8 August 2024

**Concurrent Technologies Plc**  
(the "Company" or the "Group")

**Concurrent Technologies secures contract expansion with major US Defence and Aerospace contractor**

Concurrent Technologies Plc (AIM: CNC), a designer and manufacturer of leading-edge computer products, systems, and mission-critical solutions used in high-performance markets by some of the world's major OEMs, announces an expansion to its single largest ever contract.

Further to the announcement on 20 June 2024, Concurrent Technologies has secured an additional uplift of \$1.52M to its \$4.46M contract with a major US Defence and Aerospace prime contractor, to supply computer plug-in-cards. The total contract value is now \$5.98M. The increased order reflects the customer's trust in the reliability of the Group's products and strength of the relationship.

The Company's latest product, TR MDx/6sd-RCR, announced on 29 July 2024, has been fundamental in securing this order uplift.

**Miles Adcock, CEO of Concurrent Technologies, commented** *"Securing this contract uplift in a short space of time since the initial contract is a testament to the quality and performance of our products. It highlights our ability to meet and exceed customer expectations, reinforcing the strength of our product portfolio and our position as a trusted supplier in high-performance markets. The confidence shown by our customer, a major prime in the US Defence and Aerospace sector, underscores the value and reliability we bring to their critical programmes."*
