

4 February 2025

Predator Oil & Gas Holdings Plc
("Predator" or the "Company")

Launch of New Website

Predator Oil & Gas Holdings Plc, (LSE: PRD) is pleased to announce today the launch of its new website.

The Company's re-designed website is available immediately and can be found at

www.predatoroilandgas.com

Paul Griffiths, Chief Executive Officer of Predator Oil & Gas Holdings Plc commented:

"We hope the new website will be informative for shareholders as 2025 is set to be a year of significant operational activity and potential near-term acquisitions to consolidate the options for monetisation through a divestment process if attractive commercial terms can be negotiated.

The upcoming MOU-5 drilling operations represent an opportunity for significant newsflow, subject to the customary regulatory approvals.

The new website offers shareholders the opportunity to assess public announcements in the context of the clearly stated business strategy and objectives of the Company."

Notes to Editors:

NOTES TO EDITORS:

Predator is an oil & gas company with a diversified portfolio of scaled assets including unique and highly prospective onshore Moroccan gas exposure, with multiple fully financed upcoming catalysts.

Predator has an interesting gas project in Morocco with fast pace of commercialisation and significant upside. The Guercif project is a shallow CNG biogenic gas development with different traps and separate identified reservoirs. The Jurassic Titanosaurus is a shallow thermogenic gas prospect evaluating 249m of potential gross reservoir thickness in a trap of maximum closure of 187 km² for pipeline gas to power, with pipeline 2.5km from wellhead. Moroccan gas prices are high, and the fiscal terms are some of the best in the world. Predator also has a diversified portfolio of assets across Ireland and Trinidad, which is a near-term revenue-generating project.

Predator has an experienced management team with particular knowledge in Moroccan sub surface and operations. The team specialises in incorporating modern, proven technologies and processes from Canada and the US to provinces where the conventional technologies did not allow their hydrocarbon potential to be revealed.
