agreement, revenue is recognized in accordance with the accrual basis.

(4) Interest income

Interest income is confirmed in accordance with time and actual interest others make use of the monetary capital of the group

24. Government subsidy

A government subsidy means the monetary or non-monetary assets obtained free by the Group from the government, but excluding the capital invested by the government as the owner of the enterprise. Government subsidies consist of the government subsidies pertinent to assets and government subsidies pertinent to income. Government grant obtained by the Company for the purpose of constructing or otherwise forming long term assets is recognised as government grant related to assets, and other government grants are recognised as those related to income. If government document fails to identify specific grantee, government grants will be categorized into government grants related to income or assets respectively under the below method: (1) in case government document indicates the specific project applicable to the grant, such categorization shall be made based on the respective proportion of expenditures to form assets or be recorded as expenses in budget for the specific project. The allocation proportion will be reviewed on each balance sheet date, and is subject to necessary alteration; (2) in case government document only indicate general purpose of such grant instead of specific project, the grant shall be viewed as government grant related to income.

The government subsidy with monetary assets concerned should be measured by the actual received or receivable amount while non-monetary assets government subsidy measured by fair value; if without realizable fair value obtained, measured by nominal amount instead. The government subsidy with nominal amount measured should reckon into current gains and losses.

Government grants are generally recognised when received and measured at the amount actually received, but are measured at the amount likely to be received when there is conclusive evidence at the end of the accounting period that the Group will meet related requirements of such grants and will be able to receive the grants. The government grants so measured should also satisfy the following conditions: (1) the amount of the grants be confirmed with competent authorities in written form or reasonably deduced from related requirements under financial fund management measures officially released without material

uncertainties; (2) the grants be given based on financial support projects and fund management policies officially published and voluntarily disclosed by local financial authorities in accordance with the requirements under disclosure of government information, where such policies should be open to any company satisfying conditions required and not specifically for certain companies; (3) the date of payment be specified in related documents and the payment thereof be covered by corresponding budget to ensure such grants will be paid on time as specified; and (4) other relevant conditions which shall be met based on the specific situations of the Company and the subject matter.

Asset-related government subsidies are recognized as deferred income and accounted into the current gains/losses equally within service life for the relevant assets. The government subsidies pertinent to incomes, which are used for compensating the related future expenses or losses of the enterprise shall be recognized as deferred income and should reckoned into current gains/losses in period of when relevant expenses are recognized; if used for compensating the occurred relevant expenses and losses, reckoned into current gains/losses directly.

As for the recognized government subsidy needs to return, if there has relevant balance of deferred incomes, relevant book balance of the deferred income should be written down, and the exceeded part should included in the current gains/losses; if there has no relevant balance of deferred incomes, reckoned into current gains/losses directly.

25. Deferred income tax assets and deferred income tax liabilities

(1) The current income tax

At the balance sheet date, for the current income tax liabilities (or assets) arising during the current and previous periods, current income tax should be calculated in line with expected payable (or return) income tax amount in accordance with the provisions of the tax law. Calculation of the current income tax expenses on the basis of the computation of taxable income is adjusted to the pre-tax accounting profit according to the relevant provisions of the tax law.

(2) The deferred income tax assets and deferred income tax liabilities

As for the balance between the book value of some assets and liabilities and the tax base, and those temporary difference arisen from balance which is not recognized as an asset or liability but whose difference between the book value and tax base could be calculable in accordance with the provisions of the tax law, we adopt debt method of balance sheet to recognize deferred income tax assets and deferred income tax liabilities.

As for taxable temporary differences which is arisen from initial recognition of goodwill, and those related to initial recognition of assets or liabilities arisen during trade with neither merging nor those which won't affect the accounting profit and taxable income (or deductible loss), related deferred tax liabilities will not be confirmed. In addition, as for temporary differences taxable related to subsidiary companies, associated enterprises and joint venture investment, if the group is able to control the reversal time of the temporary difference, and the temporary differences in the foreseeable future probably will not be reversed, we also could not confirm the deferred income tax liabilities. In addition to the above condition, the group could confirm all the other deferred income tax liabilities arising from taxable temporary differences.

