ATOME PLC
("ATOME", "the Company", or "the Group")

Investor Meet Company

ATOME (AIM: ATOM), the leading developer of international green fertiliser projects, is pleased to announce that Olivier Mussat, CEO of ATOME will provide a live presentation via Investor Meet Company today, 25th July 2024, at 11:00am BST.

This follows the Company's announcement on 24th July 2024 of its Heads of Terms Agreement with Yara, the world's leading crop nutrition, production and distribution company of fertiliser and ammonia products, for the offtake of the entire planned green fertiliser production of 264,000 tonnes per year from its 145MW Villeta Project.

The presentation is open to all existing and potential shareholders. Questions can be submitted pre-event via your Investor Meet Company dashboard up until 9am today or at any time during the live presentation.

Investors can sign up to Investor Meet Company for free and add to meet ATOME PLC via:

<https://www.investormeetcompany.com/atome-plc/register-investor>

Investors who already follow ATOME PLC on the Investor Meet Company platform will automatically be invited.

A copy of the the updated presentation along with a recording of the live presentation via Investor Meet Company will be made available on the Company's website: <https://www.atomeplc.com/>

About ATOME

ATOME PLC is an AIM listed company targeting green fertiliser production with 445-megawatts of projects in Paraguay and a further pipeline of potential projects in Central America.

The first project is at Villeta in Paraguay. It benefits from a 145MW renewable power purchase agreement and 30 hectares of land in a tax free zone. Front End Engineering Design studies have been completed and Heads of Terms signed with Yara, the leading international fertiliser company for offtake of all of Villeta's production. The Company is now negotiating the project finance with a view to closing that and declaring FID before end 2024. There is a further 300MW of renewable power reserved for ATOME in Paraguay.

In Costa Rica, The National Ammonia Corporation S.A. was formed in 2022 with local partner Cavendish S.A. based in Costa Rica to develop green fertiliser projects for the region. As well as straddling the Pacific and Atlantic Oceans, Costa Rica is a democratic Central American country. In agriculture, Costa Rica is the second largest supplier of pineapples in the world and is in the top ten banana growers.

All power for ATOME is from 100% renewable sources and all chosen sites are located close to the power and water sources and export facilities to serve significant domestic and then international demand.

The Company has a green-focused Board which is supported by major shareholders including Peter Levine, Schroders, a leading fund manager, and Baker Hughes, a global technology company operating in the energy and industry sectors.
