

Quantum Blockchain Technologies Plc
 (“QBT” or “the Company”)

FINAL RESULTS

QBT (AIM: QBT), a research and development company focused on disruptive Blockchain technologies, is pleased to announce its final results for the year ended 31 December 2022.

HIGHLIGHTS

- Loss before Tax of €5.2m (FY 2021: €5.4m)
- Net Current Assets of €4.4m (FY 2021: negative €3.9m)
- Sipiem court ruling awarded €6,188,974 in damages (plus interest and adjustments for inflation) and €85,499 in legal fees to CL17, which at the date of the Annual Report remain unpaid

POST YEAR END HIGHLIGHTS

- QBT’s algorithm (“Method B”) theoretically increases the rate of successful Bitcoin mining by 2.6 times
- Method B also theoretically reduces electricity consumption by 4.3% in Bitcoin mining
- Early-stage work commenced for commercialisation of Bitcoin mining products

The Company’s Annual General Meeting (“AGM”) will be held at Company’s registered address, 22 Great James Street London WC1N 3ES, at 12.00 pm on Monday, 24 July 2023.

The Annual Report and Accounts together with the AGM Notice and Form of Proxy (together the “Documents”) are available on the Company’s website under the “Investor Relations – Annual Reports and Circulars” section.

The Documents will be posted shortly to those shareholders who have requested to receive printed documents.

This announcement contains inside information for the purpose of Article 7 of the Market Abuse Regulation (EU) 596/2014 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (“MAR”), and is disclosed in accordance with the Company’s obligations under Article 17 of MAR.

About Quantum Blockchain Technologies Plc

QBT (AIM: QBT) is a London Stock Exchange AIM listed Research & Development and investing company focused on an intensive R&D programme to disrupt the Blockchain Technologies sector and, which includes, cryptocurrency mining and other advanced blockchain applications. The primary goal of the R&D programme is to develop Bitcoin mining tools and techniques, via its technology-driven approach, which the Company believes will significantly outperform existing market practices.

CHAIRMAN’S STATEMENT

I am pleased to present the Group’s Final Results for the year ended 31 December 2022. The Group consists of Quantum Blockchain Technologies PLC (“the Company” or “QBT”), running the Research and Development (“R&D”) programme and holding the Legacy Assets, and its wholly owned subsidiary Clear Leisure 2017 Ltd (“CL17”), which is focused on litigation.

During 2022, the Company continued working on its R&D programme focused on developing advanced disruptive proprietary mining technology, mainly for Bitcoin (“BTC”) mining, but also applicable to other crypto currencies, based on SHA-256 proof of work based blockchain.

During the year under review, the Company continued its R&D programme focused on the following technologies:

- SHA-256 algorithm and gate level optimisation;
- Quantum programming of SHA-256;
- FPGA and ASIC SHA-256 implementation; and

- Machine Learning (“ML”) driven use of SHA-256.

QBT believes that the strategy of diversifying its R&D approach increases not only the Company’s chance of achieving potentially disruptive results for BTC mining, but also developing products and services potentially available quicker to market during the R&D process. This can minimise “time to market” risk.

Please see below for further details on the R&D activities.

While the main focus of the Company is the development of BTC mining technology, the Board also continues to maintain its portfolio of Legacy Assets remaining from Clear Leisure Plc, as the Company was called (before 7 May 2021). The litigation against Sipiem in Liquidazione SpA (“Sipiem”) and Sosushi Srl (“Sosushi”) former management teams has been supervised with care and prudence, while monitoring the formal closing of the Mediapolis bankruptcy procedure as a final payment (c. €130k) will finally be due to the Company. In late 2022 CL17 was awarded €6,274,473 in damages plus interest and provision for inflation (“Award Payment”) in the claim against Sipiem.

Finally, the Company holds a small portfolio of investments, comprising three companies: PBV Monitor Srl (“PBV”), an Italian start-up which developed an online international legal directory, Forcrowd Srl (“Forcrowd”), an Italian crowdfunding licensed entity in the process of applying for a European crowdfunding licence and a crowdlending extension of its license, and Geosim Systems Ltd (“Geosim”), an Israeli company which has developed a proprietary high resolution 3D mapping technology used to develop city and airport realistic 3D models.

The Company has continued supporting its investees in pursuing the goal of a stable growth within their respective markets.

R&D Programme

Each technology area has a dedicated team in charge of the R&D work, reporting to the entire R&D effort coordinators. Please see below for a description of each technology area’s approach:

The Machine Learning (“ML”) research group is split into three teams, all focusing on the SHA-256 algorithm:

- **ML#1** group focused on trying to bypass all three SHA-256 rounds involved in each winning hash search.
- **ML#2** group working on “Method A” (as announced on 15 November 2022), aimed at reducing the SHA-256 search space, compared to the brute force method used mainly by miners today. Current results of our optimisations compared to brute force have shown potentially promising results. Further testing is ongoing.
- **ML#3** group applying ML and statistical optimisation to the analysis of the SHA-256 algorithm, through the development of Method B (as per the 15 November 2022 announcement) basically another oracle, developed for reducing the SHA-256 search space, but radically different from Method A. Current results are very encouraging; ML#3 group has shown that the proprietary system potentially increases the rate of successful Bitcoin mining by 2.6 times compared to standard Bitcoin mining industry practices, while also reducing the electricity consumption by 4.3%. Assuming continued successful progress with testing, the Company believes that this approach has the potential to be a significant improvement within the Bitcoin mining industry.

The findings of the Machine Learning groups #2 and #3 may represent the Company’s more expedient commercial route to market. Once the Company applies the optimisations to currently commercially available ASIC chips it is hoped that hardware for BTC (and other altcoin) mining performance can be improved with QBT’s developments.

QBT anticipates filing for patents in connection with the work product of each of the Machine Learning groups.

The Quantum Computing team, as announced by the Company on 11 March 2022, has developed a quantum version of a BTC mining algorithm. This algorithm is centered on qubit-based quantum computation, using quantum logic gates and simulated on a reduced-sized SHA-256 algorithm (called “Quantum Mining”). However, as there are currently no commercially available quantum computers with sufficient qubits to sustain full SHA-256 computations, the Company has continued working to refine its Quantum Mining algorithm. To achieve this, the Company has retained the world-renowned pioneer in quantum computing, Dr. Lov Kumar Grover. If the Company’s theoretical approach is confirmed empirically, when powerful enough quantum computers become available, QBT believes this method will potentially revolutionise the BTC industry.

With regards to the Cryptography team, the current focus is on the core of the optimisation of the SHA-256 algorithm and gate level implementation. This team has already delivered the Asic UltraBoost in September 2021 (and currently under final review by the relevant patent office), the Company’s first patent application. This has increased mining performance by circa 7%. Further expected findings by the Cryptography team are anticipated to lead to additional patent application filings which in some instances are already in the drafting stage.

The main goal of the FPGA/ASIC Design team is to turn findings from the ML and the Cryptography teams into efficient architectures, to be tested on FPGA chips first, then moved into an ASIC version, prior to prototyping before production.

A basic architecture for the final ASIC chips is available, while a large number of variants are being tested, before choosing the final configuration for the first prototype.

The Company’s objective is that the culmination of its R&D programme should enable it to produce its own more efficient mining chips embedding most, if not all, of the findings of the entire programme.

The full cost of the R&D programme and related infrastructural investments for the year under review was approximately €948,000.

Litigations and Legacy Assets

During 2022, the Company continued to deal with its Legacy Assets, which consist of pending court actions in Italy and investments in PBV, Forcrowd and Geosim.

As previously announced on 1 November 2022 in relation to CL17's claim against the previous management and internal audit committee of Sipiem, the Venice Court ruled in favour of CL17 and ordered the Sipiem defendants to pay CL17 the Award Payment amounting to €6,188,974 in damages (exclusive of interest and adjustments for inflation), and €85,499 in legal fees. The Company, through CL17, has commenced the process to collect the Award Payment from the main defendant, which remains, as at the date of the Annual Report, unpaid.

