Notes to Editor

Headquartered in Cambridge, UK, Raspberry Pi's mission is to put high-performance, low-cost, general-purpose computing platforms in the hands of enthusiasts and engineers all over the world.

Raspberry Pi is a full-stack engineering organisation, with research and development capabilities spanning the entire value chain, from semiconductor IP development, through semiconductor and electronic product design to software engineering and regulatory compliance. The high performance, low cost, and physical robustness of Raspberry Pi products make them suitable for a wide range of applications, across three distinct markets: Industrial and Embedded, Enthusiast and Education, and Semiconductors.

The Company has distributed approximately \$50m since inception to support the work of the Raspberry Pi Foundation, a UK charity founded in 2008 and a major shareholder in Raspberry Pi, to enable young people to realise their potential through computing. Raspberry Pi has been recognised with the London Stock Exchange's Green Economy Mark for its work in reducing the carbon intensity of embedded computing.