As for deductible temporary differences related to initial reorganization of asset or liability arising from trades with neither merge nor those which won't affect the accounting profit and taxable income (or deductible loss), we'll not recognize relevant deferred income tax assets. In addition, as for deductible temporary differences related to subsidiary companies, associated enterprises and joint venture investment, if the temporary differences in the foreseeable future probably will not be reversed, we also could not confirm the deferred income tax assets. In addition to the above condition, the group could confirm all the other deferred income tax assets arising from deductible temporary differences within benchmark of income of taxable deductible temporary differences.

As for deductible loss or tax deduction which to be reversed in the following years, we confirm the corresponding deferred income tax assets within benchmark of future taxable income to be likely deducted for deductible loss and tax deduction.

On the balance sheet date, the deferred income tax assets and liabilities are measured according to the provisions of the tax law, in accordance with the applicable tax rate during related assets to be expected recovery or related liabilities to be paid off.

At the balance sheet date, we recheck the book value of deferred income tax assets. If in future it is unlikely to obtain adequate taxable income to offset the benefit of the deferred income tax asset, then we write down the book value of deferred income tax assets. When it is probable to obtain adequate taxable income, amount written down shall be reversed.

(3) The income tax expenses

The income tax expense included the current income tax and deferred income tax.

In addition to trades and current income tax and deferred income tax related to projects which are included in other comprehensive income or directly included in owners' interest, as well as the book value whose goodwill arranged in line with deferred income tax arising from enterprises combination, all the other current income tax and deferred income tax expenses or income will be included in current profit and loss.

(4) Offset of income tax

When the Group has a legal right to settle on a net basis and intends either to settle on a net basis or to realise the assets and settle the liabilities simultaneously, current tax assets and current tax liabilities are offset and presented on a net basis.

When the Group has a legal right to settle current tax assets and liabilities on a net basis, and deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different

taxable entities which intend either to settle current tax assets and liabilities on a net basis or to realise the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax assets or liabilities are expected to be reversed, deferred tax assets and deferred tax liabilities are offset and presented on a net basis.

26. Leasing

Finance lease transfers substantially all the risks and rewards related to the ownership of an asset. Its ownership may eventually transfer, also may not. While all the other leases are classified as operating leases.

(1) The Company keeps record of lease business as lessee

Rental expense of operating lease is included in the relevant asset costs or current profits and losses through the straight-line method during every period. Initial direct costs shall be included in profit or loss for the current period. Or rent to the actual shall be included in the current profits and losses.

(2) The Company keeps record of lease business as lessor

Rental income of operating lease is included in the relevant asset costs or current profits and losses through the straight-line method during every period. The larger amount of initial direct costs shall be capitalized when it is created, and shall be included in the current profits and losses during the lease period in accordance with same basic as the confirmed amount by stages. The other small amount of initial direct costs shall be included in the current profits and losses when it's created. Or rent to the actual shall be included in the current profits and losses.

(3) Financing lease business with the Group recorded as lessee

On the beginning date of the lease, the entry value of leased asset shall be at the lower of the fair value of the leased asset and the present value of minimum lease payment at the beginning date of the lease. Minimum lease payment shall be the entry value of long-term accounts payable, with difference recognised as unrecognised financing expenses. In addition, initial direct costs attributable to leased items incurred during the process of lease negotiation and signing of lease agreement shall be included in the value of leased assets. The balance of minimum lease payment after deducting unrecognised financing expenses shall be accounted for long-term liability and long-term liability due within one year.

Unrecognised financing expenses shall be recognised as financing expenses for the current period using effective interest method during the leasing period. Contingent rent shall be included in profit or loss for the current period at the time it incurred.

