

14 December 2023

Gelion plc
("Gelion" or the "Company" or the "Group")

Posting of Annual Report and Notice of GM

Gelion (AIM: GELN), the Anglo-Australian battery innovator, has today published and posted its Annual Report & Accounts for the year ended 30 June 2023 to shareholders.

The General Meeting, at which the receipt of the report and accounts and the reappointment of the Company's auditors, BDO LLP, will be put to shareholders, will be held at 9am (GMT) on Tuesday, 16 January 2024 at the offices of Cavendish at One Bartholomew Close, London EC1A 7BL.

Copies of the Annual Report, Notice of General Meeting and other documents can be viewed and downloaded from the Company's website: <https://gelion.com/investors/documents-notices/>.

Shareholders who wish to attend the General Meeting remotely should register for the event in advance by contacting gelion@almastrategic.com.

CONTACTS

Gelion plc
John Wood, CEO
Amit Gupta, CFO
Thomas Maschmeyer, Founder and Principal Technology Advisor

About Gelion

Gelion ("gel: ion") is a global energy storage innovator, supporting the transition to a more sustainable economy by commercialising two globally important next generation technologies: Lithium-Sulfur (LiS) and Zinc-based (Zn) hybrid cells to electrify mobile and stationary applications. Gelion plc (the Group) is listed on the London Stock Exchange's Alternative Investment Market and wholly owns Australia based Gelion Technologies Pty Ltd. Gelion is designing and delivering innovative battery technology to enable that transition and return value for its customers and investors.

Lithium Sulfur

Gelion's effort is directed at the potential for the LiS chemistry to deliver double the gravimetric energy density of standard Lithium-ion chemistries whilst at the same time reducing cost and increasing safety targeting the EV and e-aviation market, helping to make global transport, energy consumption and storage more sustainable.

Gelion is developing a product for its high energy density sulfur cathode at its expanded R&D facilities in Sydney, enabling it to integrate with a variety of anodes ranging from graphite to silicon to lithium metal, depending on the targeted application.

Gelion recently also expanded in the UK by acquiring OXLiD Ltd, significantly increasing Gelion's capability in cathode improvement thereby accelerating path to commercial partners and commercialisation.

Zinc

Gelion is adapting its zinc technology to comprise an alternate cathode technology, a zinc hybrid cell to develop complementary next-generation batteries for the lead-acid eco-system. Early testing indicates that this solution has the potential to maintain good energy density levels with enhanced cost and safety aspects. Once fully developed, Gelion intends for our zinc technology to provide a durable and sustainable market extension within the ecosystem that supports lead-acid batteries.
