Group earnings before interest, taxation, depreciation, and amortisation (EBITDA²) of 320.4 million in 2024 was a 27% improvement on the comparative period, primarily due to the higher revenue of 801.0 million from gold sales of 335,708 oz (up 2%) at an average realised price of 2,383/oz (up 24%). The higher ounces sold reflects increased gold poured (up 3%) driven by improved sulphide processing performance at Syama and higher production from Mako. In 2024, Syama poured 215,934 oz with production from the sulphide operation 8% higher. This was partially offset by 12% lower production from the oxide operation due to processing of stockpiles throughout the year and the impact of rains on pit access and therefore ore availability. In 2024, gold poured at Mako was 3% higher (123,935 oz) than the prior year despite lower-than-expected grades and disruption to mining operations during the rainy season.

Net interest and finance expenses decreased in 2024 to 3.9 million (2023: 11.2 million) due to reduced debt levels relative to 2023. During 2024 Resolute made the final 25 million principal repayment on the Term Loan portion of the Syndicated Facility Agreement.

Depreciation and amortisation increased to 127.7 million (2023: 81.0 million) in 2024 due to an increase in depreciable assets as well as in amortisation of rehabilitation assets.

Fair value movements and treasury transactions were 20.0 million in 2024 mainly due to unrealised foreign exchange losses.

Other costs of 167.6 million includes 154.8 million of indirect tax incurred in both Mali and Senegal. This includes the Malian State Settlement Protocol. In November 2024, Resolute signed a memorandum of understanding with the Government of Mali, expressed as the protocol ("Protocol"). Pursuant to the Protocol, Resolute made settlement payments totalling 159.9 million to the Government with the final payment made on 31 December 2024.

Part of the payments (approximately 70.0 million) made were used to offset indirect tax provisions from prior years with the remainder being expensed in the current period.

Discussions with the Government of Mali are ongoing to clarify points of the Protocol which may affect the indirect tax and tax expense charges for 2024.

Financial Position

Operating cash flows in 2024 were very robust at 113.1 million inclusive of the 159.9 million of settlement payments to the Malian Government. Cash flow was significantly higher than in 2023 and was primarily driven by stabilised operations, a focus on reducing costs, and higher realised gold prices throughout the year.

Cash balance at 31 December 2024 was 69.3 million. Net cash^{1,2} increased by 52.3 million to 66.3 million at 31 December 2024 (31 December 2023: 14.0 million). Total borrowings at 31 December 2024 was 34.8 million which are from overdraft facilities in Mali and Senegal. Resolute has available liquidity² of over 100 million from a combination of existing cash and bullion as well as existing overdraft facilities.

In 2024, Resolute continued to invest in the business with spending on exploration, development, property, plant, and equipment totalling 102.9 million (2023: 71.8 million) including outlays for the Syama Sulphide Conversion Project, tailings facilities across both sites, the final principal repayment on the debt facility, capitalised stripping costs and project capital.

Total gold poured at Syama of 215,934 oz in 2024 was 2% higher than the prior year as both sulphide and oxide plants maintained high utilisation and milled near nameplate capacity of 3.93Mt versus 3.84Mt in 2023. As expected, the combined ore tonnes mined decreased to 3.21Mt (vs 4.24Mt in 2023) due to approximately 1Mt less oxide ore being mined in 2024. The sub-level cave underground operation maintained its productivity achieving approximately 2.4Mt of ore mining as it continues to benefit from productivity improvements from truck fill and loader operations that were implemented in 2023.

Syama's All-In Sustaining Cost (AISC)² for 2024 was 1,497/oz. This was 1.7% higher than in 2023 and is partly attributed to increased royalty payments as the base rate increased from August as the gold price exceeded 2,500/oz.

Mako Gold Mine, Senegal

2024 production from Mako was 123,935 oz at an AISC² of 1,244/oz. Gold production was higher than the prior year but was impacted by lower-than-expected grades and disruption to mining operations during the rainy season. Tonnes processed steadily increased over the year with mill availability increasing from 93% in H1 to 97% in H2. The AISC² decreased by 9% due to lower mining and processing costs.

1. Net cash represents cash and bullion of 100.5 million less drawn overdraft balances of 34.2 million. 1

2. This is a non-GAAP measure with no standard meaning under IFRS.