CL17 also holds the c. €1 million claim against Sosushi's previous management in Italy, which is currently continuing via an arbitration process. The process has, unfortunately, been subject to severe procedural delays outside of CL17's control and it is not expected to be concluded in the short term.

Regarding the parallel claim by Sosushi's previous management and shareholders in the English Courts, the Company's defence has been successful. The Sosushi claimants discontinued their €1.7 million legal claim against the Company and were ordered to pay the Company approximately €77,000 towards legal costs. Further legal costs and damages may still be awarded to the Company at the conclusion of the case.

During the year under review, the Company raised a total of £1.05 million pursuant to the exercise of 52,500,000 warrants, in January and March 2022, issued as part of the placing announced on 22 February 2021.

As announced on 20 December 2022, the Company granted 37,500,000 options to certain consultants, members of the R&D team and in-house staff, over its new ordinary shares of 0.25 pence each ("Ordinary Shares"), of which 25,000,000 carry an exercise price at 5p and 12,500,000 at 10p.

With regards to the Company's bonds, on 6 April 2022, the Company announced it had renegotiated the date of maturity of the €3.5 million Zero-Coupon Bond issued in 2020 with the sole bondholder to 15 December 2024. Additionally, at the Bondholder Meeting held on 21 April 2022, the Company extended the maturity of the Zero-Coupon Bond to 15 December 2024 and amended the conversion price from 15 pence to 5 pence. The extension of the maturity date for both bonds improved the Net Current Asset position of the Group (see Financial Review below).

Finally, during 2022 the Company unfortunately lost its Non-Executive Director Reg Eccles, who passed away in August. Following this sad event, the Company appointed two new Non-Executive Directors, Peter Fuhrman (in September 2022) and Mark Trafeli (in November 2022).

In conclusion, the Company continues to focus on its novel and innovative R&D activities, which have so far provided promising results. The Company is now starting to assess the commercialisation of some of these improvements as they could potentially have an immediate impact on the BTC mining market.

Financial Review

The Group reported a total comprehensive loss of €5,026,000 for the year ended 31 December 2022 (2021: €5,396,000) and a loss before tax of €5,252,000 (2021: €5,449,000). Operating losses for the period were €4,547,000 (2021: €4,970,000).

Included within administrative expenses are charges relating to the recognition of share options totalling €1,854,000 (2021: €2,622,000) and within finance costs are charges for the revaluation of derivatives totalling €324,000 (2021: €143,000). The movement in these items is dependent on the volatility of the Company's share price used for the calculation according to the relevant accounting standards.

The undiluted Net Asset Value ("NAV") of the Group decreased by €398,000 in 2022, compared to a decrease of €601,000 in 2021. The Group had Net Current Assets of €4.4m as at 31 December 2022 (2021: negative €3.9m), thanks to the rescheduling of the Company's bonds' maturity to December 2024.

For more details regarding the Audit Report, please refer to the Basis of Preparation Section hereafter and to the Audit Report sections in the Annual Report and Accounts.

Post-Balance Sheet Events

On 15 March 2023, the Company reported that, with regard to the Sipiem legal claim, the Italian Appeals Court ruled in favour of CL17 thereby allowing it to seek enforcement of the judgment without having to wait for the outcome of the appellate proceedings against the main Sipiem defendant who is individually liable for the full damages payable to CL17. The Appeals Court did, however, grant the remaining Sipiem defendants' request to temporarily enjoin enforcement of the judgment against the members of the internal audit committee and the main defendant's family members that are also themselves defendants in the case.

On 26 May 2023, the Company announced the appointment of Mr Vladimir (Vlad) Kuszniarczyk as Marketing and Business Development Manager, to address business opportunities with large US and Canadian Bitcoin miners and mining rigs manufacturers. Mr Kuszniarczyk's main focus is on developing strategic partnerships and joint ventures with large Bitcoin mining businesses in the US and Canada and with Bitcoin mining rig manufacturers in the US and China. As announced the Company issued him 2,000,000 Options as follows:

- 1,000,000 Options exercisable at 5 pence between 1 November 2023 and 25 May 2025; and
- 1,000,000 Options exercisable at 10 pence between 1 November 2023 and 25 May 2025.

Furthermore, on 31 May 2023, the Company issued additional 5,000,000 Options to existing members of the R&D team, with an exercise price of 10 pence and exercisable at any time before 25 May 2025.

Additionally, the Company amended the maturity of 12,500,000 Options exercisable at 5p and 5,000,000 Options exercisable at 10p (most of which had already expired) to 25 May 2025.

On 1 June 2023, the Company raised £1,000,000 (before expenses) through the placing of 71,428,571 new Ordinary Shares at a price of 1.4 pence per Placing Share.

Outlook

The Board remains committed to return value to its stakeholders by:

- i. Continuing to focus on its R&D programme, which is providing promising and consistent results;
- ii. investing in the technology sector (both in a direct and an indirect manner);
- iii. managing the legacy portfolio assets, where positive outcomes are expected from the Company's claims; and
- iv. further reduction of the debt position (if and when the conditions are deemed appropriate).

The Board remains positive as the technology investments are deemed sound and promising, while the legal claims have strong merit and against defendants that are expected to remain solvent, thereby enhancing the prospect of collection of the judgment debts.

Francesco Gardin

Executive Chairman

29 June 2023

GROUP STATEMENT OF COMPREHENSIVE INCOME

FOR THE YEAR ENDED 31 DECEMBER 2022

	Note	2022 €'000	2021 €'000

At 31 December 2022	8,378	50,541	13,812	(75,953)	(3,222)

The following describes the nature and purpose of each reserve:

Share capital represents the nominal value of equity shares.

Share premium amount subscribed for share capital in excess of the nominal value.

Retained losses cumulative net gains and losses less distributions made and items of other comprehensive income not accumulated in another separate reserve. Included within retained losses are movements relating to the grant, exercise, and fair value movement of the warrants issued during the year.

Other reserves consist of three reserves, as detailed in Note 23, see below:

Merger reserve relates to the difference in consideration and nominal value of shares issued during a merger and the fair value of assets transferred in an acquisition of 90% or more of the share capital of another entity.

Loan note equity reserve relates to the equity portion of the convertible loan notes.

Share option reserve fair value of the employee and key personnel equity settled share option scheme as accrued at the reporting date.

The accounting policies and notes form part of these financial statements.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2022

1.General Information

Quantum Blockchain Technologies plc is a company incorporated in the United Kingdom under the Companies Act 2006. The Company's ordinary shares are traded on AIM of the London Stock Exchange. The address of the registered office is given on the Company Information page. The nature of the Group's operations and its principal activities are set out in the Directors' report on page 13.

2.Accounting policies

The principal accounting policies are summarised below. They have all been applied consistently throughout the period covered by these consolidated financial statements.

Basis of preparation

The consolidated Financial Statements of Quantum Blockchain Technologies plc have been prepared in accordance with United Kingdom adopted International Financial Reporting Standards ("UK adopted IFRS") and the parts of Companies Act 2006 applicable to companies reporting under IFRS.

The financial statements have been prepared under the historical cost convention as modified by the revaluation of assets and liabilities held at fair value.

The basis of preparation should reflect the requirements for the publication of non-statutory accounts ([s435 Companies Act 2006](#)) so therefore we would suggest wording is required as follows:

The financial information in this financial results announcement have been prepared by the directors using the recognition and measurement principles of United Kingdom adopted International Financial Reporting Standards ("UK adopted IFRS").

The financial information for the year ended 31 December 2022 do not constitute the statutory accounts of the company but are extracted from the audited accounts. The statutory accounts will be delivered to the Registrar of Companies following the annual general meeting.

