## **Ceres Power Holdings plc**

### **Notice of Hydrogen Technology Update**

*Horsham, UK:* Ceres Power Holdings plc ("Ceres", the "Company"), a global leader in clean energy technology, will be hosting a live webcast on 17 June 2024 at 15.00 BST to discuss its green hydrogen technology programme.

Across the global market, green hydrogen has an important role to play in the energy transition to reach net zero. Jon Harman, Ceres' Technology Delivery Director, will be joined by Gareth Richardson, Low Carbon Technology Lead at AtkinsRéalis, in a conversation with Chris Leonard, Energy Transition Research Analyst at UBS, to share their views on where green hydrogen will play a role, which industries will benefit and how Ceres' technology can integrate into these solutions.

### **About Ceres**

Ceres is a leading developer of clean energy technology, electrolysis for the creation of green hydrogen and fuel cells for power generation. Its asset-light, licensing model has seen it establish partnerships with some of the world's largest companies, such as Bosch, Doosan, Delta and Weichai. Ceres' solid oxide platform technology supports greater electrification of our energy systems and produces green hydrogen at high-efficiencies as a route to decarbonise emissions-intensive industries such as steelmaking, ammonia and future fuels. Ceres is listed on the London Stock Exchange ("LSE") (LSE: CWR) and is classified by the LSE Green Economy Mark, which recognises listed companies that derive more than 50% of their activity from the green economy.
