**("Avation" or "the Company")**

**UNAUDITED RESULTS FOR THE SIX MONTHS ENDED 31 DECEMBER 2022**

Avation PLC (LSE: AVAP), the commercial passenger aircraft leasing company, announces unaudited results for the six months ended 31 December 2022.

**Financial Highlights**

- Revenue and other income reduced to US\$55.3 million (2021: US\$60.1 million);
- Operating profit increased to US\$ 35.0 million (2021: US\$18.8 million);
- Profit before tax of US\$6.7 million (2021: Loss before tax US\$15.9 million);
- Net indebtedness reduced by US\$46.0 million to US\$746.9 million (30 June 2022: US\$792.9 million); and
- Net asset value per share increased 5.2% to £2.82 (30 June 2022: £2.68);

**Operational Highlights**

- Two ATR 72-600 turboprop aircraft were sold during the period;
- One ATR 72-600 aircraft was repossessed from an airline in Myanmar;
- One off-lease ATR 72-500 started a lease with a new airline customer in Nepal;
- Avation received a creditors' distribution of US\$3.4 million from Virgin Australia;
- Two Airbus A220-300 aircraft were re-financed with fixed rate long-term loans, reducing Avation's exposure to interest rate changes;

**Outlook**

Avation is focussed on the execution of lease deliveries and sale agreements for the remaining off-lease aircraft in the fleet in the second half-year period and managing the overall cost of debt. The airline industry is continuing its recovery from the lows seen during the COVID-19 pandemic. Global domestic air travel in December 2022 as reported by IATA, has recovered to around 79.9% of December 2019 passenger numbers while international travel, while lagging, has recovered to around 75.1% of December 2019 levels.

The Company believes that airlines will require significant numbers of leased aircraft in the short to medium term due to the large number of older aircraft that have been retired as a result of the COVID-19 pandemic, and the impact of the pandemic on airline balance sheets, reducing their ability to purchase aircraft directly.

The Company's future strategy will focus on leasing modern, low CO2 emissions, fuel-efficient aircraft. Avation is supportive of the aviation industry's goal of becoming more sustainable through a transition to new technology more fuel-efficient aircraft engines and the use of sustainable aviation fuel to reduce CO2 emissions.

The Company will cautiously position itself for a return to organic self-funded growth through deliveries from its orderbook, opportunistic aircraft trading and may convert ATR purchase rights to firm orders should attractive lease opportunities arise."

**Executive Chairman, Jeff Chatfield, said:**

"During the six months ended 31 December 2022 Avation reduced the number of off-lease aircraft in the fleet from six to four. In addition, the sale of a Boeing 737-800 in February 2023 has further reduced the number of off-lease aircraft to three. A key strategic aim for Avation over the coming months is to conclude sales or lease agreements for all remaining off-lease aircraft and we are pleased to announce that we have recently concluded a lease agreement with a new airline customer for one of the three remaining aircraft.

Avation has continued to de-lever its balance sheet, achieving a reduction to 62.9% in the ratio of net debt to total assets as at 31 December 2022. A significant portion of the cashflow generated by the fleet has been directed towards repayments of debt. Scheduled loan repayments for the 2023 calendar year, amounting to around US\$57 million, exceed the expected depreciation of the fleet over the same period.

A bond repurchase tender was concluded in February, resulting in the repurchase and retirement of US\$7.1m of Avation Capital S.A. 8.25%/9.0% unsecured notes. The Company may pursue other liability management exercises from time to time with the aim of further reducing the cost and/or outstanding amount of unsecured debt in issue. The Company has retained Citibank as a strategic adviser for potential future debt reduction exercises.

After the recovery from the COVID-19 pandemic, Avation plans to re-grow its business in an organic prudent and sensible manner. We will target organic growth, which includes the placement of the remaining off-lease aircraft and leasing the two ATR aircraft we have on order for delivery in 2024. We have paid all pre-delivery payments due for the two ordered ATR aircraft and believe that the balance due on delivery of the aircraft can be funded with senior secured debt.

We note that most of our peer leasing companies have suffered large losses due to the seizure of aircraft leased to Russian airlines. Avation was fortunate in that it did not have any exposure to Russian airlines. Our policy is, and

has always been, to only lease planes in jurisdictions where we are confident that we can arrange repossession, if ever required.

The Company has taken steps to reduce overheads by reducing headcount and actively managing legal expenses and other expenditure. The Company has an in-house technical team and management was pleased that the overall cost of managing the transition of one Boeing 737-800 was less than anticipated.

