

Diaceutics Opens US Headquarters

New US office in New Jersey will facilitate growth of local sales & marketing teams close to Diaceutics' pharma customers

New York, Belfast and London, 14 January 2025 - Diaceutics PLC (AIM: DXRX), a leading technology and solutions provider to the pharma and biotech industry, is pleased to announce that it has opened its new US Headquarters (HQ) in Newport, New Jersey, in close proximity to the majority of its Life Science customers in the Northeastern US.

The US market represents around 90% of Diaceutics' revenue and the new US HQ will facilitate the further expansion of its US focused sales & marketing operations and follows on from the successful recruitment of a number of senior sales personnel in the US during 2024. Diaceutics' US HQ will provide a commercial hub, with associated facilities, for all the Company's US based personnel and will accommodate non-US based personnel whilst they are travelling in the US.

The planned expansion of Diaceutics' US sales and marketing operations will lead to a significant number of new commercially focused personnel joining the team, with the majority based at the US HQ.

As Diaceutics continues to grow its US business, and in particular rolls out its full toolkit of pharma and biotech commercialisation solutions, the geographical location of customer facing teams is essential given the level of partnership and collaboration between the Company and its customers.

Madeline Brown, VP Chief of Staff at Diaceutics, commented "The US market is crucial to our future growth plans and we are excited to continue to grow our business and presence in the US. In 2024, we have had significant success recruiting senior US based sales and management personnel, and opening our US HQ enables us to deepen our partnerships with US based life science customers."
