**About East Star Resources Plc**

East Star Resources is focused on the discovery and development of copper and other strategic minerals required for the energy revolution. With eight licences covering >1,000 km<sup>2</sup> in three mineral rich districts of Kazakhstan, East Star is undertaking an intensive exploration programme, applying modern geophysics to discover minerals in levels that were not previously explored. East Star's most advanced project is a copper deposit on the world-class Rudny Altai VMS Belt where the Company delivered a JORC compliant inferred resource of 20.3Mt @ 1.16% copper, 1.54% zinc and 0.27% lead close to infrastructure, within trucking distance of third-party mills with excess capacity. East Star's management are based permanently on the ground, supported by local expertise, and a joint venture with the state mining company on certain projects. In 2024, East Star was selected to receive grant funding through the BHP Xplor programme for copper porphyry exploration.
