NOTES TO EDITORS

Alkemy is seeking to establish the world's leading independent and sustainable lithium hydroxide production by developing state-of-the-art lithium sulphate and lithium hydroxide facilities in Australia and the UK.

Alkemy, through its wholly-owned subsidiary Tees Valley Lithium, has secured a 9.6 ha brownfields site with full planning permission at the Wilton International Chemicals Park in Teesside, a major UK Freeport, to build the UK's first and Europe's largest lithium hydroxide processing facility.

Tees Valley Lithium has completed a Class 4 Feasibility Study for its proposed lithium hydroxide refinery which will process feedstock imported from various sources to produce 96,000 tonnes of premium, low-carbon lithium hydroxide annually, representing around 15% of Europe's projected demand.

Alkemy has also secured a site near Port Hedland, Western Australia to build a world-class sustainable lithium sulphate refinery that will provide reliable feedstock for Tees Valley Lithium.
