

**Kenmare Resources plc**  
(the "Company" or the "Group")

30 January 2025

**Analyst and investor visit to Moma Mine**

Kenmare Resources plc (LSE:KMR, ISE:KMR), one of the leading global producers of titanium minerals and zircon, which operates the Moma Titanium Minerals Mine (the "Mine" or "Moma") in northern Mozambique, is hosting a site visit for analysts and investors at Moma on 30-31 January 2025.

During these two days, the group will visit Moma's mining operations, the Mineral Separation Plant, and Kenmare's dedicated export facilities. The group will also visit the staging pond, where the new module is in construction for the upgrade of Wet Concentrator Plant (WCP) A, and the new Selective Mining Operation, which recently began commissioning.

The tour will also include the plant nursery, which is a part of Kenmare's progressive land rehabilitation programme, and some community initiatives supported by the Kenmare Moma Development Association (KMAD), a not-for-profit organisation established by Kenmare in 2004.

The site visit presentation is available for download from the Company's website at <https://www.kenmareresources.com/investors/reports-presentations-webcasts/>

The latest photographs of the WCP A upgrade, including the two new dredges, are available to view here: <https://www.kenmareresources.com/media/image-library/#projects>

**About Kenmare Resources**

Kenmare Resources plc is one of the world's largest producers of mineral sands products. Listed on the London Stock Exchange and the Euronext Dublin, Kenmare operates the Moma Titanium Minerals Mine in Mozambique. Moma's production accounts for approximately 7% of global titanium feedstocks and the Company supplies to customers operating in more than 15 countries. Kenmare produces raw materials that are ultimately consumed in everyday quality-of-life items such as paints, plastics and ceramic tiles.