Few aircraft were built during the COVID-19 pandemic so lessors that own them have seen positive developments in valuations. As an owner we have managed to move, sell, service and, most importantly, transition aircraft.

We are reasonably confident that the Company will be able to place its remaining inventory of off-lease aircraft and arrange leases for the two new aircraft ordered for delivery in 2024."

Interest income from finance leases decreased by 16.7% from US\$1.4 million in the six months ended 31 December 2021 to US\$1.2 million in the six months ended 31 December 2022. The decrease was principally due to the reduction in the number of aircraft leased on finance leases from 6 at 31 December 2021 to 5 at 31 December 2022.

Foreign currency exchange gains arose principally from the release of deferred hedged foreign currency exchange gains on two Euro loans that were refinanced during the period.

The claim recovery recognised in other income in the six months ended 31 December 2022 is the balance of a distribution paid to creditors of Virgin Australia in excess of amounts allocated to trade receivables.

Staff costs	2,868	3,780

Staff costs reduced by 24.1% from US\$3.8 million in the six months ended 31 December 2021 to US\$2.9 million in the six months ended 31 December 2022 principally due to reduced headcount, lower bonus payments and lower charges for employee share warrants.

Other administrative expenses increased by 24.8% from US\$1.3 million in the six months ended 31 December 2021 to US\$1.6 million in the six months ended 31 December 2022 principally due to increased marketing related travel expenses.

A gain of US\$1.7 million on early full repayment of borrowings arose when two loans were refinanced in November 2022.

Interest expense on unsecured notes includes US\$4.3 million of non-cash interest paid in kind by increasing the face value of Avation Capital S.A. 8.25%/9.0% unsecured notes.

Amortisation of IFRS 9 gain on debt modification of US\$4.3 million represents the non-cash accretion in the book value of Avation Capital S.A. 8.25%/9.0% unsecured notes resulting from the accounting treatment of the extension and changes to the terms of the notes agreed with noteholders in March 2021. The extension was accounted for as a substantial modification of a debt instrument in accordance with IFRS 9. The face value of Avation Capital S.A. 8.25%/9.0% unsecured notes outstanding as of 31 December 2022 is US\$348.0 million.

#### 4 FAIR VALUE MEASUREMENT

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The carrying amounts of cash and bank balances, trade and other receivables, finance lease receivables - current, trade and other payables - current, loans and borrowings - current are a reasonable approximation of fair value either due to their short-term nature or because the interest rate charged closely approximates market interest rates or that the financial instruments have been discounted to their fair value at a current pre-tax interest rate.

The fair value of the maintenance reserves is not disclosed in the table below as the timing and cost of the settlement of maintenance reserves cannot be determined with certainty in advance and hence the fair value of the maintenance reserve cannot be accurately measured.

	31 Dec 2022		30 Jun 2022	
	Carrying amount US\$'000s	Fair value US\$'000s	Carrying amount US\$'000s	Fair value US\$'000s
<b>Financial assets:</b>				
Finance lease receivables - non-current	42,737	39,600	55,208	53,979
Derivative financial assets	13,240	13,240	5,920	5,920
Investment in equity, fair value through profit or loss	10,584	10,584	3,715	3,715
<b>Financial liabilities:</b>				
Deposits collected - non-current	15,306	12,775	13,692	12,893
Loans and borrowings other than unsecured notes - non-current	420,831	385,123	468,030	436,864
Unsecured notes	300,995	278,427	296,200	275,893
Derivative financial liabilities	1,055	1,055	1,055	1,055

The fair values (other than for unsecured notes, investment in debt instrument, fair value through profit or loss and derivative financial liabilities) above are estimated by discounting expected future cash flows at market incremental lending rate for similar types of lending, borrowing or leasing arrangements at the end of the reporting period, which is classified under level 2 of the fair value hierarchy.

The fair value of the unsecured notes is based on level 1 quoted prices (unadjusted) in an active market that the Group can access at measurement date.

The fair value of the derivative financial instruments is determined by reference to marked-to-market values provided by counterparties. The fair value measurement of all derivative financial instruments is classified under level 2 of the fair value hierarchy, for which inputs other than quoted prices that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) are included as inputs for the determination of fair value.

#### 4 FAIR VALUE MEASUREMENT (continued)

**Assets measured at fair value classified under level 3:**

	31 Dec 2022 US\$'000s	30 Jun 2022 US\$'000s

**Fair value measurement using significant unobservable inputs:**

### Assets pledged as security

The Group's aircraft with carrying values of US\$855.0 million (30 June 2022: US\$879.5 million) are mortgaged to secure the Group's borrowings (Note 21).

