Hydrogen Utopia International PLC
(the 'Company' or 'HUI')

Interview with HUI CEO and Owner of Ohrid Organics

Hydrogen Utopia International PLC, a company specialising in turning non-recyclable mixed waste plastic into hydrogen and other carbon-free fuels, new materials or distributed renewable heat, announces that Proactive Investors Limited has conducted an interview with the Company's CEO, Aleksandra Binkowska and Howard White, Executive Director of the Company and 100% owner of Ohrid Organics. The interview discusses the rationale for the Company's increasing engagement with Ohrid Organics.

About Hydrogen Utopia International PLC

HUI aims to become one of the leading new European companies specialising in turning non-recyclable mixed waste plastic into carbon-free fuels, new materials or distributed renewable heat.

A HUI facility uses non-recyclable mixed waste plastic as feedstock and turns it into syngas from which new products and energy can be produced. HUI anticipates that its revenues will be derived from a variety of sources, dependent upon location and configuration of the HUI facilities, including the sale of syngas, hydrogen and other gases, electricity and heat sales, and the payment to it of fees for a given quantity of non-recyclable mixed waste plastic received at a HUI facility.

HUI will target areas where there is significant private sector interest or potential, financial backing is accessible and or where substantial EU and/or government funded sources of grants and loans are or may be available. The global increase in fossil fuel-based energy prices reinforces the need for alternative, price competitive energy sources, which HUI's business model can provide.

The pressing need to deal with growing amounts of waste plastic combined with a real momentum in the use of hydrogen from renewable sources may pave the way for a rapid deployment of and investment in HUI facilities.
