**Rome Resources Plc**  
**("Rome" or the "Company")**

**Operational Update and Upcoming Assay Results**

Rome Resources Plc (AIM: RMR), the DRC-focused tin explorer, provides an operational update in light of the ongoing security developments in the eastern Democratic Republic of Congo (the "**DRC**").

Drilling operations at the Company's Bisie North site continues uninterrupted, with transport to and from the site directly supported by BAC Helicopters. The Company has also implemented enhanced security measures to ensure the safety of its personnel and contractors. Following recent events in Goma and the uncertainty around Bukavu, the Company has proactively relocated its logistical base for personnel and equipment transfers to Kisangani, the regional capital, located approximately **200km northwest** of Bisie North.

This proactive move ensures continued operational stability while maintaining a safe distance from the unrest along the Rwandan border.

The Company remains focused on advancing exploration activities and expects to announce further assay results from Bisie North within the next 10 days, specifically results from the northernmost MADD018 drill hole at Mont Agoma where over 100m of visible copper was identified.