(4) Financing lease business with the Group recorded as lessor

On the beginning date of the lease, the entry value of lease receivable shall be the aggregate of minimum lease receivable and initial direct costs at the beginning date of the lease. The unsecured balance shall be recorded. The aggregate of minimum lease receivable, initial direct costs and unsecured balance and the different between their present value shall be recognised as unrealised financing income. The balance of lease receivable after deducting unrecognised financing income shall be accounted for long-term debt and long-term debt due within one year.

Unrecognised financing income shall be recognised as financing income for the current period using effective interest method during the leasing period. Contingent rent shall be included in profit or loss for the current period at the time it incurred.

27. Other significant accounting policies and accounting estimation

(1) Discontinued operation

Discontinued operation refers to the operation disposed or classified as held-for-sale by the Company and presented separately under operation segments and financial statements, which has fulfilled one of the following criteria: ① it represents an independent key operation or key operating region; ② it is part of the proposed disposal plan on an independent key operation or proposed disposal in key operating region; or ③ it only establishes for acquisition of subsidiary through disposal.

Accounting for discontinued operation is set out in note IV 12 "classified as assets held for sale".

(2) Repurchase of shares

Share repurchase consideration paid and transaction costs to reduce the owner's equity, repurchase, transfer or cancellation of Chenming Paper's shares, the gains or losses are not recognised.

In respect of transfer of treasury shares, the difference between the actual amount received and the carrying amount of treasury shares shall be included in capital reserve. When insufficient to dilute, capital reserve will be offset against the surplus reserve and retained profits. Treasury shares are cancelled at par value and by the number of shares cancelled to reduce the share capital. The difference between the book balance and the nominal value of the treasury shares shall be offset against the capital reserve. When insufficient to dilute, capital reserve will be offset against the surplus reserve and retained profits.

(3) Assets securitization

Partial assets ("trust properties") of the Company are securitized. Relevant assets are operated by special purpose vehicles on trust. The special purpose vehicles issue superior assets supporting securities to investors and the Company holds subordinated assets supporting securities. The subordinated ones are not allowed to transfer prior to completion of repayment of principal and interest of superior ones. As assets service provider, the Company provides assets maintenance and normal management, determination of annual assets disposal plan, preparation and implementation of assets disposal plan, execution of relevant assets disposal agreement and regular preparation of assets service report. In addition, as liquidity supporting institution, the Company shall provide liquidity support where principal of superior assets supporting securities aren't paid in full, to make up shortage of interest or principal. Trust properties, after being applied to pay trust taxes and associate expenses, are preferentially used to repay the principal and interests of superior assets supporting securities, and the remaining trust properties after full settlement of such principal and interests are recorded as income of subordinated assets supporting securities and vested by the Company. The Company actually keeps nearly all the risks and rewards of trust properties, thus it doesn't derecognize trust properties. Besides, the Company owns effective control over special purpose vehicle which is included in consolidated financial statements.

When applying accounting policies in relation to securitization of financial assets, the Company has considered the risks and rewards of assets transferred to other entity as well as the level of control that the Company can exercise in respect of such entity:

- In case that the Company has transferred nearly all the risks and rewards of ownership of financial assets, the Company derecognizes such financial assets;
- In case that the Company keeps nearly all the risks and rewards of ownership of financial assets, the Company continues to recognize such financial assets;
- In case that the Company doesn't transfer or keep nearly all the risks and rewards of ownership of financial assets, the Company considers whether it owns control over such financial assets. If the Company maintains no control, it will derecognize such assets, and recognize the rights and liabilities occurred or kept during transfer as assets or liabilities respectively. If the Company maintains control, it will recognize such financial assets based on the continuous involvement level in respect of such assets.

28. Changes of major accounting policies and accounting estimation

(1) Changes of accounting policy

No accounting policy changed in reporting period.

(2) Changes of accounting estimate

No accounting estimate changed in reporting period.

