Empire Metals Limited
("Empire" or "the Company")

Attendance at TZMI Congress & Presentation

Empire Metals Limited (LON: EEE), the AIM-quoted resource exploration and development company, is pleased to advise that the Company will be attending the TZMI Congress in Kuala Lumpur from 13-15 November 2024. The TZMI Congress is one of the titanium industry's most important annual events, and showcases TiO₂ pigment industry news, end-use markets focus and market analysis. With approximately 300 delegates expected to attend, the event also provides networking opportunities with representatives from more than 150 companies operating within the titanium and zircon value chains.

The Company has prepared a presentation handout for the use during the TZMI Congress, which highlights recent operational progress and its development plans as Empire targets the delivery of a fully integrated, mining and processing operation to produce high value TiO₂ pigments and/or titanium metal from the Pitfield Project. The presentation can be found on the Company's website at <https://www.empiremetals.com/investors/shareholder-documents/presentations/>.

About Empire Metals Limited

Empire Metals is an AIM-listed exploration and resource development company (LON: EEE) with a primary focus on developing Pitfield, an emerging giant titanium project in Western Australia.

Exploration activity at Pitfield has confirmed the discovery of a new giant mineralised system extending over 40km by 8km by 5km deep. Drilling campaigns have confirmed high-grade TiO₂ mineralised zones across thick bedded intervals to a vertical depth of ~350m, confirming Pitfield as a world class, district-scale titanium mineral system.

Empire is now accelerating the economic development of Pitfield, with the objective of becoming a leading producer of high value titanium dioxide products.

The Company also has two further exploration projects in Australia; the Eclipse Project and the Walton Project in Western Australia, in addition to three precious metals projects located in a historically high-grade gold producing region of Austria.
