

Falcon Oil & Gas Ltd.
(“Falcon” or “Company”)

Successful Completion of the Amungee NW-2H Well 25-Stage Stimulation Programme

22 March 2023 Falcon Oil & Gas Ltd. (TSXV: FO, AIM: FOG) is pleased to announce the successful completion of a 25-stage stimulation programme at the Amungee NW-2H (“A2H”) well.

The A2H well was drilled to a total depth (TD) of 3,883 metres, including a 1,275-metre horizontal section within the Amungee Member B Shale (formerly known as the Middle Velkerri B-shale), in the Beetaloo Sub-Basin, Northern Territory, Australia with Falcon Oil & Gas Australia Limited’s joint venture partner, Tamboran (B1) Pty Limited (“Tamboran”) in December 2022 with stimulation commencing in February 2023.

Stimulation Programme Details:

- 25 stages were successfully stimulated across a 1,020-metre horizontal section within the Amungee Member B Shale, with approximately 2,125 pound per foot of proppant placed along the completed horizontal section.
- Proppant was placed using 5-½-inch casing and was based on modern US shale design, the design is anticipated to result in improved flow rates during the extended production test.
- Stimulation fluid flow back will commence imminently and is estimated to take several weeks before the well is shut-in for installation of production tubing.
- 30-day initial production (IP30) flow rates are expected during the second quarter of 2023.

Philip O Quigley, Falcon’s CEO, commented:

“We are delighted to announce the completion of stimulation operations at the A2H well with our joint venture operator, Tamboran Resources Limited. The programme was successfully executed during the Northern Territory wet season and we are now entering the very important phase of flow back operations, which have the potential to confirm production rates to support the joint venture moving to a multi-well pilot development programme in 2023/2024. We look forward to updating the market when these flow rates are available.”

Ends.

About Tamboran (B1) Pty Limited

Tamboran (B1) Pty Limited is a 50:50 joint venture between Tamboran Resources Limited and Daly Waters Energy, LP (Sheffield).

Tamboran Resources Limited, is a natural gas company listed on the ASX (TBN) and U.S. OTC markets (TBNNY). Tamboran is focused on playing a constructive role in the global energy transition towards a lower carbon future, by developing the significant low CO₂ gas resource within the Beetaloo Basin through cutting-edge drilling and completion design technology as well as management’s experience that in successfully commercialising unconventional shale in North America.

Bryan Sheffield of Daly Waters Energy, LP is a highly successful investor and has made significant returns in the US unconventional energy sector

in the past. He was Founder of Parsley Energy Inc. (â€œPEâ€), an independent unconventional oil and gas producer in the Permian Basin, Texas and previously served as its Chairman and CEO. PE was acquired for over US\$7 billion by Pioneer Natural Resources Company (â€œPioneerâ€), itself a leading independent oil and gas company and with the PE acquisition became a Permian pure play company. Pioneer has a current market capitalisation of c. US\$60 billion.

Advisory regarding forward looking statements

Certain information in this press release may constitute forward-looking information. Any statements that are contained in this news release that are not statements of historical fact may be deemed to be forward-looking information. Forward-looking information typically contains statements with words such as â€œmayâ€, â€œwillâ€, â€œshouldâ€, â€œexpectâ€, â€œintendâ€, â€œplanâ€, â€œanticipateâ€, â€œbelieveâ€, â€œestimateâ€, â€œprojectsâ€, â€œdependentâ€, â€œpotentialâ€, â€œscheduledâ€, â€œforecastâ€, â€œoutlookâ€, â€œbudgetâ€, â€œhopeâ€, â€œsuggestâ€, â€œsupportâ€ â€œplannedâ€, â€œapproximatelyâ€, â€œpotentialâ€ or the negative of those terms or similar words suggesting future outcomes. In particular, forward-looking information in this press release includes, but is not limited to, information relating to the completion of the stimulation programme and progress to date at A2H, the execution of the fracture stimulation of the A2H well, utilisation of proven US-style shale stimulation designs and techniques, including the use of 5-1/2-inch casing expected to result in improved flow rates, the prospectivity of the Amunsee Member/Middle Velkerri play and the prospect of the exploration programme being brought to commerciality and a pilot production in 2023/2024. This information is based on current expectations that are subject to significant risks and uncertainties that are difficult to predict. The risks, assumptions and other factors that could influence actual results include risks associated with fluctuations in market prices for shale gas; risks related to the exploration, development and production of shale gas reserves; general economic, market and business conditions; substantial capital requirements; uncertainties inherent in estimating quantities of reserves and resources; extent of, and cost of compliance with, government laws and regulations and the effect of changes in such laws and regulations; the need to obtain regulatory approvals before development commences; environmental risks and hazards and the cost of compliance with environmental regulations; aboriginal claims; inherent risks and hazards with operations such as mechanical or pipe failure, cratering and other dangerous conditions; potential cost overruns, drilling wells is speculative, often involving significant costs that may be more than estimated and may not result in any discoveries; variations in foreign exchange rates; competition for capital, equipment, new leases, pipeline capacity and skilled personnel; the failure of the holder of licenses, leases and permits to meet requirements of such; changes in royalty regimes; failure to accurately estimate abandonment and reclamation costs; inaccurate estimates and assumptions by management and their joint venture partners; effectiveness of internal controls; the potential lack of available drilling equipment; failure to obtain or keep key personnel; title deficiencies; geo-political risks; and risk of litigation.

Readers are cautioned that the foregoing list of important factors is not exhaustive and that these factors and risks are difficult to predict. Actual results might differ materially from results suggested in any forward-looking statements. Falcon assumes no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those reflected in the forward looking-statements unless and until required by securities laws applicable to Falcon. Additional information identifying risks and uncertainties is contained in Falcon's filings with the Canadian securities regulators, which filings are available at www.sedar.com, including under "Risk Factors" in the Annual Information Form.
