Smarttech247 Announces Integration of NoPhish Tool with Google Mail

Integration will see Enhanced Email Security Across Platforms

Smarttech247 (AIM: S247), a multi-award-winning provider of AI-enhanced cybersecurity services providing automated managed detection and response for a portfolio of international clients, is pleased to announce the expansion of its NoPhish tool to users of Google Mail.

NoPhish, Smarttech247's email security tool, previously only available on Microsoft Outlook, is designed to empower users in the fight against phishing and other email-based threats. By integrating with Google Mail this expansion provides comprehensive email security solutions for a wider audience.

NoPhish, which won Email Security Solution of the Year at the 2023 Computing Awards in London and is available for immediate use with Google Mail, enables users to report suspected emails with ease, playing a crucial role in enhancing individual and organisational cybersecurity.

Upon reporting, NoPhish employs advanced analysis algorithms to evaluate the content and legitimacy of the reported emails, offering instant feedback to the user. In cases where an email is identified as suspicious or malicious, NoPhish takes proactive measures by automatically removing the email from the user's inbox, thereby mitigating the risk of accidental exposure to harmful content.

Raluca Saceanu, CEO of Smarttech247, commented:

"We are delighted to bring NoPhish to Google Mail users. Our mission has always been to provide cutting-edge, user-friendly cybersecurity tools and by making NoPhish available on one of the world's most widely used email platforms, we are taking a significant step towards making the digital world safer for everyone.

"The integration signifies major advancement in email security, as Google Mail's extensive user base can now benefit from Smarttech247's phishing detection and response technology. This expansion is part of our ongoing efforts to adapt and evolve in the face of ever-changing cyber threats, ensuring users across various platforms can enjoy a safer email experience."

About Reach announcements

Reach is an investor communication service aimed at assisting listed and unlisted (including AIM quoted) companies to distribute media only/non-regulatory news releases such as marketing messages, corporate and product information into the public domain. An RNS Regulatory announcement is required to be notified under the AIM Rules for Companies.

About Smarttech247

Smarttech247 is a multi-award winning automated MDR (Managed Detection & Response) company. Its platform is trusted by international organisations and provides threat intelligence with managed detection and response to provide actionable insights, 24/7 threat detection, investigation and response.

The Group's services are geared towards proactive prevention and it achieves this by utilising the latest in cloud, big data analytics and machine learning, along with an experienced incident response team. In recognition of its innovative technology, Smarttech247 was named by Chambers Ireland InBusiness Recognition Awards as Cyber Security Company of the Year 2023.

Smarttech247's offices are located in Ireland, United Kingdom, Romania, Poland and the USA. The Company was admitted to trading on AIM on 15 December 2022.
