## KR1 PLC

(“KR1” or the “Company”)

### Investment: Anoma

KR1 plc (KR1:AQSE), a leading digital asset investment company, is pleased to announce that the Company has invested a total of US\$1,000,000 into Anoma (“XAN”). The investment took place as part of Anoma’s US\$25 million financing round with participation from other respected investors such as CMCC Global, Electric Capital and Dialectic.

Anoma is building a next generation blockchain that is innovating with an intent-centric architecture, introducing a new paradigm for building decentralised infrastructure and a new operating system for decentralised applications (“dApps”). Anoma’s intent-centricity introduces novel primitives that allow existing web2.5 dApps to become fully decentralised, such as optimistic and ZK rollups, DEXs, NFT marketplaces, or public goods funding applications like Gitcoin.

### George McDonough, Managing Director and Co-Founder of KR1, commented:

“We are excited to support a team driving real innovation in protocol design, privacy and blockchain infrastructure. Anoma will not only enable the full decentralisation of existing applications, but also lay the foundations for new use cases that will be enabled by Anoma’s architecture.”

The Directors of KR1 plc accept responsibility for this announcement.

### About KR1 plc

KR1 plc is a leading digital asset investment company supporting early-stage decentralised and open source blockchain projects. Founded in 2016 and publicly traded in London on the AQSE Growth Market (KR1:AQSE), KR1 has one of the longest and most successful track records of investment in the digital assets space by investing in decentralised platforms and protocols that are emerging to form new financial and internet infrastructures.