### Additions and disposals

During the six months ended 31 December 2022, one turboprop aircraft was reclassified from finance leases, two jet aircraft were reclassified from assets held for sale, and one jet aircraft was reclassified as asset held for sale.

## 11 PROPERTY, PLANT AND EQUIPMENT (continued)

### Valuation

The Group's aircraft were valued in June 2022 by independent valuers on a lease-encumbered value basis ("LEV"). LEV takes into account the current lease arrangements for the aircraft and estimated residual values at the end of the lease. These amounts have been discounted to present value using discount rates ranging from 5.50% to 7.00% (2021: 5.50% to 8.00%) per annum for jet aircraft and 5.50% to 8.00% (2021: 5.50% to 8.00%) per annum for turboprop aircraft. Different discount rates are considered appropriate for different aircraft based on their respective risk profiles.

During the six months ended 31 December 2022, an impairment loss of US\$0.3 million was recognised.

If the aircraft were measured using the cost model, carrying amounts would be as follows:

	31 Dec 2022		30 Jun 2022	
	Jets US\$'000s	Turbo props US\$'000s	Jets US\$'000s	Turbo props US\$'000s

### 14 GOODWILL

The Group performs its annual impairment test in June and when circumstances indicate the carrying value may be impaired. For the purpose of these financial statements there was no indication of impairment. The key assumptions used to determine the recoverable amount for the different cash generating units were disclosed in the annual consolidated financial statements for the year ended 30 June 2022.

Hedge accounting has been applied for interest rate swap contracts and cross-currency interest rate swap contracts which have been designated as cash flow hedges.

### 15 DERIVATIVE FINANCIAL ASSETS/LIABILITIES (continued)

The Group pays fixed rates of interest of 1.0% to 2.6% per annum and receives floating rate interest equal to 1-month to 3-month LIBOR or 1-month SOFR under the interest rate swap contracts.

The Group pays fixed rates of interest of 3.1% to 4.9% per annum and receives floating

interest equal to 3-month LIBOR under the cross-currency interest rate swap contracts.

The swap contracts mature between 26 December 2023 and 21 November 2030.

Changes in the fair value of these interest rate swap and cross-currency interest rate swap contracts are recognised in the fair value reserve. The net fair value gain net of tax of US\$6.5 million (31 December 2021: gain of US\$5.1 million) on these derivative financial instruments was recognised in the fair value reserve for the six-month period ended 31 December 2022.

The fair value of the derivative financial instruments is determined by reference to marked-to-market values provided by counterparties. The fair value measurement of all derivative financial instruments is classified under level 2 of the fair value hierarchy, for which inputs other than quoted prices that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) are included as inputs for the determination of fair value.

The Group entered into Euro denominated lease agreements which create exposure to variability in cash flows due to movements in the EUR:USD exchange rate. To hedge its exposure to various cash flows resulting from changes in EUR:SGD spot rates, the Group has arranged Euro denominated financing which reduces overall exposure to variable cash flows to the extent that lease receipts and debt service cashflows are matched. The Group is making use of a non-derivative hedging instrument and has designated the cash flows with respect to the loan interest and principal repayment (hedging instrument) against a specific portion of the lease receivable (hedge item).

Unrealised foreign exchange gains and losses arising on Euro denominated loans designated as cash flow hedges are recognised in the foreign currency hedge reserve. Unrealised foreign exchanged gains and losses recorded in the foreign currency hedging reserve are systematically re-cycled through profit or loss over the remaining term of the related loan on a straight-line basis.

## PRINCIPAL RISKS

The Group's risk management processes bring greater judgement to decision making as they allow management to make better, more informed and more consistent decisions based on a clear understanding of risk involved. We regularly review the risk assessment and monitoring process as part of our commitment to continually improve the quality of decision-making across the Group.

The principal risks and uncertainties which may affect the Group in the second half of the financial year will include the typical risks associated with the aviation business, including but

not limited to any downturn in the global aviation industry, fuel costs, finance costs, war and terrorism and the like which may affect our airline customers' ability to fulfil their lease obligations.

The business also relies on its ability to source finance on favourable terms. Should this supply of finance contract, it would limit our fleet expansion and therefore growth.

## **GOING CONCERN**

After making enquiries, the directors have a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. For this reason they continue to adopt the going concern basis in preparing the financial statements. The financial risk management objectives and policies of the Group and the exposure of the Group to credit risk and liquidity risk are discussed in the annual report for the Group for the year ended 30 June 2022.
