IXICO plc

("IXICO", the "Company" or the "Group")

Contract win in Huntington's disease worth circa £2M

IXICO plc (AIM: IXI), the medical imaging advanced analytics company delivering intelligent insights in neuroscience, is pleased to announce that an existing client has contracted IXICO to provide imaging services for the extension study of their Huntington's disease ('HD') Ph2b trial. This is a new study protocol and results in a new work order worth just under £2M which IXICO expects to deliver over the next 4 years.

HD is a rare, inherited disease that causes the progressive breakdown of nerve cells in the brain affecting movement, mood and thinking abilities.

Giulio Cerroni, CEO of IXICO, commented: "We are delighted to be awarded this contract to support the ongoing development programme of this promising treatment in HD. This contract strengthens our order book, securing further visibility to future anticipated revenues. We have been working with this client for several years and I am delighted to be further deepening our long-term partnership as they pursue a treatment for this terrible neurological disease."

About IXICO

IXICO is dedicated to delivering insights in neuroscience to help transform the advancement of investigational therapies for neurological diseases, such as Huntington's disease, Parkinson's disease and Alzheimer's disease. The Company's purpose is to advance medicine and human health by turning data into clinically meaningful information, providing valuable new insights in neuroscience by supporting pharmaceutical companies across all phases of CNS clinical research. IXICO's goal is to be a leading advocate of artificial intelligence in medical image analysis.

IXICO has developed and deployed breakthrough data analytics, at scale, through its remote access technology platform, to improve the return on investment in drug development and reduce risk and uncertainty in clinical trials for the Company's pharmaceutical clients.
