Zenova Group PLC

("Zenova", the "Company" or the "Group")

Zenova expands into Spain with new distributor and order across multiple product categories

Zenova Group PLC (AIM: ZED), a leading innovator in fire suppression and temperature management solutions, is pleased to announce another important new distributor and customer in the Spanish market. This new distribution channel and preliminary order covers a wide spread of Zenova's product suit and was secured through its Latin American & Iberian partner, EcoZenova Internacional S.L. ("EcoZenova Intl"), which has been successfully displaying the Company's bespoke products across multiple new markets.

This initial order, worth nearly £25,000, is a strong endorsement of the breadth of Zenova's product specification superiority available to early market adopters and encompasses both Zenova FX6L and Zenova FX9L extinguishers, Zenova IP and Zenova FP paints, as well as Zenova primer products.

Thomas Melchior, CEO of Zenova Group PLC, commented, *"Our first order of consequence in the Spanish market marks the beginning of what the management team at Zenova expects to be a particularly productive period across mainland Europe as tougher product specifications and tightening environmental regulations increasingly prevail. We're particularly grateful to our local partner, EcoZenova Intl, for their successful hard work and commitment to the great potential of our product suite that is helping us enter new markets."*

About Zenova Group PLC

Zenova Group PLC specializes in the development and supply of advanced fire safety and temperature management technologies for industrial, commercial, and residential sectors. Its product portfolio includes the Zenova FP fire protection paint, Zenova IP thermal insulation paint, and the Zenova FX series of fire extinguishers, all engineered to meet the highest safety and efficiency standards in the industry. The product range is applicable to industrial, commercial, and residential markets.

Zenova FP, fire protection paint

A water based, fire protection paint (also known as a 'thermofoaming' or 'intumescent' paint), which can be used on any surface and colour matched to any colour. When exposed to heat or flames, the paint expands and creates a solid foam-like crust which will not burn and insulates the surface it is painted on. This prevents surfaces from catching fire and stops fire spreading. It has been tested by global fire industry experts and complies with UK building

regulations and the latest UK and European fire safety standards.

Zenova IP, thermal insulation paint

A thermal insulation paint embeds the most modern insulating technology in a thermos-like ultra-thin layer. It saves energy by increasing the thermal insulation level in commercial and residential buildings. Solar heat can increase the temperature within a building by 75% to 90%. Zenova IP has been independently tested and validated to deflect, absorb and dissipate up to 75% of this heat, thereby reducing the inside temperature by up to 45%. Suitable for both exterior and interior, on any type of surface

Zenova IR, thermal insulation render

Zenova IR is a ready mixed insulation render that can be applied to internal and external walls in commercial and residential buildings to provide immediate insulation benefits and can be colour matched to any colour.

Zenova FX, fire extinguishers

A fire extinguisher like no other. It puts out class A, B, F and electrical fires fully tested against European EN3 as well as British standards. Available in 6 and 9 litre sizes.

Zenova FX500, aerosol fire extinguisher

The Zenova FX500 is a high-performance handheld fire extinguisher that is tested by independent experts and adheres to the highest industry standards. Safe for use on any type of fire the Zenova FX500 reduces the risk of reignition. The Zenova FX 500 is quick, easy and safe to operated and has been tested to BS6165 standard.

Zenova CS, automatic ceiling sprinklers

The Zenova CS provides ceiling-mounted fire protection for new builds and can be easily retrofitted into any existing environment to address all types of fire risks

Zenova WB, wildfire barrier

A wildfire barrier fluid (applied via spray wands or aerial drops), which provides a virtual barrier where fire simply will not burn. Repeated tests on a variety of extremely dry wildfire fuels (grasses, hays, brush) demonstrates the incredible fire resistance Zenova WB provides, while remaining viable after application for 30+ days in dry conditions.
