

## Allergy Therapeutics<sup>PLC</sup>

**Allergy Therapeutics plc**  
("Allergy Therapeutics", the "Group" or "Company")

### Update on funding

**6 November 2023** Allergy Therapeutics plc (AIM: AGY), the integrated commercial biotechnology company specialising in allergy vaccines, today announces a positive update on the Group's working capital position. Following the release of its unaudited preliminary results on 27 September 2023 for the year ended 30 June 2023, the Group has continued to work on initiatives to enhance cost control and manage working capital alongside trading broadly in line with expectations for the current financial year to date. As a consequence, the Group has extended its cash runway and now expects to require additional funding by the end of December 2023.

Since the completion of the subscription and open offer, announced on 13 October 2023, discussions with certain major shareholders have progressed. Whilst there are currently no firm commitments in place to provide further funding, discussions are continuing positively.

The Pivotal Phase III Grass G306 MATA MPL trial remains on track to report interim trial results in November 2023.
