

25 January 2023

**t42 IoT Tracking Solutions plc**  
("t42" or the "Company")

#### **T42 receives order of 1,000 Tetis units in the USA**

t42 IoT Tracking Solutions plc (AIM: TRAC) ("t42" or the "Company"), the provider of global shipping containers tracking solutions, is pleased to announce that it has received its first order of 1,000 Tetis units with a client based in the USA. t42 will also provide its tracking and monitoring software services and connectivity solutions as part of this order. The agreement provides for monthly payments over a 36 month period to cover both device and data costs.

The client is a US-based company, one of the leading global companies that provide a unified view of in-transit logistics to detect and correct non-compliance within supply chains. Using the Tetis units as part of its solutions, the client is able to provide its customers with a much higher level of visibility and control over their cargo performance. The client's adoption of the Tetis highlights the need for the Company's technology in this growing segment. The client indicated that additional orders of Tetis units would likely be placed in the near future.

**Avi Hartmann, CEO of t42, commented** "The promising start to 2023 continues through this order and demonstrates trust in our products and services. As part of the partnership, we look forward to working with this client in order to provide better visibility and control for supply chains globally and hope to receive further orders under the agreement in the coming months."
