

19th March 2025

Gulf Marine Services PLC
('Gulf Marine Services', 'GMS', 'the Company' or 'the Group')

New Contract Award

Gulf Marine Services (GMS), a leading provider of self-propelled, self-elevating support vessels to the offshore energy industry, is pleased to announce that it has secured a new contract for an additional vessel in the Middle East. The contract, awarded by a major regional client, spans an initial term including extensions of seven months.

This additional vessel, sourced to meet the demands of this project, will support a range of offshore operations, leveraging its advanced capabilities to deliver tailored solutions for various projects in the region.

Mansour Al Alami, GMS Executive Chairman, commented:

"This award underscores GMS's ability to source and provide customised solutions to our clients and demonstrates our flexibility in meeting current as well as future demand."

Notes to Editors:

Gulf Marine Services PLC, a company listed on the London Stock Exchange, was founded in Abu Dhabi in 1977 and has become a world-leading provider of advanced self-propelled self-elevating support vessels (SESVs). The fleet serves the offshore energy industries from its offices in the United Arab Emirates, Saudi Arabia, Qatar and the United Kingdom. The Group's assets are capable of serving clients' requirements across the globe, including those in the Middle East, Europe, South East Asia, West Africa, North and South America, and the Gulf of Mexico.

The GMS fleet of 14 SESVs is amongst the youngest in the industry. The vessels support GMS's clients in a broad range of offshore platform refurbishment and maintenance activities, well intervention work, and offshore wind turbine maintenance work (which are opex-led activities), as well as offshore platform installation and decommissioning and offshore wind turbine installation (which are capex-led activities).

The SESVs are categorised by size - K-Class (Small), S-Class (Mid), and E-Class (Large) - with these capable of operating in water depths of 45m to 80m depending on leg length. The vessels are four-legged and are self-propelled, which means they do not require tugs or similar support vessels for moves between locations in the field; this makes them significantly more cost-effective and time-efficient than conventional offshore support vessels without self-propulsion. They have a large deck space, crane capacity, and accommodation facilities (for up to 300 people) that can be adapted to the requirements of the Group's clients.