29. Major accounting judgment and estimate

The Company need make judgment, estimation and hypothesis to book value of those unaccountable items in sheet due to inner uncertainties of operating activities in the process of using accounting policies. These judgments, estimates and

assumptions are made in line with the Company's past management experience, and in consideration of other relevant factors. These judgments, estimates and assumptions will affect disclosure of amount of income, expenses, assets and liabilities as well as contingent liability on the balance sheet day. However, the uncertainties in these estimates may cause significant adjustments to book value of those asset or liability affected in the future.

The Company rechecks regularly the judgment, estimation and hypothesis based on sustainable management. As for a change affecting only the current period, the amount shall be confirmed only in the current period; for those not only affecting the current but the future, the amount shall be confirmed in the current and future period.

At the balance sheet date, the Company needs to determine amount of items of the financial statements, estimation and hypothesis shown as the following important areas:

(1) Provision for bad debts

The Company accounts for the allowance for bad debt losses according to the receivable accounting policies. Accounts receivable is the valuation of accounts receivable can be recovered based on. Identification of devaluation of accounts receivable needs judgments and estimates of management level. Difference between actual results and the original estimates impact reversal of the book value accounts receivable and accounts receivable for provision for bad debts during the estimation was changing.

(2) Provision of inventory devaluation

According to the inventory accounting policies, the Company shall accrue inventory devaluation provision as for inventory whose cost is higher than net realizable and those obsolete or unmarketable in accordance with the lower one in cost and net realizable value. Write-down of inventories to net realizable value is to assess the salability and net amount of prospect realization. Identification of inventory impairment requires management's judgment and estimation after their obtaining conclusive evidence and consideration of the purpose for holding inventories, events effects occurring after balance sheet date. The difference between actual results and original estimates will affect the reversal of book value and devaluation provision of inventories during the estimation was changing.

(3) Financial assets available for sale

In respect of impairment of available-for-sale financial assets, whether impairment loss shall be recognised in income statement significantly depends on the judgments and assumptions of the management. While making judgments and assumptions, the Company shall assess the excess of cost of the investee's identifiable net assets attributable to the investment over fair value and the duration, and financial condition and short term business outlook of the investee, including industry situation, technical reform, credit rating, default rate and risks from counterparties.

(4) Long-term provision for asset impairment

The Company has checked if there is any sign that the long-term asset except for the financial assets may have the impairment at the balance sheet date. For the intangible assets with uncertain service life, in addition to the annual impairment test, make the impairment test when it has signs of impairment. Proceed with the impairment test when there is any sign indicates that the book amounts of other long-term assets except for the financial assets are uncollectible

When the book value of the asset or group of assets exceeds its recoverable amount, i.e. the higher one between the net amount after subtracting the disposal costs from the fair value and the present value of the future cash flow, it indicates impairment occurs.

The net amount after subtracting the disposal costs from the fair value is determined by subtracting the incremental costs

directly attributable to this disposal of assets from the sales agreement price similar to assets in fair dealing or the observable market price.

When predicting the present value of future cash flows, it is required to make significant judgments to the output, selling price and related operating expenses of this asset or group of assets and the discount rate used for calculating the present value. The Company shall adopt all available related data when predicting the recoverable amounts, including making predictions about the relevant output, selling price and related operating expenses based on reasonable and supportable assumptions.

(5) Depreciation and amortization

For the investment real estate, fixed assets and intangible assets, the Company takes a straight-line depreciation and amortization within service life in consideration of its residual value. The Company regularly review service life, thus determine the depreciation and amortization amount in each reporting period. Life is determined based on past experience of similar assets and technology update is expected. If the previous estimate changes, we will adjust depreciation and amortization expense in future periods.

(6) The deferred income tax assets

Within the limits that it is very likely to have sufficient taxable profits to offset losses, the Company confirms deferred income tax assets using all unused tax losses. This requires the management to use a lot of judgment to estimate the time and amount of future taxable profits, combined with the tax planning strategy, thus confirm the amount of deferred income tax assets.

