Zegona HoldCo Limited and its subsidiaries ("the Zegona HoldCo Group" or "the Group") presents the Group's unaudited consolidated financial information for the periods noted in the following pages.

Purpose of this information

This information is provided for the sole purpose of satisfying the Company's external debt reporting obligations as required pursuant to the Senior Facilities Agreement dated 15 July 2024.

1. Operational Commentary

The three month period to December 2024 has seen further progress in the transformation of Vodafone Spain. Cost control and customer reinvestment continue to be key focus areas. Whilst still early days, consumer product improvements are delivering results with further increases in fixed broadband and contract mobile lines. Cash flow remains management's top priority, and it is pleasing to see significant improvements in EBITDAaL minus capex versus historical levels.

Vodafone Spain entered into a binding contract with MasOrange on 2 January 2025 to create a new fibre network company in Spain ("FibreCo"). FibreCo will bring together network assets of Vodafone Spain and MasOrange to create a 100% FTTH network covering 12.2 million premises across Spain. The combination of this transaction with the agreements signed with Telefónica España in November 2024 completes the transformation of Vodafone Spain's fixed line strategy, delivering full FTTH services nationally. The transaction is subject to customary regulatory approvals. FibreCo completion is expected in the first half of 2025.
