投资者关系活动主要内容介绍	<p>Q1: How about your new NEV model “Han” ?</p> <p>Answer: We launched our new model “Han” this year, which is a B class sedan model. “Han” carry our new “Blade Battery”, which base on the LFP technical route.</p> <p>Q2: How about the sales of “Han” ?</p> <p>Answer: “Han” attracted the attention of the whole market, and also received consumer’s consistent high</p>

	<p>praise. The sales of “Han” increased month by month, the number of follow-up orders continued.</p> <p>Q3: What is your energy density of battery?</p> <p>Answer: The density of NCM battery is over 160 wh/kg in pack level this year. However, the density of LFP battery also could reach over 140 wh/kg in pack level.</p> <p>Q4: Will any new models adopt “Blade battery” in passenger vehicles except “Han” ?</p> <p>Answer: We will adopt “Blade battery” in our later NEV passenger vehicle model.</p> <p>Q5: How about IGBT business?</p> <p>Answer: As the largest car-rated IGBT manufacturer in China, our semiconductor business successfully introduced 1.9 billion RMB strategic investment within 42 days. This is the first step of BYD’ s marketization strategy about core component businesses, and we will see more competitive businesses.</p>