(7) The income tax

During ordinary course of business, uncertainty exists in final tax treatment and calculation of a part of trading. Whether part of the project is in pre tax expenses requires approval of tax authorities. If the final confirmation of these tax matters differs from an initial estimate, the difference will affect current income tax and deferred income tax during the final period.

(8) Accrual liabilities

The Company estimates and accrues corresponding provision for product quality guarantee, expected contract loss, penalty for late delivery and others in accordance with terms of the contract, existing knowledge and experience. When such contingencies has formed a present obligation, and the performance of the current obligation is likely to lead to the outflow of economic benefits of the Company, the Company recognizes the best estimate of required expense when performing current obligation as accrual liability. The recognition and measurement of debt is largely dependent on the judgment of management. In the process of judgment the Company needs to assess the contingent risks, uncertainties and money and the time value and other factors.

VII. Taxation

1. Main tax and tax rate

Type	Tax rate
VAT	The output tax of taxable income is calculated by the tax rate of 17% , 6%, or 11%, the added-value tax is calculated and paid according to the balance after

Type	Tax rate
	deducting the input VAT allowed to be deducted in current period, immovable property leasing is levied taxes by 5% (immovable property achieved before April 30, 2016).
Operation tax	Calculated and paid on 5% of the taxable operation amount
City maintaining & construction tax	Calculated and paid on 7% of the turnover tax actually paid
Education surcharge	Calculated and paid on 3% of the turnover tax actually paid
Local education surcharge	Calculated and paid on 2% of the turnover tax actually paid
Corporation income tax *	Calculated and paid on 25% of the taxable income amount and tax by the levy rate

Since May 1, 2016, the pilot scheme scope of changing the business tax to added-value tax has extended to construction industry, real estate, financial industry, living service industry, etc., the Company and its subsidiaries' immovable property leasing, property management and service business all fall within the scope of the pilot.

* Note: The Company and subsidiaries exercise rate of 25% in 2016, except Shenzhen New Yongtong Dongxiao Vehicle Inspection Co., Ltd., which has taxed on levy rate.

VIII. Enterprise consolidation and consolidated financial statements

Unless otherwise stated, the follow notes (including the items of financial statement of the Company), year-begin refers to 1st January 2016 while period-end refers to 30th June 2016.

1. Monetary fund

1. Important commitments

(1) Capital commitments

Item	Closing balance	Balance at year-begin
Signed without recognized in financial statement		
—Purchase and construction of long-term assets commitment	137,851,735.07	158,289,230.16
Total	137,851,735.07	158,289,230.16

2. Contingency

(1) Contingent liability and its financial influence formed by un-settle lawsuits or arbitration

①In October 2005, a lawsuit was brought before Shenzhen Luo Hu District People's Court by the Company, which was the recognizer of Jintian Industrial (Group) Co., Ltd. ("Jintian") to require Jintian to redress RMB 4,081,830 (principal: RMB 3,000,000, interest: RMB 1,051,380, legal fare: RMB 25,160 and executive fare: RMB 5,290). Shenzhen Intermediate People's Court had adjudged that the Company won the lawsuit and the forcible execution had been applied by the Company. As for the deducted amount in previous years, the Company has counted as debt losses. The lawsuit has not executed yet till on 30 June 2015.

In April 2006, Shenzhen Development Bank brought an accusation against Jintian's overdue loan two million U.S. dollars and the Company who guaranteed for this loan. The company took on the principal and all interest. After that, the Company appealed to Shenzhen Luohu District People's Court, asking Jintian to repay 2,960,490 U.S. dollars and interest. In 2008, it reached Shen Luo No.937 Civil Reconciliation Agreement (2008) after the mediating action taken by Shenzhen Luohu District People's Court. The agreement is as follows: If Jintian repay 2,960,490 U.S. dollars before October 31, 2008, the company will exempt all the interest. If Jintian can not settle the amount on time, it will pay the penalty in accordance with the People's Bank of China RMB benchmark lending rate over the same period. The lawsuit has not executed yet till on 30 June 2015.

