**US 9 million new MDA system contract award**

SRT, a global provider of maritime domain awareness systems and technologies for security, safety and environmental protection is pleased to advise that it has received a notice of award for a contract worth US 9m from a Middle East sovereign Coast Guard. The contract is expected to be signed and commence during December.

The contract is from an existing long standing SRT customer who is now undertaking an upgrade to their system to integrate more sensor systems and related new functionalities. The upgrade will integrate multiple command centres and ministries enabling them to integrate all maritime data within a single secure platform that is fully owned, controlled and operated by the customer in country and thus share a common national operating picture and digitally co-ordinate operations.

Simon Tucker, CEO of SRT Marine Systems, commented:

"This is a typical example of the long-term partnership SRT builds with customers and how the build-up of customer MDA system capabilities and capacity is a long-term multi-contract program. We look forward to delivering enhanced capability to their existing SRT system and working with them to fully operationalise them."
