About Ceres Power

Ceres is a leading developer of clean energy technology: electrolysis for the production of green hydrogen and fuel cells for power generation. Its asset-light, licensing model has seen it establish partnerships with some of the world's largest companies, such as Bosch, Doosan, Delta, Denso, Shell, Thermax and Weichai. Ceres' solid oxide technology supports greater electrification of our energy systems and produces green hydrogen at high-efficiencies as a route to decarbonise emissions-intensive industries such as steelmaking, ammonia and future fuels. Ceres is listed on the London Stock Exchange ("LSE") (LSE: CWR) and is classified by the LSE Green Economy Mark, which recognises listed companies that derive more than 50% of their activity from the green economy.
