

22 August 2024

**Georgina Energy plc (the "Company")  
(formerly Mining, Minerals & Metals plc)  
Change of Name Application Approved**

Further to its announcement on 30<sup>th</sup> July 2024, the Company announces that the application to change the name of the Company to Georgina Energy plc has been registered at Companies House with effect from 21 August 2024. The Company's change of name will be effective on the London Stock Exchange plc from 8.00 a.m. on Friday 23 August 2024.

The TIDM code "GEX" remains unchanged. The Company's ISIN (GB00BSMN5L80) and SEDOL (BSMN5L8) remain unchanged.

Shareholder documents of title will be unaffected by the change of name and existing share certificates should be retained and remain valid. Any new share certificates to be issued will bear the new name, Georgina Energy plc.

**Notes to Editors**

Georgina Energy aims to become a leading player in the global energy market and is focused on establishing itself among the top producers of Helium and Hydrogen worldwide. With a strategic approach and leveraging the experienced management team's expertise, Georgina Energy aims to capitalize on opportunities in these critical energy sectors.

The projects benefit from established infrastructure and a reliable supply chain, offering significant resource potential through low-risk, cost-effective drilling projects.

Georgina Energy has two principal onshore interests held through its wholly owned Australian subsidiary, Westmarket Oil & Gas. The first, the Hussar Prospect is located in the Officer Basin in Western Australia and

Westmarket O&G holds a 100% working interest in the exploration permit. Georgina also has a right to earn an initial 75% interest (with the potential to extend to 90%) in a second prospect, EPA155 Mt Winter Prospect, is located in the Amadeus Basin in the Northern Territory, subject to the granting of the permit application.

In line with market demand trends, Georgina Energy is well-positioned to capitalize on the growing gap between supply and demand for Helium and Hydrogen with the independently verified prospective recoverable resource potential of the Hussar and Mt Winter projects.