The independent auditor's report on the accounts for the year ended 31 December 2022 was qualified on the basis that they were unable to obtain sufficient and appropriate audit evidence about the carrying amount of the investment in GeoSim Systems Limited, as disclosed in note 15 to the accounts, which had been valued by the directors at €622,000 based on the share price of another investee that took place 42 months before the year end, rather than using a valuation at 31 December 2022 based on an appropriate valuation technique in accordance with IFRS 13 Fair Value Measurement.

Except for the qualification noted above the independent auditor's on the accounts for the year ended 31 December 2022 did not contain a statement under section 498(2) of the Companies Act 2006 or section 498(3).

The independent auditor's report on the accounts for the year ended 31 December 2022 also drew attention by way of emphasis to the use of the going concern basis but without qualifying the report in that respect.

The preparation of Financial Statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated Financial Statements are disclosed in Note 3.

The Consolidated Financial Statements are presented in Euros (€), the functional and presentation of the entity rounded to the nearest €'000.

The Group has adopted the amendments to IAS 16 Property, Plant and Equipment (issued in May 2020) in the current year. This has not had a material impact on the Group financial statements.

The Group has adopted the amendments to IAS 16 IAS 37 Provisions, Contingent Liabilities and Contingent Assets (issued in May 2020) in the current year. This has not had a material impact on the Group financial statements.

Going Concern

The Group's activities generated a loss of €5,026,000 (2021: loss of €5,396,000) and had net current assets of €4,414,000 as at 31 December 2022 (2021: net current liabilities of €3,863,000). The Group's operational existence is still dependent on the ability to raise further funding either through an equity placing on AIM, or through other external sources, to support the on-going working capital requirements.

After making due enquiries, the Directors have formed a judgement that there is a reasonable expectation that the Group can secure further adequate resources to continue in operational existence for the foreseeable future and that adequate arrangements will be in place to enable the settlement of their financial commitments, as and when they fall due.

For this reason, the Directors continue to adopt the going concern basis in preparing the financial statements. Whilst there are inherent uncertainties in relation to future events, and therefore no certainty over the outcome of the matters described, the Directors consider that, based upon financial projections and dependant on the success of their efforts to complete these activities, the Group will be a going concern for the next twelve months. If it is not possible for the Directors to realise their plans, over which there is significant uncertainty, the carrying value of the assets of the Group is likely to be impaired.

Notwithstanding the above, the Directors note the material uncertainty in relation to the Group being unable to realise its assets and discharge its liabilities in the normal course of business.

New standards, interpretations and amendments not yet adopted

The Group decided not to early adopt the following amendments to standards which are not yet mandatory.

Amendments to IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Non-current *(issued January 2020)*

The amendments clarify that the classification of a liability as current or non-current is based only on rights existing at the end of the reporting period and the classification is not affected by expectations about whether rights to settle or defer a liability will be exercised. Further, the amendments clarify that the settlement of a liability refers to the transfer of cash, equity instruments, other assets, or services to the counterparty. This amendment only affects presentation.

The amendment is effective for financial years beginning on or after 1 January 2024 and is not yet adopted in the United Kingdom.

The Group does not expect a material impact on its consolidated financial statements from these amendments.

Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 Interest Rate Benchmark Reform – Phase 2 *(issued in August 2020)*

The amendments are aimed at helping companies to provide investors with useful information about the effects of the reform of interest rate benchmarks on those companies' financial statements.

The amendments complement those issued in 2019 and focus on the effects on financial statements when a company replaces the old interest rate benchmark with an alternative benchmark rate as a result of the reform. The Phase 2 amendments relate to:

- **changes to contractual cash flows**—a company will not have to derecognise or adjust the carrying amount of financial instruments for changes required by the reform, but will instead update the effective interest rate to reflect the change to the alternative benchmark rate;
- **hedge accounting**—a company will not have to discontinue its hedge accounting solely because it makes changes required by the reform, if the hedge meets other hedge accounting criteria; and
- **disclosures**—a company is required to disclose information about new risks arising from the reform and how it manages the transition to alternative benchmark rates.

The Group does not expect a material impact on its consolidated financial statements from these amendments.

Amendments to IAS 1 and IFRS Practice Statement 2 Disclosure of Accounting Policies *(issued in February 2021)*

The amendments enhance the disclosure requirements relating to an entity's accounting policies and clarify that the notes to a complete set of financial statements are required to include material accounting policy information. Material accounting policy information, when considered with other information included in the financial statements, can reasonably be expected to influence decisions that the primary users of financial statements make on the basis of the financial statements. The amendments help preparers determine what constitutes material accounting policy information and notes that accounting policy information which focuses on how IFRS has been applied to its own circumstances is more useful for users of financial statements than standardised information or information duplicating the requirements of IFRS.

The amendment also states that immaterial accounting policy information need not be disclosed but when it is disclosed it shall not obscure material accounting policy information. Further, if accounting policy information is not deemed material this does not affect the materiality of related disclosure requirements of IFRS.

The disclosure of judgements made in applying accounting policies should reflect those that have had the most significant effect on items recognised in the financial statements.

The amendment is effective for financial years beginning on or after 1 January 2023 and is not yet adopted in the United Kingdom.

Amendments to IAS 8 Definition of Accounting Estimates *(issued in February 2021)*

The amendments define accounting estimates as monetary amounts in financial statements that are subject to measurement uncertainty. An accounting policy may require an item in financial statements to be measured at a monetary amount that cannot be observed directly so that in order to achieve the objective of an accounting policy, an estimation is required.

The amendments state that the development of an accounting estimate requires the use of judgement or assumptions based on the latest available reliable information and involve the use of measurement techniques and inputs. Accounting estimates might then need to change as a result of new information, new developments or more experience.

A change in input or measurement technique is a change in accounting estimate which is applied prospectively unless the change results from the correction of prior period errors.

The amendment is effective for financial years beginning on or after 1 January 2023 and is not yet adopted in the United Kingdom.

Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction *(issued in May 2021)*

The amendments specify how companies should account for deferred tax on transactions such as leases and decommissioning obligations.

In specified circumstances, companies are exempt from recognising deferred tax when they recognise assets or liabilities for the first time. Previously, there had been some uncertainty about whether the exemption applied to transactions such as leases and decommissioning obligations—transactions for which companies recognise both an asset and a liability.

The amendments clarify that the exemption does not apply and that companies are required to recognise deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023, with early application permitted and is not yet adopted in the United Kingdom.

Basis of consolidation

Where the company has control over an investee, it is classified as a subsidiary. The company controls an investee if all three of the following elements are present: power over the investee, exposure to variable returns from the investee, and the ability of the investor to use its power to affect those variable returns. Control is reassessed whenever facts and circumstances indicate that there may be a change in any of these elements of control.

The consolidated financial statements present the results of the company and its subsidiaries as if they formed a single entity. Intercompany transactions and balances between group companies are therefore eliminated in full. All subsidiaries have a reporting date of December.

The consolidated financial statements incorporate the results of business combinations using the acquisition method. In the statement of financial position, the acquiree's identifiable assets, liabilities and contingent liabilities are initially recognised at their fair values at the acquisition date. The results of acquired operations are included in the consolidated statement of comprehensive income from the date on which control is obtained. They are deconsolidated from the date on which control ceases.

There is alignment of accounting policies across all Group entities by using uniform accounting policies for like transactions and other events in similar circumstances.

The Group attributes total comprehensive income or loss of subsidiaries between the owners of the parent and the non-controlling interests based on their respective ownership interests.

On consolidation, the results of overseas operations are translated into euros at rates approximating to those ruling when the transactions took place. All assets and liabilities of overseas operations, including goodwill arising on the acquisition of those operations, are translated at the rate ruling at the reporting date. Exchange differences arising on translating the opening net assets at opening rate and the results of overseas operations at actual rate are recognised in other comprehensive income and accumulated in the foreign exchange reserve.

