About Feedback

Feedback plc helps clinical teams to make better decisions faster for patients. We design products that enhance clinician access to patient data and to their colleagues. Our unique approach centres around individual patient episodes, into which we pull relevant clinical data from hospital systems and around which we build remote clinical teams for collaboration. As a result, we produce a digital infrastructure that makes patient data available to clinicians in multiple settings, in a format that enables them to meaningfully interact with it, providing flexibility to clinicians and free movement of patients between provider settings - clinicians can practice from anywhere and patients can attend any care provider for treatment, with greater connectivity across organisations.

Our products Bleepa® and CareLocker® work together to deliver unparalleled value to our customers. Bleepa® is our application layer and sits on top of CareLocker® as our data layer. Bleepa® is a clinician facing platform that displays clinical results from a patient's CareLocker® at a certified and regulated quality, that is suitable for clinical use and enables dialogue on a patient-by-patient basis with colleagues through a secure, auditable chat interface that links back to the patient medical record. The CareLocker® data storage model is built around the patient. Our vision is one where relevant clinical data is always available to the patient as well as to any care setting that they may attend - a federated data architecture with the patient as the tenant.

The Company has a number of growth opportunities domestically and internationally across a range of markets including the NHS, the veterinary market and private healthcare providers and its highly scalable Software as a Service ("SaaS")-based model is expected to provide increasing levels of revenue visibility as the Company grows its customer base.
