AUGUST 2024 TRAFFIC AND CO2 EMISSION STATISTICS WIZZ AIR CARRIED A RECORD 6.2 MILLION PASSENGERS

Ticker: **WIZZ**

Geneva, 3 September 2024: Wizz Air Holdings Plc ("Wizz Air"), one of the most sustainable European airlines, announces passenger and CO₂ emission statistics for August 2024.

Wizz Air carried a record 6.2 million passengers during the month of August at an improved load factor of 95.4% (vs 94.1% last year), despite operated seat capacity being down 0.4% YoY due to the Pratt & Whitney GTF engine-related groundings.

During the month:

- Wizz Air launched a revolutionary new product, the *All you can fly* annual membership scheme, which sold out within 48 hours from launch.
- While remaining one of the leading airlines in terms of lower emissions per passenger kilometer, in August CO₂/ RPK emission slightly increased by 0.7% YoY, to 50.9 grams, due to the suboptimal fleet mix (older aircraft and lower gauge) resulting from the GTF engine-related grounding of Wizz Air's efficient A321neo fleet.
