Kevin Murphy, Ferguson CEO, commented,  $\hat{a}$ CeOur associates remained focused on execution, delivering revenue growth in the quarter, despite continued market headwinds and commodity price deflation. The year has started largely as expected and our balanced business mix and ability to deploy scale locally give us confidence in our continued market outperformance. Our strong balance sheet and cash generative model allow us to continue to invest for organic growth, consolidate our fragmented markets through acquisitions and return capital to shareholders. $\hat{a}$ 

 $\hat{a} \in \infty$  Our fiscal 2025 financial guidance remains unchanged, reflecting modest full year revenue growth with continued outperformance. While we anticipate an ongoing challenging near term market environment, we will continue to invest in scale and capabilities to take advantage of multi-year structural tailwinds such as underbuilt and aging U.S. housing, non-residential large capital projects and our opportunity with the plumbing and HVAC specialized professional.  $\hat{a} \in$

## Summary of financial results

## First quarter

Net sales of 7.8 billion were 0.8% ahead of last year driven by an organic revenue decline of 0.3%, offset by acquisition growth of 1.1%. On a volumetric basis, total volume increased by approximately 3% with organic volume up approximately 2%. Continued weakness in certain commodity related categories drove modest overall price deflation of around 2%.

Gross margin of 30.1% was 10 basis points lower than last year. Operating expense growth was driven by volumetric growth, cost inflation and

continued investment in core capabilities for future growth.

Reported operating profit was 665 million (8.6% operating margin), 10.0% lower than last year. Adjusted operating profit of 706 million (9.1% adjusted operating margin) was 8.7% below last year.

Reported diluted earnings per share was 2.34 (Q1 2024: 2.54), a decrease of 7.9% compared to last year, and adjusted diluted earnings per share of 2.45 decreased 7.5% due to the lower adjusted operating profit, partially offset by the impact of share repurchases.

#### USA - first quarter

Net sales in the US business increased by 0.5%, with an organic revenue decline of 0.4% offset by a 0.9% contribution from acquisitions.

Residential end markets, which comprise just over half of US revenue, remained down year-over-year with market activity similar to the fourth quarter. Overall, our residential revenue was flat in the first quarter.

Non-residential end markets, representing just under half of US revenue, were slightly more resilient but also remain down year-over-year. We continue to take share with non-residential revenue growth of approximately 1% in the first quarter. Sales in civil/infrastructure and industrial end markets were stronger with commercial broadly flat. We continued to see good levels of shipment and bidding activity on large capital projects.

Adjusted operating profit of 697 million was 9.0% or 69 million below last year.

We completed one acquisition during the quarter, Fresno Pipe and Supply, a leading distributor of industrial pipes, valves and fitting products in California. Additionally, subsequent to quarter end we acquired Templeton and its affiliate, TEMSCO, which serve the water and wastewater industries in the southeast.

#### Canada - first quarter

Net sales grew by 6.3%, with an organic revenue growth of 1.3% and a 5.6% contribution from acquisitions, partially offset by a 0.6% adverse impact from foreign exchange rates. Markets have been similar to that of the United States with non-residential activity remaining more resilient than residential. Adjusted operating profit of 23 million was flat to last year.

#### **Financial position**

Net debt to adjusted EBITDA at October 31, 2024 was 1.2x and during the quarter we completed share repurchases of 256 million with approximately 600 million remaining under our current share repurchase program.

We declared a quarterly dividend of 0.83 representing a 5% growth over prior year. The dividend will be paid on February 6, 2025 to stockholders of record as of December 20, 2024.

During the quarter, we completed a public offering of 750 million of senior unsecured notes due in 2034. We used a portion of the net proceeds from the sale of the notes to prepay certain outstanding term loans, with the remaining proceeds to be used for general corporate purposes.

There have been no other significant changes to the financial position of the Company.

#### Non-GAAP Reconciliations and Supplementary Information

#### (unaudited)

## Non-GAAP items

This announcement contains certain financial information that is not presented in conformity with U.S. GAAP. These non-GAAP financial measures include adjusted operating profit, adjusted operating margin, adjusted net income, adjusted earnings per share - diluted, adjusted EBITDA, adjusted effective tax rate, net debt and net debt to adjusted EBITDA ratio. The Company believes that these non-GAAP financial measures provide users of the Company's financial information with additional meaningful information to assist in understanding financial results and assessing the Companyâ€<sup>TM</sup>s performance from period to period. Management believes these measures are important indicators of operations because they exclude items that may not be indicative of our core operating results and provide a better baseline for analyzing trends in our underlying businesses, and they are consistent with how business performance is planned, reported and assessed internally by management and the Board. Such non-GAAP adjustments include amortization of acquired intangible assets, discrete tax items, and any other items that are nonrecurring. Non-recurring items may include various restructuring charges, gains or losses on the disposals of businesses which by their nature do not reflect primary operations, as well as certain other items deemed non-recurring in nature and/or that are not a result of the Companyâ€<sup>TMs</sup> primary operations. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These non-GAAP financial measures should not be considered in isolation or as a substitute for results reported under U.S. GAAP. These non-GAAP financial measures reflect an additional way of viewing aspects of operations that, when viewed with U.S. GAAP results, provide a more complete understanding of the business. The Company strongly encourages investors and shareholders to review the Company's financial statements and publicly filed reports in their entirety and not to rely on any single financial measure.

The Company does not provide a reconciliation of forward-looking non-GAAP financial measures to the most directly comparable U.S. GAAP financial measures on a forward-looking basis because it is unable to predict with reasonable certainty or without unreasonable effort non-recurring items, such as those described above, that may arise in the future. The variability of these items is unpredictable and may have a significant impact.

## Summary of Organic Revenue

Management evaluates organic revenue as it provides a consistent measure of the change in revenue year-on-year. Organic revenue growth (or decline) is determined as the growth (or decline) in total reported revenue excluding the growth (or decline) attributable to currency exchange rate fluctuations, sales days, acquisitions and disposals, divided by the preceding financial year $\hat{e}^{TM}$ s revenue at the current year $\hat{e}^{TM}$ s exchange rates.

#### Net Debt : Adjusted EBITDA Reconciliation

To assess the appropriateness of its capital structure, the Company $\hat{a} \in TM$ s principal measure of financial leverage is net debt to adjusted EBITDA. The Company aims to operate with investment grade credit metrics and keep this ratio within one to two times.

## Net debt

Net debt comprises bank overdrafts, bank and other loans and derivative financial instruments, excluding lease liabilities, less cash and cash equivalents. Long-term debt is presented net of debt issuance costs.
