**About ATOME**

ATOME PLC is an AIM listed company targeting green fertiliser production with 445-megawatt of projects in Paraguay, 120-megawatt project in Costa Rica and a further pipeline of potential projects in Central America.

Since its admission to AIM in December 2021 ATOME signed a 145MW power purchase agreement with ANDE, the state energy company in Paraguay for acquired 30 hectares of land in Villeta, Paraguay for that facility, mandated Natixis Corporate & Investment Banking and the multilateral IDB Invest to lead the project funding and with Front End Engineering and Design studies currently underway with the international companies Urbas and Casale. ANDE has also allocated a further 300MW for ATOME's second project subject to studies.

In Costa Rica, The National Ammonia Corporation S.A. was formed in 2022 with local partner Cavendish S.A. based in Costa Rica to develop green fertiliser projects for the region. As well as straddling the Pacific and Atlantic Oceans, Costa Rica is a democratic Central American country. In agriculture, Costa Rica is the second largest supplier of pineapples in the world and is in the top ten banana growers.

ATOME is in the process of operational planning, sourcing and negotiations with green electricity suppliers, equipment providers and offtake partners, including signed memoranda of understanding and cooperation agreements in place with key parties, to produce green fertiliser at an industrial scale using electricity generated from hydroelectric power in Paraguay and Costa Rica. All chosen sites are located close to the power and water sources and export facilities to serve significant domestic and then international demand.

The Company has a green-focused Board which is supported by major shareholders including Peter Levine, Schroders, a leading fund manager, and since May 2023, Baker Hughes, a global technology company operating in the energy and industry sectors.
