Notes to Editors:

Predator is an oil & gas company with a diversified portfolio of scaled assets including unique and highly prospective onshore Moroccan gas exposure, with multiple fully financed upcoming catalysts.

Predator has an interesting gas project in Morocco with fast pace of commercialisation and significant upside. The Guercif

project is a shallow CNG biogenic gas development with different traps and separate identified reservoirs. The Jurassic Titanosaurus is a shallow thermogenic gas prospect evaluating 249m of potential gross reservoir thickness in a trap of maximum closure of 187 km² for pipeline gas to power, with pipeline 2.5km from wellhead. Moroccan gas prices are high, and the fiscal terms are some of the best in the world. Predator also has a diversified portfolio of assets across Ireland and Trinidad, which is a near-term revenue-generating project.

Predator has an experienced management team with particular knowledge in Moroccan sub surface and operations. The team specialises in incorporating modern, proven technologies and processes from Canada and the US to provinces where the conventional technologies did not allow their hydrocarbon potential to be revealed.

Predator Oil & Gas Holdings plc is listed on London Stock Exchange's Main Market with a Standard Listing (symbol: PRD). For further information, visit www.predatoroilandgas.com
