About Kelso

Kelso was established in 2022 to identify, engage and unlock trapped value in the UK stock market. Kelso's strategy is to invest in situations where there is an anomaly between the intrinsic value and prospects of a company and its stock market valuation. Kelso will, in particular, look for situations where it believes the sum of the parts of a business is greater than the current value. The company completed a fundraising of £3m in January 2023. Kelso believes that the current market conditions are such that there are situations where UK listed companies' valuations are not appropriately matched to their underlying intrinsic value. There may be instances where Kelso itself could be used as a vehicle by an undervalued company to spin off a subsidiary into its own listing. Such a transaction would undoubtedly constitute a reverse takeover for Kelso.
