

INDUCTION HEALTHCARE GROUP PLC

New Contract in Republic of Ireland

London, UK - 2 December 2024: Induction Healthcare Group PLC ("Induction", the "Company", or the "Group"; AIM: INHC) is pleased to announce that its video platform, Attend Anywhere, has been selected as the national clinical video solution for the Republic of Ireland.

This contract with the Republic of Ireland's Health Service Executive (HSE), through the Company's partnership with Involve Visual Collaboration Limited, will see Attend Anywhere rolled out nationally across the health system from 1 January 2025, with an initial focus on the acute sector. The contract is for 2 years, with an option to extend to a 3rd year, and procures a minimum of 1,500 licences generating at least £0.3m in ARR. HSE have an ambition to scale usage to more than 3,000 clinical users in the near term.

Attend Anywhere was selected over generic solutions like Teams and Zoom because of its robust waiting room functionality, better security features, and for its ease of use for administrators.

Induction CEO, Paul Tambeau, said: *"Attend Anywhere is built specifically for health care, and this new contract is another demonstration that the market is seeing the real value in our video solution. As a national rollout, we are very pleased to support the Republic of Ireland's health system enable patients to connect with their clinical teams virtually. The program will improve accessibility and patient choice, reduce the need to travel to appointments, and help address waiting lists. Our teams will be working closely with HSE to drive adoption across the Republic of Ireland."*

About Induction - www.inductionhealthcare.com

Induction (AIM: INHC) Induction delivers a suite of software solutions that transforms care delivery and the patient journey through hospital. Our system-wide applications help healthcare providers and administrators to deliver care at any stage remotely as well as face-to-face - giving the communities they serve greater flexibility, control and ease of access. Purpose-built for integration with leading Electronic Medical Record (EMR) platforms, our products offer immediate stand-alone value that becomes even greater when integrated with pre-existing systems.

Used at scale by national and regional healthcare systems, as well non-health government services, our applications are relied upon by hundreds of thousands of clinicians and millions of patients across almost every hospital in the British Isles.