②Subsidiary of the Company Shenzhen SD Tellus Real Estate Company ("Tellus Real Estate Company") entered

into the “Contract of Liyehui Food Street Co-operation in Buji Town” with Shenzhen Jinlu Industrial & Trading Company (“Jinlu Company”) on 29 November 1994. In accordance with the Contract, on the foundation of “Cooperative Development Contract of Liyehui Food Street in Buji Town” signed between the Jinlu Company and land providers -- Shenzhen Real Estate Management Branch Bureau of Guangzhou Military Region (“Real Estate Management Branch Bureau”) and People’s Liberation Army Unit 75731 (“ Unit 75731”), construction funds 10 million Yuan invested by Tellus Real Estate, received fixed floor area of 6,000 M² property, and Jinlu Company promise to delivered the completed building and ancillary facility at the end of November 1995. Tellus Real Estate Company have invested a total of 9,822,500.00 Yuan in cooperative development up to 31 December 1996, however, Tellus Real Estate Company failed to get the property should enjoy on the agreed date for property hand over. Tellus Real Estate Company institute an action at law to the Court, requesting Jinlu Company pay back the 9.8 million Yuan investment and interests immediately and shoulder all the Court Costs, Real Estate Management Branch Bureau and Unit 75731 were sentence to be the defendant pursuant to the law in trial. On 18 March 2003, in line with the Written Judgment (2000) Shen Zhong Fa Fang Chu Zi No. 101 by Shenzhen Intermediate People’s Court, the above mentioned “Cooperative Contract” is valid, identified as nature of cooperative housing, the two parties continue to perform the contract and legitimate mechanism should be follow if any disputes arising from executing the Contract by parties in the Contract.

In March 2005, as a joint plaintiff, Tellus Real Estate Company and Jinlu Company start a suit to Real Estate Management Branch Bureau and Unit 75731(Communication Equipment Repair Institute of Guangzhou Military Region), requesting two defendants performing cooperative contract, and delivered 11,845 M²(approximately 11,851,357 Yuan in value) property of Liyehui Food Street to two plaintiff, moreover, pay for the rental income 5,034,664.94 Yuan in total due to two plaintiff since 1998. Meanwhile, Tellus Real Estate Company and Jinlu Company entered into an agreement, that is, due to the self-executing or mandatory enforcement by the Court, concerning the Liyehui Food Street property taken back in lawsuit, Tellus Real Estate Company received a fixed property of 6,000 M², rests of the property belongs to Jinlu Company and Tellus Real Estate Company owns all property while less than 6,000 M²; the income deserved in the lawsuit should be allocated according to 5:5 ratio by two parties, and as for this lawsuit, which have its first trial in Shenzhen Intermediate People’s Court in August 2010, because details of a case is complex, the case did not judge in court.

In 2011, Tellus Real Estate Company received a civil ruling paper (2005) Shen Zhong Fa Min Chu Zi No. 82 from Shenzhen Intermediate People’s Court, that is, “People’s Court has no right to judged how to allocate the building and its working interest”, because Liyehui Food Street property “is part of the illegal building”, reject the Tellus Real Estate Company and Jinlu Company’s claim in aspect of the property delivery and rental allocation of Liyehui Food Street. The cooperative development fund invested for Tellus Real Estate Company has been provision for bad debts in total in previous year by the Company.

③In 2014, our subsidiary Shenzhen Auto Industrial Trading Company (hereinafter referred to as Auto Industrial Trading Company) was served with a summon from people’s court in Futian district, Shenzhen, pursuant to which, Shenzhen branch of China Huarong Asset Management Co., Ltd. (“Huarong Shenzhen”) sued Auto Industrial Trading Company for joint settlement responsibility in respect of the debt disputes between Shenzhen Guangming Watch Co., Ltd. (“Guangming Watch”) and its creditors.

