**Oracle Power PLC**  
**("Oracle" or the "Company")**

**2025 Drilling Campaign to Commence at Northern Zone**

Oracle Power PLC (AIM:ORCP), an international project developer, is pleased to announce that drilling is planned to recommence in March 2025 at the Northern Zone Intrusive Hosted Gold Project ("Northern Zone"), located just 25km east of Kalgoorlie, Western Australia.

- Next phase of drilling at Northern Zone aims to target and extend previous identified higher grade gold intercepts via a series of SW-NE orientated extensional lines using a nominal 20m spacing.
- A drilling contractor has been booked and will be mobilising to site in March 2025.
- Northern Zone features a 600m wide porphyry system and previously announced significant results to date include:
  - 8m @ 4.86 g/t Au from 34m (NZAC090)
  - 7m @ 4.07 g/t Au from 48m (NZAC0107)
  - 4m @ 7.47 g/t Au from 49m (NZAC113)
  - 5m @ 12.27 g/t Au from 32m (NZAC062)
  - 16m @ 4.69 g/t Au from 30m (NZAC033)
  - 110m @ 0.6 g/t Au from 208m (RSDD02) - diamond drill hole
  - 154m @ 0.58 g/t Au from 98m (21OPRC004) - RC drill hole
  - 330m @ 0.49 g/t Au from 30m incl 54.79 @ 1.15 g/t Au from 213m (BNRC066) - RC drill hole
- The next drill programme has been planned to follow up on these highly positive results.

**Naheed Memon, CEO of Oracle, commented:**

*"The Northern Zone continues to deliver significant gold intercepts, and I am very pleased that we will be launching our 2025 drilling campaign in the coming weeks. The mining lease submission to convert the project to a mining licence signifies our commitment and belief in this project. The significant high-grade gold assays at Northern Zone from 2024 drilling have continued to expand the gold mineralised footprint of the porphyry over a larger area and confirms the presence of a significant gold system. The Australian dollar gold price has passed 4,500/ounce, which bodes well for this exciting project."*
