The *Proposal Regarding Tender Offer of KUKA AG* was reviewed and approved at the 11th and 12th Meeting of the Second Board of Directors and at the Third Extraordinary General Meeting of Shareholders for 2016. The Company, through its subsidiary MECCA International (BVI) Limited, has launched a voluntary public tender offer for all shares in KUKA AG (KUKA). It is offering EUR 115 in cash in exchange for each KUKA share. The acquisition shall be financed by the Company's own cash and syndicated loans.

By the end of the additional acceptance period on August 4th, 2016, 80.04% of KUKA shares were tendered. The total number of KUKA shares for which the takeover offer has been accepted during the offer period plus the 13.51% KUKA shares indirectly held by Midea prior to the takeover offer, result in 94.55% of the issued share capital and the existing voting rights of KUKA.

By August 20th, 2016, one of the Completion Conditions of the tender offer, "BMW i has not prohibited the direct or indirect acquisition of voting rights in KUKA", has been fulfilled.

Up to the disclosure of this report, all required merger control procedures in the countries related to this transaction, i.e. EU, US, China, Russia, Brazil and Mexico, have been cleared.

This transaction is still subject to approvals by CFIUS and DDTC from the US which shall be obtained before March 31st, 2017.

Risk analysis of positions held in derivatives during the Reporting Period and explanation of control measures (including but not limited to market risk, liquidity risk, credit risk, operational risk and legal risk)	<p>For the sake of eliminating the cost risk of the Company's bulk purchases of raw materials as a result of significant fluctuations in raw material prices, the Company not only carried out futures business for some of the materials, but also made use of bank financial instruments and promoted forex funds business, with the purpose of avoiding the risks of exchange and interest rate fluctuation, realizing the preservation and appreciation of forex assets, reducing forex liabilities, as well as achieving locked-in costs. The Company has performed sufficient evaluation and control against derivatives investment and position risks, details of which are described as follows:</p> <p>1. Legal risk: The Company's futures business and forex funds businesses shall be conducted in compliance with laws and regulations, with clearly covenanted responsibility and obligation relationship between the Company and the agencies.</p> <p>Control measures: The Company has designated relevant responsible departments to enhance learning of laws and regulations and market rules, conducted strict examination and verification of contracts, defined responsibility and obligation well, and strengthened compliance check, so as to ensure that the Company's derivatives investment and position operations meet the requirements of the laws and regulations and internal management system of the Company.</p> <p>2. Operational risk: Imperfect internal process, staff, systems and external issues may cause the Company to suffer from loss during the course of its futures business and forex funds business.</p> <p>Control measures: The Company has not only developed relevant management systems that clearly defined the assignment of responsibility and approval process for the futures business and forex funds business, but also established a comparatively well-developed monitoring mechanism, aiming to effectively reduce operational risk by strengthening risk control over the business, decision-making and trading processes.</p> <p>3. Market risk Uncertainties caused by changes in the prices of bulk commodity and exchange rate fluctuations in foreign exchange market could lead to greater market risk in the futures business and forex funds business. Meanwhile, inability to timely raise sufficient funds to establish and maintain hedging positions in futures operations, or the forex funds required for performance in forex funds operations being unable to be credited into account could also result in loss and default risks.</p> <p>Control measures: The futures business and forex funds business of the Company shall always be conducted by adhering to prudent operation principles. For futures business, the futures transaction volume and application have been determined strictly according to the requirements of production & operations, and the stop-loss mechanism has been implemented. Besides, to determine the prepared margin amount which may be required to be supplemented, the futures risk measuring system has been established to measure and calculate the margin amount occupied, floating gains and losses, margin amount available and margin amount required for intended positions. As for forex funds business, a hierarchical management mechanism has been implemented, whereby the operating unit which has submitted application for funds business should conduct risk analysis on the conditions and environment affecting operating profit and loss, evaluate the possible greatest revenue and loss, and report the greatest acceptable margin ratio or total margin amount, so that the Company can update operating status of the funds business on a timely basis to ensure proper funds arrangement before the expiry dates.</p>
Changes in market price or fair value of derivatives product invested during the Reporting Period: specific methods used and relevant assumption and parameter settings shall be disclosed for analysis of fair value of derivatives	<p>1.
