**Notes to Editors:**

Predator is an oil & gas company with a diversified portfolio of scaled assets including unique and highly prospective onshore Moroccan gas exposure, with multiple fully financed upcoming catalysts.

Predator has two high quality, scalable gas projects in Morocco with fast pace of commercialisation and blue sky potential. Guercif is a shallow CNG biogenic gas development with multiple traps and at least 4 separate reservoirs with recently drilled wells due to be flow tested. The Giant Jurassic Titanosaurus is a shallow thermogenic gas prospect evaluating 249m of potential gross reservoir thickness in a trap of 187 km<sup>2</sup> for pipeline gas to power, with pipeline 2.5km from wellhead. Moroccan gas prices are high, and the fiscal terms are some of the best in the world. Predator also has a diversified portfolio of assets across Ireland and Trinidad, which is a near-term revenue-generating project.

Predator has an experienced management team and consultants with particular knowledge in Moroccan sub surface and operations. The team specialises in incorporating modern, proven technologies and processes from Canada and the US to provinces where the conventional technologies did not allow their hydrocarbon potential to be revealed.
