12 March 2024

Scancell Holdings plc

("Scancell" or the "Company")

Scancell Announces its Attendance at Upcoming Conferences

Scancell Holdings plc (AIM: SCLP), the developer of novel immunotherapies for the treatment of cancer and infectious disease, is pleased to confirm that it will be presenting at, and will also attend, several upcoming conferences and events. Presentations at these high-profile conferences follow the significant recent progress that Scancell has made in both pre-clinical and clinical development.

These include:

- 14th World ADC taking place in London, UK from 12-15 March.
  Mandeep Sehmi, Head of Business Development, will be presenting at the conference.
  Title: Glymab ADC for targeting cancers with high unmet need
  Date and Time: Wednesday 13th March 5pm GMT

- Oxford Global - Biologics 2024 taking place in London, UK from 13-15 March
  Poonam Vagehla and Foram Dave, Scientists at Scancell, will be presenting at the conference.
  Session Title: Nextgen Multispecifics, Cell Engagers & Other New Modalities
  Title: Glycan Targeting Antibodies for T Cell Redirection
  Date and Time: Friday 15th March at 3:10 pm GMT

- BIO-Europe Spring in Barcelona, Spain from 18-20 March
  Mandeep Sehmi, Head of Business Development and Mireille Vankemmelbeke, PI at Scancell will be attending the conference.

- 21st CIMT Annual Meeting taking place in Mainz, Germany from 15-17 May
  Samantha Paston, Head of Translational Research, will be attending the conference.

If you would like to arrange a meeting with management, please contact commercial.enquiries@scancell.co.uk.

About Scancell

Scancell is a clinical stage biopharmaceutical company that is leveraging its proprietary research, built up over many years of studying the human adaptive immune system, to generate novel medicines to treat significant unmet needs in cancer and infectious disease. The Company is building a pipeline of innovative products by utilising its four technology platforms: Moditope® and ImmunoBody® for vaccines and GlyMab® and AvidiMab® for antibodies.

Adaptive immune responses include antibodies and T cells (CD4 and CD8), both of which can recognise damaged or infected cells. In order to destroy such cancerous or infected cells, Scancell uses either vaccines to induce immune responses or monoclonal antibodies (mAbs) to redirect immune cells or drugs. The Company's unique approach is that its innovative products target modifications of proteins and lipids. For the vaccines (Moditope® and ImmunoBody®) this includes citrullination and homocitrullination of proteins, whereas its mAb portfolio targets glycans or sugars that are added onto proteins and / or lipids (GlyMab®) or enhances the potency of antibodies and their ability to directly kill tumour cells (AvidiMab®).