On disposal of a foreign operation, the cumulative exchange differences recognised in the foreign exchange reserve relating to that operation up to the date of disposal are transferred to the consolidated statement of comprehensive income as part of the profit or loss on disposal.

Investments in subsidiaries

Investments in subsidiaries are stated at cost less any impairment loss.

Investments in associates

Investments in associates are accounted for using the equity method less any impairment loss.

The carrying amount of the investment in associates is increased or decreased to recognise the Group's share of the profit or loss and other comprehensive income of the associate, adjusted where necessary to ensure consistency with the accounting policies of the Group.

Unrealised gains and losses on transactions between the Group and its associates are eliminated to the extent of the Group's interest in those

entities. Where unrealised losses are eliminated, the underlying asset is also tested for impairment.

Foreign currency

The functional currency is Euro. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. This is applicable to non-monetary items. Exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss. Exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within 'finance income or costs'. All other exchange gains and losses are presented in the income statement within 'other (losses)/gains – net'.

Changes in the fair value of monetary securities denominated in foreign currency are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortised cost are recognised in profit or loss, and other changes in carrying amount are recognised in other comprehensive income.

Taxation

The tax expense represents the sum of the tax currently payable and any deferred tax.

Current taxes are based on the results of the Group companies and are calculated according to local tax rules, using the tax rates and laws that have been enacted or substantially enacted by the

Deferred tax is provided in full using the financial position liability method for all taxable temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Deferred tax is measured using currently enacted or substantially enacted tax rates and laws. Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the statement of financial position liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax assets are recognised to the extent the temporary difference will reverse in the foreseeable future and that it is probable that future taxable profit will be available against which the asset can be utilised. Deferred tax is recognised for all deductible temporary differences arising from investments in subsidiaries and associates, to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

Revenue

The Group provides consultancy services.

To determine whether to recognise revenue, the Group follows a 5-step process:

1. Identifying the contract with a customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations, and then
5. Recognising revenue when/as performance obligation(s) are satisfied.

Revenue is recognised at the point of the provision of the service. Revenue is recognised as earned at a point in time on the unconditional supply of these services, which are received and consumed simultaneously by the customer. The Group measures revenues at the fair value of the consideration received or receivable for the provision of consultancy services net of Value Added Tax.

Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised on a straight-line basis to write down the cost less estimated residual value. The following useful lives are applied:

Computers	5 years
-----------	---------

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset and is recognised in the profit or loss.

Impairment of property, plant and equipment

At each reporting end date, the company reviews the carrying amounts of its property, plant and equipment to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Financial instruments

Classification and measurement

The Company classifies its financial assets into the following categories: those to be measured subsequently at fair value through profit or loss (FVPL) and those to be held at amortised cost.

Classification depends on the business model for managing the financial assets and the contractual terms of the cash flows.

Management determines the classification of financial assets at initial recognition. The Company's policy with regard to financial risk management is set out in Note 20. Generally, the Company does not acquire financial assets for the purpose of selling in the short term.

The Company's business model is primarily that of "hold to collect" (where assets are held in order to collect contractual cash flows). When the Company enters into derivative contracts, these transactions are designed to reduce exposures relating to assets and liabilities, firm commitments or anticipated transactions.

Financial Assets held at amortised cost

The classification applies to debt instruments which are held under a hold to collect business model, and which have cash flows that meet the "solely payments of principal and interest" (SPPI) criteria.

At initial recognition, trade receivables that do not have a significant financing component, are recognised at their transaction price. Other financial assets are initially recognised at fair value plus related transaction costs, they are subsequently measured at amortised costs using the effective interest method. Any gain or loss on derecognition or modification of a financial asset held at amortised cost is recognised in the income statement.

Financial Assets held at fair value through profit or loss (FVPL)

The classification applies to the following financial assets. In all cases, transaction costs are immediately expensed to the income statement.

·Debt instruments that do not meet the criteria of amortised costs or fair value through other comprehensive income. These receivables are generally held to collect but do not meet the SPPI criteria and as a result must be held at FVPL. Subsequent fair value gains or losses are taken to the income statement.

·Equity investments which are held for trading or where the FVOCI election has not been applied. All fair value gains or losses and related dividend income are recognised in the income statement.

·Derivatives which are not designated as a hedging instrument. All subsequent fair value gains or losses are recognised in the income statement.

Trade and other receivables

Trade and other receivables are measured at initial recognition at fair value and are subsequently measured at amortised cost using the effective interest rate method. For trade receivables, where there is no significant financing component, fair value is normally the transaction price.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value with maturities of three months or less from inception.

Impairment of financial assets

A forward-looking expected credit loss (ECL) review is required for: debt instruments measured at amortised costs are held at fair value through other comprehensive income; loan commitments and financial guarantees not measured at fair value through profit or loss; lease receivables and trade receivables that give rise to an unconditional right to consideration.

As permitted by IFRS9, the Company applies the "simplified approach" to trade receivable balances and the "general approach" to all other financial assets. The general approach incorporates a review for any significant increase in counter party credit risk since inception. The ECL reviews including assumptions about the risk of default and expected loss rates. For trade receivables, the assessment takes into account the use of credit enhancements, for example, letters of credit. Impairments for undrawn loan commitments are reflected as a provision.

Financial liabilities

Borrowings and other financial liabilities (including trade payables but excluding derivative liabilities) are recognised initially at fair value, net of transaction costs incurred, and are subsequently measured at amortised costs.

Convertible bonds

Convertible bonds are regarded as compound instruments, consisting of a liability component and an equity component. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible debt. The difference between the proceeds of issue of the convertible loan notes and the fair value assigned to the liability component, representing the embedded option to convert the liability into equity of the Group, is included in equity.

Issue costs are apportioned between the liability and equity components of the convertible loan notes based on their relative carrying amounts at the date of issue. The portion relating to the equity component is charged directly against equity.

The interest expense on the liability component is calculated by applying the prevailing market interest rate for similar non-convertible debt to the liability component of the instrument. The difference between this amount and the interest paid is added to the carrying amount of the convertible loan note.

Borrowings costs

Interest-bearing borrowings are initially recorded at fair value net of attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between proceeds and redemption value being recognised in the profit or loss over the period of the borrowings on an effective interest basis.

Trade payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Provisions, contingent assets and contingent liabilities

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the year-end date, taking into account the risks and uncertainties surrounding the obligation.

No liability is recognised if an outflow of economic resources as a result of present obligations is not probable. Such situations are disclosed as contingent liabilities unless the outflow of resources is remote.

Contingent assets are possible assets whose existence will be confirmed by the occurrence or non-occurrence of uncertain future events that are not wholly within the control of the Group. Contingent assets are not recognised, but they are disclosed when it is more likely than not that an inflow of benefits will occur. When the inflow of benefits is virtually certain an asset is recognised.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received net of direct issue costs.

Share capital account represents the nominal value of the shares issued.

The share premium account represents premiums received on the initial issuing of the share capital. Any transaction costs associated with the issuing of shares are deducted from share premium, net of any related income tax benefits.

Retained losses include all current and prior period results as disclosed in the statement of comprehensive income.

Other reserves consist of the merger reserve, share option reserve and loan equity reserve.

- the merger reserve represents the premium on the shares issued less the nominal value of the shares, being the difference between the fair value of the consideration and the nominal value of the shares.
- the share option reserve represents the cumulative amounts charged to the profit or loss in respect of employee share option arrangements where the scheme has not yet been settled by means of an award of shares to an individual.
- the loan equity reserve represents the value of the equity component of the nominal value of the loan notes issued.

Government Grants

Grants from the government are recognised at their fair value where there is reasonable assurance that the grant will be received, and the group will comply with all attached conditions. Government grants which are revenue in nature are recognised in profit or loss over the period in which the group recognises as expenses the related costs for which the grants are intended to compensate.

