### About RC Fornax

RC Fornax is an established, highly accredited engineering consultancy, formed to define and execute engineering design projects under Statements of Work (SoW), enhancing and augmenting customer capabilities while improving project efficiency. A rapid growth, market-disruptive, solutions provider in the defence sector, RC Fornax was founded by two ex-RAF engineers who spotted deficiencies in the existing outsourced contract defence market. By leveraging this experience, RC Fornax aims to become a challenger to the industry and establish itself to be a best-in-class provider of services to the UK defence sector, by offering a wider range of expertise and capabilities, with an initial focus on systems, software and hardware engineering.

By utilising a well-established associate community approach to augment core capabilities, RC Fornax defines and executes engineering design projects under Statements of Work. Services are provided with the aim of supporting the whole product lifecycle with expertise of systems, software, and hardware engineering of high complexity and high integrity platforms.
