Initial order for lithium ion battery fire extinguishers in North America

LifeSafe (AIM: LIFS), a fire safety technology business with innovative fire extinguishing and prevention fluids and fire safety products, is pleased to announce that it has received an initial purchase order for 600 of LifeSafe's new range of 6-litre fire extinguishers containing LifeSafe's unique new extinguishing fluid which is highly effective at putting out lithium ion battery fires. This initial order is worth over £100,000 and has been placed by LifeSafe's US distributor, Fire Suppression Solutions LLC ("FSS").

Our state-of-the-art 6-litre lithium thermal runaway fluid ("TRF+") fire extinguishers, supplied through FSS, were ordered by a global battery manufacturing and electronics company and also a world-leading marine corporation to protect against the threat of lithium ion battery fires, reinforcing essential safety measures in critical environments where every second counts.

LifeSafe's new TRF+ is a powerful fluid that extinguishes, cools and prevents reignition of lithium ion battery fires. This revolutionary solution exemplifies our steadfast commitment to advancing fire safety technology, underscoring our mission to protect lives and property in every environment.

LifeSafe is not just in the business of selling fire extinguishers; along with our partner FSS, we are setting new standards in fire suppression.

Dominic Berger, Chairman of LifeSafe, commented: *"LifeSafe was founded on the basis of developing a non toxic fire extinguishing fluid that had the capability to put out multiple types of fire including new fire threats such as lithium ion battery fires. The patent-pending fluid has time and again proven to be highly effective and is setting new standards. We are incredibly proud that finally the industrial market is becoming aware of our game changing fluids. This initial order from FSS, a market leader in fire suppression in the US, is just the beginning of our journey in our business to business channel. The need for highly effective products, and market demand for environmentally friendly fluids, are all factors that point to a very big opportunity for LifeSafe and its partners."*

Amy Scheu, CEO of FSS, commented: *"We are thrilled to announce a significant milestone in our journey at FSS. The latest breakthrough in fire safety technology, the 6-liter TRF+ fire extinguisher, is now ready to hit the US market. This game-changing solution addresses the global threat posed by lithium ion batteries, showcasing our commitment to innovation and safety."*

Our dedication to education and innovation remains at the core of our mission. We are excited to introduce this product to our ever-growing customer base. The response has been overwhelmingly positive, with pre-orders pouring in since its introduction at a prominent industry trade show.

We are also proud to add Thermal Runaway Fluid to our line of eco-friendly offerings, further solidifying our position as a leader in sustainable fire safety solutions."

Notes to Editors

About LifeSafe

LifeSafe is a fire safety technology business that develops eco-friendly, novel and innovative fire extinguishing and prevention fluids and life-saving fire safety products. LifeSafe has developed a market disrupting range of eco-friendly fire safety protection products; a new patent-pending Thermal Runaway Fluid to combat lithium battery fires by permanently extinguishing and preventing re-ignition, and the StaySafe All-in-1, a handheld eco-friendly and fully recyclable extinguisher which is verified to extinguish ten different types of fire. LifeSafe is successfully creating new markets for the Group in fire safety through its innovative technologies, products, digital marketing and multi-channel sales; and is continuing to develop new fluid derivations for applications in various industrial market sectors.

LifeSafe was admitted to trading on AIM in July 2022 with the ticker LIFS.