Research and development costs

Development costs are recognised as an asset only when all of the following criteria are met:

- (a) the technical feasibility of completing the intangible asset so that it will be available for use or sale.
- (b) its intention to complete the intangible asset and use or sell it.
- (c) its ability to use or sell the intangible asset.
- (d) how the intangible asset will generate probable future economic benefits. Among other things, the entity can demonstrate the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset.
- (e) the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset.
- (f) its ability to measure reliably the expenditure attributable to the intangible asset during its development.

The research and development expenditure that does not meet the recognition criteria are not capitalised and are recognised as an expense as incurred, as shown in Note 7.

1. Critical accounting judgements and key sources of estimation uncertainty

The preparation of Financial Statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Estimates and judgements are continually evaluated and are based on historical experience and other factors including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below and in other relevant notes in the financial statements.

Fair value measurement

Management uses valuation techniques to determine the fair value of financial instruments (where active market quotes are not available) and non-financial assets. This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management bases its assumptions on observable data as far as possible, but this is not always available. In that case management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm's length transaction at the reporting date.

In order to arrive at the fair value of investments a significant amount of judgement and estimation has been adopted by the Directors as detailed in the investments accounting policy. Where these investments are un-listed and there is no readily available market for sale the carrying value is based upon future cash flows and current earnings multiples for which similar entities have been sold. The nature of these assumptions and the estimation uncertainty as a result is outlined in Note 15, along with sensitivities in Note 20.

1. Segment information

In identifying its operating segments, management generally follows the Group's service lines, which represent the main products and services provided by the Group. The measurement policies the Group uses for segment reporting under IFRS 8 are the same as those used in its financial statements. The disclosure is based on the information that is presented to the chief operating decision maker, which is considered to be the board of Quantum Blockchain Technologies plc.

The Directors are of the opinion that under IFRS 8 - "Operating Segments" there are no identifiable business segments that are subject to risks and returns different to the core business of developing cheaper and faster Bitcoin mining. The information reported to the Directors, for the purposes of resource allocation and assessment of performance is based wholly on the overall activities of the Group. Therefore, the Directors have determined that there is only one reportable segment under IFRS 8.

The Group has not generated a material level of income and has no major customers.

1. Staff costs

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Staff costs during the period including directors comprise:				
Wages and salaries	188	555	188	555

Social security costs and pension contributions	228	3	228	3
Share options expense	1,854	2,622	1,854	2,622
	2,270	3,180	2,270	3,180

1. Directors' emoluments

	2022	2021
	€'000	€'000
Aggregate emoluments	116	525
Share options expense	1,728	2,444
	1,844	2,969

Remuneration of the highest paid Director was €57,000 (2021: €327,000).

There are no retirement benefits accruing to the Directors. Details of directors' remuneration are included in the Directors' Report.

1. Expenses by nature

	2022	2021
	€'000	€'000
Directors' emoluments	1,844	2,969
Employee emoluments	378	210
Professional and legal fees	509	441
Audit fees	86	50
Administrative expenditure	216	156
Impairment of assets	618	769
Fundraising fees	75	192
Research and development costs	821	198
	4,547	4,985

1. Investments in associates

The Group has a 41.17% equity interest in ForCrowd Srl.

Summarised financial information of the Group's share in this associate is as follows:

	2022	2021
	€'000	€'000
Loss from continuing operations	(69)	(33)
Impairment	(82)	-
Total comprehensive loss	(151)	(33)
Aggregate carrying amount of the Group's interests in this associate	60	211

1. Finance (costs)/income

	2022	2021
	€'000	€'000
(Loss)/gain on derivatives	(324)	(143)
Interest on convertible bonds	(325)	(305)
Interest credit on modification of convertible bonds	9	-
Other gains or losses	-	(4)
Interest received	6	6
Bank fees	(2)	-
	(636)	(446)

1. Auditor's remuneration

	2022 €'000	2021 €'000
Group Auditor's remuneration:		
Fees payable to the Group's auditor for the audit of the Company and consolidated financial statements:	56	50
Non audit services:		
Other services (tax)	-	-
Subsidiary Auditor's remuneration		
Other services pursuant to legislation	-	-
	56	50

1. Employee numbers

	Group		Company	
	2022 Number	2021 Number	2022 Number	2021 Number
The average number of Company's employees, including directors during the period was as follows:				
Management and administration	4	3	4	3

1. Taxation

	2022 €'000	2021 €'000
Corporation tax - current period	(117)	(53)
Corporation tax - prior period underprovision	(86)	-
Foreign tax	(23)	-
Deferred taxation	-	-
Tax charge for the year	(226)	(53)

The Group has a potential deferred tax asset arising from unutilised trading losses and management expenses available for carry forward and relief against future taxable profits. The deferred tax asset has not been recognised in the financial statements in accordance with the Group's accounting policy for deferred tax.

The Group's unutilised losses are as follows:	2022 €'million	2021 €'million
Trading losses	2	2
Management expenses	19	19
Non trade loan relationship deficits	2	2
Capital losses	8	8

The standard rate of tax for the current year, based on the UK effective rate of corporation tax is 19% (2020: 19%). The standard rate of Research and Development Tax credit is 14.5% of the enhanced R&D expenditure. The actual rate for the current and previous year varies from the standard rate for reasons set out in the

Continuing operations	2022 €'000	2021 €'000
Loss for the year before tax	(5,252)	(5,449)
Tax on ordinary activities at standard rate	(998)	(1,035)
Effects of:		
Expenses not deductible for tax purposes	595	751
R&D enhancement	(153)	(39)

R&D losses surrendered	270	70
R&D Foreign Tax losses surrendered	11	-
Losses brought forward claimed	-	(10)
Tax losses available for carry forward against future profits	275	263
Total tax payable	-	-
Enhanced R&D expenditure	804	368
Total tax repayable – current year	117	53
Corporation tax - prior period underprovision	86	-
Foreign tax	23	-
Total tax repayable	226	53

The UK government has announced that the corporation tax rate will increase from 19% to 25% with effect from 1 April 2023.

1. Earnings per share

The basic earnings per share is calculated by dividing the loss attributable to equity shareholders by the weighted average number of ordinary shares in issue during the period. Diluted earnings per share is computed using the weighted average number of shares during the period adjusted for the dilutive effect of share options, warrants and convertible loans outstanding during the period.

The loss and weighted average number of shares used in the calculation are set out below:

	2022			2021		
	Profit/ (Loss)	Weighted average no. of shares	Per share amount	Profit/ (Loss)	Weighted average no. of shares	Per share amount
	€'000	000's	Euro Cent	€'000	000's	Euro Cent
Basic earnings per share						
Continuing operations	(5,026)	989,497	(0.508)	(5,396)	869,339	(0.621)
Total operations	(5,026)	989,497	(0.508)	(5,396)	869,339	(0.621)
Fully diluted earnings per share						
Continuing operations	(5,091)	1,632,694	(0.312)	(5,328)	1,503,440	(0.354)
Total operations	(5,091)	1,632,694	(0.312)	(5,328)	1,503,440	(0.354)

See note 27 for details of share option transactions and share issues that have occurred since the end of the reporting period.

1. Property, plant and equipment

Group	Computers €'000	Total €'000
Cost		
At 1 January 2022	164	164
Additions	111	111
At 31 December 2022	275	275
Depreciation and impairment		
At 1 January 2022	-	-

The registered office for TLT SPA is Via Trento 5, Biella (BI), 13900.

The directors have assessed the group's interests in other entities on an individual basis and come to the overall conclusions as detailed in the table below. Please see the note narrative for additional information on an entity by entity basis.

Quantum Blockchain Technologies PLC

This entity is the UK based group parent.

