("Zenova", the "Company" or the "Group")

Zenova Group PLC Secures First Order for Zenova CS Ceiling Sprinklers

Zenova Group PLC (AIM: ZED) an innovation leader in fire suppression and temperature management solutions, is thrilled to announce its first order for the recently launched Zenova CS ceiling sprinkler units, which has arrived just one month after the product's launch announcement. This debut order includes Zenova FX fire extinguishers and will be deployed at a newly constructed casino property in Albania to help ensure the buyer's need for the highest standards of customer safety. The order is expected to total over €20,000 for the new building.

The cutting-edge Zenova CS, certified to EN3-7 standards, is a ceiling-mounted sprinkler system designed for 360-degree coverage through its custom nozzle system, which extends both horizontally and vertically to maximize protection. Its advanced design makes it seamlessly adaptable for both new building projects and retrofitting existing spaces. Unlike traditional water-based sprinklers, the Zenova CS uses Zenova's proprietary fluid, capable of addressing a much wider range of fire sources-including cooking oil and lithium batteries-where conventional systems fall short. This makes it particularly well suited for traditional heavy-risk spaces like kitchens and restaurants, but increasingly as well, to meet the more general safety needs across residential developments to office spaces, where mobile device-related fire risks are rising.

Thomas Melchior, CEO of Zenova Group PLC commented: *"We are delighted to see the Zenova CS receiving its first order so soon after launch. This demonstrates Zenova's ability to rapidly deliver high-quality, innovative solutions to meet the evolving needs of our customers, both current and new."*

About Zenova Group PLC

Zenova Group PLC specializes in the development and supply of advanced fire safety and temperature management technologies for industrial, commercial, and residential sectors. Its product portfolio includes the Zenova FP fire protection paint, Zenova IP thermal insulation paint, and the Zenova FX series of fire extinguishers, all engineered to meet the highest safety and efficiency standards in the industry. The product range is applicable to industrial, commercial, and residential markets.

Zenova FP, fire protection paint

A water based, fire protection paint (also known as a 'thermofoaming' or 'intumescent' paint), which can be used on any surface and colour matched to any colour. When exposed to heat or flames, the paint expands and creates a solid

foam-like crust which will not burn and insulates the surface it is painted on. This prevents surfaces from catching fire and stops fire spreading. It has been tested by global fire industry experts and complies with UK building regulations and the latest UK and European fire safety standards.

Zenova IP, thermal insulation paint

A thermal insulation paint embeds the most modern insulating technology in a thermos-like ultra-thin layer. It saves energy by increasing the thermal insulation level in commercial and residential buildings. Solar heat can increase the temperature within a building by 75% to 90%. Zenova IP has been independently tested and validated to deflect, absorb and dissipate up to 75% of this heat, thereby reducing the inside temperature by up to 45%. Suitable for both exterior and interior, on any type of surface

Zenova IR, thermal insulation render

Zenova IR is a ready mixed insulation render that can be applied to internal and external walls in commercial and residential buildings to provide immediate insulation benefits and can be colour matched to any colour.

Zenova FX, fire extinguishers

A fire extinguisher like no other. It puts out class A, B, F and electrical fires fully tested against European EN3 as well as British standards. Available in 6 and 9 litre sizes.

Zenova FX500, aerosol fire extinguisher

The Zenova FX500 is a high-performance handheld fire extinguisher that is tested by independent experts and adheres to the highest industry standards. Safe for use on any type of fire the Zenova FX500 reduces the risk of reignition. The Zenova FX 500 is quick, easy and safe to operate and has been tested to BS6165 standard.

Zenova CS, automatic ceiling sprinklers

The Zenova CS provides ceiling-mounted fire protection for new builds and can be easily retrofitted into any existing environment to address all types of fire risks

Zenova WB, wildfire barrier

A wildfire barrier fluid (applied via spray wands or aerial drops), which provides a virtual barrier where fire simply will not burn. Repeated tests on a variety of extremely dry wildfire fuels (grasses, hays, brush) demonstrates the incredible fire resistance Zenova WB provides, while remaining viable after application for 30+ days in dry conditions.