Pursuant to the civil verdict (SFFJCZD No.801(1997)) issued by people's court in Futian district, Shenzhen on 24 November 1997, Guangming Watch shall repay RMB700,000 and interests thereof to Shenzhen Futian branch of China CITIC Bank. Guangming Watch failed to discharge debts after such verdict, and Shenzhen Futian branch of China CITIC Bank applied for compulsive execution and recovered an amount of RMB561,398.30. later, due to that there was no property available for execution, people's court in Futian district of Shenzhen issued civil verdict (SFFZZD No.102(1998)) to suspend execution on 10 December 1998. In July, the original creditor Shenzhen Futian branch of China CITIC Bank transferred the above creditor's right (namely outstanding principal of RMB350,000 million and relevant interests) to Huarong Shenzhen.

Guangming Watch was an associate company of Auto Industrial Trading Company with a shareholding of 10% in 1990. Guangming Watch has been deregistered with Shenzhen Business and Commerce Bureau on 28 February 2002. Huarong Shenzhen sued Guangming Watch and Auto Industrial Trading Company at people's court in Futian district of Shenzhen in May 2014, requesting to obtain all the interests of Guangming Watch under the civil verdict (SFFJCZD No.801(1997)), and request an order for Auto Industrial Trading Company to take joint settlement responsibility for the above debts on the grounds that failure of Guangming Watch to settle debts resulted in prejudice in creditors' right by shareholders. Up to the approval date of the financial report, the case has not been ruled yet.

④ The Company's subsidiary, Shenzhen Automobile Industry and Trade Co., Ltd (hereinafter referred to as "Automobile Industry and Trade Company") got shares in Shenzhen Guangming Watch Co., Ltd. (hereinafter referred to as "Guangming Watch Company", Automobile Industry and Trade Company holds 10% of shares) in 1990, this company loaned RMB 2 million yuan from China Construction Bank on December 12, 1990 with time limit of nine months, Guangming Watch Company repaid RMB 100,000 yuan in October 1992, but the balance was still in arrears. Shenzhen Bao'an District People's Court (1996) BFJZ No. 183 paper of civil judgment determined Guangming Watch Company to repay the loan of RMB 1.9 million yuan and the interests to China Construction Bank, Shenzhen Intermediate People's Court (1996) SZFJYZZ No. 563 paper of civil judgment' final judgment affirmed the original judgment. After the judgment, Guangming Watch Company didn't perform the obligations, so China Construction Bank applied for compulsory execution and got repayment of 1.64 million yuan, but later due to no property for execution, Bao'an District People's Court (1997) SBFZZ No. 220 civil ruling paper had the verdict for termination of execution on May 20, 2003. In June 2004, the original creditor CCB transferred the above-mentioned creditor's rights to Assets Management Company, after several transfers, Ezhou Liantai Investment and Consulting Co., Ltd. put forward the creditor's rights in April 2008.

Guangming Watch Company has been revoked license by Shenzhen Industrial and Commercial Bureau on February 28, 2002. Ezhou Liantai Investment and Consulting Co., Ltd. submitted the case of Guangming Watch Company and Automobile Industry and Trade Company to Shenzhen Futian District People's Court in May 2012, requesting to order Guangming Watch Company to pay off 3.607 million yuan and the interests from May 11, 2012 to the actual repayment date, and requesting to order Automobile Industry and Trade Company to assume the joint liability for above-mentioned debts by the reason of Automobile Industry and Trade Company being its last shareholder, not setting up a liquidation team for liquidation within the legal time limit, and assuming the joint liability for debts.