Brainspark Associates Limited

This entity is a 100% owned UK incorporated subsidiary of Quantum Blockchain Technologies PLC and has been included in the consolidation.

Clear Leisure 2017 Limited

This entity is a 100% owned UK incorporated subsidiary of Quantum Blockchain Technologies PLC and has been included in the consolidation.

QBT R&D Srl

This entity is a 100% owned subsidiary of the group incorporated in Italy and has been included in the consolidation.

Milan Digital Twin Limited

This entity is a 100% owned UK incorporated subsidiary of Quantum Blockchain Technologies PLC. This entity only includes unpaid share capital and has not begun operating. It has been included in the consolidation with an overall impact of nil.

London Digital Twin Limited

This entity is a 100% owned UK incorporated subsidiary of Quantum Blockchain Technologies PLC. This entity only includes unpaid share capital and has not begun operating. It has been included in the consolidation with an overall impact of nil.

Clear Holiday Srl

Clear Holiday Srl is a 100% owned subsidiary of the group incorporated in Italy. Although QBT hold all of the shares, they do not have control of the company. Therefore, this entity has not been consolidated on the basis that QBT do not have control. The balances held within the company are not with external third parties and therefore the overall impact on the accounts would be trivial.

Miner One Limited

Miner One Limited is a 100% owned UK based entity. The entity itself was initially set up with the hope of transferring certain assets, notably a data centre located in Serbia into its possession. However, due to disputes with the previous joint venture partner this did not materialise. In 2021 this entity remained dormant and did not trade during the year. This entity only includes unpaid share capital and has not begun operating, it has been included in the consolidation with an overall impact of nil.

Mediapolis Investment S.A.

Mediapolis Investment S.A. is a 71.72% owned subsidiary incorporated in Luxembourg. The company itself is inactive and is not trading. Previous management failed to pay accountants and local directors for the previous six years and no financial statements have been filed for over seven years. Although this entity is inactive and

71.72% of the shares are held by the group, there is no active management in Luxembourg, and this has led to a difficulty in finalizing a liquidation.

The most recent accounts available were produced in 2010 and the main asset held by the entity is the investment of 13% of the capital in another former group company, Fallimento Mediapolis Srl, which has been liquidated. This investment is carried at approximately EUR6.6m and has been impaired to nil in previous years. Therefore, the non-consolidation of this entity is deemed to be immaterial to the group.

On 6 May 2021 Mediapolis Investment S.A. had entered a liquidation process and the Group does not expect any further assets or liabilities to arise from these proceedings.

Sosushi Company Srl

Sosushi Company Srl was a 99.3% owned entity incorporated in Italy. On 24 June 2021, the Company received notification that Sosushi had been declared bankrupt. Sosushi has not been consolidated as the fair value has been determined as nil and all receivables from the company have been fully impaired. The litigation is held via Clear Leisure 2017.

Fallimento Mediapolis Srl

Fallimento Mediapolis Srl was an 84.04% equivalent owned entity incorporated in Italy. Quantum Blockchain Technologies Plc held directly 74.67% of the capital of the company whilst a 13% stake was held via Mediapolis Investment S.A as noted above. The company was liquidated in 2017 and therefore this is the date from which control is deemed to have been lost. There is ongoing bankruptcy litigation however, the investment has been fully impaired. Therefore, the financial information for Fallimento Mediapolis Srl has not been consolidated into the group financial statements.

Sipiem S.P.A

Sipiem S.P.A was a 50.17% owned entity incorporated in Italy. The entity had not been trading for a number of years and was maintained due to ongoing legal matters with the former directors. The company entered into liquidation in 2015. Therefore, this is the date from which control is deemed to have been lost. Therefore, the financial information for Sipiem S.P.A has not been consolidated into the group financial statements. The investment in Sipiem S.P.A is accounted at fair value through profit or loss. Furthermore, in August 2022 the company was declared bankrupt by the Court of Rovigo, following a petition filed by Sipiem's liquidator with the support of its main shareholder (Quantum Blockchain Technologies). Sipiem's bankruptcy does not impact the Company's balance sheet, as the litigation is held via Clear Leisure 2017.

In November 2022, the Venice Court issued its final judgement in respect of the Company's legal claim against the previous management in which it ruled in favour of QBT and ordered the defendants to pay an aggregate amount of €6,188,974 (plus interest and adjustments for inflation to accrue from different dates until the date of payment) in damages, plus €85,499 in legal expenses (together the "Award Payment"). The Award Payment is subject to tax duties in Italy. It is worth noting that the exact amount of the Award Payment that will be collected by the Company and the timing of receipt of any such funds have not yet been finalised.

Eight of the ten defendants have appealed against the Venice Court's judgment. The appealing defendants have requested the Venice Court of Appeal to set aside the Venice's Court's judgment, and enjoin the enforceability of the Award Payment, until the ruling of the appeals. The hearings for the defendants' appeals are tentatively set to commence in March 2023. The Court of Appeal will set a final date for the first hearing in the coming weeks.

ForCrowd Srl

ForCrowd Srl is a 41.17% owned investment of the group incorporated in Italy. The group has determined that it holds significant influence over this associate given the voting rights arising from its shareholding. Consequently, this investment has been categorised in the accounts within "Investments in equity-accounted associates" and is carried in the accounts at the Group's share of the associate's net assets, with the Group's share of the profit or loss and other comprehensive income of the associate being brought into the Group's results for the year.

Previously, this investment was categorised in the financial statements within "Investments" and hence was re-categorised in the year ended 31 December 2021.

ClassFinance in Liquidazione Srl

ClassFinance in Liquidazione Srl is a 20% owned investment of the group incorporated in Italy. The company was placed into liquidation in 2015. The investment in ClassFinance in Liquidazione Srl is accounted at fair value through profit or loss. The fair value is assessed to be nil and fair value loss has been fully recognised.

1. Investments (continued)

PBV Monitor Srl

PBV Monitor Srl is a 10% owned investment in an entity incorporated in Italy. The investment has been recognised in the accounts at fair value through profit or loss. The Fair Value of PBV Monitor (€55,000, 2021: €77,000) has decreased during the year due to an impairment.

There were additional rounds of equity funding in January and February 2022, in which the entire post money valuation of the company was €1,429,000, with Quantum Blockchain Technologies directly holding 10% of such amount.

The post money valuation at which the Company invested in 2018 was €340,000, which also represented the Company's valuation of PBV in Pre Covid-19 conditions. The difference between this original value and the current Fair Value is not attributable to a change of fundamentals to the business. Similarly, the progress made since 2020 has not highlighted any significant divergence from the original business plan.

The difference in the valuation is therefore attributable to lower value attributed to the company during the 2022 equity round. The key assumptions underpinning the equity round at the start of 2022 remain applicable.

The Fair Value assessment of PBV Monitor, is directly related to the company's valuation in future rounds.

Geosim Systems Limited

Geosim Systems Limited is a 4.53% owned investment in an entity incorporated in Israel. The investment has been recognised in the accounts through its fair value and is held via Brainspark Associates Limited.

The Fair Value of Geosim (€622,000, 2021: €587,000) has been assessed in relation to the last equity round of the company in 2018, in which Quantum Blockchain Technologies' 533,990 Geosim shares have been valued at \$1.25 each. The difference in the valuation between 2022 and 2021, attributable to the variance in the EUR/USD exchange rate.

The Fair Value assessment of Geosim is directly related to the company's valuation in future rounds and to the EUR/USD exchange rate.

Beni Immobili Srl

Beni Immobili Srl is a 15.05% equivalent owned investment in an entity incorporated in Italy. The shares in this company are held via Sipiemi S.P.A. No fair value is recognised for this investment as the entity has minimal net

assets and the valuation would be trivial to the consolidated financial statements. Moreover, as the investment is held via Sipiemi S.P.A, which is in liquidation, the investment has not been recognised as an asset.

