ABOUT BBB

Bigblu Broadband plc (AIM: BBB.L), is a leading provider of alternative super-fast broadband solutions throughout Australasia and the Nordics. BBB delivers a portfolio of super-fast wireless broadband products for consumers and businesses unserved or underserved by fibre.

High levels of recurring revenue, increasing economies of scale and Government stimulation of the alternative broadband market in many countries provide a solid foundation for significant organic growth as demand for alternative super-fast broadband services increases around the world.

BBB's range of solutions includes satellite, next generation fixed wireless and 4G/5G delivering between 30 Mbps and 150 Mbps for consumers, and up to 1 Gbps for businesses. BBB provides customers ongoing services including hardware supply, installation, pre- and post-sale support, billings and collections, whilst offering appropriate tariffs depending on each end user's requirements.

Importantly, as its core technologies evolve, and more affordable capacity is made available, BBB continues to offer ever-increasing speeds and higher data throughputs to satisfy market demands for 'video-on-demand'. Its alternative broadband offerings present a customer experience that is similar to that offered by wired broadband and the connection can be shared in the normal way with PCs, tablets and smart phones via a normal wired or wireless router.