In 2013, Shenzhen Futian District People's Court (2012) SFFMECZ No. 4328 paper of civil judgment determined Automobile Industry and Trade Company to assume the joint liability for debts in (1996) SZFJYZZ No. 563 paper of civil judgment to the accused, Guangming Watch Company. Automobile Industry and Trade Company appealed, on December 12, 2013, Shenzhen Intermediate People's Court (2013) SZFSZZ No. 1677 civil judgment's final judgment affirmed the original judgment. Automobile Industry and Trade Company accrued the payable joint liability funds of 2,130,200 yuan in 2013.

Hua Rong District People's Court of Ezhou City (2008) HMCZ No. 57 civil judgment determined the accused Ezhou Liantai Investment and Consulting Co., Ltd. to pay the accuser Huizhou Lamei Information Consulting Co., Ltd. assignment of claims and liquidated damages and also bear the legal fare. In the executing process, on April 14, 2015, Hua Rong District People's Court of Ezhou City (2015) EHRZYZ No. 0005 execution ruling added Automobile Industry and Trade Company as the person subject to enforcement and ordered Automobile Industry and Trade Company to pay the object funds of 4,170,859.54 yuan. Hua Rong District People's Court of Ezhou City held that the object Guangming Watch Company should perform is the loan principal of 1.9 million yuan and the promissory loan interest of 331,785.60 yuan from November 21, 1995 to January 22, 1997, with a total of 2,231,785.60 yuan. Shenzhen Bao'an District People's Court has executed 1,641,888.10 yuan, deducting the litigation fee of 21,700 yuan and execution fee of 28,500 yuan, up to March 25, 2002, there were still object funds of 1,161,725.65 yuan and debt interest of 1,274,604.31 yuan during the delay in performance calculated by the principle of repayment of principal with interest and debt interest of 1,734,529.5 yuan caused by delay in performance from March 25, 2002 to March 30, 2009, principal and interest amounting to 4,170,859.54 yuan. Automobile Industry and Trade Company proposed an opposition to execution that Automobile Industry and Trade Company should assume the joint liability for the debts of 258,111.90 yuan and the interest to be assumed by Guangming Watch Company, and (1996) BFJZ No. 183 litigation fee of 21,700 yuan, and (1997) SBFZZ No. 220 case execution fee of 28,500 yuan.

Ezhou City Intermediate People's Court held that the surplus creditor's rights was non liquet after Shenzhen Bao'an District People's Court's execution of (1996) SZFJYZZ No. 563 civil judgment, both parties had large difference in opinion whether the executed 1.64 million yuan was just principal or principal and interest, which was difficult to be determined, therefore, Ezhou City Intermediate People's Court (2015) EHRZYZ No. 00005 execution ruling was repealed and returned for re-examination.

⑤ Shenzhen Nigang industrial Corporation sued Huari Company to return the ground part 1,585.84 square meters of Parcel H403-0054(B) and the royalties from January 1, 1990 to the actual return date, which was implemented in accordance with the government guidance rental price for the corresponding period and location, the interest rate is implemented in accordance with the loan interest rate stipulated by the People's Bank of China for the corresponding period, annual use fees calculated from the following year in January 1st, that comes to about 476 million Yuan. Luohu Court made a civil judgment[(2013) Shenzhen Luohu Court-Min-three-Chu-zi-No.1875]at April 8, 2016: Huari Company should return ground part 1,585.84 square meters of Parcel H403-0054(B) to Shenzhen Nigang industrial Corporation within thirty days from the effective date of the judgment..Huari Company should pay the royalties to Shenzhen Nigang industrial Corporation within thirty days from the effective date of the judgment (By December 31, 2015, the fee is

347,271.74 Yuan, and pay 7,268 Yuan per month till actual returning of the above property asset. Meanwhile, overruled other litigant requests from Shenzhen Nigang industrial Corporation. Huari Company had appealed to the Shenzhen intermediate people's court, The case was first held at July 13, 2016, the second session held at August 1, 2016, So far there is no verdict.

XIII. Events occurring after the balance sheet date

The Company has no major events occurring after the balance sheet date which should disclosed

XIV. Other important events