TLT S.P.A

TLT S.P.A is a 0.25% owned investment based in Italy. No fair value is recognised for this investment as the entity has a large net liability position and due to the small shareholding, any potential valuation would be trivial to the consolidated financial statements. Moreover, as the investment is held via Sipiemi S.P.A, there has been a complete fair value loss and the investment amount has been derecognised.

Carrying value of investments	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
At as 1 January	664	848	298	434
Additions	50	-	50	64
Fair value decrease	(72)	(225)	(223)	(200)
Foreign exchange	35	41	-	-
Carrying value at 31 December	677	664	125	298

An amount of €622,000 (2021: €587,000) included within Group investments held for trading is a level 3 investment and represents the fair value of 533,990 shares in GeoSim Systems Ltd. GeoSim Systems Ltd is an Israeli company seeking to establish itself as the world leader in building complete and photorealistic 3D virtual cities and in delivering them through the Internet for use in local searches, real estate and city planning, homeland security, tourism and entertainment. Quantum Blockchain Technologies owns 4.53% of GeoSim Systems Ltd.

An amount of €55,000 (2021: €77,000) included within Company investments held for trading is a level 3 investment and represents the fair value of a 10% interest in PBV Monitor Srl ("PBV"). PBV is an Italian company specialising in the acquisition and dissemination of data for the legal services industry, utilising proprietary market intelligence tools and dedicated search software. Quantum Blockchain Technologies acquired 10% of PBV in December 2018 and has purchased more shares in January and February 2022 to maintain their 10% shareholding. As part of the initial investment agreement, Quantum Blockchain Technologies was granted a seat on the board of PBV and was appointed as exclusive advisor to PBV regarding the possible sale of PBV from 1 January 2020 for a period of four years and will be entitled to a 4% commission fee on the proceeds of any sale.

1. Trade and other receivables

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Trade receivables	14	58	-	-
Other receivables	4,537	4,769	280	144
Amounts owed by related parties	75	78	776	521
	4,626	4,905	1,056	665

Group other receivables includes an amount of €132,000 (2021: €132,000) due in relation to the Fallimento Mediapolis Srl bankruptcy procedure; and an amount of €4,037,000 (2021: €4,445,000) due in relation to the ongoing Sipiemi legal claim, which is unsecured, interest free and does not have fixed terms of repayment.

The Directors consider that the carrying value of trade and other receivables approximates to their fair value.

1. Cash and cash equivalents

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Bank current accounts	463	1,039	449	1,035
	463	1,039	449	1,035

The Directors consider the carrying amounts of cash and cash equivalents approximates to their fair value.

1. Trade and other payables

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Trade payables	147	128	122	126
Other payables	183	91	320	91
Accruals	135	110	135	137
Trade and other payables	465	329	577	354

The Directors consider that the carrying value of trade and other payables approximates to their fair value.

Included within other payables are intercompany balances that are not eliminated on consolidation, PAYE, national insurance and pension liabilities outstanding as at the year end, and unpaid salary balances.

Accruals relate to R&D, consulting and accountancy costs incurred by the Group that had not been invoiced by the year end.

1. Borrowings

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Zero rate convertible bond 2015	5,148	5,100	5,148	5,100
Zero rate convertible bond 2020	2,983	3,265	2,983	3,265
	8,131	8,365	8,131	8,365
Disclosed as:				
Current borrowings	-	8,365	-	8,365
Non-current borrowings	8,131	-	8,131	-
	8,131	8,365	8,131	8,365

Interest on the bonds is payable annually on 31 March each year. The bonds at 31 December 2022 include all unpaid interest and interest accrued to that date.

On 25 March 2013 the Company issued €3,000,000 nominal value of zero rate convertible bonds at a discount of 22%. The bonds are convertible at 15p per share and have a redemption date of 15 December 2015.

During 2014 the Company issued €1,885,400 zero bonds in settlement of £1,563,000 7% bonds (see above). Also €600,000 zero bonds were issued in settlement of a debt of €518,000 and €450,000 bonds were issued for cash realising €412,000 before expenses.

On 15 December 2015 the bondholders meeting approved the amendments on the Zero Rate Convertible Bond 2015, originally due on 15 December 2015; Under new terms the final maturity date of the Bond is 15 December 2017 and the interest has been reduced from 9.5% to 7%.

On 15 December 2016 the bondholders meeting approved the amendments on the Zero Rate Convertible Bond 2015, originally due on 15 December 2017; Under new terms the final maturity date of the Bond is 15 December 2018 and the interest has been reduced from 7% to 1%.

On 19 June 2018, the holders of its €9.9m Bonds agreed to extend the final maturity date of the Bonds from 15 December 2018 to 15 December 2022. The Company is now able to convert the Bonds into new ordinary shares of 0.25p each.

On 28 December 2018, bonds with a face value of €2,100,000 plus cumulative interest were converted into 50,992,826 new ordinary shares of 0.25 pence at a price of 3.76 pence per share.

On 5 October 2020, Eufingest SA agreed to extend the repayment date of all loans advanced to the company amounting to €3,375,000 and £30,000 to 31 October 2020.

On 9 November 2020 Eufingest SA agreed to convert all outstanding loans and accrued interest amounting to €3,423,707 into Zero rate convertible bond 2020. The Zero Coupon Bonds 2020 accrue interest at a rate of 2% per annum. Bondholders can convert at any time up to 15 December 2022 at a conversion price of £0.01 per share.

In April 2022, QBT agreed with the sole bondholder of the €3.5m 2020 Zero Coupon Bond to extend the maturity date from December 2022 to December 2024.

Also, with regard to the 2015 Zero Coupon Bond, via a Bondholders' meeting held on 21 April 2022, the Company extended the maturity date from 15 December 2022 to 15 December 2024 and amended the conversion price into Company's new ordinary shares from 15p to 5p.

Key Assumptions

The derivative element of the Zero Coupon Bonds 2015 were valued at each year end using the Black Scholes option pricing model. The following assumptions were used at each period end.

Zero Coupon Bonds 2015

	2022	2021
Share price	1.125p	3.100p
Expected life	2 years	1 year
Volatility	136%	130%
Dividend yield	0%	0%
Risk free interest rate	3.58%	0.76%
Fair value	0.5p	0.4p

1. Financial instruments

The Group's financial instruments comprise cash, investments at fair value through profit or loss, investments in equity-accounted associates, trade receivables, trade payables that arise from its operations and borrowings. The main purpose of these financial instruments is to provide finance for the Group's future investments and day to day operational needs.

The Group does not enter into any derivative transactions such as interest rate swaps or forward foreign exchange contracts, as the Group's exposure to movements in foreign exchange rates is not considered significant (see foreign currency risk management). The main risks faced by the Group are limited to interest rate risk on surplus cash deposits and liquidity risk associated with raising sufficient funding to meet the operational needs of the business.

The Board reviews and agrees policies for managing these risks and they are summarised below.

FINANCIAL ASSETS BY CATEGORY

The categories of financial assets included in the statement of financial position and the headings in which they are included are as follows:

	2022	2021
	€'000	€'000
Financial assets:		
Financial assets held at fair value through profit and loss	677	664
Investments in equity-accounted associates	60	211
Trade and other receivables	4,284	4,862
Cash and cash equivalents	463	1,039
	5,484	6,776

FINANCIAL LIABILITIES BY CATEGORY

The categories of financial liabilities included in the statement of financial position and the headings in which they are included are as follows:

	2022	2021
	€'000	€'000

Financial liabilities at amortised cost:

Trade and other payables	465	329
Provisions	210	-
Borrowings	8,131	8,365
Derivative	468	1,113
	9,274	9,807

Financial instruments measured at fair value:

	Level 1	Level 2	Level 3
	€'000	€'000	€'000
As at 31 December 2022			
Investments at fair value through profit or loss	-	-	677
	-	-	677
As at 31 December 2021			
Investments at fair value through profit or loss	-	-	664
	-	-	664

The valuation techniques and significant unobservable inputs used in determining the fair value measurement of level 2 and level 3 financial instruments, as well as the inter-relationship between key unobservable inputs and fair value, are set out in the table below.

