About East Star Resources Plc

East Star Resources is focused on copper exploration and resource development. With eight licences covering >1,000 km² in three mineral rich districts of Kazakhstan, East Star is undertaking an intensive exploration programme, applying modern geophysics to discover minerals in levels that were not previously explored.

East Star's most advanced project is a copper deposit on the world-class Rudny Altai VMS Belt where the Company has a maiden JORC Inferred Mineral Resource Estimate of 20.3Mt @ 1.16% copper, 1.54% zinc and 0.27% lead using a whole deposit cutoff grade of 0.86% copper equivalent, within trucking distance of third-party mills with excess capacity.

East Star's management are based permanently on the ground, supported by local expertise, a joint venture with the state mining company on certain projects, and grant funding from BHP through the BHP Xplor programme for copper porphyry exploration.
