Trevor Carvey, Chief Executive Officer, commented: "In another active period for industry loss events we are pleased to have produced an RoE of 9.9% for the half year. Our 36.1% premium growth reflects our well-established distribution channels and our maintenance of underwriting discipline. Property and specialty, in particular the non-catastrophe exposed lines, again attracted our attention and capital deployment. - Specialty lines some potential for re-rating post Baltimore bridge collapse <u>1</u> and other large market loss events
- Casualty lines certain classes are showing pricing pressure rates generally are adequate
- Inflationary factors underpin both pricing and demand for coverage.
- Conduit Re's established distribution channels continue to deliver a healthy pipeline of new and repeat business
- Natural catastrophe accumulations remain in balance relative to the overall portfolio and our net exposures to such events remain within our tolerances
- Long-term success lies in building a resilient and diversified book of business and the noncatastrophe lines continue to present areas of interest for increased capital deployment.
- Conduit continues to see an attractive underwriting environment into which it remains well
  capitalised to continue to grow its premium base and deliver attractive shareholder returns

**Neil Eckert, Executive Chairman, commented**: "Our results represent the team's continued ability to grow our underwriting business successfully. Progression across earnings, premium and assets under management has been substantial and supports the delivery of increasing shareholder value."

Our undiscounted ultimate loss estimates, net of ceded reinsurance and reinstatement premiums, for previously reported loss events remained stable.

Our loss and reserve estimates have been derived from a combination of reports and statements from brokers and cedants, modelled loss projections, pricing loss ratio expectations and reporting patterns, all supplemented with market data and assumptions. We will continue to review these estimates as more information becomes available.

The Conduit renewal indicative rate change measure is an internal methodology that management intends to use to track risk-adjusted trends in premium rates of a portfolio of reinsurance contracts. The change measure reflects management's assessment of relative changes in price, exposure and terms and conditions. It is also net of the estimated impact of claims inflation. The calculation involves a degree of judgement in relation to comparability of contracts and the assessment noted above, particularly in Conduit's initial years of underwriting. To enhance the methodology, management may revise the methodology and assumptions underlying the change measure, so the trends in premium rates reflected in the change measure may not be comparable over time. Consideration is only given to renewals of a comparable nature so it does not reflect every contract in the portfolio of Conduit contracts. The future profitability of the portfolio of contracts within the change measure is dependent upon many factors besides the trends in premium rates.