Financial Instruments	Valuation technique used	Significant unobservable inputs (Level 3 only)	Inter – relationship between key unobservable inputs and fair value (level 3 only)
Investments	Based on issue of shares in the investments held by the Group and directors assessment on the recoverability of loans.	Assessment of recoverability of loan.	If loan was considered not to be recoverable this would result in the reduction in the fair value of the investment.

The Group has adopted fair value measurements using the IFRS 7 fair value hierarchy.

Categorisation within the hierarchy has been determined on the basis of the lowest level of input that is significant to the fair value measurement of the relevant asset as follows:

- Level 1: valued using quoted prices in active markets for identical assets;
- Level 2: valued by reference to valuation techniques using observable inputs other than quoted prices included in Level 1;
- Level 3: valued by reference to valuation techniques using inputs that are not based on observable markets criteria.

The Level 3 investment refers to an investment in GeoSim Systems Ltd and PBV Monitor Srl.

Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders through optimisation of the debt and equity balance. The capital structure of the Group consists of debt attributable to convertible bondholders, borrowings, cash and cash equivalents, and equity attributable to equity holders of the Group, comprising issued capital, reserves and retained earnings, all as disclosed in the Statement of Financial Position.

Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument disclosed in Note 2 to the financial statements.

Financial risk management objectives

The Company is exposed to a variety of financial risks which result from both its operating and investing activities. The Group's risk management is coordinated by the board of directors and focuses on actively securing the Company's short and medium-term cash flows by raising liquid capital to meet current liability obligations.

Market price risk

The Company's exposure to market price risk mainly arises from movements in the fair value of its investments held for trading. The Group manages the investment price risk within its long-term investment strategy to manage a diversified exposure to the market. If the investments were to experience a rise or fall of 15% in their fair value, this would result in the Group's net asset value and statement of comprehensive income increasing or decreasing by €102,000 (2021: €97,000).

Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which monitors the Group's short, medium and long-term funding and liquidity management requirements on an appropriate basis. The Group has minimal cash balances at the reporting date (refer to Note 2 – Basis of preparation and going concern). The Group continues to secure future funding and cash resources from disposals as and when required in order to meet its cash requirements. This is an on-going process and the directors are confident with their cash flow models.

The following are the undiscounted contractual maturities of financial liabilities:

	Carrying Amount €'000	Less than 1 year €'000	Between 1 and 5 years €'000	Total €'000
As at 31 December 2022				
Trade and other payables	465	465	-	465
Provisions	210	210	-	210
Borrowings	8,131	-	8,131	8,131
Derivative financial instruments	468	-	468	468
	9,274	675	8,599	9,274
As at 31 December 2021				
Trade and other payables	329	329	-	329
Borrowings	8,365	8,365	-	8,365
Derivative financial instruments	1,113	1,113	-	1,113
	9,807	9,807	-	9,807

Management believes that based on the information provided in Note 2 – in the '*Basis of preparation*' and '*Going concern*', that future cash flows from operations will be adequate to support these financial liabilities.

Interest rate risk

The Group and Company manage the interest rate risk associated with the Group cash assets by ensuring that interest rates are as favourable as possible, whilst managing the access the Group requires to the funds for working capital purposes.

The Group's cash and cash equivalents are subject to interest rate exposure due to changes in interest rates. Short-term receivables and payables are not exposed to interest rate risk. The borrowings are at fixed interest rates.

	Group		Company	
	2022	2021	2022	2021
		€'000		€'000
Fixed rate instruments				
Financial assets	5,021	4,845	222	605
Financial liabilities	8,528	8,718	8,503	8,743

Change in interest rates will affect the Group's income statement as follows:

	Gain / (loss)	
Group	2022	2021

€'000 €'000

Euribor +0.5% / -0.5%

+2 / -2

+5 / -5

The analysis was applied to cash and cash equivalents based on the assumption that the amount of asset as at the reporting date was available for the whole year.

Foreign currency risk management

The Group undertakes certain transactions denominated in currencies other than Euro, hence exposures to exchange rate fluctuations arise. Amounts due to fulfil contractual obligations of £435,000 (2021: £208,000) are denominated in sterling. An adverse movement in the exchange rate will impact the ultimate amount payable, a 10% increase or decrease in the rate would result in a profit or loss of £44,000 (2021: £21,000). The Group's functional and presentational currency is the Euro as it is the currency of its main trading environment, and most of the Group's assets and liabilities are denominated in Euro. The parent company is located in the sterling area.

Credit risk management

The Group's financial instruments, which are subject to credit risk, are considered to be trade and other receivables. There is a risk that the amount to be received becomes impaired. The Group's maximum exposure to credit risk is €4,626,000 (2021: €4,905,000) comprising receivables during the period. About 87% (2021: 91%) of total receivables are due from a single company. The ageing profile of trade receivables was:

	2022		2021	
	Total book value	Allowance for impairment	Total book value	Allowance for impairment
Group	€'000	€'000	€'000	€'000
Current	4,626	-	4,905	-
	4,626	-	4,905	-
Company				
Current	1,056	-	665	-
	1,056	-	665	-

1. Provisions

	Group		Company	
	2022	2021	2022	2021
	€'000	€'000	€'000	€'000
Provision for potential payroll tax liability	210	-	210	-
Provisions	210	-	210	-

The above provision estimates a potential employment tax liability deriving from consultancy payments to directors between 2015 and 2022.

1. Share capital and share premium

ISSUED AND FULLY PAID:	Number of ordinary shares	Number of deferred shares	Ordinary share capital €'000	Deferred share capital €'000	Share premium €'000	Total €'000
At 1 January 2021	662,371,447	199,409,377	1,930	5,467	47,124	54,521

1. Events after the reporting date

During the first months of 2023, the Company has been involved in the following:

On 15 March the Company reported that, with regard to the Sipiem legal claim, the Venice Court of Appeals ruled in favour of CL17 thereby allowing it to seek enforcement of an aggregate amount of €6,188,974 (plus interest and adjustments for inflation) in damages, plus €85,499 in legal expenses the “Award Payment” against the main Sipiem defendant, who is an individual and is liable for the full amount of the Award Payment. The Court of Appeal did, however, grant the remaining Sipiem defendants’ request to temporarily enjoin enforcement of the judgment against the members of the internal audit committee and the main defendant’s family member pending outcome of the appeal presently before that court.

On 26 May, the Company announced the appointment of Mr Vladimir (Vlad) Kuszniarczyk as Marketing and Business Development Manager, to address business opportunities with large US and Canadian Bitcoin miners and mining rigs manufacturers. Mr Kuszniarczyk’s main focus is on developing strategic partnerships and joint ventures with large Bitcoin mining businesses in the US and Canada and with Bitcoin mining rig manufacturers in the US and China. As announced the Company issued him 2,000,000 Options as follows:

- 1,000,000 Options exercisable at 5 pence between 1 November 2023 and 25 May 2025; and
- 1,000,000 Options exercisable at 10 pence between 1 November 2023 and 25 May 2025.

On 31 May, the Company announced it issued additional 5,000,000 Options to existing members of the R&D team, with an exercise price of 10 pence and exercisable at any time before 25 May 2025.

Additionally, the Company amended the maturity of 12,500,000 Options exercisable at 5p and 5,000,000 Options exercisable at 10p (most of which had already expired) to 25 May 2025.

On 1 June, the Company raised £1,000,000 (before expenses) through the placing of 71,428,571 new ordinary shares of 0.25 pence each in the Company at a price of 1.4 pence per Placing Share.
