**Galileo Resources Plc
("Galileo" or the "Company")**

Drilling underway on Shinganda Licence, Central western Zambia

The Company is pleased to confirm that Phase 3 RC drilling on the Shinganda Licence has commenced. Exploration including drilling to date has established the potential for a large IOCG-type target and the current programme is focusing on an approximate 10km strike length of Cu - Au mineral-bearing fault/shear targets along the Shinganda Main Fault and Splay structures broadly defined by the Company to date. These structures exposed at surface are proven to host copper - gold mineralisation within shears associated with the Shinganda Splay Fault. The extent of the mineralisation will be tested during this programme.

The Company will provide the market with updates when results are received.

Technical Sign-Off

Technical information in this announcement has been reviewed by Edward (Ed) Slowey, BSc, PGeo, Technical Director of Galileo. Mr Slowey is a geologist with more than 40 years' relevant experience in mineral exploration and mining, a founder member of the Institute of Geologists of Ireland and is a Qualified Person under the AIM rules.
