About Oxford Nanopore Technologies plc:

Oxford Nanopore Technologies' goal is to bring the widest benefits to society through enabling the analysis of anything, by anyone, anywhere. The company has developed a new generation of nanopore-based sensing technology that is currently used for real-time, high-performance, accessible, and scalable analysis of DNA and RNA. The technology is used in more than 120 countries, to understand the biology of humans, plants, animals, bacteria, viruses and environments as well as to understand diseases such as cancer. Oxford Nanopore's technology also has the potential to provide broad, high impact, rapid insights in a number of areas including healthcare, food and agriculture.

Oxford Nanopore devices sequence DNA and RNA directly and sequence short to ultra-long fragments of DNA, for a truly comprehensive picture of the genome. Data is streamed in real-time and can enable rapid insights. The technology is fully scalable - from pocket-sized to ultra-high throughput devices.
